ÉNOSTÉAL (Fr.), n. A-nos-ta-a^{3}l. Of G. St.-Hilaire, the tympanic bone of the crocodile. [L, 14.]

ENOSTOSIS (Lat.), n. f. E^{2}n-o^{2}s-tos'i^{2}s. Gen., *enostos'eos* (*-is*). From ἐν, in, and ὀστέον, a bone. Fr., *énostose*. Ger., *Enostose, Knochenwucherung nach innen*. An osseous tumor developed in the medullary canal, or projecting from the interior of the skull. [E; L, 50 (α, 14).]

ENRAGÉ (Fr.). A^{3}n^2-ra^3-zha. Affected with rabies.

ENREGISTREUR (Fr.), n. A^{3}n^2-re^2-zhi^{2}s-tru^{5}r. That which registers a movement; as an adj., registering. [A, 385 (α, 21).]

ENRHUMIRT (Ger.), adj. E^{2}n-ru-mert'. Affected with a cold. [A, 521.]

ENRHYTHMUS (Lat.), adj. E^{2}n-ri^{2}th(ru^{6}th)'mu^{3}s(mu^{4}s). Gr., ἔνρυθμος (from ῥυθμός, rhythm). Fr., *enrhythmique*. Ger., *rhythmisch, regelmässig*. Of the pulse, rhythmical. [A, 325 (α, 21); L, 50 (α, 14).]

ENROBAGE (Fr.), n. A^{3}n^2-ro-ba^{3}zh. The process of imbedding and impregnating tissues with fluid substances which, upon hardening, allow the tissues to be cut into thin sections without destroying the relation of the various parts. [G. C. Freeborn (α, 27).]

ENROBER (Fr.), v. tr. A^{3}n^2-ro-ba. To coat (pills, etc.). [B.]

ENROUÉ (Fr.), adj. A^{3}n^2-ru-a. Hoarse. [α, 29.]

ENROUEMENT (Fr.), n. A^{3}n^2-ru-ma^{3}n^2. Hoarseness.

ENROULÉ (Fr.), adj. A^{3}n^2-ru-la. See CONVOLUTE.

ENROULEMENT (Fr.), n. A^{3}n^2-rul-ma^{3}n^2. 1. A winding or twining (see *E. du cordon*). [A, 385 (α, 21).] 2. See VOLVULUS.—**E. du cordon.** The looping or coiling of the umbilical cord around any part of the fœtus. [A, 385 (α, 21).]

ENS (participle of *esse*, to be), n. n. E^{2}nz(ans). Gen., *ent'is*. Fr., *e*. Ger., *Wesen*. It., *e*. Sp., *ser, esencia*. A thing, an entity, being, existence in the abstract; inherent quality or power. [B.]—**E. astrale, E. astrorum.** Of Paracelsus, the power of the stars to cause disease. [H.]—**E. deale, E. Dei.** Of Paracelsus, a disease sent from God as a punishment. [H.]—**E. Martis.** Syn.: *flores martiales*. Flowers of iron; ammonio-ferric chloride obtained by sublimation. [B.]—**E. naturale.** Of Paracelsus, an inherent bodily defect or tendency to originate disease (as by self-infection). [H.]—**E. parvum sapientium.** A soap made by mixing a fixed alkaline salt with a distilled vegetable oil. [L, 84.]—**E. primum.** A tincture to which the alchemists attributed the power to change a base metal into a precious one. [L, 44, 94 (α, 14).]—**E. primum salium.** See CIRCULATUM *minus*.—**E. primum solare.** Antimony. [L, 84.]—**E. spirituale.** 1. Of Paracelsus, the morbific power of the mind. 2. Obsession of the mind by witchcraft. [H; L, 49 (α, 14).]—**E. venenale, E. veneni.** Of Paracelsus, a poisonous property. [H.]—**E. Veneris.** An old name for a preparation of copper, either copper chloride or reduced copper. [A, 518; L, 107.]

ENSADE (Fr.), n. A^{3}n^2-sa^{3}d. See FICUS *indicus*.

ENSAL, adj. E^{2}n'sa^{2}l. From *ensis*, a sword. Fr., *e*. Sword-shaped; as a n., a sword-shaped cautery-iron used in ancient surgery; in Ceylon, the cardamom. [L, 41, 44 (α, 14).]

ENSALADA [Mex. Ph.] (Sp.), n. E^{2}n-sa^3-la^3'da^3. The *Plumiera tricolor*. [A, 447 (α, 21).]

ENSATÆ (Lat.), n. f. pl. E^{2}n-sa(sa^3)'te(ta^3-e^2). Ger., *Schwertlilien*. 1. Of Linnæus, an order of plants (of Batsch, a family of the *Gladiales*) comprising genera now distributed among the *Iridaceæ, Xyrideæ, Aphyllantheæ*, etc. 2. Of Eichler, an order (cohort) of the *Liliforæ*, comprising the *Irideæ, Bromeliaceæ, Agaveæ*, and *Amaryllideæ*. [B, 19, 121, 170 (α, 24).]

ENSATE, adj. E^{2}n'sat. Lat., *ensatus* (from *ensis*, a sword). Fr., *ensal*. Ensiform (said of leaves when quite straight, with the point acute). [B, 1, 19, 121 (α, 24).]

ENSELLÉ (Fr.), adj. A^{3}n^2-se^{2}l-la. Saddle-backed, affected with lordosis. [A, 301 (α, 21).]

ENSELLURE (Fr.), n. A^{3}n^2-se^{2}l-y'u^{6}r. From *sella*, a saddle. See LORDOSIS.

ENSEMENCEMENT (Fr.), n. A^{3}n^2-se^2-ma^{3}n^{2}s-ma^{3}n^2. See INSEMINATION.

ENSEVELISSEMENT (Fr.), n. A^{3}n^2-se^2-ve^2-les-ma^{3}n^2. Preparation for, or the act of, burial. [A, 385 (α, 21); L, 88 (α, 14).]

ENSETE, n. In Abyssinia, the *Musa e*. [B, 121, 185 (α, 24).]

ENSICAUDATUS (Lat.), adj. E^{2}n-si^2-ka^{4}d(ka^3-u^{4}d)-at(a^{3}t)'u^{3}s-(u^{4}s). From *ensis*, a sword, and *cauda*, a tail. Fr., *ensicaudé*. Ger., *schwertschwanzig*. Having a sword-like tail. [L, 41.]

ENSIFORM, adj. E^{2}n'si^2-fo^{2}rm. Lat., *ensiformis* (from *ensis*, a sword, and *forma*, form). Fr., *ensiforme*. Ger., *schwertförmig*. It., Sp., *ensal, ensiforme*. Sword-shaped.

ENSISTERNAL, adj. E^{2}n-si^2-stu^{5}rn'a^{2}l. Lat., *ensisternalis* (from *ensis*, a sword, and *sternum* [*q. v.*]). Fr., *e*. Ensate and belonging to the sternum. [L, 41.]

ENSOMATOSIS (Lat.), n. f. E^{2}n-som-a^{2}t(a^{3}t)-os'i^{2}s. Gen., *ensomatos'eos* (*-is*). Gr., ἐνσωμάτωσις (from ἐνσωματοῦν, to incorporate). See INCORPORATION.

ENSTACTON (Lat.), **ENSTACTUM** (Lat.), n's n. E^{2}n-sta^{2}k-(sta^{3}k)'to^{2}n, -tu^{3}m(tu^{4}m). Gr., ἔνστακτον. Of Galen, a collyrium. [A, 325 (α, 21).]

ENSTALAXIS (Lat.), n. f. E^{2}n-sta^{2}l(sta^{3}l)-a^{2}x(a^{3}x)'i^{2}s. Gen., *enstalax'eos* (*-is*). Gr., ἐνστάλαξις. Instillation. [A, 325 (α, 21).]

ENSTASIS (Lat.), n. f. E^{2}n'sta^{2}s-i^{2}s. Gen., *enstas'eos* (*en'stasis*). Gr., ἔνστασις (from ἐνιστάναι, to oppose). Obstruction (as of the pores). [L, 119 (α, 14).]

ENSTROPHE (Lat.), n. f. E^{2}n'stro(stro^2)-fe(fa). Gen., *en'strophes*. Gr., ἐνστροφή (from ἐνστρέφειν, to turn in). Ger., *Einwärtsdrehen*. A turning inward, especially of the eyelids. [A, 322 (α, 21).]

ENTAD, adv. E^{2}n'ta^{2}d. From ἐντός, within. Toward the interior; toward a real or assumed centre. [J, 55, 100.]

ENTADA (Lat.), n. f. E^{2}n-ta^3'da^3. Fr., *e., entade*. Ger., *Riesenhülse*. The sword-bean; of Adanson, a genus of the *Adenanthereæ*, found chiefly in Africa and tropical America. [B, 42, 180, 275 (α, 24).]—**E. gingalobium.** Fr., *liane à bœufs*. The sea-side chestnut-plant; a species found in the West Indies. The legumes yield a gummy, transparent juice which is used for sores and wounds. The seeds are emetic and are employed as an antidote to poisons, and also in syphilis. [B, 180, 275 (α, 24).]—**E. monostachya, E. pusætha, E. scandens.** The match-box bean of Queensland, the cacoon or cocoon of the West Indies, the scimitar-pod-plant or West Indian filbert-tree; a tropical species used like *Acacia scandens* (*q. v.*). The raw fruit is poisonous, but in India is eaten roasted, after repeated and prolonged soaking. The seeds also are eaten roasted. [B, 19, 121, 172, 180, 275 (α, 24); "Proc. of the Am. Pharm. Assoc.," xxxvii (α, 14).]

ENTAILLE (Fr.), n. A^{3}n^2-ta^3-el-y'. A deep incision. [L, 41.]

ENTAL, adj. E^{2}nt'a^{2}l. Lat., *entalis* (from ἐντός, within). Fr., Ger., *e*. Internal; situated at or directed toward a real or assumed centre. [J, 55, 100; B. G. Wilder, "N. Y. Med. Jour.," July 31, 1886, p. 134.]

ENTALE, n. 1. A vessel. 2. In pharmacy, the *Dentalium entalis*. [B, 88 (α, 14); L, 84.] 3. See ENTALI.

ENTALI, n. Of Paracelsus, a salt formed by the transformation of *sal gemmæ*; fossil alum. [H; L, 119.] See ALUMEN *scissum*.

ENTALIA [Würt. Ph., 1798] (Lat.), n. n. pl. E^{2}n-tal(ta^{3}l)'i^2-a^3. Fr., *entales*. Ger., *Zahnschnecken*. Certain shells (especially those of the *Dentalium entalis*) used in the preparation of calcium carbonate. [B, 97, 119; B, 180 (α, 24).]

ENTALIUM (Lat.), n. n. E^{2}n-tal(ta^{3}l)'i^2-u^{3}m(u^{4}m). 1. See ENTALIA. 2. See ENTALI.

ENTALKOHOLISIRUNG (Ger.), n. E^{2}nt-a^{3}l-ko-hol-ez-er'un^2. The process of depriving a mixture of the whole or a part of the alcohol contained in it. [A, 521.]

ENTALLANTOIC, adj. E^{2}nt-a^{2}l-a^{2}n-to'i^{2}k. From ἐντός, within, and ἀλλαντοειδής (see ALLANTOID). Situated within the sac of the allantois. [L, 14.]

ENTAMNIOTIC, adj. E^{2}nt-a^{2}m-ni^2-o^{2}t'i^{2}k. From ἐντός, within, and ἀμνίον (see AMNION). Situated within the cavity formed by the folds of the amnion. [L, 14.]

ENTAMURE (Fr.), n. A^{3}n^2-ta^3-mu^{6}r. 1. A lesion of a bone involving the loss of a superficial portion. 2. An abrasion of the pastern. [A, 385 (a, 21); L, 41 (a, 14).]

ENTANGLED, adj. E^{2}n-ta^{2}n^2'g'ld. Fr., *embrouillé*. Ger., *verwickelt*. It., *intralciato*. Sp., *enredado*. Densely intertwined (said of the roots, hairs, and branches of plants). [E.]

ENTANKYLOBLEPHARITIS (Lat.), n. f. E^{2}nt-a^{3}n^2(a^{3}n^2)-ki^{2}l(ku^{6}l)-o(o^3)-ble^{2}f'a^{2}r(a^{3}r)-i(e)'ti^{2}s. Gen., *entankyloblepharit'idos (-is)*. From ἐντός, within, ἀγκύλη, a loop, and βλέφαρον, an eyelid (see also *-itis**). Fr., *entancyloblépharite*. Ger., *Entzündung einwärts gewandter Augenlider*. Entankyloblepharon with blepharitis. [L, 50.]

ENTANKYLOBLEPHARON (Lat.), n. n. E^{2}nt-a^{2}n^2(a^{3}n^2)-ki^{2}l(ku^{6}l)-o(o^3)-ble^{2}f'a^{3}r-o^{2}n. Fr., *entancyloblépharon*. Adhesion of the eyelids to the surface of the eyeball. [L, 50.]

ENTANTHEMA (Lat.), n. n. E^{2}nt-a^{2}n(a^{3}n)-the(tha)'ma^3. Gen., *entanthem'atos (-is)*. See ENANTHEMA.

ENTARTHROCHONDRUS (Lat.), n. m. E^{2}nt-a^{3}rth-ro(ro^3)-ko^{2}n(ch^{2}o^{2}n)'dru^{3}s(dru^{4}s). From ἐντός, within, ἄρθρον, a joint, and χόνδρος, cartilage. Fr., *entarthrochondre*. Ger., *Zwischengelenkknorpel, Gelenkmaus*. An interarticular cartilage. [L, 50.]

ENTARTHROTICUS (Lat.), adj. E^{2}nt-a^{3}rth-rot(ro^{2}t)'i^{2}k-u^{3}s-(u^{4}s). From ἐντός, within, and ἄρθρον, a joint. Ger., *zwischengelenkig*. Interarticular. [L, 50.]

ENTARTUNG (Ger.), n. E^{2}nt-a^{3}rt'un^2. See DEGENERATION.—**E'sreaction.** See REACTION *of degeneration*.—**Fette'.** See *Fatty* DEGENERATION.—**Hydropische E.** Dropsical degeneration; cellular degeneration caused by the absorption of dropsical fluid. [D, 4.]—**Kohlenhydrat-E.** See *Hydrocarbonaceous* DEGENERATION.—**Specke'.** See *Amyloid* DEGENERATION.—**Wachse'.** See *Waxy* DEGENERATION.

ENTASIA (Lat.), **ENTASIS** (Lat.), n's f. E^{2}n-ta(ta^3)'zi^2(si^2)-a^3, e^{2}nt'a^3-si^{2}s. Gen., *entas'iæ, entas'eos (en'tasis)*. Gr., ἔντασις (from ἐντείνειν, to stretch tight). Ger., *Spannung, Anstrengung*. 1. Contracture. 2. Tension, exertion. [L, 50.]—**E. articularis.** See *E.* (1st def.).—**E. acrotismus.** Failure or cessation of the pulse, often accompanied with pain in the epigastrium, the consciousness and the voluntary muscles remaining undisturbed. [L, 29 (a, 29).]—**E. articulorum.** See ARTHRENTASIS.—**E. loxia.** See TORTICOLLIS.—**E. lyssa.** See RABIES.—**E. orcheos.** Epididymitis. [L, 57.]—**E. priapismus.** See PRIAPISM.—**E. rhachybia.** Lateral curvature of the spine without paralysis of the lower limbs. [L, 29 (a, 29).]—**E. systremma.** See CRAMP.—**E. tetanus.** See TETANUS.—**E. tetanus anticus.** See EMPROSTHOTONUS.—**E. trismus.** See TRISMUS.

ENTASSÉ (Fr.), adj. A^{3}n^2-ta^{3}s-sa. See CONGESTED (2d def.).

ENTATIC, adj. E^{2}n-ta^{2}t'i^{2}k. Gr., ἐντατικός (from ἐντείνειν, to stretch tight). Lat., *entaticus*. 1. Bracing, invigorating. 2. Aphrodisiac. [A, 387; L, 119 (a, 14).]

ENTBINDEN (Ger.), v. tr. E^{2}nt-bi^{2}nd'e^{2}n. To deliver (in the obstetrical sense).

ENTBINDER (Ger.), n. E^{2}nt-bi^{2}nd'e^{2}r. An obstetrician. [L, 80.]

ENTBINDUNG (Ger.), n. E^{2}nt-bi^{2}nd'un^2. 1. Childbirth; labor; parturition, especially when artificial assistance is rendered. See GEBURT and ACCOUCHEMENT *forcé*. 2. In chemistry, liberation.—**E. des Magens.** See PYLORUS.—**E'sakt.** The act of delivery. [A, 521.]—**E'sanstalt.** A lying-in hospital. [L, 135.]—**E'sarzt.** An obstetrician. [L, 80.]—**E'sflasche.** In chemistry, a flask for containing the substances from which gas is evolved. [B, 270 (a, 27).]—**E'shaus.** See *E'sanstalt*.—**E'sinstrument.** An obstetrical instrument. [A, 521.]—**E'sklinik.** An obstetrical clinic.—**E'skunst.** Obstetrics. [L, 135.]—**E'slähmung.** Paralysis in a new-born child due to injury during parturition. [Seeligmüller (A, 319).]—**E'slehranstalt.** An institution for teaching obstetrics. [L, 135.]—**E'stuhl.** See *Obstetrical* CHAIR.—**E'sverfahren.** An obstetrical procedure. [A, 521.]—**E'swerkzeug.** An obstetrical instrument. [L, 43.]—**E'szange.** An obstetrical forceps. [A, 521.]—**Gewaltsame E.** See ACCOUCHEMENT *forcé*.—**Künstliche E.** Artificial delivery. [L, 135.]

ENTBLÄTTERN (Ger.), n. E^{2}nt-ble^{2}t-te^{2}rn. See DEFOLIATION.

ENTBLÄTTERT (Ger.), adj. E^{2}nt-ble^{2}t'te^{2}rt. See DEFOLIATE.

ENTBLÄTTERUNG (Ger.), n. E^{2}nt-ble^{2}t'te^{2}r-un^2. See DEFOLIATION.

ENTBLEIEN (Ger.), v. tr. E^{2}nt-bli'e^{2}n. To deprive of lead. [B.]

ENTBLINDEN (Ger.), v. intr. E^{2}nt-bli^{2}nd'e^{2}n. To regain the power of sight. [A, 521.]

ENTBLÖSSEN (Ger.), n. E^{2}nt-blu^{6}s'se^{2}n. See ENTBLÖSSUNG.

ENTBLÖSST (Ger.), adj. E^{2}nt-blu^{6}st'. Denuded. [L, 43.]

ENTBLÖSSUNG (Ger.), n. E^{2}nt-blu^{6}s'sun^2. Denudation. [L, 43.]

ENTBUNDEN (Ger.), adj. E^{2}nt-bund'e^{2}n. Delivered; as a n., in the f., *e'e*, see PUERPERA. [L, 80.]

ENTE (Fr.), n. A^{3}nt. 1. A graft. 2. Grafting. [A, 385.]

ENTE (Ger.), n. E^{2}nt'e^2. See ANAS.—**E'nfett.** See AXUNGIA *anatis*.—**E'nflott.** See LEMNA.—**E'nfuss.** The *Podophyllum peltatum*. [B, 180 (a, 24).]—**E'nfüssig.** See ANATIPES.—**E'ngang.** A waddling gait. [L, 80.]—**E'ngras.** The *Glyceria fluitans*. [B, 180 (a, 24).]—**E'ngrün, E'ngrütze.** See LEMNA.—**E'nschnabel.** A duck-bill (speculum, forceps, or the like); of J. Rueff, a certain instrument for extracting the fœtus by the breech. [A, 20, 521.]—**Gemeine E.** See ANAS *boschas*.

ENTELECHIA (Lat.), n. f. E^{2}nt-e^{2}l-e^{2}k(e^{2}ch^2)-i(e)'a^3. Gr., ἐντελέχεια. Activity, action. [L, 50 (a, 14).]

ENTELODON (Lat.), n. n. E^{2}n-te^{2}l'o^2-do^{2}n. From ἐντελής, complete, and ὀδούς, a tooth. A mammal having a complete set of teeth. [L, 87.]

ENTELTEL, n. In Abyssinia, the *Gomphocarpus pedunculatus*. [B, 121 (a, 24).]

ENTENDEMENT (Fr.), n. A^{3}n^2-ta^{3}nd'ma^{3}n^2. The intellect; intelligence. [A, 385 (a, 21).]

ENTEPICONDYLAR, adj. E^{2}nt-e^{2}p-i^2-ko^{2}n'di^{2}l-a^{3}r. From ἐντός, within, ἐπί, upon, and κόνδυλος (see CONDYLE). Situated at the inner side of the epicondyle. ["Proc. of the Zool. Soc.," 1886, p. 497 (L).]

ENTEPICONDYLE, n. E^{2}nt-e^{2}p-i^2-ko^{2}n'dil. Of Owen, the internal condyle of the humerus. [L, 153.]

ENTERA (Lat.), n. n., pl. of *enteron* (*q. v.*).

ENTERADEN (Lat.), n. m. and f. E^{2}nt-e^{2}r-a(a^3)'de^{2}n(dan). Gen., *enterad'enos (-is)*. From ἔντερον, an intestine, and ἀδήν, a gland. Fr., *enteradène*. Ger., *Darmdrüse*. It., *e*. An intestinal gland. [L, 41, 50, 119 (a, 14).]

ENTERADENOGRAPHY, ENTERADENOLOGY, n's. E^{2}nt-e^{2}r-a^{2}d-e^{2}n-o^{2}g'ra^{2}f-i^2, -o^{2}l'o-ji^2. Lat., *enteradenographia, enteradenologia* (from ἔντερον, an intestine, ἀδήν, a gland, and γράφειν, to write, or λόγος, understanding). Fr., *entéradénographie, entéradénologie*. Ger., *Darmdrüsenlehre*. The anatomy, etc., of the intestinal glands. [L, 41, 50, 56.]

ENTERÆMIA (Lat.), n. f. E^{2}n-te^{2}r-em'(a^3-am')-i^2-a^3. From ἔντερον, an intestine, and αἷμα, blood. Fr., *enterémie*. Ger., *Blutandrang zu den Gedärmen*. Intestinal congestion. [L, 50, 116.]

ENTERÆMOTYPHUS (Lat.), n. m. E^{2}n-te^{2}r-e^{2}m(a^3-e^{2}m)-o-(o^3)-tif(tu^{6}f)'u^{3}s(u^{4}s). From ἔντερον, an intestine, αἷμα, blood, and τῦφος, stupor. Fr., *enterémotyphus*. Ger., *Bluttyphus mit Darmentzündung*. See HÆMOTYPHENTERITIS.

ENTERÆRECTASIA (Lat.), **ENTERÆRECTASIS** (Lat.), n's f. E^{2}n-te^{2}r-er(a^3-e^{2}r)-e^{2}k-taz(ta^{3}s)'i^2-a^3, -re^{2}k'ta^2(ta^3)-si^{2}s. From ἔντερον, the intestine, ἀήρ, air, and ἔκτασις, extension. Fr., *enteraërectasie*. Ger., *Luft in den Darmen*. Intestinal flatulence. [L, 50 (a, 21).]

ENTERAGRA (Lat.), n. f. E^{2}n-te^{2}r'a^{2}g(a^{3}g)-ra^3. From ἔντερον, the intestine, and ἄγρα, a seizure. Fr., *entéragre*. Ger., *Darmgicht*. Intestinal gout. [L, 50 (a, 21).]

ENTERALGIA (Lat.), n. f. E^{2}n-te^{2}r-a^{2}l(a^{3}l)'ji^2(gi^2)-a^3. From ἔντερον, the intestine, and ἄλγος, pain. Fr., *entéralgie*. Ger., *Enteralgie, Darmschmerz*. Intestinal pain. [A. Jacobi, "N. Y. Med. Jour.," Nov. 9, 1889, p. 521.]

ENTERANGEIEMPHRAXIS (Lat.), n. f. E^{2}n-te^{2}r-a^{2}n-(a^{3}n^2)-ji(ge^2-e)-e^{2}n-fra^{2}x(fra^{3}x)'i^{2}s. Gen., *enterangeiemphrax'eos (-is)*. From ἔντερον, the intestine, ἀγγεῖον, a vessel, and ἔμφραξις, obstruction. Fr., *entérangiemphraxie*. Ger., *E. Verstopfung der Darmgefässe*. Obstruction of the intestinal blood-vessels. [L, 50 (a, 14).]

ENTÉRARCTIE (Fr.), n. A^{3}n^2-ta-ra^{3}rk-te. From ἔντερον, the intestine, and *arctare* (= *artare*), to constrict. Intestinal stricture. [L, 41, 44 (a, 14).]

ENTERATA (Lat.), n. n. pl. E^{2}n-te^{2}r-a(a^3)'ta^3. Animals in which the digestive tract is separated from the body cavity. [a, 27.]

ENTÈRE (Fr.), n. A^{3}n^2-te^{2}r. Mucous membrane. [L, 41.]

ENTERECHEMA (Lat.), n. n. E^{2}n-te^{2}r-e(a)-kem(ch^{2}am)'a^3. Gen., *enterechem'atos (-is)*. From ἔντερον, the intestine, and ἤχημα, a sounding. Fr., *entérechème*. Ger., *Darmlaut*. Intestinal rumbling. [L, 41, 50, 95 (a, 14).]

ENTERECTASIS (Lat.), n. f. E^{2}nt-e^{2}r-e^{2}k'ta^{2}s(ta^{3}s)-i^{2}s. Gen., *enterectas'eos (-ec'tasis)*. From ἔντερον, the intestine, and ἔκτασις, dilatation. Fr., *entérectasie*. Ger., *Darmausdehnung*. Dilatation of the intestines. [L, 41, 44, 50 (a. 14).]

ENTERECTOMY, n. E^{2}n-te^{2}r-e^{2}k'to-mi^2. Lat., *enterectome* (from ἔντερον, the intestine, and ἐκτέμνειν, to cut out). Fr., *entérectomie*. Ger., *Darmausschneidung*. It., *enterectomia*. Sp., *enterectomía*. The resection of a portion of intestine. [L, 50, 87.]

ENTERELCOSIS (Lat.), n. f. E^{2}n-te^{2}r-e^{2}l-kos'i^{2}s. Gen., *enterelcos'eos (-is)*. From ἔντερον, an intestine, and ἕλκωσις, ulceration. Fr., *entérelcosie, entérelcie*. Ger., *Darmverschwärung*. Intestinal ulceration. [L, 135.]

ENTERELCUS (Lat.), n. n. E^{2}n-te^{2}r-e^{2}lk'u^{3}s(u^{4}s). From ἔντερον, an intestine, and ἕλκος, an ulcer. Fr., *entérelcus*. Ger., *Darmgeschwür*. An intestinal ulcer. [A, 322 (a, 21).]

ENTERELESIA (Lat.), n. f. E^{2}n-te^{2}r-e^2-le(la)'zi^2(si^2)-a^3. From ἔντερον, an intestine, and εἴλησις, a whirling. Fr., *entérélésie* [Alibert]. See VOLVULUS.

ENTEREMBOLE (Lat.), n. f. E^{2}n-te^{2}r-e^{2}m'bo(bo^2)-le(la). Gen., *enterem'boles*. From ἔντερον, an intestine, and ἐμβολή, insertion. Fr., *entérembole*. Ger., *Darmeinschiebung*. Intestinal intussusception. [L, 50.]

ENTEREMPHRAXIS (Lat.), n. f. E^{2}n-te^{2}r-e^{2}m-fra^{2}x(fra^{3}x)'i^{2}s. Gen., *enteremphrax'eos (-is)*. From ἔντερον, an intestine, and ἔμφραξις, obstruction. Fr., *entéremphraxie*. Ger., *Darmverstopfung*. Intestinal obstruction. [L, 50.]

ENTERENCHYTA (Lat.), n. f. E^{2}n-te^{2}r-e^{2}n^2(e^{2}n^2)'ki^2(ch^{2}u^6)-ta^3. From ἔντερον, an intestine, and ἐγχεῖν, to pour in. Fr., *entérenchyte*. Ger., *Klystirpritze*. Sp., *enterenguita*. An instrument for administering an enema. [L, 50, 119.]

ENTEREPIPLOCELE (Lat.), n. f. E^{2}n-te^{2}r-e^{2}p-i^2-plo(plo^2)-se(ka)'le(la); in Eng., e^{2}n-te^{2}r-e^{2}p-i^{2}p'lo-sel. Gen., *enterepiplocel'es*. From ἔντερον, an intestine, and ἐπιπλοκήλη (see EPIPLOCELE). Fr., *entérépiplocèle*. Ger., *Netzdarmbruch*. A hernia containing both intestine and omentum. [A, 322.]

ENTEREPIPLOMPHALOCELE (Lat.), n. f. E^{2}n-te^{2}r-e^{2}p-i^{2}p-lo^{2}m-fa^{2}l(fa^{3}l)-o(o^3)-se(ka)'le(la); in Eng., -lo^{2}m'fa^{2}l-o-sel. From **ἔντερον**, an intestine, **ἐπίπλοον**, the omentum, **ὀμφαλός**, the navel, and **κήλη**, a tumor. An umbilical enterepiplocele. [α, 29.]

ENTÉRÉTIQUE (Fr.), adj. A^{3}n^2-ta-ra-tek. Pertaining to enteritis. [L, 41.]

ENTEREUPEPTICUM (Lat.), n. n. E^{2}n-te^{2}r-u^2-pe^{2}pt'i^{2}k-u^{3}m(u^{4}m). From **ἔντερον**, an intestine, **εὖ**, well, and **πεπτικός**, assisting digestion. Fr., *entérenpepticum*. A medicine that promotes intestinal digestion. [L, 50.]

ENTERHELCUS (Lat.), n. m. E^{2}nt-e^{2}r-he^{2}lk'u^{3}s(u^{4}s). See ETERELCUS.

ENTERHELCOSIS (Lat.), n. f. E^{2}nt-e^{2}r-he^{2}lk-o'si^{2}s. See ENTERELCOSIS.

ENTERIA (Lat.), n. f. E^{2}n-te(te^2)'ri^2-a^3. See *Catarrhal* DIARRHŒA.

ENTERIC, adj. E^{2}n-te^{2}r'i^{2}k. Gr., **ἐντερικός**. Lat., *entericus*. Fr., *entérique*, *entérien*. Ger., *enterisch*. It., *enterico*. Sp., *entérico*. Intestinal. [L, 50, 343.]

ENTERICA (Lat.), n. n. pl. E^{2}n-te^{2}r'i^{2}k-a^3. An order in Good's nosology, comprising diseases of the alimentary canal. [L, 107.]

ENTÉRIE (Fr.), n. f. A^{3}n^2-ta-re. See ENTERITIS.

ENTÉRIEN (Fr.), adj. A^{3}n^2-ta-re-a^{3}n^2. See ENTERIC.

ENTERISCHIOCELE (Lat.), n. E^{2}n-te^{2}r-i^{2}s-ki^2(ch^{2}i^2)-o(o^2)-se(ka)'le(la); in Eng., e^{2}n-te^{2}r-i^{2}sk'i^2-o-sel. Gen., *enterischiocel'es*. From **ἔντερον**, an intestine, **ἰσχίον**, the hip joint, and **κήλη**, a tumor. Fr., *entérischiocèle*. Ger., *Hüftausschnittbruch*. It., *e.* Sp., *enteroisquiocele*. An intestinal hernia through the greater sciatic notch. [E.]

ENTÉRITE (Fr.), n. A^{3}n^2-ta-ret. See ENTERITIS.—**E. aiguë de la volaille.** See *Chicken* CHOLERA.—**E. aiguë des porcs.** See *Hog* CHOLERA.—**E. cholériforme.** See CHOLERA *infantum*.—**E. couenneuse.** See *Membranous* ENTERITIS.—**E. dothiénentérie.** See *Typhoid* FEVER.—**E. glaireuse.** A condition which simulates dysentery, and is sometimes an accompaniment of chronic uterine disease. The alvine discharges are transparent, thick, and almost colorless, and the rectum is inflamed. [Jousset (D).]—**E. glaireuse dysentériforme** [Nonat]. A condition in which there are glairy intestinal discharges, with tenesmus ("false dysentery"), that sometimes precedes the rupture of an abscess into the intestine. [A, 62.]—**E. iléodiclydite.** See *Typhoid* FEVER.—**E. muqueuse.** See *Catarrhal* ENTERITIS.—**E. subaiguë.** See *Catarrhal* ENTERITIS.—**E. suraigue.** See CHOLERA *infantum*.—**E. syphilitica.** See *Syphilitic* ENTERITIS.

ENTERITIC, adj. E^{2}n-te^{2}r-i^{2}t'i^{2}k. Lat., *enteriticus*. Fr., *entéritique*. Pertaining to enteritis. [A, 322 (α, 21).]

ENTERITIS (Lat.), n. f. E^{2}n-te^{2}r-i(e)'tis. Gen., *enterit'idos* (-*is*). From **ἔντερον**, the intestine (see also -*itis* *). Fr., *entérite*. Ger., *E.*, *Darmentzündung*, *Darmkatarrh*. It., *enterite*. Sp., *e.* Inflammation of the intestine, especially of its mucous coat. [D, 1.]—**Catarrhal e.** Lat., *e. catarrhalis*. Fr., *entérite muqueuse*. Intestinal catarrh; ordinary e. affecting only the superficial portion of the intestinal mucous membrane, giving rise to mucous diarrhœa.—**Choleriform e.** See CHOLERA *infantum*.—**Croupous e.** See *Membranous e.*—**Diphtheritic e.** Lat., *e. diphtherica*. A form of e. occurring in infectious and chronic diseases, in which the mucous membrane is covered with an adherent, filmy or flaky, whitish-gray deposit. [A, 326 (α, 21); L, 20 (α, 14).]—**Diphtheritic-ulcerative e.** A severe and fatal form of e. generally secondary to scurvy, marked by frequent bloody stools. [L, 20 (α, 14).]—**Dothiene'.** See the major list.—**E. catarrhalis.** See *Catarrhal e.*—**E. colica.** See COLITIS.—**E. cystica polyposa.** E. characterized by papillary swellings and retention of the mucus in Lieberkühn's papillary canals. [A, 326 (α, 21).]—**E. diphtherica.** See *Diphtheritic e.*—**E. enterocelica.** E. associated with an intestinal hernia. [L, 119 (α, 14).]—**E. erythematica** [Cullen], **E. erythematoidea.** See *Catarrhal e.*—**E. follicularis.** See *Follicular e.*—**E. iliaca.** E. limited to the small intestine. [L, 119 (α, 14).]—**E. mesenterica.** Of Pinel, typhoid fever. [α, 29.]—**E. phlegmonoidea** [Cullen], **E. phlegmonosa.** See *Phlegmonous e.*—**E. polyposa.** Chronic intestinal catarrh in which the mucous membrane becomes hypertrophied and polypoid formations are developed from it. [D, 70.]—**E. pustulosa.** See *Pustular e.*—**E. submucosa purulenta.** See *Phlegmonous e.*—**Erythematous e.** [Cullen]. See *Catarrhal e.* [D, 25.]—**Follicular e.** Lat., *e. follicularis*. 1. Typhoid fever. 2. Of Billard, cholera infantum. [D, 1, 40.]—**Membranous e.** Fr., *entérite membraneuse* (ou *couenneuse*). Syn.: *pellicular intestinal inflammation* [Simpson]. A form in which membrane-like deposits or exudates form on the mucous surface.—**Muco-e., Mucous e.** See *Catarrhal e.*—**Partial e.** Inflammation of the glands of the small intestine. [D. 63.]—**Pellicular e.** See *Membranous e.*—**Phlegmonous e.** Lat., *e. phlegmonosa*. Fr., *entérite phlegmoneuse*. A rare form, affecting chiefly the duodenum, characterized by a tendency to suppuration in the submucous, occasionally the subserous, connective tissue; usually of metastatic origin. [H. Eichhorst (A, 319); L, 20, 41 (α, 14).]—**Pseudo-membranous e.** See *Membranous e.*—**Pustular e.** Lat., *e. pustulosa*. Fr., *entérite pustuleuse*. A form described as characterized by the formation of pustules. [D. 44.]—**Syphilitic e.** E. in which there are numerous Peyer's scales or indurations corresponding to individual glands. [L, 57 (α, 21).]

ENTERO-ANASTOMOSIS (Lat.), n. f. E^{2}n-te^{2}r-o(o^3)-a^{2}n(a^{3}n)-a^{2}s(a^{3}s)-to(to^2)-mo'si^{2}s. Gen., *anastomo'seos* (-*is*). From **ἔντερον**, the intestine, and **ἀναστόμωσις** (see ANASTOMOSIS). See ANASTOMOSE *intestinale*.

ENTERO-ARCTIA (Lat.), n. f. E^{2}n-te^{2}r-o(o^3)-a^{3}rk'shi^2(ti^2)-a^3. See ENTÉRARCTIE. [L, 50.]

ENTEROBIUS (Lat.), n. m. E^{2}n-te^{2}r-ob(o^{3}b)'i^2-u^{3}s(u^{4}s). From **ἔντερον**, the intestine, and **βιοῦν**, to live. See OXYURIS *vermicularis*.

ENTEROBRANCHIUS (Lat.), adj. E^{2}n-te^{2}r-o(o^3)-bra^{3}n^{2}k-(bra^{2}nch)'i^2-u^{3}s(u^{4}s). From **ἔντερον**, the intestine, and **βράγχια**, gills. Fr., *entérobranche*. Ger., *darmkiemig*. Having the branchiæ opening into the intestine. [L, 41.]

ENTEROBROSIS (Lat.), n. f. E^{2}n-te^{2}r-o(o^3)-bro'si^{2}s. Gen., *enterobros'eos* (-*is*). From **ἔντερον**, an intestine, and **βιβρώσκειν**, to eat. Perforation of the intestine. [α, 29.]

ENTEROCACE (Lat.), n. E^{2}n-te^{2}r-o^{2}k'a^3-se(ka). Gen., *enteroc'aces*. From **ἔντερον**, the intestine, and **κακός**, evil. Ger., *Darmfäule*. See CACENTERIA.

ENTÉRO-CARCINE (Fr.), n. A^{3}n^2-ta-ro-ka^{3}r-sen. Intestinal cancer. [L, 41.]

ENTEROCATARRHUS (Lat.), n. m. E^{2}n-te^{2}r-o(o^3)-ka^{2}t(ka^{3}t)-a^{3}r'ru^{3}s(ru^{4}s). For deriv., see ENTERON and CATARRH. Fr., *entérocatarrhe*. Ger., *Darmkatarrh*. Intestinal catarrh. [L, 50 (α, 14).]

ENTEROCELE (Lat.), n. f. E^{2}n-te^{2}r-o(o^3)-sel(kal)'e(a); in Eng., e^{2}n'te^{2}r-o-sel. Gen., *enterocel'es*. Gr., **ἐντεροκήλη** (from **ἔντερον**, the intestine, and **κήλη**, a tumor). Fr., *entérocèle*. Ger., *Darmbruch*. A hernia containing intestine. [L, 43, 50, 56.]—**Crural e.** See *Femoral e.*—**E. vaginalis.** See *Vaginal e.*—**Femoral e.** Fr., *entérocèle fémorale* (ou *crurale*). Ger., *Darmschenkelbruch*. A femoral hernia containing intestine. [L, 88 (α, 14).]—**Inguinal e.** Fr., *entérocèle inguinale*. Ger., *Darmweichbruch*. An inguinal hernia containing intestine. [L, 88 (α, 14).]—**Partial e.** Fr., *entérocèle partielle*. Ger., *theilweiser Darmbruch*. A hernia in which a part only of the circumference of the bowel is engaged and strangulated in the hernial orifice. The involved segment may become gangrenous, yet the lumen of the gut remain free. The portion constricted projects from the surface of the intestine as a small rounded bud-like diverticulum. ["Med.-chir. Trans.," lxx, p. 149 (α, 29).]—**Perineal e.** A perineal hernia containing intestine.—**Pudendal e.** A pudendal hernia containing intestine. [T. G. Thomas, "N. Y. Med Jour.," Dec. 26, 1885, p. 705.]—**Rectal e.** See PROCTOCELE.—**Scrotal e.** Fr., *entérocèle scrotale*. Ger., *Darmhodensackbruch*. An inguinal e. that has descended into the scrotum.—**Vaginal e.** Lat., *e. vaginalis* Fr., *entérocèle vaginale*. Ger., *Darmscheidenbruch*. A vaginal hernia containing intestine. [T. G. Thomas, *l. c.*]—**Vulvar e.** Fr., *entérocèle vulvaire*. Ger., *Darmschaamspaltenbruch*. 1. A vaginal e. protruding from the vulva. 2. See *Pudendal e.*

ENTEROCELETES (Lat.), **ENTEROCELICUS** (Lat.), adj's. E^{2}nt-e^{2}r-o(o^3)-sel(kal)-et(at)'ez(as), -sel(kal)'i^{2}k-u^{3}s(u^{4}s). Gr., **ἐντεροκηλήτης**, **ἐντεροκηλικός**. Fr., *entérocélique*. Affected with or pertaining to enterocele. [E.]

ENTEROCENTESIS (Lat.), n. f. E^{2}n-te^{2}r-o(o^3)-se^{2}nt(ke^{2}nt)-es(as)'i^{2}s. Gen., *enterocentes'eos* (-*is*). From **ἔντερον**, the intestine, and **κέντησις**, puncture. Fr., *entérocentèse*. The operation of puncturing the intestine (as in tympanites). [A, 326 (α, 21); L, 88 (α, 14).]

ENTEROCEPHALOPYRA (Lat.), n. f. E^{2}n-te^{2}r-o(o^3)-se^{2}f-(ke^{2}f)-a^{2}l(a^{3}l)-o^{2}p'i^{2}r(u^{6}r)-a^3. From **ἔντερον**, an intestine, **κεφαλή**, the head, and **πῦρ**, a fire. Of Eisenmann, acute internal hydrocephalus. [D, 29.]

ENTEROCESTRION (Lat.), **ENTEROCESTRIS** (Lat.), n's n. and f. E^{2}n-te^{2}r-o(o^3)-ce^{2}st(ke^{2}st)'ri^2-o^{2}n, -ri^{2}s. From **ἔντερον**, the intestine, and **κέστρα**, an awl. Fr., *entérocestrion*. Ger., *Darmbohrer*. An instrument for performing enterocentesis. [L, 50.]

ENTERO-CHLOROPHYLL, n. E^{2}n"te^{2}r-o-klo'ro-fi^{2}l. From **ἔντερον**, the intestine, **χλωρός**, green, and **φύλλον**, a leaf. Of MacMunn, the green coloring matter, with a spectrum like that of plant-chlorophyll, which is found in many animals, more especially in the liver and other intestinal appendages. ["Phil. Trans.," 1886, p. 235 (J).]

ENTERO-CHOLECYSTOSTOMY, n. E^{2}nt"e^{2}r-o-kol-e^2-si^{2}st-o^{2}st'o-mi^2. See CHOLECYSTENTEROSTOMY.

ENTEROCLEISIS (Lat.), n. f. E^{2}n-te^{2}r-o(o^3)-klis'(kle^2-es')-i^{2}s. Gen., *enterocleis'eos* (-*is*). From **ἔντερον**, the intestine, and **κλεῖσις**, a closing. Fr., *entérocleisie*. Ger., *Darmverschliessung*. Occlusion of the intestine. [L, 50.]

ENTEROCLYSIS (Lat.), n. f. E^{2}n-te^{2}r-o^{2}k'li^{2}s(lu^{6}s)-i^{2}s. Gen., *enteroclys'eos* (-*oc'lysis*). For deriv., see ENTERON and CLYSIS. Ger., *Enteroklysie*, *Darmwaschung*. The administration of an enema. [B.]

ENTEROCLYSM, n. E^{2}n-te^{2}r-o^{2}k'li^{2}z'm. Lat., *enteroclysma* (from **ἔντερον**, the intestine, and **κλύσμα**, a clyster). Fr., *entéroclysme*. Ger., *Enteroklysma*, *Darminfusion* (1st def.). It., *enteroclisma* (1st def.), *enteroclismo* (2d def.). An enema, especially one thrown up past the ileo-cæcal valve. 2. An apparatus for administering such an enema. [A. Cantani, "Ctrlbl. f. d. med. Wssnsch.," Nov. 1, 1884, p. 769 (B); "Union méd.," Jan. 5, 1882.]

ENTEROCŒLE (Lat.), n. f. E^{2}n-te^{2}r-o(o^3)-sel'(ko^2-al')-e(a); in Eng., e^{2}nt'e^{2}r-o-sel. Gen., *enterocœl'es*. From **ἔντερον**, an intestine, and **κοιλία**, a cavity. Fr., *entérocœle*. Ger., *Bauchhöhle*, *Leibeshöhle*. 1. The abdominal cavity. 2. See *Pleuro-peritoneal* SPACE. 3. A body cavity formed by a diverticulum of the archenteron in the embryo. [J, 1, 69, 89.] Cf. *Pleuroperitoneal* SPACE.

ENTEROCŒLIAC, adj. E^{2}nt"e^{2}r-o-sel'i^2-a^{2}k. Lat., *enterocœlicus*. Pertaining to the abdominal cavity. [A, 322 (α, 21).]

ENTÉROCŒLOME (Fr.), n. A^{3}n^2-ta-ro-sa-lom. The cavity which contains the intestine. [A, 385 (α, 21).]

ENTERO-COLITIS (Lat.), n. f. E^{2}n-te^{2}r-o(o^3)-kol-i(e)'ti^{3}s. Gen., *entero-colit'idos* (-*is*). For deriv., see ENTERON and COLITIS.

Fr., *entéro-colite.* It., *entero-colite.* Sp., *e.-c.* See *Inflammatory* DIARRHŒA.

ENTEROCYSTOCELE (Lat.), n. f. E²n-te²r-o(o³)-si²st(ku⁶st)-o(o³)-sel(kal)'e(a); in Eng., e²n-te²r-o-si²st'o-sel. For deriv., see ENTERON and CYSTOCELE. Fr., *entéro-cystocèle.* Ger., *Darmblasenbruch.* A hernia of the urinary bladder and intestine. [E.]

ENTEROCYSTOMA (Lat.), n. n. E²n-te²r-o(o³)-si²st(ku⁶st)-o'-ma³. Gen., *enterocystom'atos (-is).* For deriv., see ENTERON and CYSTOMA. A cystic tumor formed by the persistence of a portion of the omphalo-mesenteric duct, having no opening either externally or into the intestinal canal. ["Prag. med. Woch.," June 26, 1889, p. 307 (*a*, 29).]

ENTEROCYSTOSCHEOCELE (Lat.), n. f. E²n-te²r-o(o³)-si²st(ku⁶st)-o²s-ke²(ch²e²)-o(o³)-sel(kal)'e(a); in Eng., e²n-te²r-o-si²st-o²s'ke-o-sel. From ἔντερον, an intestine, κύστις, a bladder, ὄσχεον, the scrotum, and κήλη, a swelling. Fr., *enterocystoschéocèle.* Ger., *Darmblasenhodensackbruch.* A scrotal hernia containing both intestine and bladder. [L, 41.]

ENTERODARSIS (Lat.), n. f. E²n-te²r-o(o³)-da³r'si²s. Gen., *enterodar'seos (-is).* For deriv., see ENTERON and DARSIS. Fr., *entérodarsis.* Ger., *Excoriation in den Därmen.* Excoriation of the intestines. [L, 50, 135.]

ENTERODELUS (Lat.), adj. E²n-te²r-o(o³)-del(dal)'u³s(u⁴s). From ἔντερον, an intestine, and δῆλος, evident. Fr., *entérodèle.* Having a well-marked intestinal tube; as a n., in the n. pl., *Enterodela,* of Ehrenberg, a class of the *Polygastrica* so characterized. [L, 30, 41 (*a*, 14).]

ENTERODIALYSIS (Lat.), n. f. E²n-te²r-o(o³)-di(di²)-a²l(a³l)'-i²s(u⁶s)-i²s. Gen., *enterodialys'eos (-al'ysis).* For deriv., see ENTERON and DIALYSIS. Fr., *entérodialyse.* Complete traumatic division of an intestine. [L, 41, 50, 135 (*a*, 14).]

ENTERODOMYCODORITIS (Lat.), n. f. E²n-te²r-o(o³)-do²-mi²(mu⁶)-ko(ko³)-do²r-i(e)'ti²s. Gen., *enterodomycodorit'idos (-is).* Of Ritgen, see ENTEROMYCODERMITIS.

ENTERODOTHIENIA (Lat.), **ENTERODOTHIENOSIS** (Lat.), **ENTERODOTHIONIA** (Lat.), **ENTERODOTHIONOSIS** (Lat.), n's f. E²n-te²r-o(o³)-do²th-i²-en(an)'i²-a³, -en(an)-o'si²s, -on'i²-a³, -o-no'si²s. Gen., *enterodothienos'eos (-is), -onos'eos (-is).* From ἔντερον, an intestine, and δοθιήν, a boil. Fr., *entérodothiénie.* Ger., *pustulöser Darmausschlag.* More correct terms for *dothienenteria (q. v.).*

ENTERODYNIA (Lat.), n. f. E²n-te²r-o(o³)-di²n(du⁶n)'i²-a³. From ἔντερον, an intestine, and ὀδύνη, pain. Fr., *entérodynie.* Ger., *Darmschmerz, Enterodynie.* It., Sp., *enterodinia.* Intestinal pain. [L, 20 (*a*, 14).]

ENTERO-ECTASIA (Lat.), n. f. E²n-te²r-o(o³)-e²k-ta(ta³)'zi²-(si²)-a³. For deriv., see ENTERON and ECTASIA. Of Piorry, see ENTERECTASIS.

ENTERO-EPIPLOCELE (Lat.), n. f. E²n-te²r-o(o³)-e²p-i²-plo(plo³)-sel(kal)'e(a); in Eng., e²n-te²r-o-e²p-i²p'lo-sel. Gen., *entero-epiplocel'es.* For deriv., see ENTERON and EPIPLOCELE. See ENTEREPIPLOCELE.

ENTEROEPIPLOMPHALOCELE (Lat.), n. f. E²n-te²r-o-(o³)-e²p-i²-plo²m-fa²l(fa³l)-o(o³)-sel(kal)'e(a); in Eng., e²n-te²r-o-e²p-i²p-lo²m-fa²l'o-sel. See ENTEREPIPLOMPHALOCELE.

ENTERO-GASTROCELE (Lat.), n. f. E²n-te²r-o(o³)-ga²st-(ga³st)-ro(ro³)-sel(kal)'e(a); in Eng., e²nt-e²r-o-ga²st'ro-sel. For deriv., see ENTERON and GASTROCELE. Fr., *entérogastrocèle.* Ger., *Bauchbruch, Darmbauchbruch.* It., Sp., *e.* 1. An abdominal enterocele. 2. A hernia containing both intestine and stomach. [L, 41, 43, 50 (*a*, 14).]

ENTÉROGASTROSE (Fr.), n. A³n²-ta-ro-ga³s-tros. Gastroenteritis. [L, 135 (*a*, 14).]

ENTÉROGRAPHE (Fr.), n. A³n²-ta-ro-gra³f. From ἔντερον, an intestine, and γράφειν, to write. A myograph arranged for measuring the movements of the intestines. [A, 301 (*a*, 21).]

ENTEROGRAPHY, n. E²n-te²r-o²g'ra²f-i². From ἔντερον, an intestine, and γράφειν, to write. Fr., *entérographie.* It., Sp., *enterografia.* See ENTEROLOGY.

ENTEROHELCOS (Lat.), n. m. E²n-te²r-o(o³)-he²l'ko²s. Gen., *enterohel'ceos (-is).* See ENTERELCOS.

ENTEROHELCOSIS (Lat.), n. f. E²n-te²r-o(o³)-he²l-kos'i²s. Gen., *enterohelcos'eos (-is).* See ENTERELCOSIS.

ENTÉROHÉMIE (Fr.), n. A³n²-ta-ro-a-me. See ENTERÆMIA.

ENTÉRO-HÉMORRHAGIE (Fr.), n. A³n²-ta-ro-a-mo³r-ra³-zhe. See ENTERORRHAGIA.

ENTÉRO-HÉPATITE (Fr.), n. A³n²-ta-ro-a-pa³-tet. From ἔντερον, an intestine, and ἧπαρ, the liver (see also *-itis**). Inflammation of the liver and intestines. [L, 41.]

ENTEROHYDROCELE (Lat.), n. f. E²n-te²r-o(o³)-hi(hu⁶)-dro-sel(kal)'e(a); in Eng., e²n-te²r-o-hi'dro-sel. See ENTERYDROCELE.

ENTEROHYDROMPHALUS (Lat.), n. m. E²n-te²r-o(o³)-hi-(hu⁶)-dro²m'fa²l(fa³l)-u³s(u⁴s). Of Bégin, see ENTERYDROMPHALUS.

ENTÉROIDE (Fr.), adj. A³n²-ta-rwa³d, or a³n²-ta-ro-ed. Resembling an intestine. [A, 385 (*a*, 21).]

ENTEROLITE, ENTEROLITH, n's. E²n'te²r-o-lit, -li²th. Lat., *enterolithus* (from ἔντερον, an intestine, and λίθος, a stone). Fr., *entérolithe.* Ger., *E., Darmstein.* It., *enterolito.* Sp., *enterólito.* A stony concretion in the intestine. [L, 50.] See *Intestinal* CALCULUS.

ENTEROLITHIASIS (Lat.), n. f. E²nt-e²r-o(o³)-li²th-i²-a(a³)'-si²s. Gen., *enterolithias'eos (-is).* For deriv., see ENTERON and LITHIASIS. Fr., *entérolithiase.* Ger., *Steinbildung im Darmkanal.* It., *enterolitiasi.* Sp., *enterolitiasis.* The formation or existence of intestinal concretions. [L, 41, 50.]

ENTEROLITHUS (Lat.), n. m. E²n-te²r-o²l'i²th-u³s(u⁴s). See ENTEROLITH.—**E. bezoardus.** See BEZOAR.—**E. calculus.** See *Intestinal* CALCULUS.—**E. scybalum.** See SCYBALUM.

ENTEROLOBIUM (Lat.), n. n. E²n-te²r-o(o³)-lob(lo²b)'i²-u³m(u⁴m). A genus of the *Leguminosæ,* tribe *Ingeæ.* [B, 42 (*a*, 24).]—**E. timbouva.** The *courotu* of South America. The bark and pericarp have marked astringent and saponaceous properties, and are extensively used in southern Brazil and Uruguay. [B, 121 (*a*, 24); "Proc. of the Am. Pharm. Assoc.," xxxiv (*a*, 14).]

ENTEROLOGY, n. E²n-te²r-o²l'o-ji². From ἔντερον, an intestine, and λόγος, understanding. Fr., *entérologie.* Ger., *Eingeweidelehre.* It., Sp., *enterologia.* The anatomy, etc., of the intestines. [L, 107.]

ENTEROMALACIA (Lat.), **ENTEROMALACOSIS** (Lat.), **ENTEROMALAXIS** (Lat.), n's f. E²n-te²r-o(o³)-ma²l(ma³l)-as(a³k)'i²-a³, -a²(a³)-ko'sis, -a²x(a³x)'i²s. Gen., *enteromalac'iæ, -cos'eos (-is), -ax'eos (-is).* From ἔντερον, an intestine, and μαλακία, softness, or μάλαξις, a softening. Fr., *entéromalacie.* Ger., *Darmerweichung.* Morbid softening of the intestines. [L, 41, 50.]

ENTEROMELANORRHŒA (Lat.), n. f. E²n-te²r-o(o³)-me²l-a²n(a³u)-o²r-re'(ro²'e²)-a³. From ἔντερον, the intestine, μέλας, black, and ῥεῖν, to flow. Fr., *entéromélanorrhée.* See MELÆNA.

ENTEROMENIA (Lat.), n. f. E²n-te²r-o(o³)-men(man)'i²-a³. From ἔντερον, an intestine, and μήν, a month. Fr., *entéroménie.* Vicarious menstruation by the bowels. [L, 50.]

ENTEROMEROCELE (Lat.), n. f. E²n-te²r-o(o³)-me(ma)-ro-(ro³)-sel(kal)'e(a); in Eng., e²n-te²r-o-me'ro-sel. Gen., *enteromerocel'es.* From ἔντερον, an intestine, μηρός, a thigh, and κήλη, a rupture. Fr., *entéromérocèle.* Ger., *Schenkeldarmbruch.* See *Femoral* ENTEROCELE.

ENTEROMESENTERICUS (Lat.), adj. E²n-te²r-o(o³)-me²s-e²n-te²r'i²k-u³s(u⁴s). From ἔντερον, an intestine, and μεσεντέριον, the mesentery. Fr., *entéro-mesentérique.* Ger., *Darmgekröse betreffend.* Pertaining to the intestinal mesentery; as a n., in the f., *enteromesenterica* (*febris* understood), of Petit and Serres, typhoid fever, from its being associated with ulceration of the mucous membrane of the small intestine and swelling of the mesenteric glands. [L, 41, 50 (*a*, 14, 21).]

ENTÉRO-MÉSENTÉRITE (Fr.), n. A³n²-ta-ro-ma-za³n²-ta-ret. See TABES *mesenterica.*

ENTEROMORPHA (Lat.), n. f. E²n-te²r-o(o³)-mo²rf'a³. From ἔντερον, an intestine, and μορφή, shape. Fr., *entéromorphe.* A genus of *Algæ;* the *Ulva* of most authors. The *Enteromorpheæ* (Fr., *entéromorphées*) of Kützing are a family of algals of the *Dermatoblasteæ,* made by Rabenhorst a subsection of the *Ulveæ.* [B, 121, 170 (*a*, 24).]

ENTEROMPHALOCELE (Lat.), **ENTEROMPHALUS** (Lat.), n's f. and m. E²n-te²r-o²m-fa²l(fa³l)-o(o³)-sel(kal)'e(a) (in Eng., e²n-te²r-o²m'fa²l-o-sel), e²n-te²r-o²m'fa²l(fa³l)-u³s(u⁴s). Gr., ἐντερόμφαλος (from ἔντερον, the intestine, and ὀμφαλός, the navel). Fr., *entéromphale.* Ger., *Nabeldarmbruch.* An umbilical hernia of the intestine. [A, 301. 325 (*a*, 21); E.]

ENTEROMYCODERMA (Lat.), n. n. E²n-te²r-o(o³)-mi²(mu⁶)-ko(ko³)-du⁶rm(de²rm)'a³. Gen., *enteromycoderm'atos (-is).* From ἔντερον, the intestine. μύκης, a fungus, and δέρμα, the skin. Fr., *entéromycoderme.* Ger., *Darmschleimhaut.* The intestinal mucous membrane. [L, 50.]

ENTEROMYCODERMITIS (Lat.), n. f. E²n-te²r-o(o³)-mi²-(mu⁶)-ko(ko³)-du⁶rm(de²rm)-i(e)'ti²s. Gen., *enteromycodermit'idos (-is).* Fr., *entéro-mycodermite.* Ger., *Darmschleimhautentzündung.* Inflammation of the intestinal mucous membrane. [L, 50 (*a*, 21).]

ENTEROMYCODORA (Lat.), n. f. E²n-te²r-o(o³)-mi²(mu⁶)-ko²d'o²r-a³. From ἔντερον, the intestine, μύκης, a fungus, and δέρμα, the skin. See ENTEROMYCODERMA.

ENTEROMYCODORITIS (Lat.), n. f. E²n-te²r-o(o³)-mi²-(mu⁶)-ko²d-o²r-i(e)'ti²s. Gen., *enteromycodorit'idos (-is).* See ENTEROMYCODERMITIS.

ENTEROMYIASIS (Lat.). n. f. E²n-te²r-o(o³)-mi(mu⁶)-i²-as-(a³s)'i²s. Gen., *enteromyias'eos (-myi'asis).* From ἔντερον, the intestine, and μυῖα, a fly. Fr., *entéromyiase.* A disease of the intestines due to the presence of the larvæ of flies. [L, 41, 50 (*a*, 14).]

ENTERON (Lat.), n. n. E²n'te²r-o²n. Gr., ἔντερον. Fr., *intestin* (1st def.). Ger., *Darm* (1st def.). It., Sp., *intestino* (1st def.). 1. An intestine. 2. In the pl., *entera,* the abdominal organs in general. 3. The uterus. [L, 50 (*a*, 14).]

ENTERONCOCOLICA (Lat.), n. f. E²n-te²r-o²n²-ko(ko³)-kol'-i²k-a³. From ἔντερον, the intestine, ὄγκος, a mass, and κωλική, colic. Fr., *entéroncocolique.* Colic due to an abdominal tumor or to coprostasis. [A, 322.]

ENTERONCOS (Lat.), **ENTERONCUS** (Lat.), n's m. E²n-te²r-o²n²'ko²s, -ku³s(ku⁴s). From ἔντερον, the intestine, and ὄγκος, a mass. Fr., *entéroncus.* Ger., *Darmgeschwulst.* An intestinal tumor. [L, 50.]

ENTERONERVIA (Lat.), **ENTERONEURIA** (Lat.), n's f. E²n-te²r-o(o³)-nu⁶r(ne²r)'vi²(wi²)-a³, -nu²'ri²-a³. From ἔντερον, the intestine, and *nervus* or νεῦρον, a nerve. Fr., *entéroneurie* [Piorry]. Intestinal disorder due to deranged nervous action. [L, 50 (*a*, 21).]

ENTERO-OSCHEOCELE (Lat.), n. f. E²n-te²r-o(o³)-o²s-ke²-(ch²e²)-o-sel(kal)'e(a); in Eng., e²n-te²r-o-o²s'ke-o-sel. See ENTEROSCHEOCELE.

ENTEROPARALYSIS (Lat.), n. f. E²n-te²r-o(o³)-pa²r(pa³r)-a²l(a³l)'i²(u⁶)-si²s. Gen., *enteroparalys'eos (-al'ysis).* For deriv., see ENTERON and PARALYSIS. Intestinal paralysis. [L, 107.]

ENTEROPARISACTICUS (Lat.), adj. E²n-te²r-o(o³)-pa²r-(pa³r)-i²(e)-sa²k(sa³k)'ti²-ku³s(ku⁴s). From ἔντερον, an intestine, and

παρεισάγειν, to insert. Fr., *entéroparisactique.* Pertaining to enteroparisagoge. [L, 41, 50.]

ENTEROPARISAGOGE (Lat.), n. f. E^{2}n-te^{2}r-o(o^3)-pa^{2}r(pa^{3}r)-i^{2}s(es)-a^3-go'je(ga). Gen., *enteroparisagog'es.* From ἔντερον, the intestine, and παρεισαγωγή, an inserting. Fr., *entéroparisagoge.* Ger., *Ineinanderschiebung der Därme.* Intestinal intussusception. [L, 41, 50 (*a*, 14).]

ENTEROPATHY, n. E^{2}n-te^{2}r-o^{2}p'a^{2}th-i^2. Lat., *enteropathia* (from ἔντερον, the intestine, and πάθος, disease). Fr., *entéropathie.* Ger., *Darmleiden.* Any intestinal disease. [L, 50.]

ENTEROPERISTOLE (Lat.), n. f. E^{2}n-te^{2}r-o(o^3)-pe^{2}r-i^{2}s'to^2-le(la). Gen., *enteroperist'oles.* From ἔντερον, the intestine, and περιστέλλειν, to compress. Fr., *entéropéristole.* 1. Intestinal peristalsis. [L, 41, 50, 135 (*a*, 14).] 2. See ENTEROSPHIGMA.

ENTEROPERITONITIS (Lat.), n. f. E^{2}n-te^{2}r-o(o^3)-pe^{2}r-i^2-to^{2}n-i(e)'ti^{2}s. Gen., *enteroperitonit'idos (-is).* From ἔντερον, the intestine, and περιτόναιον, the peritonæum (see also *-itis**). Fr., *entéro-péritonite.* Ger., *Darmbauchfellentzündung.* Inflammation of the peritoneal coat of the intestine.

ENTEROPHLŒODES (Lat.), adj. E^{2}n-te^{2}r-o(o^3)-fle(flo^2-e^2)-o'dez(das). From ἔντερον, an intestine, and φλοιώδης, like bark. Fr., *entérophléode.* Ger., *darmrindig.* Of lichens, growing on the interior of the woody stems of other plants. [L, 41.]

ENTEROPHLOGIA (Lat.), **ENTEROPHLOGOSIS** (Lat.), n's f. E^{2}n-te^{2}r-o(o^3)-flo^{2}j(flo^{2}g)'i^2-a^3, -flo^{2}g-o'si^{2}s. Gen., *enterophlog'iæ, -phlogos'eos (-is).* From ἔντερον, the intestine, and φλογία or φλόγωσις, a burning. Fr., *entérophlogie, entérophlogose.* See ENTERITIS.

ENTEROPHTHISIS (Lat.), n. f. E^{2}n-te^{2}r-o^{2}f'thi^2-si^{2}s. Gen., *enterophthis'eos (-oph'thisis).* From ἔντερον, the intestine, and φθίσις, phthisis. Fr., *entérophthisie.* Ger., *Darmschwindsucht.* Intestinal phthisis. [L, 50.]

ENTEROPHYMIA (Lat.), n. f. E^{2}n-te^{2}r-o(o^3)-fi^{2}m(fu^{6}m)'i^2-a^3. From ἔντερον, the intestine, and φύειν, to grow. Fr., *entérophymie.* Intestinal tuberculosis. [L, 41.]

ENTEROPLASTIC, adj. E^{2}n-te^{2}r-o-pla^{2}st'i^{2}k. Lat., *enteroplasticus.* Fr., *entéroplastique.* Plastic and pertaining to the intestine (said of operations).

ENTEROPLASTY, n. E^{2}n'te^{2}r-o-pla^{2}st-i^2. Lat., *enteroplastice* (from ἔντερον, an intestine, and πλαστικός, plastic). Fr., *entéroplastie.* The plastic surgery of the intestines. [E.]

ENTEROPLEGIA (Lat.), n. f. E^{2}n-te^{2}r-o(o^3)-ple(pla)'ji^2(gi^2)-a^3. From ἔντερον, an intestine, and πληγή, a stroke. See ENTEROPARALYSIS.

ENTEROPNEUMATOSIS (Lat.), n. f. E^{2}n-te^{2}r-o^{2}p-nu^2-ma^3-to'si^{2}s. Gen., *enteropneumatos'eos (-is).* For deriv., see ENTERON and PNEUMATOSIS. Fr., *entéropneumatose.* Ger., *Luftentwickelung im Darmkanal.* Excessive formation of gas in the intestine. [A, 301 (*a*, 21).]

ENTEROPNEUSTUS (Lat.), adj. E^{2}n-te^{2}r-o^{2}p-nu^{2}st'u^{3}s(u^{4}s). From ἔντερον, the intestine, and πνεῖν, to breathe. Fr., *entéropneuste.* Having the function of respiration performed by the intestine; as a n., in the n. pl., *Enteropneusta*, an order of the *Rhyncocœla*; as a n., in the m. pl., *Enteropneusti*, of Gegenbaur, a class of worms. [L, 49, 228, 354.]

ENTEROPONUS (Lat.), n. m. E^{2}n-te^{2}r-o^{2}p'o^{2}n-u^{3}s(u^{4}s). From ἔντερον, the intestine, and πόνος, pain. Fr., *entéropone.* Ger., *Darmgrimmen.* See COLIC.

ENTEROPROCTIA (Lat.), n. f. E^{2}n-te^{2}r-o(o^3)-pro^{2}k(prok)'-shi^2(ti^2)-a^3. From ἔντερον, the intestine, and πρωκτός, the anus. Fr., *entéroproctie.* The formation or existence of an artificial anus. L. H. Petit, "Union méd.," Apr. 10, 1886, p. 577.] Cf. COLOPROCTIA.

ENTÉROPTOSIQUE (Fr.), adj. A^{3}n^2-ta-ro^{2}p-to-zek. Pertaining to or affected with enteroptosis. [*a*, 18.]

ENTEROPTOSIS (Lat.), n. f. E^{2}n-te^{2}r-op-to'si^{2}s. Gen., *enteroptos'eos (-is).* From ἔντερον, the intestine, and πτῶσις, a falling. Fr., *entéroptose.* 1. A prolapse of intestine. 2. The descent of the intestines *en masse* as the result of relaxation of the abdominal wall, as in cases of pendulous abdomen. [F. Glénard, "Lyon méd.," Apr. 5, 1885, p. 492.]

ENTEROPYRA (Lat.), n. f. E^{2}n-te^{2}r-o^{2}p'i^{2}r(u^{6}r)-a^3. From ἔντερον, an intestine, and πῦρ, a fire. Fr., *entéropyre, entéropyrie.* Ger., *Darmfieber, Darmentzündungsfieber.* Intestinal fever (*enteritis*); of Alibert, typhoid fever. [L, 50 (*a*, 14).]—**E. asiatica.** See *Asiatic* CHOLERA.—**E. biliosa.** See *Bilious* FEVER.

ENTERORRHAGIA (Lat.), n. f. E^{2}n-te^{2}r-o^{2}r-raj(ra^{3}g)'i^2-a^3. From ἔντερον, an intestine, and ῥηγνύναι, to burst forth. Fr., *entérorrhagie.* Ger., *Enterorrhagie, Darmblutung, Darmblutfluss.* Intestinal hæmorrhage. [D.]

ENTERORRHAPHY, n. E^{2}n-te^{2}r-o^{2}r'ra^{2}f-i^2. Lat., *enterorrhaphe, enterorrhaphia* (from ἔντερον, an intestine, and ῥαφή, a suture). Fr., *entérorrhaphie.* Ger., *Enterorrhaphie, Darmnaht, Kürschnernaht.* It., *enterorrafia.* Sp., *enterorrafía.* The operation of stitching together the lips of an intestinal wound or of stitching an intestine to some other structure (*e. g.*, the abdominal wall).

ENTERORRHEUMA (Lat.), n. n. E^{2}n-te^{2}r-o^{2}r-ru^2'ma^3. Gen., *enterorrheum'atos (-is).* From ἔντερον, the intestine, and ῥεῦμα, a flowing. Fr., *entérorrhume.* Ger., *Darmrheumatismus.* Intestinal rheumatism. [L, 50.]

ENTERORRHEXIS (Lat.), n. f. E^{2}n-te^{2}r-o^{2}r-rex(rax)'i^{2}s. Gen., *enterorrhex'eos (-is).* From ἔντερον, the intestine, and ῥῆξις, rupture. Rupture or laceration of an intestine. [L, 20 (*a*, 14).]

ENTERORRHŒA (Lat.), n. f. E^{2}n-te^{2}r-o^{2}r-re'(ro^2'e^2)-a^3. From ἔντερον, the intestine, and ῥεῖν, to flow. Fr., *entérorrhée.* Ger., *schwarze Ruhr* (1st def.), *Darmschleimfluss* (2d def.). It., Sp., *enterorrea.* 1. See DIARRHŒA. 2. See MELÆNA.

ENTERORRHOIS (Lat.), n. f. E^{2}n-te^{2}r-o^{2}r'ro(ro^2)-i^{2}s. Gen., *enterorrho'idos (-is).* From ἔντερον, an intestine, and ῥόος, a stream. Fr., *entérorrhoïde.* Ger., *Darmblutsickerung.* An oozing of blood from the intestine. [L, 50.]

ENTEROSARCOCELE (Lat.), n. f. E^{2}n-te^{2}r-o(o^3)-sa^{3}rk-o(o^3)-sel(kal)'e(a); in Eng., e^{2}n-te^{2}r-o-sa^{3}rk'o-sel. Gen., *enterosarcocel'es.* For deriv., see ENTERON and SARCOCELE. Fr., *entérosarcocèle.* Ger., *Darmfleischbruch.* It., Sp., *e.* Intestinal hernia complicated with sarcocele. [E.]

ENTEROSARCOMA (Lat.), n. n. E^{2}n-te^{2}r-o(o^3)-sa^{3}r-ko'ma^3. Gen., *enterosarcom'atos (-is).* For deriv., see ENTERON and SARCOMA. Sarcoma of the intestine. [*a*, 29.]

ENTEROSCHEOCELE (Lat.), n. f. E^{2}n-te^{2}r-o^{2}s-ke^2(ch^{2}e^2)-o-(o^3)-sel(kal)'e(a); in Eng., e^{2}n-te^{2}r-o^{2}s'ke^2-o-sel. Gen., *enteroscheocel'es.* From ἔντερον, the intestine, ὄσχεον, the scrotum, and κήλη, a tumor. Fr., *entéroscheocèle.* Ger., *Darmhodensacksbruch.* A scrotal enterocele. [E.]

ENTEROSCIRRHUS (Lat.), n. m. E^{2}n-te^{2}r-o(o^3)-ski^{2}r'ru^{3}s-(ru^{4}s). From ἔντερον, the intestine, and σκίῤῥος, scirrhus. Fr., *entérosquirrhe.* Ger., *Darmkrebs.* Intestinal scirrhus. [L, 50.]

ENTEROSCOPE, n. E^{2}n'te^{2}r-o-skop. From ἔντερον, the intestine, and σκοπεῖν, to view. Ger., *Enteroskop.* Of Leiter, an instrument for illuminating the intestinal cavity by means of an electric light, for purposes of examination. [A, 326 (*a*, 21).]

ENTEROSIS (Lat.), n. f. E^{2}n-te^{2}r-o'si^{2}s. Gen., *enteros'eos (-is).* Fr., *entérose.* Ger., *Darmübel.* Any intestinal disease. [L, 41, 43.]

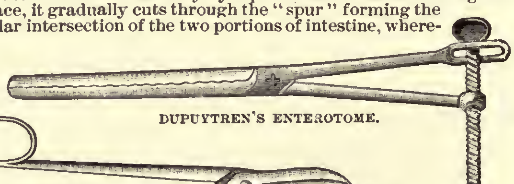
ENTEROSPASMUS (Lat.), n. m. E^{2}n-te^{2}r-o(o^3)-spa^{2}z(spa^{3}s)'mu^{3}s(mu^{4}s). From ἔντερον, the intestine, and σπασμός, a spasm. Fr., *entérospasme.* Ger., *Darmkrampf, Krampfkolik.* Spasmodic colic. [L, 50.]

ENTEROSPHIGMA (Lat.), n. n. E^{2}n-te^{2}r-o(o^3)-sfi^{2}g'ma^3. Gen., *enterosphig'matos (-is).* From ἔντερον, the intestine, and σφίγμα, that which is bound tight. Fr., *entérosphigme.* Ger., *Darmeinklemmung.* 1. An intestinal constriction or occlusion. 2. A strangulated or incarcerated intestinal hernia. [L, 41, 50, 135 (*a*, 14).]

ENTEROSPHINXIS (Lat.), n. f. E^{2}n-te^{2}r-o(o^3)-sfi^{2}nx'i^{2}s. Gen., *enterosphinx'eos (-is).* From ἔντερον, the intestine, and σφίγξις, a binding tight. Fr., *entérosphinxis.* Ger., *Entstehung einer Darmeinklemmung.* The formation or existence of an enterosphigma. [L, 50.]

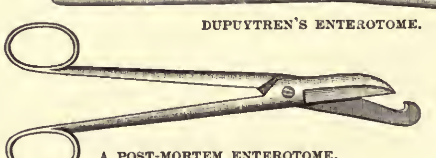
ENTEROSPHONGIOMA (Lat.), n. n. E^{2}n-te^{2}r-o(o^3)-sfo^{2}n-(sfo^{2}n^2)-ji^2(gi^2)-o'ma^3. Gen., *enterosphongiom'atos (-is).* From ἔντερον, the intestine, and σφόγγος, a sponge. Fr., *entérosphongiome.* Ger., *Darmschwamm, Darmtuberkeln.* An intestinal fungous or tubercular growth. [L, 50.]

ENTEROSTENOSIS (Lat.), n. f. E^{2}n-te^{2}r-o(o^3)-ste^{2}n-o'si^{2}s. Gen., *enterostenos'eos (-is).* From ἔντερον, the intestine, and στένωσις, constriction. Fr., *entéro-sténose.* Ger., *Darmverengerung.* Intestinal stricture. [L, 42, 50.]



ENTEROSTEUS (Lat.), adj. E^{2}n-te^{2}r-o^{2}st'e^2-u^{3}s(u^{4}s). From ἔντερον, the intestine, and ὀστέον, a bone. Fr., *entérosté.* Ger., *darmbeinig.* Having a bony formation in the interior of the body (said of certain *Cephalopoda*). [L, 41, 42.]

ENTEROSTOMY, n. E^{2}n-te^{2}r-o^{2}s'to-mi^2. From ἔντερον, the intestine, and στόμα, an aperture. Fr., *entérostomie.* Ger., *Enterostomie.* The operation of making a permanent opening into the small intestine for the purpose of inserting food. [L. H. Petit, "Union méd.," Apr. 10, 1886, p. 577.]



ENTEROSYMPHOREMA (Lat., **ENTEROSYMPHORESIS** (Lat.), n's n. and f. E^{2}n-te^{2}r-o(o^3)-si^{2}m(su^{6}m)-fo^{2}r-e(a)'ma^3, -sis. Gen., *enterosymphorem'atos (-is), -es'eos (-is).* From ἔντερον, the intestine, and συμφόρημα, that which is brought together, or συμφόρησις, a bringing together. Fr., *entérosymphorème.* Ger., *Anhäufung in den Därmen.* Intestinal congestion. [A, 322 (*a*, 21).]

ENTÉROSYPHILIDIE [Piorry] (Fr.), n. A^{3}n^2-ta-ro-se-fe-le-de. For deriv., see ENTERON and SYPHILIS. Any syphilitic affection of the intestine. [A, 250 (*a*, 21).]

ENTEROTOME, n. E^{2}n'te^{2}r-o-tom. Lat., *enterotomus* (from ἔντερον, the intestine, and τέμνειν, to cut). Fr., *entérotome.* Ger., *Enterotom, Darmschneider, Darmscheere* (2d def.). 1. A compressing forceps, one blade of which is inserted into the upper and the other into the lower portion of an intestine, that communicates with the exterior of the body by a preternatural anus. Being left in place, it gradually cuts through the "spur" forming the angular intersection of the two portions of intestine, where-

DUPUYTREN'S ENTEROTOME.

A POST-MORTEM ENTEROTOME.

by the continuity of the intestinal canal is restored as a preliminary step to the closure of the unnatural opening. 2. A pair of scissors with one blade blunt-pointed and longer than the other, used for slitting open the intestines in post-mortem examinations. [E.]

ENTEROTOMY, n. E^{2}n-te^{2}r-o^{2}t'o-mi^2. Lat., *enterotomia* (from ἔντερον, the intestine, and τέμνειν, to cut). Fr., *entérotomie.*

Ger., *Darmschnitt*. It., *enterotomia*. Sp., *enterotomía*. The operation of making an opening into the intestine. The term is restricted by some writers to a temporary opening, as opposed to *enterostomy* (*q. v.*). [E; L. H. Petit, "Union méd.," April 10, 1886, p. 577.]

ENTEROTUBERCULUM (Lat.), n. n. E²n-te²r-o(o³)-tu²(tu)-bu⁵r(be²r)'ku²(ku⁴)-lu³m(lu⁴m). From ἔντερον, the intestine, and *tuberculum*, a tubercle. See ENTEROSPHONGIOMA.

ENTEROTYPHUS (Lat.), n. m. E²n-te²r-o(o³)-ti(tu⁶)'fu³s(fu⁴s). From ἔντερον, the intestine, and τῦφος, stupor. Fr., *entérotyphus*. Ger., *Darmtyphus*. Typhoid fever. [A, 326 (α, 21).]

ENTERO-VAGINAL, adj. E²n"te²r-o-va²j'i²n-a²l. For deriv., see ENTERON and VAGINA. See INTESTINO-VAGINAL.

ENTEROZOON (Lat.), n. n. E²n-te²r-o(o³)-zo'o²n. From ἔντερον, the intestine, and ζῷον, an animal. Fr., *entérozoaire*. Ger., *Darmthier*. An intestinal entozoon. [L, 41, 88 (α, 14).]

ENTERUM (Lat.), n. n. E²n'te²r-u³m(u⁴m). See ENTERON.

ENTERURIA (Lat.), n. f. E²n-te²r-u²(u)'ri²-a³. From ἔντερον, the intestine, and οὖρον, urine. Fr., *entérurie*. Ger., *Harnversetzung nach dem Darmkanal*. The vicarious excretion of urinary constituents by the intestine. [L, 50.]

ENTERYDROCELE (Lat.), n. f. E²n-te²r-i(u⁶)-dro(dro³)-sel-(kal)'e(a); in Eng., e²n-te²r-i'dro-sel. Gen., *enterydrocel'es*. For deriv., see ENTERON and HYDROCELE. Fr., *entéro-hydrocèle*. Ger., *Darmwasserbruch*. Intestinal hernia complicated with hydrocele. [E.] 1. An enterocele with watery effusion into the sac. 2. A scrotal enterocele complicated with hydrocele. [E.]

ENTERYDROMPHALUS (Lat.), n. m. E²n-te²r-i(u⁶)-dro²m'-fa²l(fa³l)-u³s(u⁴s). From ἔντερον, the intestine, ὕδωρ, water, and ὀμφαλός, the navel. Fr., *entéro-hydromphale*. Ger., *Nabeldarmwasserbruch*. An umbilical enterocele with watery effusion into the sac. [E.]

ENTERYPERPATHIA (Lat.), n. f. E²n-te²r-i(u⁶)-pu⁵r(pe²r)-pa²th(pa³th)-i(e)'a³. From ἔντερον, the intestine, and ὑπερπαθεῖν, to suffer excessively. Fr., *entéryperpathie* [Piorry]. Ger., *übermässiges Darmleiden*. Any severe intestinal affection. [L, 50.]

ENTERYPOPATHIA (Lat.), n. f. E²n-te²r-i(u⁶)-po(po²)-pa²th-(pa³th)-i(e)'a³. From ἔντερον, an intestine, and ὑποπάσχειν, to suffer slightly. Fr., *entérypopathie*. Ger., *mässiges Darmleiden*. A slight intestinal affection. [L, 50.]

ENTERERYTHROSIS (Lat.), n. f. E²n-te²r-e²-ri²(ru⁶)-thro'-si²s. Gen., *entererythros'eos* (*-is*). For deriv., see ENTERON and ERYTHROSIS. Intestinal erythrosis. [A, 322 (α, 21).]

ENTÊTÉ (Fr.), adj. A³n²-te²-ta. Affected with vertigo. [L, 41.]

ENTFÄRBT (Ger.), adj. E²nt-farbt'. Decolorized. [L, 43.]

ENTFÄRBUNG (Ger.), n. E²nt-farb'un². See DECOLORATION. —**E'sflüssigkeit.** A bleaching fluid. [α, 14.]

ENTFETTEN (Ger.), v. tr. E²nt-fe²t'te²n. 1. See DEGREASE. 2. To reduce corpulency. [A, 521.]

ENTFETTUNG (Ger.), n. E²nt-fe²t'tun². 1. The removal of fatty matter. 2. The reduction of corpulency. [A, 521.]—**E'skur, E'smethode.** A course of treatment for reducing corpulency. [A, 521.]—**E'smittel.** A remedy for corpulency. [A, 521.]

ENTFIEBERUNG (Ger.), n. E²nt-feb'e²r-un². See DEFERVESCENCE.

ENTFIBRINIRT (Ger.), adj. E²nt-fe-bri²-nert'. See DEFIBRINATED.

ENTFLEISCHEN (Ger.), v. tr. E²nt-flish'e²n. To deprive of flesh (said of bones). [A, 521.]

ENTFREMDUNG (Ger.), n. E²nt-fre²md'un². See ALIENATION.

ENTFUSELN (Ger.), **ENTFUSELUNG** (Ger.), n's. E²nt-fuz'-e²l'n, -e²l-un². The purification of alcohol, especially by getting rid of fusel oil. [J, 173.]

ENTGASUNG (Ger.), n. E²nt-ga³z'un². The process of depriving of gas. [K, 13.]

ENTGEGEN (Ger.), n. E²nt-gag'e²n. See CONTRARY.—**E'gesetzt.** See CONTRARY.—**E'reizend.** See COUNTER-IRRITANT.—**E'setzer, E'steller.** See OPPONENS.—**E'wirkend.** Antagonistic. [L, 80.]

ENTGLASUNG (Ger.), n. E²nt-gla³z'un². See DEVITRIFICATION.

ENTHAAREND (Ger.), adj. E²nt-ha³r'e²nd. See DEPILATORY.

ENTHAARUNG (Ger.), n. E²nt-ha³r'un². See DEPILATION.—**E'smittel.** A depilatory. [L, 57.]

ENTHALTEN (Ger.), n. E²nt-ha³lt'e²n. Continence. [L, 80.]

ENTHALTEND (Ger.), **ENTHALTSAM** (Ger.), adj's. E²nt-ha³lt'e²nd, -za³m. 1. Abstemious. 2. Continent. [L. 81.]

ENTHAUPTUNG (Ger.), n. E²nt-ha³'u⁴pt-un². Decapitation. [L, 135.]—**E'shaken.** A decapitating hook.

ENTHÄUTUNG (Ger.), n. E²nt-hoit'un². Excoriation. [A, 521.]

ENTHEASTICOS (Lat.), adj. E²n-the²-a²st(a³st)'i²k-o²s. Gr., ἐνθεαστικός (from ἐνθεάζειν, to be inspired). Inspired; as a n., of Paulus Ægineta, a victim of melancholia who believes himself inspired. [L, 94 (α, 14).]

ENTHELMINTHA (Lat.), **ENTHELMINTHES** (Lat.), n's n. pl. and f. pl. E²n-the²l-mi²n'tha³, -thez(the²s). From ἐντός, within, and ἕλμινς, a worm. Fr., *enthelminthes*. Ger., *Eingeweidewürmer*, *Enthelminthen*. Intestinal worms. [L, 50.]

ENTHEMATA (Lat.), n. n. pl. E²n-the²m'a³-ta³. Gr., ἐνθέματα (from ἐντιθέναι, to put in). Medicines anciently supposed to prevent inflammation and stop hæmorrhage when applied immediately to recent wounds. [L, 84.]

ENTHEOMANIA (Lat.), n. f. E²n-the²-o(o³)-man(ma³n)'i²-a³. From ἔνθεος, inspired, and μανία, madness. Fr., *enthéomanie*. Ger., *religiöser Wahnsinn*. Religious mania. [L, 41, 50.]

ENTHETIC, adj. E²n-the²t'i²k. From ἐν, in, and τιθέναι, to place. Introduced into the system from without (said of infectious diseases). [D, 20.]

ENTHETOS (Lat.), adj. E²n'the²t-o²s. Gr., ἔνθετος (from ἐντιθέναι, to put in). Placed upon (in particular, said of medicines placed upon the nostrils to stop hæmorrhage). [A, 325 (α, 21).]

ENTHIRNUNG (Ger.), n. E²nt-hern'un². Removal of the brain. [A, 521.]

ENTHLASIS (Lat.), n. f. E²n'thla²s(thla³s)-i²s. Gen., *enthlas'eos* (*en'thlasis*). Gr., ἔνθλασις (from ἐνθλᾶν, to indent by pressure). Fr., *enthlase enthlasie* (2d def.). Ger., *Enthlase*, *Schädeleindruck* (2d def.). 1. Originally, any depression. 2. A comminuted, depressed fracture of the skull. [E; L, 50.]

ENTHYSTEROPHYMA (Lat.), n. E²n-thi²st(thu⁶st)-e²r-o(o³)-fi(fu⁶)'ma³. Gen., *enthysterophym'atos* (*-is*). From ἐντός, within, ὑστέρη, a womb, and φῦμα, a tumor. Fr., *enthystérophyme*. A tumor protruding into the cavity of the uterus. [L, 50 (α, 14).]

ENTIRE, adj. E²n-tir'. Lat., *integer*. Fr., *entier*. Ger., *ganz*, *ungetheilt*. It., *intero*. Sp., *entero*. In botany, consisting of a single piece, not divided at the edge. [B, 19, 121 (α, 24).]

ENTJUNGFERN (Ger.), **ENTJUNGFERUNG** (Ger.), n's. E²nt-yun²'fe²rn, -fe²r-un². See DEFLORATION (1st def.).

ENTKALKUNG (Ger.), n. E²nt-ka³lk'un². Decalcification. [G.]

ENTKRÄFTUNG (Ger.), n. E²nt-kre²ft'un². Enervation; debility. [L, 80.]

ENTKRUSTUNG (Ger.), n. E²nt-krust'un². See DECRUSTATION.

ENTLADER (Ger.), n. E²nt-la³d'e²r. See DISCHARGER.

ENTLADUNG (Ger.), n. E²nt-la³d'un². See DISCHARGE.—**Elektrische E.** See *Electric* DISCHARGE.—**E'shypothese.** See *Discharge* HYPOTHESIS.—**E'sschlag** (Ger.). See *Discharging* SHOCK.

ENTLAUBT (Ger.), adj. E²nt-la³'u⁴bt. See DEFOLIATE.

ENTLAUBUNG (Ger.), n. E²nt-la³'u⁴b-un². See DEFOLIATION.

ENTLEEREND (Ger.), adj. E²nt-lar'e²nd. See EVACUANT.

ENTLEERUNG (Ger.), n. E²nt-lar'un². See EVACUATION.

ENTMANNEN (Ger.), v. tr. E²nt-ma³n'ne²n. To castrate. [E.]

ENTMANNUNG (Ger.), n. E²nt-ma³n'nun². See CASTRATION.

ENTMARKUNG (Ger.), n. E²nt-ma³rk'un². Enervation. [A, 521.]

ENTMISCHUNG (Ger.), n. E²nt-mi²sh'un². The separation of the component parts of a mixture. [α, 14.]

ENTMÜNDIGUNG (Ger.), n. E²nt-mu⁶nd'i²g-un². The act of subjecting a person to legal restraint or disability (*e. g.*, on account of insanity, etc.). [L. Blumenstok (A, 319).]

ENTNERVEN (Ger.), **ENTNERVUNG** (Ger.), n's. E²nt-ne²rf'-e²n, -un². See ENERVATION.

ENTOBAINONTES (Lat.), n. m. pl. E²n-to(to³)-ban(ba³-e²n)-o²n'tez(te²s). Gr., ἐντοβαίνοντες (from ἐντός, within, and βαίνειν, to go). Fr., *nerfs entobans*. Of Fodéré, the sensory nerves. [L, 50 (α, 14).]

ENTOBLAST, n. E²n'to-bla²st. From ἐντός, within, and βλαστός, a germ. Fr., *entoblaste*. Ger., *E.* 1. The rudimentary hypoblast. [J.] 2. Of Agassiz, a nucleolus. [K.]—**Chordaë'** (Ger.). Fr., *entoblaste chordal*. A short, groove-shaped portion of the e. (1st def.) at the anterior extremity of the embryo, continuous, without the line of demarkation, with the cephalic process or appendix and formed by eversion from the intestinal e. [Bannet, "Arch. f. Anat. u Phys." (Anat.), 1889, p. 81 (α, 18).]—**Darme'** (Ger.). See *Digestive* HYPOBLAST and *Intestinal* HYPOBLAST.

ENTOBRONCHIA (Lat.), n. n. pl. E²n-to(to³)-bro²n²'ki²-(ch²i²)-a³. The lateral bronchi given off from the ventral surface of the main bronchus in birds (see ECTOBRONCHUS). [L, 294 (α, 27).]

ENTOCAROTID, n. E²n-to-ka²r-o²t'i²d. From ἐντός, within, and καρωτίς, a carotid artery. See *Internal carotid* ARTERY.

ENTOCCIPITAL, adj. E²nt-o²k-si²p'i²t-a²l. From ἐντός, within, and *occiput* (*q. v.*). Situated internally to the occipital fissure or convolution. [L, 14.]

ENTOCELE (Lat.), n. f. E²n-to(to³)-sel(kal)'e(a); in Eng., e²n'-to-sel. Gen., *entoceles*. From ἐντός, within, and κήλη, a tumor. Fr., *entocèle*. Ger., *innerer Bruch*. See *Internal* HERNIA.—**E. lentis.** See ECTOPIA *lentis*.

ENTOCENTRAL, adj. E²n-to-se²nt'ra²l. From ἐντός, within, and κέντρον, a centre. Situated near the centre and on the internal surface. [L.] ["Proc. of the Zool. Soc.," 1878, p. 965 (L).]

ENTOCÉPHALIQUE (Fr.), adj. A³n²-to-sa-fa³-lek. See INTRACRANIAL.

ENTOCINEREA (Lat.), n. f. E²n-to(to³)-si²n(ki²n)-e(e²)'re²-a³. From ἐντός, within, and *cinereus*, ash-colored. Of B. G. Wilder, the central gray matter of the brain and spinal cord. [I.]

ENTOCŒLE, n. E²nt'o-sel. From ἐντός, within, and κοιλία, a cavity. In certain corals, a chamber or division of the cœlenteron situated between a pair of mesenteries. ["Quart. Jour. of Micr. Sci.," 1885, p. 578 (L).] Cf EXCCŒLE.

ENTOCŒLIAN, adj. E²n-to-sel'i²-a²n. Of B. G. Wilder, within the cavities of the brain or spinal cord; intraventricular. [I, 80, 98.]

ENTOCŒLIC, adj. E^{2}n-to-sel'i^{2}k. Within the intestines. [L, 182.]

ENTOCONDYLAR, adj. E^{2}n-to-ko^{2}n'di^{2}l-a^{3}r. From ἐντός, within, and κόνδυλος (see CONDYLE). Relating to, connected with, or on the same side as the internal condyle of the humerus. [L, 14.]

ENTOCONID, n. E^{2}n-to-kon'i^{2}d. The postero-internal cusp of a lower molar tooth. [" Nature," Mar. 20, 1890, p. 467 (L).]

ENTOCRANIAL, adj. E^{2}nt-o-kran'i^2-a^{2}l. Lat., *entocranius* [Broussais]. See INTRACRANIAL.

ENTOCUNEIFORM, adj. E^{2}n-to-ku^2'ne^2-i^2-fo^{2}rm. Lat., *entocuneiformis* (from ἐντός, within [see also CUNEIFORM]). Cuneiform and situated internally. [L.] Cf. *E.* BONE.

ENTOCYTE, n. E^{2}n'to-sit. From ἐντός, within, and κύτος, a cell. The more fluid portion of the protoplasm of the *Protozoa.* [L, 321.]

ENTODERM, n. E^{2}n'to-du^{5}rm. Lat., *entoderma* (from ἐντός, within, and δέρμα, a skin). Fr., *entoderme.* Ger., *Darmdrüsenblatt.* Of Kölliker and Allman, the hypoblast. [A, 8.]

ENTODISCALIS (Lat.), adj. E^{2}n-to(to^3)-di^{2}s-kal(ka^{3}l)'i^{2}s. From ἐντός, within, and δίσκος, a disc. Having the stamens inserted within the disc. [L, 41.]

ENTOGASTRIC, adj. E^{2}n-to-ga^{2}st'ri^{2}k. From ἐντός, within, and γαστήρ, the belly. Relating to or springing from the interior of a digestive cavity. [L, 11.]

ENTOGASTROCNEMIUS (Lat.), n. m. E^{2}n-to(to^3)-ga^{2}s(ga^{3}s)-tro^{2}k-nem(nam)'i^2-u^{3}s(u^{4}s). From ἐντός, within, γαστήρ, the belly, and κνήμη, the leg. Of E. Coues, the gastrocnemius internus muscle. [L.]

ENTOGENOUS, adj. E^{2}n-to^{2}j'e^{2}n-u^{3}s. See ENDOGENOUS.

ENTOGLOSSAL, adj. E^{2}n'to-glo^{2}s'a^{2}l. From ἐντός, within, and γλῶσσα, the tongue. Fr., *entoglosse.* Situated within the tissues of the tongue. [L.] Cf. *E.* BONE.

ENTO-GLUTÆUS (Lat.), n. m. E^{2}n-to(to^3)-glu^3(glu)-te'(ta^3'e^2)-u^{3}s(u^{4}s). From ἐντός, within, and γλουτοί, the buttocks. See GLUTÆUS *minimus.*

ENTOGONYANCON (Lat.), n. m. E^{2}n-to(to^3)-go^{2}n-i^2(u^6)-a^{2}n^2-(a^{3}n^2)'ko^{2}n(kon). Gen., *entogonyanco'nos* (-*is*). From ἐντός, within, γόνυ, the knee, and ἀγκών, a bend. Fr., *e.* See GENU *varum.*

ENTOHYAL, adj. E^{2}n-to-hi'a^{2}l. From ἐντός, within, and ὑοειδής, hyoid. Hyoid and situated internally. [L, 41, 43.] See *E.* BONE.

ENTOHYALOID, adj. E^{2}n-to-hi'a^{2}l-oid. From ἐντός, within, and ὑαλοειδής, glass-like. Situated within the vitreous body. [α, 29.]

ENTOLAMBDOIDAL, adj. E^{2}n-to-la^{2}m-doid'a^{2}l. From ἐντός, within, and λαμβδοειδής, lambdoidal. Situated internally to the lambdoidal suture (said of a cerebral fissure). [L, 14.]

ENTOLOMA (Lat.), n. f. (treated by botanists as m.). E^{2}n-to-(to^3)-lo'ma^3. Of Fries, a subdivision of the genus *Agaricus.* [B, 121 (α, 24).]—**E. pluteus** [Batsch]. A very poisonous species. [B, 121 (α, 24).]

ENTOMA [Aristotle] (Lat.), n. n. pl. E^{2}n'to(to^2)-ma^3. Gr., ἔντομα (from ἐντέμνειν, to cut in). Fr., *entomes.* The *Arthropoda,* exclusive of the *Crustacea.* [L, 121.]

ENTOMADERM (Ger.), n. E^{2}n'to-ma^3-de^{2}rm. From ἔντομον, an insect, and δέρμα, the skin. The chitinous investment of an insect. [L, 30 (α, 14).]

ENTOMARGINAL, adj. E^{2}n-to-ma^{3}rj'i^{2}n-a^{2}l. From ἐντός, within, and *margo,* a margin. Internal and near the margin. [" Proc. of the Zool. Soc.," 1878, p. 965 (L).]

ENTOMATOGRAPHY, n. E^{2}n-to-ma^3-to^{2}g'ra^{2}f-i^2. From ἔντομον, an insect, and γράφειν, to describe. See ENTOMOLOGY.

ENTOME (Fr.), n. A^{3}n^2-tom. 1. One of the *Entoma.* [L.] 2. Of Leroy d'Étiolles, an instrument for dividing a urethral stricture. [L, 41, 87 (α, 14).]

ENTOMERE, n. E^{2}n'to-mer. From ἐντός, within, and μέρος, a part. One of the cells resulting from germ segmentation that are destined to enter into the formation of the hypoblast. [J.]

ENTOMIASIS (Lat.), n. f. E^{2}n-to(to^3)-mi^2-a^{2}s(a^{3}s)'i^{2}s. Gen., *entomias'eos* (-*is*). From ἔντομον, an insect. Fr., *entomiase.* Any morbid condition caused by infestment with insects. [A, 322.]

ENTOMIC, ENTOMICAL, adj's. E^{2}n-to^{2}m'i^{2}k, -i^{2}k-a^{2}l. Lat., *entomicus* (from ἔντομον, an insect). Fr., *entomique.* Ger., *Insecten betreffend.* Pertaining to insects. [L, 50, 56.]

ENTOMOBIUS (Lat.), adj. E^{2}n-to-mo(mo^3)'bi^2-u^{3}s(u^{4}s). From ἔντομον, an insect, and βιοῦν, to live. Fr., *entomobe.* Parasitic on or in other insects (said of the larvæ of various species of *Diptera*). [L, 41.]

ENTOMOCÈRE (Fr.), adj. A^{3}n^2-to-mo-se^{2}r. From ἔντομος, incised, and κέρας, a horn. Having the antennæ divided into segments; as a n., in the m. pl., *e's,* a group of the *Diptera* so characterized. [L, 41.]

ENTOMOCRANIA (Lat.), n. n. pl. E^{2}n-to(to^2)-mo(mo^3)-kran-(kra^{3}n)'i^2-a^3. From ἔντομος, cut into, and κρανίον, the skull. Of Huxley, a division of fishes which retain through life the original segmentation of the cranium; made to include the genus *Amphioxus.* [L, 121; " Proc. of the Zool. Soc.," 1876, p. 58 (L).]

ENTOMOGENUS (Lat.), adj. E^{2}n-to(to^2)-mo^{2}j(mo^{2}g)'e^{2}n-u^{3}s-(u^{4}s). From ἔντομον, an insect, and γεννᾶν, to engender. Growing and living on the bodies of insects; as a n., in the f. pl., *Entomogenæ,* a section of the *Sphæriacei.* [B, 121 (α, 24); L, 42.]

ENTOMOGRAPHY, n. E^{2}n-to-mo^{2}g'ra^{2}f-i^2. Lat., *entomographia* (from ἔντομον, an insect, and γράφειν, to describe). Fr., *entomographie.* Ger., *Entomographie.* See ENTOMOLOGY.

ENTOMOID, adj. E^{2}n'to-moid. From ἔντομον, an insect, and εἶδος, resemblance. Fr., *entomoïde.* Ger., *insektenähnlich.* Resembling an insect. [L, 56.]

ENTOMOLINE, n. E^{2}n-to^{2}m'o-len. From ἔντομον, an insect. Fr., *entomoléine.* See CHITINE.

ENTOMOLITHUS (Lat.), n. m. E^{2}n-to(to^2)-mo^{2}l'i^{2}th-u^{3}s(u^{4}s). From ἔντομον, an insect, and λίθος, a stone. Fr., *entomolithe.* Ger., *Insektenversteinerung.* The fossil remains of an insect; found in amber, limestone, etc. [L, 30, 41, 50 (α, 14).]

ENTOMOLOGY, n. E^{2}n-to-mo^{2}l'o-ji^2. From ἔντομον, an insect, and λόγος, understanding. Fr., *entomologie.* Ger., *Insektenkunde, Insektenlehre.* The natural history of insects. [L, 43, 56.]

ENTOMOMÉILINE (Fr.), n. A^{3}n^2-to-mo-ma-e-len. See CHITINE.

ENTOMOMETER, n. E^{2}n-to-mo^{2}m'e^{2}t-u^{6}r. Lat., *entomometrum* (from ἔντομον, an insect, and μέτρον, a measure). Fr., *entomomètre.* Ger., *E.* Of Zenneck, an instrument for measuring the parts of insects. [L, 50.]

ENTOMOMYCETES (Lat.), n. m. pl. E^{2}n-to^{2}m-o(o^3)-mi(mu^6)-set(kat)'ez(e^{2}s). From ἔντομον, an insect, and μύκης, a fungus. Fr., *entomomycetes.* See ENTOMOPHYTA.

ENTOMON (Lat.), n. n. E^{2}n'to^{2}m-o^{2}n. Gr., ἔντομον (from ἐντέμνειν, to cut into). Fr., *entome.* See INSECT.

ENTOMOPHAGOUS, adj. E^{2}n-to-mo^{2}f'a^{2}g-u^{3}s. Lat., *entomophagus* (from ἔντομον, an insect, and φαγεῖν, to eat). Fr., *entomophage.* See INSECTIVOROUS.

ENTOMOPHILÆ (Lat.), n. f. pl. E^{2}n-to(to^2)-mo^{2}f'i^{2}l-e(a^3-e^2). Fr., *entomophiles.* Diamesogamous plants that are fertilized by the aid of insects. [Müller (α, 24).]

ENTOMOPHILOUS, adj. E^{2}n-to-mo^{2}f'i^{2}l-u^{3}s. Lat., *entomophilus* (from ἔντομον, an insect, and φιλεῖν, to love). Fr., *entomophile.* Ger., *durch Insekten befruchtet.* Fertilized (pollinated) by the agency of insects (said of plants). [B, 121 (α, 24).]

ENTOMOPHTHOREÆ (Lat.), n. f. pl. E^{2}n-to^{2}m-o^{2}f-thor-(tho^{2}r)'e^2-e(a^3-e^2). From ἔντομον, an insect, and φθείρειν, to destroy. Ger., *Entomophthoreen.* A family of insectivorous *Fungi,* allied to the *Mucorinæ.* [B, 121 (α, 24).]

ENTOMOPHYTA (Lat.), n. n. pl. E^{2}n-to^{2}m-o^{2}f'i^2(u^6)-ta^3. From ἔντομον, an insect, and φυτόν, a plant. Fr., *entomophytes.* Of Wallroth, a division of *Fungi,* parasitic on insects, comprising the *Hyphontomycetes, Entomomycetes pileati,* and *Entomo-pyrenomycetes.* [B, 121, 170 (α, 24).]

ENTOMO-PYRENOMYCETES (Lat.), n. m. pl. E^{2}n-to^{2}m-o-(o^3)-pi^2(pu^6)-ren(ran)-o(o^3)-mi(mu^6)-set(kat)'ez(a^{2}s). From ἔντομον, an insect, πυρήν, the stone of a fruit, and μύκης, a fungus. Of Wallroth, a section of the *Entomophyta,* consisting of the single genus *Kentrosporium.* [B, 121, 170 (α, 24).]

ENTOMOSTEGUS (Lat.), adj. E^{2}n-to^{2}m-o^{2}s'te^{2}g-u^{3}s(u^{4}s). From ἔντομος, divided, and στέγη, a chamber. Fr., *entomostègue.* Ger., *insektenfacherig.* Having divided cells; as a n., in the n. pl., *Entomostega,* an order of the *Foraminifera.* [L, 41, 147.]

ENTOMOSTRACOUS, adj. E^{2}n-to-mo^{2}s'tra^{2}k-u^{3}s. Lat., *entomostracus* (from ἔντομος, divided, and ὄστρακον, a shell). Fr., *entomostracé.* Having a shell consisting of several pieces, belonging to or resembling the *Entomostraca* (a subclass of the *Crustacea*). [L, 42, 121.]

ENTOMOTILLUS (Lat.), adj. E^{2}n-to^{2}m-o(o^3)-ti^{2}l'lu^{3}s(lu^{4}s). From ἔντομον, an insect, and τίλλειν, to torment. Fr., *entomotille.* Preying upon insects; as a n., in the n. pl., *Entomotilla,* a family of the *Hymenoptera.* [L, 41, 180.]

ENTOMOTOMY, n. E^{2}n-to-mo^{2}t'o^{2}m-i^2. From ἔντομον, an insect, and τέμνειν, to cut. The dissection of insects. [L, 56, 107.]

ENTOMOZOARIA (Lat.), n. n. pl. E^{2}n-to^{2}m-o(o^3)-zo-a(a^3)'-ri^2-a^3. From ἔντομον, an insect, and ζῷον, a living being. Fr., *entomozoaires.* Of De Blainville, a type of bilateral animals nearly equivalent to the *Arthropoda;* of Milne-Edwards, a division including the *Arthropoda* and *Vermes.* [L, 121.]

ENTOMOZOOLOGIE (Fr.), n. A^{3}n^2-to-mo-zo-o^{2}l-o-zhe. From ἔντομον, an insect, ζῷον, an animal, and λόγος, understanding. See ENTOMOLOGY.

ENTOMUS (Lat.), adj. E^{2}n'to^{2}m-u^{3}s(u^{4}s). Gr., ἔντομος (from ἐντέμνειν, to cut in). Cut into pieces, segmented, incised. [A, 322 (α, 21).]

ENTONIA (Lat.), n. f. E^{2}n-ton(to^{2}n)'i^2-a^3. Gr., ἐντονία (from ἐντείνειν, to strain tight). Rigidity of the voluntary muscles; in Young's classification of diseases, a genus of the *Paraneurismi.* [L, 290.]

ENTONIC, adj. E^{2}n-to^{2}n'i^{2}k. Gr., ἔντονος (from ἐντείνειν, to strain tight). Lat., *entonicus.* Ger., *entonisch.* Strained, tense, exaggerated in action, exalted. [A, 322 (α, 21); L, 56.]

ENTONNOIR (Fr.), n. A^{3}n^2-to^{2}n-nwa^{3}r. See FUNNEL and INFUNDIBULUM.—**E. brun.** A species of *Coprinus.* [B, 121 (α, 24).]—**E. membraneux.** Of Scarpa, an abnormal anus which forms a sort of funnel, wide toward the intestine and narrow at the outer aperture. [L, 88 (α, 14).]—**E. vénéneux.** The *Agaricus geotropus.* [B, 105.]

ENTONOUS, adj. E^{2}n'ton-u^{3}s. See ENTONIC.

ENTOPARASITE, n. E^{2}n-to-pa^{2}r'a-sit. From ἐντός, within, and παράσιτος, a parasite. Fr., *e.* Ger., *Entoparasit.* A parasite living in the interior of its host. [J, 137.]

ENTOPARASITIC, adj. E^{2}n-to-pa^{2}r-a-si^{2}t'i^{2}k. Living as an entoparasite; pertaining to entoparasites. [B, 146.]

ENTOPARASITISM, n. E^{2}n-to-pa^{2}r'a-sit-i^{2}z'm. Parasitism within the interior of an organism. [L, 182.]

ENTOPERIPHERAL, adj. E[2]n-to-pe[2]r-i[3]f'e[2]r-a[2]l. From ἐντός, within, and περιφέρεια, a periphery. Pertaining to the interior and the periphery. [J.]

ENTOPHTHALMIA (Lat.), n. f. E[2]n-to[2]f-tha[3]l(tha[3]l)'mi[2]-a[3]. From ἐντός, within, and ὀφθαλμία, ophthalmia. Fr., *entophthalmie.* Ger., *innere Augenentzündung.* Inflammation of the interior coats of the eyeball. [F.]

ENTOPHYLLINUS (Lat.), adj. E[2]n-to(to[3])-fi[2]l(fu[6]l)-lin(len)'u[3]s-(u[4]s). From ἐντός, within and φύλλον, a leaf. Fr., *entophylline.* Ger., *eingeschlossenblüthig.* Having the buds imbedded in the substance of the plant; as a n., in the n. pl., *Entophyllina*, a division of the *Jungermanniei.* [B, 121, 170 (α, 24); L, 41.]

ENTOPHYLLOCARPUS (Lat.), adj. E[2]n-to(to[3])-fi[2]l(fu[6]l)-lo-(lo[3])-ka[3]rp'u[3]s(u[4]s). From ἐντός, within, φύλλον, a leaf, and καρπός, a fruit. Fr., *entophyllocarpe.* Having the seeds or fruit growing in the leaves. [L, 41, 50.]

ENTOPHYTE, n. E[2]n'to-fit. See Entophyton.

ENTOPHYTEUSIS (Lat.), n. f. E[2]n-to(to[3])-fi[2]t(fu[6]t)-u[2]s'i[2]s. Gen., *entophyteu'seos (-is).* See Entophytogenesis.

ENTOPHYTIC, adj. E[2]n-to-fi[2]t'i[2]k. Lat., *entophytus.* Fr., *entophyte.* Ger., *entophytisch.* Living as an entophyton; pertaining to entophyta.

ENTOPHYTOGENESIS (Lat.), n. f. E[2]n-to(to[3])-fi[2](fu[6])-to-(to[3])-je[2]n(ge[2]n)'e[2]s-i[2]s. Gen., *entophytogenes'eos (-gen'esis).* From ἐντός, within, φυτόν, a plant, and γένεσις, generation. Fr., *entophytogénèse.* Ger., *Eingeweidepflanzenerzeugung.* Of Ritgen, the production of entophyta. [L, 41, 50.]

ENTOPHYTON (Lat.), n. n. E[2]n-to[2]f'i[2]t(u[6]t)-o[2]n. From ἐντός, within, and φυτόν, a plant. Fr., *entophyte.* Ger., *Eingeweidepflanze.* An internal vegetable parasite. The entophyta include all the vegetable parasites that infest the interior of an organism, whether in the substance of the tissues, within the circulating fluids, or on free surfaces.

ENTOPHYTOSIS (Lat.), n. f. E[2]n-to(to[3])-fi[2](fu[6])-to'si[2]s. Gen., *entophytos'eos (-is).* See Entophytogenesis.

ENTOPHYTOUS, adj. E[2]n-to[2]f'i[2]t-u[3]s. See Entophytic.

ENTOPLASTIC, adj. E[2]n-to-pla[2]st'i[2]k. 1. Forming tissue by metamorphosis of their protoplasm within themselves (said of cells). 2. Resulting from such a process. ["Quart. Jour. of Micr. Sci.," 1880, p. 307 (J).]

ENTOPLASTRON (Lat.), n. n. E[2]n-to(to[2])-pla[2]s(pla[3]s)'tro[2]n. The median and anterior membrane-bone of the thoracic-abdominal structure of the *Chelonia.* [L, 11 (α, 27).]

ENTOPLASTS, n. pl. E[2]n'to-pla[2]sts. From ἐντός, within, and πλαστός, formed. Ger., *Entoplasten, Protoplasmaflecke.* Of Whitman, the nucleated masses of protoplasm, without cell-boundaries, in the entoblasts from which the entoderm is developed in the leeches. The e's finally develop into cells and form the lining of the mesenteron. ["Jour. of Morph.," i, p. 135 (J).]

ENTOPOGONEI (Lat.), n. m. pl. E[2]n-to(to[3])-po-gon'e[2]-i(e). From ἐντός, within, and πώγων, a beard. A section of mosses in which the urn has the cilia within only. [B, 1, 121, 170 (α, 24).]

ENTOPROCTOUS, adj. E[2]n-to-pro[2]k'tu[3]s. Lat., *entoproctus.* From ἐντός, within, and πρωκτός, the anus. Having the anus situated within the lophophore; belonging to the *Entoprocta*, a subclass of the *Eupolyzoa.* [L, 121.]

ENTOPTERYGOID, adj. E[2]n-to[3]p-te[2]r'i[3]-goid. Lat., *entopterygoideus* (from ἐντός, within, πτέρυξ, a wing, and εἶδος, resemblance). Fr., *entoptérigoïde.* Wing-like and situated internally; as a n., of Owen, the pterygoid process of the sphenoid bone; of E. Coues, the internal pterygoid muscle. [L, 107.] Cf. *E.* bone.

ENTOPTIC, ENTOPTICAL, adj's. E[2]nt-o[3]p'ti[2]k, -a[2]l. Lat., *entopticus* (from ἐντός, within, and ὀπτικός, optic). Fr., *entoptique.* Ger., *entoptisch.* It., *entottico.* Sp., *entóptico.* 1. Pertaining to the interior of the eye or to entoptoscopy. [α, 17.] 2. Pertaining to the phenomena of chromatic polarization observed in quickly cooled glass. [B, 49.]

ENTOPTICS, n. sing. E[2]nt-o[3]p'ti[3]ks. Fr., *entoptique.* Ger., *Entoptik.* The science of entoptoscopy. [F.]

ENTOPTOSCOPY, n. E[2]nt-o[2]p-to[2]s'ko-pi[2]. From ἐντός, within, ὤψ, the eye, and σκοπεῖν, to view. Fr. and Ger., *Entoptoscopie.* Sp., *entoptoscopia.* It., *entottoscopia.* 1. The observation of intraocular shadows and objects. 2. The perception of circumscribed shadows of opaque particles in the dioptric media of one's own eye or of the blood-vessels of one's own retina. [F.]

ENTOPYRENES (Lat.), **ENTOPYRENIÆ** (Lat.), n's m. pl. and f. pl. E[2]n-to(to[3])-pi(pu[6])-ren(ran)'ez(as), -i[2]-e(a[3]-e[2]). From ἐντός, within, and πυρήν, a fruit-stone. Of Wallroth, a group of the *Sphœriacei*, having the perithecia (*pyrenium*) included in a common stroma. [B, 121 (α, 24).]

ENTORBITAL, adj. E[2]nt-o[3]rb'i[2]t-a[2]l. Situated on the inner portion of the orbital lobe of the brain or internally to its orbital fissure. [L, 14.]

ENTORGANISMUS (Lat.), n. m. E[2]nt-o[2]r-ga[3]n(ga[3]n)-i[2]s'mu[3]s-(mu[4]s). From ἐντός, within, and ὄργανον, an organ. Fr., *entorganisme.* Ger., *innerer Schmarotzerorganismus.* Of Grossi, an internal parasitic organism. [L, 50.]

ENTORRHINAL, adj. E[2]n-to[2]r-rin'a[2]l. From ἐντός, within, and ῥίς, the nose. Situated internally to the nose (see *E.* fissure and *E.* fold). [L, 14 (α, 29).]

ENTORSE (Fr.), n. A[3]n[2]-tors. A sprain. [L, 41, 87.]—**E. juxta-épiphysaire.** Of Ollier, an assemblage of lesions produced, in that portion of the diaphysis of a long bone bordering on the epiphysis, by forced movements of adjacent joints or by certain forms of injury to the bones themselves. ["Rev. méd.," May, 1882, p. 249.]

ENTORTILLÉ (Fr.), adj. A[3]n[3]-tor-tel-ya. See Circinal and Involute.

ENTOSCOPE, n. E[2]n'to[2]s-kop. See Endoscope.

ENTOSEPTA (Lat.), n. n. pl. E[2]n-to(to[3])-se[2]p(sap)'ta[3]. From ἐντός, within, and *septum*, a hedge. In certain corals, the septa situated within entocœles. ["Quart. Jour. of Micr. Sci.," 1885, p. 585 (L).]

ENTOSPHENOID, adj. E[2]n-to-sfen'oid. From ἐντός, within, σφήν, a wedge, and εἶδος, resemblance. Fr., *entosphénal.* Sphenoid and situated internally. [L.] Cf. *E.* bone.

ENTOSPORI (Lat.), n. m. pl. E[2]n-to[2]s'po[2]r-i(e). From ἐντός, within, and σπόρος, a seed. Of Wallroth, a group of *Fungi*, comprising those *Sporomycetes* and *Hyphomycetes* whose spores are confined in the sporangeia. [B, 121 (α, 24).]

ENTOSTEOMYCES (Lat.), n. m. E[2]nt-o[3]s-te[2]-o[2]m'i[2](u[6])-sez-(kas). Gen., *entosteomycet'os (-is).* From ἐντός, within, ὀστέον, a bone, and μύκης, a fungus. Fr., *entostéomyce.* Ger., *innere Knochenschwamm.* A fungous growth in the interior of a bone. [L, 50.]

ENTOSTETHIDIA (Lat.), **ENTOSTHIA** (Lat.), **ENTOSTHIDIA** (Lat.), n's n. pl. E[2]n-to[2]s-te[2]th(tath)-i[2]d'i[2]-a, -to[3]s'thi[2]-a[3], -to[2]s-thi[2]d'i[2]-a[3]. Gr., ἐντοστηθίδια, ἐντόσθια, ἐντοσθίδια. The intestines. [L, 50 (α, 14).]

ENTOSTHOBLAST, n. E[2]n-to[3]s'tho-bla[2]st. From ἔντοσθε, within, and βλαστός, a germ. Of Agassiz, any small granule visible within the nucleolus of a cell or ovum. [K.]

ENTOSYLVIAN, adj. E[2]n-to-si[2]l'vi[2]-a[2]n. From ἐντός, within, and *Sylvius*, the Latinized name of Jacques Dubois. Situated within the Sylvian fissure (said of a fold included in the island of Reil). [L, 14 (α, 29).]

ENTOTENTORIAL, adj. E[2]n-to-te[2]n-to'ri[2]-a[2]l. Situated internally to the tentorial fissure or convolution. [L, 14.]

ENTOTHALAMUS (Lat.), n. m. E[2]n-to(to[2])-tha[2]l(tha[3]l)'a[2]m-(a[3]m)-u[3]s(u[4]s). From ἐντός, within, and θάλαμος (see Thalamus). Of E. C. Spitzka, the inner gray thalamic zone. ["Science," April 9, 1881, p. 166 (I).]

ENTOTIC, adj. E[2]n-tot'i[2]k. From ἐντός, within, and οὖς, the ear. Fr., *entotique.* Ger., *entotisch.* Pertaining to the interior of the ear or to the perception of sound due to some condition of the auditory apparatus, and not to any cause external to the ear. [A, 521; L, 56.]

ENTOTORRHŒA (Lat.), n. f. E[2]nt-ot-o[2]r-re'(ro[2]'e[3])-a[3]. From ἐντός, within, οὖς, the ear, and ῥεῖν, to flow. Fr., *entotorrhée.* Ger., *inneres Ohrenlaufen.* Internal otorrhœa. [L, 50 (α, 21).]

ENTOTROCHANTER (Lat.), n. m. E[2]n-to(to[3])-tro(tro[2])-ka[2]n-(ch[2]a[3]n)'tu[5]r(tar). Gen., *entotrochanter'os (-is).* From ἐντός, within, and τροχαντήρ, a trochanter. The lesser trochanter of the femur. [L.]

ENTOTYMPANIC, adj. E[2]n-to-ti[2]m-pa[2]n'i[2]k. From ἐντός, within, and τύμπανον (see Tympanum). Situated within the tympanum. [α, 29.]

ENTOURANT (Fr.), adj. A[3]n[2]-tu-ra[3]n[3]. See Circumdans.

ENTOXICATIO (Lat.), **ENTOXICISMUS** (Lat.), **ENTOXISMUS** (Lat.), n's f. and m. E[2]n-to[2]x-i[2]-ka(ka[3])'shi[2](ti[2])-o, -i[2]-si[2]z-(ki[2]s)'mu[3]s(mu[4]s), -i[2]z(i[2]s)'mu[3]s(mu[4]s). From ἐν, in, and τοξικόν, poison. See Intoxication and Poisoning.

ENTOZÆNA (Lat.), n. f. E[2]n-to(to[2])-ze'(za[3]'e[2])-na[3]. From ἐντός, within, and ὄζαινα, a fœtid smell. Fr., *entozène.* See Ozæna.

ENTOZOA (Lat.), n. n., pl. of *entozoon* (*q. v.*). E[2]n-to(to[3])-zo'a[3]. See also Metazoa.

ENTOZOAL, ENTOZOIC, adj's. E[2]n-to-zo'a[2]l, -i[3]k. Pertaining to the *Entozoa*, of the nature of an entozoon. [L, 56.]

ENTOZOOGENESIS (Lat.), n. f. E[2]n-to(to[3])-zo-o(o[3])-je[2]n-(ge[2]n)'e[2]s-i[2]s. Gen., *entozoogenes'eos (-gen'esis).* From ἐντός, within, ζῷον, an animal, and γένεσις, generation. Fr., *entozoögénésie, entozoögénèse.* Ger., *Eingeweidethiererzeugung.* Of Ritgen, the generation of entozoa. [L, 41, 50 (α, 14).]

ENTOZOOLOGY, n. E[2]n-to-zo-o[2]l'o-ji[2]. From ἐντός, within, ζῷον, an animal, and λόγος, understanding. Fr., *entozoölogie.* Ger., *Eingeweidewürmerlehre.* The natural history of entozoa.

ENTOZOON (Lat.), n. n. E[2]n-to-zo'o[2]n. From ἐντός, within, and ζῷον, an animal. Fr., *e., entozoaire.* Ger., *E., Eingeweidewurm.* It., *entozoo.* Sp., *entozoario.* An internal animal parasite. The entozoa comprise all the animal parasites that infest the interior of the body, whether within the tissues, in the circulating fluids, or upon a free surface (see also Metazoa).—**E. folliculaire, E. folliculorum.** Of E. Wilson, the *Demodex folliculorum.*

ENTOZOOSIS (Lat.), n. f. E[2]n-to(to[2])-zo-o'si[2]s. Gen., *entozoos'eos (-is).* From ἐντός, within, and ζώωσις, a making alive. See Entozoogenesis.

ENTPOLARISIRUNG (Ger.), n. E[2]nt-po-la[3]r-e-zer'un[2]. See Depolarization.

ENTRAILS, n. pl. E[3]n'tralz. Fr., *entrailles.* Ger., *Eingeweide.* It., *viscere.* Sp., *entrañas.* The internal organs of an animal, especially the stomach and intestines. [C.]

ENTRAÎNEMENT (Fr.), n. A[3]n[2]-tre[2]n-ma[3]n[3]. Gymnastic exercise. [L, 41 (α, 14).]

ENTRANCEMENT, n. E[3]n-tra[3]ns'me[3]nt. An old term for apoplexy. [L. 290.]

ENTRAVES (Fr.), n. pl. A^{3}n^2-tra^{3}v. Cords, straps, etc., for binding an animal in a certain posture for purposes of examination or operation. [A, 301 (*a*, 21).]

ENTRECÔTE (Fr.), n. A^{3}n^{2}tr'kot. The muscles, etc., which occupy the intercostal spaces. [A, 385 (*a*, 21).]

ENTRECOUPÉ (Fr.), adj. A^{3}n^{2}tr'ku-pa'. Interrupted. [A, 301 (*a*, 21).]

ENTRECOUPER (Fr.), v. intr. A^{3}n^{2}tr'ku-pa. To interfere (said of horses). [L, 41.]

ENTRE-CROISEMENT (Fr.), n. A^{3}n^{2}tr'-krwa^{3}z-ma^{3}n^2. See DECUSSATION.

ENTRE-DEUX (Fr.), n. A^{3}n^{2}tr'-du^5. See ENTRE-FESSES.

ENTRÉE (Fr.), n. A^{3}n^2-tra. An entrance.—**E. de l'aquéduc de Sylvius, E. de l'entonnoir.** The entrance to the Sylvian aqueduct. [I, 39.]—**E. extérieure de la matrice.** An old term for the vulva. [A, 44.]

ENTREFEGOS, n. In Languedoc, the potato (*Solanum tuberosum*). [B, 88 (*a*, 14).]

ENTREFEL, n. In Languedoc, the genus *Trifolium*. [B, 121 (*a*, 24).]

ENTRE-FESSES (Fr.), n. A^{3}n^{2}tr'-fe^{2}s. In the cow, a mass of fat situated immediately behind the udder. [A, 301 (*a*, 21).]

ENTREFESSON (Fr.), n. A^{3}n^{2}tr'fe^{2}s-so^{2}n^2. From *entre*, between, and *fesse*, the buttock. 1. Intertrigo of the cleft of the buttocks. [G.] 2. The perinæum. [A, 518.]

ENTREFEUILLE (Fr.), n. A^{3}n^{2}tr'fu^6-el-y'. A secondary leaf growing at the axis of a primary leaf. [L, 41.]

ENTREGREFFÉ (Fr.), adj. A^{3}n^{2}tr'gre^{2}f-fa. See COALESCENT.

ENTRE-NŒUD (Fr.), n. A^{3}n^{2}tr'nu^5. See INTERNODE.

ENTREVADIS, ENTREVIGES, ENTREVIGNES, ENTREVŒDISSO, n's. In Provence, the *Clematis flammula*. [B, 121 (*a*, 24).]

ENTRICHIASIS (Lat.), n. f. E^{2}n-tri^2-ki^2(ch^{2}i^2)-as(a^{3}s)'i^{2}s. Gen., *entrichias'eos* (*-is*). From ἐν (see *In-**), and τριχίασις, a disease of the eyelids. See TRICHIASIS.

ENTRICHOMA (Lat.), n. n. E^{2}n-tri^2-ko(ch^{2}o)'ma^3. Gen., *entrichom'atos* (*-is*). From ἐν, in, and τρίχωμα, a growth of hair. Ger., *Haarrand der Augenlider* (1st def.). 1. An old name for the tarsus and the ciliary edge of the eyelid with the cilia. [F.] 2. See TRICHIASIS.

ENTRINDET (Ger.), adj. E^{2}nt-ri^{2}nd'e^{2}t. See DECORTICATED (1st def.).

ENTR'OPERCULE (Fr.), n. A^{3}n^2-tro-pe^{2}r-ku^{6}l. The bony part of the head of a fish situated behind the inferior maxillary bone. [L, 42.]

ENTROPION (Lat.), **ENTROPIUM** (Lat.), n's n. E^{2}n-trop(tro^{2}p)'i^{2}o^{2}n, -u^{3}m(u^{4}m). From ἐντρέπειν, to turn inward. Fr., *entropion*. Ger., *Entropium, Einwärtskehrung*. An inversion or turning in (usually applied to the ciliary margin of the eyelid). [A, 326 (*a*, 21); F.]—**Entropion aigu** (Fr.). E. of the eyelid produced by an acute spasm of the orbicular muscle. [L, 41, 87 (*a*, 14).]—**E. bulbale.** E. of the eyelid in which the contracting process involves the tarsal and ocular conjunctiva and also the retrotarsal fold. In this case the entire lid may be inverted. [F.]—**E. cicatriciale.** Fr., *entropion cicatriciel*. Ger., *narbiges E.* E. resulting from cicatricial contraction. [F.]—**E. der Greise** (Ger.). See *E. senile*.—**E. musculare.** Fr., *entropion musculaire*. Ger., *musculäres E.* E. of the eyelid occurring in consequence of some irritation which affects the conjunctiva or cornea, or of some disease of the eyeball causing pain and reflex contraction of the orbicular muscle. It usually occurs in the lower lid and in advanced years. [F.]—**E. organicum.** E. of the eyelid caused by contraction of the lid following diphtheritic or gonorrhœal conjunctivitis or a cicatricial formation. [A, 326 (*a*, 21).]—**E. palpebræ.** E. of the eyelid.—**E. senile.** Fr., *entropion sénile*. Ger., *E. der Greise*. 1. E. of the eyelid due to shrinking of the globe of the eye in old age. [L, 41, 87 (*a*, 14).] 2. See *E. musculare*.—**E. spasmodicum, E. spasticum.** See *E. musculare*.—**E. tarsale.** Fr., *entropion tarsale*. Ger., *tarsales E.* E. of the lid, in which the contracting or cicatricial process is mainly confined to the tarsus which is curved in upon itself; usually the result of long-continued granular conjunctivitis. [F.]—**Introsusceptic e.** See *E.*

ENTROPY, n. E^{2}n'tro^{2}p-i^2. Fr., *entropie*. Ger., *Entropie*. Of Clusius, that portion of the energy of a body or of a system which can no longer be converted into mechanical work. [B, 49.]

ENTR'OUVERT (Fr.), adj. A^{3}n^2-tru-ve^{2}r. 1. Partly open. 2. Of the veterinarians, sprained in the shoulder joint. [A, 474.]

ENTR'OUVERTURE (Fr.), n. A^{3}n^2-tru-ve^{2}r-tu^{6}r. See ÉCART.

ENTSÄUERUNG (Ger.), n. E^{2}nt-zoi'e^{2}r-un^2. Deoxidation. [L, 80.]

ENTSCHEIDEND (Ger.), adj. E^{2}nt-shid'e^{2}nd. See CRITICAL.

ENTSCHEIDUNG (Ger.), n. E^{2}nt-shid'un^2. See CRISIS.—**E'slinien.** See LINEÆ *discriminales*.—**Langsame E.** See LYSIS.

ENTSCHLÜPFUNG (Ger.), n. E^{2}nt-shlu^{6}pf'un^2. An involuntary discharge (*e. g.*, of semen). [L, 80.]

ENTSCHWEFELN (Ger.), v. E^{2}nt-shwaf'e^{2}l'n. To desulphurize. [B.]

ENTSCHWEFELUNG (Ger.), n. E^{2}nt-shwaf'e^{2}l-un^2. Desulphuration. [B.]

ENTSCHWELLUNG (Ger.), n. E^{2}nt-shwe^{2}l'un^2. See DETUMESCENCE.

ENTSPANNER (Ger.), n. E^{2}nt-spa^{3}n'ne^{2}r. A laxator muscle. [A, 521.]

ENTSPANNUNG (Ger.), n. E^{2}nt-spa^{3}n'nun^2. Relaxation, atony. [A, 521.]—**E'snaht.** See *Relief* SUTURE.—**E'sschnitt.** See *Relief* INCISION.

ENTSTEHEND (Ger.), adj. E^{2}nt-sta'he^{2}nd. 1. Springing from. 2. Nascent.

ENTSTEHUNG (Ger.), n. E^{2}nt-sta'hun^2. Nascency, genesis. [L, 80.]—**E'szustand.** Nascency, the nascent state. [A, 521.]

ENTSTELLUNG (Ger.), n. E^{2}nt-ste^{2}l'un^2. See DEFORMITY.

ENTWÄSSERT (Ger.), adj. E^{2}nt-vas'se^{2}rt. Deprived of water, rendered anhydrous. [A, 521.]

ENTWÄSSERUNG (Ger.), n. E^{2}nt-vas'se^{2}r-un^2. 1. Dehydration. [A, 521.] 2. See DRAINAGE (2d def.).

ENTWICKELUNG (Ger.), **ENTWICKLUNG** (Ger.), n's. E^{2}nt-vi^{2}k'e^{2}l-un^2, -lun^2. See DEVELOPMENT, EVOLUTION, and DELIVERY (1st def.).—**E'sbedingung.** A condition of development. [A, 521.]—**E'senergie.** The "specific energy" of development. [Marchand (A, 319).]—**E'sfähig.** Capable of development.—**E'sfehler.** A defect of development. [A, 521.]—**E'sfieber.** See ANAPHYTOPYRA.—**E'sgang.** The process of development. [A, 521.]—**E'sgeschichte.** See EMBRYOLOGY.—**E'sgesetz.** A law of development. [A, 521.]—**E'shemmend.** Hindering development. [A, 521.]—**E'shemmung.** A restriction of development (as after castration). [Samuel (A, 319).]—**E'skraft.** See *E'senergie*.—**E'skrankheiten.** Diseases due to defective development. [Samuel (A, 319).]—**E'slehre.** The doctrine of evolution. [L, 80.]—**E'smodus.** A mode of development. [A, 521.]—**E'speriode.** A period of development. [A, 521.]—**E'sprocess.** A process of development. [D, 4.]—**E'sreihe.** A series of developmental processes. [A, 521.]—**E'sstadium.** A stage of development. [A, 521.]—**E'sstörung.** Derangement of development. [A, 521.]—**E'sstufe.** A step in development. [A, 521.]—**E'szeit.** See *E'speriode*.—**Fälschung der E.** See CENOGENESIS.

ENTWÖHNEN (Ger.), v. tr. E^{2}nt-vu^{6}n'e^{2}n. 1. To give up a habit or the exercise of a function. 2. To wean. [A, 521.]

ENTWÖHNUNG (Ger.), n. E^{2}nt-vu^{6}n'un^2. 1. See APETHESIS. 2. Weaning. [A, 521.]

ENTWURZELN (Ger.), **ENTWURZELUNG** (Ger.), n's. E^{2}nt-vurtz'e^{2}ln, -e^{2}l-un^2. Eradication. [A, 521.]

ENTYPOSIS (Lat.), n. f. E^{2}n-ti^2(tu^6)-po'si^{2}s. Gr., ἐντύπωσις (from ἐντυποῦν, to carve upon). Fr., *entypose*. An old name for the glenoid cavity of the scapula. [L, 41, 50.]

ENTZIEHUNG (Ger.), n. E^{2}nt-tse'hun^2. A withdrawal, withholding, deprivation, abstraction. [A, 450.]—**Blute'.** Bloodletting.—**E. der Wärme.** Abstraction of heat. [L, 80.]—**E'sdiät.** A restricted diet. [Kisch (A, 319).]—**E'skur.** A course of treatment by restriction of the diet. [A, 521.]

ENTZÜCKUNG (Ger.), n. E^{2}nt-tsu^{6}k'un^2. See ECSTASY.

ENTZÜNDBAR (Ger.), adj. E^{2}nt-tsu^{6}nd'ba^{3}r. Inflammable. [L, 43.]

ENTZÜNDEN (Ger.), v. tr. and intr. E^{2}nt-tsu^{6}nd'e^{2}n. 1. (Tr.) to burn, to irritate. [A, 521.] 2. (Intr.) to be inflamed. [L, 80.]

ENTZÜNDET (Ger.), adj. E^{2}nt-tsu^{6}nd'e^{2}t. Inflamed. [L, 46, 80.]

ENTZÜNDLICH (Ger.), adj. E^{2}nt-tsu^{6}nd'li^{2}ch^2. See INFLAMMATORY.

ENTZÜNDUNG (Ger.), n. E^{2}nt-tsu^{6}nd'un^2. See INFLAMMATION.—**Adere'.** See PHLEBITIS.—**Aftere'.** See PROCTITIS.—**Allgemeine E.** Inflammation of all the structures of a part. [L, 80.]—**Aortene'.** See AORTITIS.—**Augene'.** See OPHTHALMIA.—**Bauchfelle'.** See PERITONITIS.—**Blasene'.** See CYSTITIS.—**Blasenhalse'.** See CYSTAUCHENITIS.—**Blatternaugene'.** See CONJUNCTIVITIS *variolosa*.—**Blutgefässe'.** See ANGEITIS.—**Brustdrüsene'.** See MASTITIS.—**Brustfelle'.** See PLEURISY.—**Cubitaldrüsene'.** See ADENITIS *cubitalis*.—**Drüsenbindehaute'.** See ADENOLOGADITIS.—**Drüsene'.** See ADENITIS.—**Dünndarme'.** Inflammation of the small intestine. [B.]—**Eierstocke'.** See OOPHORITIS.—**E'sartig.** Inflammatory.—**E'sbeule.** See ABSCESS.—**E'serreger.** An exciting cause of inflammation. [A, 521.]—**E'sfell.** See BUFFY COAT.—**E'shaut.** See BUFFY COAT.—**E'sheerd.** An inflammatory focus.—**E'skrust.** See BUFFY COAT.—**E'slymphe.** See *Inflammatory* LYMPH.—**E'sreiz.** Inflammatory irritation. [D.]—**E'sresiduum.** The relics of a former inflammation. [A, 521.] See *Residual* ABSCESS.—**E'srinde.** See BUFFY COAT.—**E'svorgang.** An inflammatory process. [A, 521.]—**E'swall.** The inflammatory wall-like exudation surrounding the cavity of an abscess.—**E'swidrig.** Antiphlogistic. [L, 80.]—**E'szeitraum.** A stage of inflammation. [L, 80.]—**Gichtische E.** Gouty inflammation. [L, 80.]—**Undeutliche E.** Latent inflammation. [L, 80.]—**Zerstreute E.** Diffuse inflammation. [A, 322 (*a*, 21).]

ENUCLEATION, n. E-nu^2-kle-a'shu^{3}n. Lat., *enucleatio* (from *enucleare*, to shell out). Fr., *énucléation*. Ger., *E.*, *Ausschälung*. It., *enucleazione*. Sp., *enucleación*. The process by which a tumor or the like is removed or becomes detached by mere separation from the surrounding parts, without any cutting or with only very little; so called from its resemblance to the escape of a kernel from a nut when the shell is broken.—**E. of the eye.** Lat., *enucleatio bulbi*. Fr., *énucléation de l'œil*. Ger., *E.* (oder *Ausschälung*, oder *Auslösung*) *des Auges* (oder *des Augapfels*). The removal of the eyeball, leaving all the rest of the orbital tissues in place. [F.]—**Spontaneous e.** The process by which a fibrous tumor of the uterus is detached and expelled by the contraction of the surrounding muscular tissue. [L, 20 (*a*, 14).]

ENUCLEATOR (Lat.), n. m. E(a)-nu2(nu4)-kle2-a(a3)'to2r; in Eng., e-nu2'kle-a-to2r. Gen., *enucleator'is.* An instrument for effecting enucleation. [E.] Cf. *Serrated* SCOOP.

ENUCLEOLAR, adj. E-nu2-kle'o-la3r. From *e* priv., and *nucleolus* (*q. v.*). Fr., *énucléolaire.* Lacking a nucleolus, non-nucleolated (said of cells). [J.]

ENULA (Lat.), n. f. E2n'u2(u4)-la3. 1. Of Necker, the genus *Inula.* 2. See INULA *helenium.* [α, 24.]—**E. campana.** The *Inula helenium.* [B, 121, 173 (α, 24).]—**Extractum enulæ** [Finn. Ph., Swiss Ph.]. See *Extractum* HELENII.—**Syrupus enulæ.** Fr., *sirop d'aunée.* Ger., *Alantsyrup.* A syrup made of a strained mixture of 3 parts of juice of the root of *Inula helenium* and 5 of white sugar. [B, 119.]—**Unguentum enulæ.** See *Unguentum* INULÆ.—**Vinum enulæ.** Fr., *vin d'aunée* [Fr. Cod.]. Syn.: *vinum enulatum.* A preparation made by macerating the rhizome of *Inula helenium* in 2 parts of white wine [Sard. Ph., 1773], or by mixing 2 parts of tincture of *Inula helenium* with 25 of red wine [Ph. French Hosp., 1839]. [B, 119.] See also *Vin d'*AUNÉE.

ENULA (Lat.), n. n. pl. E2n-u2(u)'la3. Gr., ἔνουλα. The inner surfaces of the gums. [A, 387.]

ENULATUS (Lat.), adj. E2n-u2(u4)-lat(la3t)'u3s(u4s). Containing or made with elecampane. [B.] See VINUM *enulatum.*

ENULIS (Lat.), **ENULISMUS** (Lat.), n's f. and m. E2n-u2(u)'li2s, -u2(u)-li2z(li2s)'mu3s(mu4s). From ἔνουλος, curly. Ger., *Kräuseln.* The curling of anything, especially the hair. [L, 50 (α, 14).]

ENULON (Lat.), n. n. E2n-u2(u)'lo2n. Gr., ἔνουλον. The inner surface of the gums. [L, 84.]

ENURESIS (Lat.), n. E2n-u2(u)-re(ra)'si2s. Gen., *enures'eos (-is).* From ἐνουρεῖν, to make water in. Fr., *enurésie.* Ger., *Unvermögen den Harn zu halten, Einpissen.* It., *enuresi.* Sp., *e.* Involuntary micturition. [D.]—**E. atonica** [Cullen]. E. from debility. [L, 290.]—**E. continua.** Incontinence of urine persisting both night and day. [α, 29.]—**E. diurna.** Incontinence of urine occurring during the day. [α, 29.]—**E. irritata** [Cullen]. E. from irritability. [L, 290.]—**E. mechanica.** E. from mechanical causes. [L, 80.]—**E. nocturna.** Fr., *enurésie nocturne.* Nocturnal incontinence of urine. [D, 29.]—**E. paralytica, E. paralyticorum.** Ger., *paralytische E.* E. associated with paralysis of the bladder. [D, 70.]—**E. spastica.** E. due to spasm of the bladder. [A, 326 (α, 14).]

ENVAHISSEMENT (Fr.), n. A3n2-va3-es-ma3n2. See INVASION.

ENVAL (Fr.), n. A3n2-va3l. A place in the department of Puy-de-Dôme, France, where there is a gaseous, slightly alkaline spring. [L, 87 (α, 14).]

ENVELOPE, n. A3n've2l-op. Lat., *integumentum.* Fr., *enveloppe.* Ger., *Decke.* It., *invoglio, inviluppo.* Sp., *envolvedero, cubierta.* An investing membrane, sheet, or layer.—**Floral e's.** Lat., *integumenta floralia.* Fr., *enveloppes florales.* Ger., *Blüthendecke.* The protective coverings of a flower, consisting of the calyx and corolla; called collectively the perianth or perigone. [B, 77, 121, 123 (α, 24).]—**Fœtal e's.** Lat., *velamenta ovi, velamina infantis.* Fr., *enveloppes de l'œuf* (ou *du fœtus*). Ger., *Eihüllen des Fötus.* It., *inviluppi fetali.* Sp., *membranas cobertoras del feto.* Syn.: *fœtal membranes.* The membranes that envelop the fœtus; the chorion and the amnion. [A, 11.]—**Medullary e.** Fr., *enveloppe médullaire.* The medullary sheath of a nerve-fibre. [J, 83.]—**Nuclear e.** See *Nuclear* MEMBRANE.—**Serous e. of the ovum.** Of von Baer, the subzonal membrane.

ENVELOPING, adj. E2n-ve2l'op-i2n2. Lat., *involutans.* Fr., *enveloppant.* Ger., *bedeckend, überkleidend.* Surrounding (said of leaves around a stem or in æstivation). [B, 1, 123 (α, 24).]

ENVELOPPE (Fr.), n. A3n2-ve2-lop. See ENVELOPE and INVOLUCRUM.—**E. cellulaire.** Of Mirbel, the cellular tissue immediately under the cortical layer of dicotyledons. [B, 1 (α, 24).]—**E's florales.** See *Floral* ENVELOPES.—**E. herbacée.** See *E. cellulaire.*—**E. séminale.** The envelope of a seed-kernel. [B, 1 (α, 24).]—**E. subéreuse.** A vegetable layer or parenchyma that assumes the character of cork (cortical tissue). [B, 1 (α, 24).]

ENVENIMATION (Fr.), n. A3n2-ve2-ne-ma3-se-o3n2. The introduction and action of the poison of serpents. [A, 385 (α, 21).]

ENVENIMÉ (Fr.), adj. A3n2-ve2-ne-ma. Poisoned with venom. [A, 301.]

ENVERGURE (Fr.), n. A3n2-ve2r-gu6r. The width of the extension of a bird's wings when they are spread to fly. [L, 41.]—**Grande e.** The distance from the middle finger of one hand to that of the other, the arms being extended as far as possible. [L, 49.]

ENVIE (Fr.), n. A3n2-ve. 1. A hang-nail. 2. An urgent desire. 3. A birth-mark. [L, 41, 105 (α, 14).]—**E. des femmes enceintes.** The longing for certain fruits or foods experienced by pregnant women. [L, 41.]—**E. d'uriner.** An urgent desire to urinate.

ENVINASSA, n. In Provence, the *Agaricus campestris.* [B, 121 (α, 24).]

ENVOILURE (Fr.), n. A3n2-vwa3-lu6r. A slight curve in the plane of the blade of a pair of scissors. [A, 385 (α, 21).]

ENXOFRE (Port.), n. E2n-sho'fra. The commercial term for sulphur. [L, 77 (α, 14).]

ENYDROS (Lat.), adj. E2n'i2(u6)-dro2s. Gr., ἔνυδρος (from ἐν, in, and ὕδωρ, water). Living in water, containing much water; as a n., an ætite, or eagle-stone, containing water. [L, 50 (α, 14).]

ÉNYPNALISME (Fr.), n. A-nep-na3-li2z'm. From ἐνύπνιον, a dream. Animal magnetism. [L, 41.]

ENYPNION, n. n. E2n-i2p(u6p)'ni2-o2n. Gr., ἐνύπνιον (from ἐν, in, and ὕπνος, sleep). Lat., *insomnium.* Fr., *rêve.* Ger., *Traum.* It., *sogno.* Sp., *sueño.* A dream. [L, 50, 94.]

ÉNYPNIOTISME (Fr.), n. A-nep-ne-o-ti2z'm. Magnetic sleep. [L, 41.]

ENYSTRON (Lat.), n. n. E(a)-ni2s(nu6s)'tro2n. Gr., ἤνυστρον. Fr., *caillette.* Ger., *Labmagen.* It., *caglio.* Sp., *cuajar.* See ABOMASUM.

ENZIAN (Ger.), n. E2n-tse-a3n'. The genus *Gentiana.* [B, 180 (α, 24).]—**Bärtiger E.** The *Gentiana barbata.* [B, 180 (α, 24).]—**Bitterer E.** The *Gentiana amarella.* [B, 180 (α, 24).]—**Deutscher E.** The *Gentiana germanica.* [B, 180 (α, 24).]—**Edler E.** The *Gentiana lutea.* [B, 180 (α, 24).]—**E'extrakt.** See *Extractum* GENTIANÆ.—**E'gewächse.** The *Gentianaceæ.* [B.]—**E'tinctur** [Ger. Ph.]. See *Tinctura* GENTIANÆ.—**E'wurzel.** Gentian-root; the root of *Gentiana lutea,* and other species used instead of it. [B, 180 (α, 24).]—**Felde'.** The *Gentiana campestris.* [B, 180 (α, 24).]—**Gebräuchlicher E.** The *Gentiana lutea.* [B, 180 (α, 24).]—**Gelber E.** Yellow or red gentian-root; the root of *Gentiana lutea, Gentiana punctata, Gentiana pannonica,* or *Gentiana purpurea.* [B, 180 (α, 24).]—**Gemeiner E.** The *Gentiana lutea.* [B, 180 (α, 24).]—**Geöhrter E.** The *Gentiana auriculata.* [B, 180 (α, 24).]—**Grosser E.** The *Gentiana lutea.* [B, 180 (α, 24).]—**Herbste'.** The *Gentiana amorella.* [B, 180.]—**Kreuz-E.** The *Gentiana cruciata.* [B, 180 (α, 24).]—**Lungene'.** The *Gentiana pneumonanthe.* [B, 180 (α, 24).]—**Niedriger E.** The *Gentiana humilis.* [B, 180 (α, 24).]—**Punktirter E.** The *Gentiana punctata.* [B, 180 (α, 24).]—**Purpurrother E.** The *Gentiana purpurea.* [B, 180 (α, 24).]—**Rother E.** See *Gelber E.*—**Schwalbenwurzartiger E.** The *Gentiana asclepiadea.* [B, 180 (α, 24).]—**Seifenkrautblättriger E.** The *Gentiana saponaria.* [B, 180 (α, 24).]—**Spitziger E.** The root of *Gentiana purpurea.* [B, 180.]—**Stengelloser E.** The *Gentiana acaulis.* [B, 180 (α, 24).]—**Stumpfblättriger E.** The *Gentiana obtusifolia.* [B, 180 (α, 24).]—**Ungarischer E.** The *Gentiana pannonica.* [B, 180 (α, 24).]—**Weisse E'wurzel.** The root of *Laserpitium latifolium.* [B, 180.]—**Weisser E.** 1. Dog's excrement. See ALBUM *græcum.* 2. The *Laserpitium latifolium.* [B, 180 (α, 24).]

ENZOON (Lat.), n. n. E2n-zo'o2n. From ἐν, in, and ζῷον, an animal. See ENTOZOON.

ENZOONOMIA (Lat.), n. f. E2n-zo-o(o3)-nom(no2m)'i2-a3. From ἐν, in, ζῷον, an animal, and νόμος, a law. See ENTOZOOLOGY.

ENZOOTIA (Lat.), n. n. pl. E2n-zo-ot'i2-a3. From ἐν, among, and ζῷον, an animal. Fr., *enzooties.* Ger., *Enzootien, Landesviehseuchen.* Enzootic diseases. [L, 41, 43, 50, 135 (α, 14).]

ENZOOTIC, adj. E2n-zo-o2t'i2k. Lat., *enzooticus.* Fr., *enzoötique.* Ger., *enzootisch.* Prevailing among the lower animals of a certain district (said of diseases). [L, 43, 50 (α, 14).]

ENZYMÄMIE (Ger.), n. E2n-tsu6-ma-me'. From ἐν, in, ζύμη, a ferment, and αἷμα, blood. Infection of the blood with a ferment. ["Arch. f. Anat. u. Phys.," 1879 (Phys.), p. 30 (L).]

ENZYME, n. E2n'zim. From ἐν, within, and ζύμη, leaven. A ferment formed within the animal body. [B, 11.]

ENZYMIC, adj. E2n-zi2m'i2k. Pertaining to an enzyme. [B, 11.]

ENZYMOSIS (Lat.), n. f. E2n-zi(zu6)-mo'si2s. Gen., *enzymos'eos (-is).* From ἐν, in, and ζύμωσις, fermentation. Fermentation produced by an enzyme. [B, 11.]

EOLIPYLE, n. E-o2l'i2-pil. See ÆOLIPYLE.

EON (Lat.), n. m. and f. E(a)'o2n(on). See ÆON.

ÉONÉ (Fr.), n. A-o-na. A plant found in Brazil (the *mucura-e-ha* of the Tecuna Indians), resembling the *Amaranthaceæ* (perhaps *Petiveria tetrandra*). The bark enters into the composition of curare. [A, 385 (α, 21); B, 121 (α, 24); Joubert, "Proc. of the Am. Pharm. Assoc.," xxvi (α, 14).]

EOROO, n. In Tahiti, the fruit of *Artocarpus incisa.* [B, 88 (α, 14).]

EOSIN, n. E'o-si2n. From ἠώς, the dawn. Fr., *éosine.* Ger., *E.* It., Sp., *eosina.* Tetrabromfluorescein, $C_{20}H_8Br_4O_5$, a 4-atom bromine substitution product of fluorescein; a brownish-red powder which crystallizes from its solution in acetic acid in yellow prisms; used as a staining agent in microscopy. [B, 4 (α, 27).]

EOSINOPHILOUS, adj. E-o-si2n-o2f'i2l-u3s. From ἠώς (see EOSIN), and φιλεῖν, to love. Fr., *éosinophile.* Ger., *eosinophil.* Of Ehrlich, easily colored by eosin (said of cells and granules). [K, 6.]

EOUI, n. In Tahiti, the *Dioscorea alata.* [B, 46, 88 (α, 14).]

EOUNO, EOURRÉ, n's. In Provence, the *Hedera helix.* [B, 88 (α, 14).]

EOUSE, n. In Languedoc, the *Quercus ilex.* [B, 121 (α, 24).]

EOUSINE, n. In Languedoc, the acorns of *Quercus ilex.* [B, 121 (α, 24).]

EOUSSES, n. In Languedoc, the *Sambucus ebulus.* [B, 121 (α, 24).]

ÉOUVÉ (Fr.), n. A-u-va. The *Pinus cembra.* [B, 121, 173 (α, 24).]

EPACIHUITL [Mex. Ph.], n. The *Croton dioicus.* [A, 447 (α, 21).]

EPACMASTICOS (Lat.), **EPACMASTICUS** (Lat.), adj's. E2p-a2k(a3k)-ma2s(ma3s)'ti2-ko2s, -ku3s(ku4s). Gr., ἐπακμαστικός (from ἐπί, upon, and ἀκμάζειν, to be in full bloom). Fr., *épacmastique.* Ger., *epakmastisch.* See ANABATIC.

EPACME (Lat.), n. f. E2p-a2k(a3k)'me(ma). Gr., ἐπακμή (from ἐπί, upon, and ἀκμή, a summit). Fr., *épacme.* Ger., *Zunahme.* 1. Vigor; over-activity. 2. An exacerbation in an acute disease. 3. The approach of an acute disease to its crisis. [A, 322 (α, 30); A, 385 (α, 21); L, 41, 135 (α, 14).]

EPACREÆ (Lat.), n. f. pl. E2p-a2k(a3k)'re2-e(a3 e2). Fr., *épacréées.* Of Reichenbach, a subdivision (of Dumortier and

others, a tribe; of Spach, a section) of the *Epacrideæ* (*Epacridaceæ* [Lindley]), comprising the *Richeaceæ*, *Sprengeliaceæ*, and *Lysinemaceæ* (or the *Richeeæ*, *Sprengelieæ*, *Lysinemeæ*, *Epacris*, etc.), and having a capsular, many-seeded fruit. The *Epacridaceæ* of Lindley (Fr., *épacridacées*) are an order of the *Ericales*, comprising the *Stypheliеæ* and *E.*; of R. Brown, an order of monopetalous dicotyledons comprising *Styphelia*, *Richea*, etc.; of Agardh, an order of the *Aridifoliæ*; of Reichenbach, a division of the *Primuleæ* (in 1828, a division of the *Lysimachiaceæ*), comprising the *Stypheliaceæ* and *E.*; of Link, a suborder of the *Ericaceæ*, consisting of *Epacris*; of Dumortier, a family of the *Ericarieæ*, including the *E.* and *Stenanthereæ*. The *Epacrideæ* of Lindley (Fr., *épacridées*) are an order of the *Monopetaleæ* (or of the *Ericineæ* [Bartling, Meissner], or *Ericaceæ* [Don], or *Ericales* [Bentham and Hooker]). The *Epacrieæ* of Don are a tribe of the *Epacridaceæ*. [B, 19, 42, 121, 170 (α, 24).]

EPACROS (Lat.), adj. E2p-a2k(a3k)'ro2s. Gr., ἔπακρος (from ἐπί, upon, and ἄκρα, the highest point). Of Hippocrates, pointed at the end. [A, 325 (α, 21).]

EPACTAL, adj. E2p-a2k'ta2l. From ἔπακτος, brought on. Lat., *epactalis*. Fr., *épactal*. Ger., *e.* Adventitious (see *E.* CARTILAGES); as a n., a Wormian bone that sometimes takes the place of the superior corner of the parietal bone. [A, 387, 518.]

EPAGOGE (Lat.), n. f. E2p-a3-go'je(ga). Gen., *epagog'es*. Gr., ἐπαγωγή (from ἐπάγειν, to bring in). 1. An introduction, a falling into. 2. A pressure, congestion. [L, 50 (α, 14).]

EPAGOGIITIS (Lat.), n. f. E2p-a3-go-ji2(gi2)-i(e)'ti2s. Gen., *epagogiit'idos* (*-is*). From ἐπαγώγιον, the prepuce (see also *-itis**). Ger., *Vorhautentzündung*. See POSTHITIS.

EPAGOGIOCARCINOMA (Lat.), n. n. E2p-a3-go-ji2(gi2)-o-(o3)-ka3r-si2n(ki2n)-o'ma3. Gen., *epagogiocarcinom'atos* (*-is*). From ἐπαγώγιον, the prepuce, and καρκίνωμα, a cancer. Fr., *épagogiocarcinome*. Ger., *Vorhautkrebs*. Preputial carcinoma. [L, 50.]

EPAGOGIOLITH, n. E2p-a3-go'ji2-o-li2th. Lat., *epagogiolithus* (from ἐπαγώγιον, the prepuce, and λίθος, a stone). Fr., *épagogiolithe*. Ger., *Vorhautstein*. See *Preputial* CALCULUS.

EPAGOGION (Lat.), **EPAGOGIUM** (Lat.), n's n. E2p-a3-go'ji2(gi2)-o2n, -u3m(u4m). Gr., ἐπαγώγιον (from ἐπί, upon, and ἄγειν, to draw). 1. The prepuce. [L, 50.] 2. Of Gorræus, see PHIMOSIS.

ÉPAIS (Fr.), adj. A-pe2. Thick, fleshy (said of leaves, cotyledons, etc.). [B, 1 (α, 24).]

ÉPAISSI (Fr.), adj. A-pe2s-se. Thickened (said of the peduncle of plants when it is swollen at the extremity). [A, 301 (α, 21).]

ÉPAISSISSANT (Fr.), adj. A-pe2s-ses-sa3n2. Growing thick. [B, 88 (α, 14).]

ÉPAISSISSEMENT (Fr.), n. A-pe2s-ses-ma3n2. A thickening. [A, 301 (α, 21).]

EPALPATE, adj. E-pa2l'pat. Lat., *epalpatus* (from *e*, without, and *palpare*, to touch lightly). Fr., *épalpé*. Ger., *ohne Fühlhörner*. Not furnished with antennæ. [L, 41, 56.]

EPALPEBRATUS (Lat.), adj. E(a)-pa2l(pa3l)-pe(pa)-brat-(bra3t)'u3s(u4s). From *ex*, without, and *palpebra*, the eyelid. Fr., *épalpébré*. Ger., *ohne Augenlider*. Without eyelids. [L, 41, 180.]

EPANACLESIS (Lat.), n. f. E2p-a2n(a3n)-a3-kles(klas)'i2s. Gen., *epanacles'eos* (*-is*). Gr., ἐπανάκλησις (from ἐπί, upon, and ἀνακαλεῖν, to recall). A return of fever. [A, 325 (α, 21).]

EPANADIDON (Lat.), adj. E2p-a2n(a3n)-a3-di(de)'do2n(don). Gen., *epanadidont'os* (*-is*). From ἐπαναδιδόναι, to increase more and more. Increasing more and more (said of fevers).

EPANADIPLOSIS (Lat.), n. f. E2p-a2n(a3n)-a3-di2-plo'si2s. Gen., *epanadiplos'eos* (*-is*). Gr., ἐπαναδίπλωσις (from ἐπαναδιπλοῦν, to repeat yet again). Fr., *épanadiplose*. See ANADIPLOSIS.

EPANALEPSIS (Lat.), n. f. E2p-a2n(a3n)-a3-le2p(lap)'si2s. Gen., *epanalep'seos* (*-is*). Gr., ἐπανάληψις (from ἐπαναλαμβάνειν, to take up again). 1. See ANALEPSIS. 2. See ANADIPLOSIS.

EPANASTASIS (Lat.), n. f. E2p-a2n(a3n)-a3s(a3s)'ta3-si2s. Gen., *epanastas'eos* (*-as'tasis*). Gr., ἐπανάστασις (from ἐπανιστάναι, to cause to rise up). Fr., *épanastasie*. Ger., *Ausbruch*. An elevated efflorescence of the skin; a pustule (in the older sense, see PUSTULE [1st def.]). [G.]

EPANASTEMA (Lat.), n. n. E2p-a2n(a3n)-a3s-ste(sta)'ma3. Gen., *epanastem'atos* (*-is*). Gr., ἐπανάστημα (from ἐπανιστάναι, to cause to rise up). Ger., *Hervorragung*, *Fleischwärzchen*. An old term for a caruncle, especially of the ocular conjunctiva. [L, 50, 135 (α, 14).]

ÉPANCHEMENT (Fr.), n. A-pa3n2sh-ma3n2. An effusion, or extravasation of liquid into a natural or pathological cavity or into the substance of a part. [A, 518.]

EPANCYLOTOS (Lat.), **EPANCYLOTUS** (Lat.), n's m. E2p-a2n(a3n2)-si2l(ku6l)-o'to2s, -tu3s(tu4s). From ἐπί, upon, and ἀγκυλωτός, looped. Fr., *épancylote*. Of Oribasius, a kind of serpentine bandage. [L, 84.]

EPANESIS (Lat.), n. f. E2p-a2n(a3n)'e2s-i2s. Gen., *epanes'eos* (*-an'esis*). Gr., ἐπάνεσις (from ἐπανιέναι, to relax). Ger., *Nachlassen*. A remission or abatement (of a disease). [L, 50 (α, 14).]

EPANETUS (Lat.), n. m. E2p-a2n(a3n)'e2t-u3s(u4s). Gr., ἐπάνετος (from ἐπανιέναι, to relax). Ger., *nachlassendes Fieber*. Of Good, a remittent fever. [L, 50, 107 (α, 14).]—**E. hecticus.** Hectic fever. [L, 29 (α, 29).]—**E. malignus.** Severe remittent fever, including yellow fever, with others dependent apparently on malarial origin. [L, 29 (α, 29).]—**E. malignus flavus.** Yellow fever. [L, 29 (α, 29).]—**E. nutis.** A mild form of remittent fever. [L, 29 (α, 29).]

ÉPANILLE (Fr.), n. A-pa3-nel-y'. In the Antilles, the *Erythalis fruticosa*. [B, 121 (α, 24).]

EPANODY, n. E-pa2n'o-di2. From ἐπάνοδος, a return. The return of an irregular form or development of a flower to a regular form. [α, 22.]

EPANORTHOSIS (Lat.), n. f. E2p-a2n(a3n)-o2r-tho'si2s. Gen., *epanorthos'eos* (*-is*). Gr., ἐπανόρθωσις (from ἐπανορθοῦν, to set up again). Ger., *Wiederherstellung*, *Zurechtsetzung*. The restoration or replacement of a part or member to its proper condition or position. [L, 50 (α, 14).]

EPANORTHOTICUS (Lat.), adj. E2p-a2n(a3n)-o2rth-o2t(ot)'-i2k-u3s(u4s). Gr., ἐπανορθωτικός. See CORRIGENT.

ÉPANOUI (Fr.), adj. A-pa3-nu-e. Expanded, fully developed. [B, 1 (α, 24).]

ÉPANOUISSEMENT (Fr.), adj. A-pa3-nu-es-ma3n2. Ramification (as of vessels or nerves); expansion, development (as of a flower). [A, 518; B, 1 (α, 24).]

EPANTHEMA (Lat.), **EPANTHESIS** (Lat.), **EPANTHISMA** (Lat.), n's n., f., and n. E2p-a2n(a3n)-the(tha)'ma3, -si2s, -thi2z-(thi2s)'ma3. Gen., *epanthem'atos* (*-is*), *-thes'eos* (*-is*), *-this'matos* (*-is*). Gr., ἐπάνθημα (from ἐπανθεῖν, to bloom). See EFFLORESCENCE and EXANTHEMA.

EPANTHOUS, adj. E2p-a2n'thu3s. From ἐπί, upon, and ἄνθος, a flower. Fr., *épanthe*. Ger., *auf Blumen wachsend*. Growing on flowers (said of *Fungi*). [B, 1 (α, 24).]

EPANTLESIS (Lat.), n. f. E2p-a2nt(a3nt)-les(las)'i2s. Gen., *epantles'eos* (*-is*). Gr., ἐπάντλησις (from ἐπαντλεῖν, to pour over). Of Hippocrates, affusion with water. [A, 325 (α, 21); L, 94.]

EPAPHÆRESIS (Lat.), n. f. E2p-a2f(a3f)-e2r'(a3'e2r)-e2s-i2s. Gen., *epaphære'seos* (*-ær'esis*). Gr., ἐπαφαίρεσις (from ἐπαφαιρεῖν, to take away again). Fr., *épaphérèse*. Ger., *wiederholtes Blutlassen* (oder *Aderlassen*). A frequent repetition of bloodletting. [L, 41, 50, 84, 135 (α, 14).]

EPAPHRISMUS (Lat.), n. m. E2p-a2f(a3f)-ri2z(ri2s)'mu3s-(mu4s). From ἐπαφρίζειν, to froth up. Frothing. [A, 316.]

EPAPHROS (Lat.), adj. E2p-a2f(a3f)'ro2s. Gr., ἔπαφρος (from ἐπί, upon, and ἀφρός, foam). Frothy. [L, 94.]

EPAPPOUS, adj. E-pa2p'u3s. From *e* priv., and πάππος, down. Destitute of a pappus (said of a seed). [α, 24.]

EPAR (Lat.), n. n. E(a)'pa3r. See HEPAR.

EPARAPETALOUS, adj. E-pa3r-a3-pe2t'a2l-u3s. Lat., *eparapetalus* (from *ex*, without, παρά, near, and πέταλον, a petal). Fr., *éparapétale*. Ger., *ohne Afterkronenblatt*. Destitute of nectaries (said of flowers). [B, 1 (α, 24).]

EPARMA (Lat.), n. n. E2p-a3r'ma3. Gen., *eparm'atos* (*-is*). Gr., ἔπαρμα (from ἐπαίρειν, to raise up). An old term for a swelling, especially of the parotid gland. [L, 50, 135 (α, 14).]

ÉPARPILLÉ (Fr.), adj. A-pa3r-pel-ya. See ÉPARS.

ÉPARPILLEMENT (Fr.), n. A-pa3r-pel-ma3n2. The separation of the anthers of flowers. [L, 180.]

ÉPARS (Fr.), adj. A-pa3rs. Sparse, irregularly scattered (said of leaves on a stem, etc.). [B, 121 (α, 24).]

EPARSIS (Lat.), n. f. E2p-a3r'si2s. Gen., *epars'eos* (*-is*). Gr., ἔπαρσις (from ἐπαίρειν, to raise up). See EPARMA.

EPARTERIAL, adj. E2p-a3r-te'ri2-a2l. From ἐπί, upon, and ἀρτηρία, an artery. Situated above the pulmonary artery (said of a branch of the right bronchus). [L, 210.]

ÉPARVIN (Fr.), n. A-pa3r-va2n2. See SPAVIN.

EPATICA (Lat.), n. f. E(a)-pa2t(pa3t)'i2k-a3. See HEPATICA.

EPATORION (Lat.), n. n. E2p-a3-to(to2)'ri2-o2n. Of Dioscorides, the *Eupatorium cannabinum*. [B, 46, 88 (α, 14).]

ÉPAULE (Fr.), n. A-pol. 1. The shoulder; in the *Vertebrata*, that part of the thoracic limb that is nearest to the trunk. 2. In the *Hexapoda*, the second article of the anterior feet. [L, 41, 43.]

ÉPAULETTE (Fr.), n. A-po-le2t. In the *Hymenoptera*, the piece which covers the base of the anterior wing. [L, 41.]

ÉPEAUTRE (Fr.), n. A-potr'. The *Hordeum vulgare* (*Triticum spelta*). [B, 38 (α, 14), 173 (α, 24).]—**E. amidonnier.** The *Triticum amyleum*. [A, 385 (α, 21).]—**E. locular.** The *Triticum monococcum*. [B, 121, 173 (α, 24).]—**Grand é.** See *E.*—**Petit é.** See *E. locular*.

EPAXIAL, adj. E2p-a2x'i2-a2l. From ἐπί, upon, and *axis* (*q. v.*). Situated above or dorsad of the axis; of Huxley, episkeletal. ["Med. Rec.," July 23, 1887 (L).]

EPAZOTE [Mex. Ph.] (Sp.), **EPAZOTL** [Mex. Ph.], n's. A-pa3-tho'ta, -thot'l'. The *Chenopodium ambrosioides*. [A, 447 (α, 21).]

EPECHONTOCIC, adj. E2p-e2k-o2n-tos'i2k. From ἐπέχειν, to check, and τόκος, parturition. Having the property of moderating uterine contraction. ["Therap. Gaz.," June, 1882, p. 220.]

EPENCEPHALIC, adj. E2p-e2n-se2f-a2l'i2k. From ἐπί, upon, and ἐγκέφαλος, the brain. Pertaining to the epencephalon. [L.]

EPENCEPHALON (Lat.), n. n. E2p-e2n(e2n2)-se2f(ke2f)-a2l-(a3l)-o2n. From ἐπί, upon, and ἐγκέφαλος, the brain. Ger., *Hinterhirn*. Syn.: *hinderbrain*, *hind-brain*. A division of the brain of the *Mammalia*, embracing the medulla oblongata, the cerebellum, and the pons Varolii; of Huxley, that portion of the embryonic brain which, being formed from the posterior encephalic vesicle, gives rise to the cerebellum, the pons Varolii, and the anterior part of the fourth ventricle. [A, 5; L, 14.]

EPENCHYMA (Lat.), n. n. E2p-e2n2'ki2m(ch2u6m)-a3. Gen., *epenchym'atos* (*-is*). From ἐπί, upon, and ἔγχυμα, something poured in. Fr., *épenchyme*, *épène*. Fibro-vascular vegetable tissue. [B, 121 (α, 24).]

EPENCRANIS (Lat.), n. f. E2p-e2n2-kran(kra3n)'i2s. Gen., *epencran'eos* (*-is*). Gr., ἐπεγκρανίς (from ἐπί, upon, ἐν, in, and κρανίον, the skull). An old name for the cerebellum. [L, 84.]

EPENDYM (Ger.). n. E^{2}p-e^{2}n-du^{6}m′. See Ependyma.—**Centrale E′faden.** See Substantia *gelatinosa centralis.*—**E′faden, E′fasern.** The delicate fibres forming the basis of the ependyma. [I, 6 (K).]—**E′zellenausläufer.** The processes (neuroglia cells) of the ependyma. [J.]

EPENDYMA (Lat.), n. n. E^{2}p-e^{2}n′di^{2}m(du^{6}m)-a. Gen., *ependym′atos* (*-is*). Gr., ἐπένδυμα (from ἐπενδύειν, to put on over). Fr., *épendyme.* Ger., *Ependym, Gehirnhöhlenhaut.* A thin layer of neuroglia (without nerve-cells) which lines the ventricles of the brain and the central canal of the spinal cord, lying just beneath the epithelial layer. [I, 15 (K).]—**E. medullæ spinalis.** The spinal portion of the e. [L, 115.]—**E. ventriculorum cerebri.** The ventricular portion of the e. [L, 7.]

EPENDYMAL, adj. E^{2}p-e^{2}n′di^{2}m-a^{2}l. Fr., *épendymaire.* Pertaining to the ependyma. [A, 301 (α, 21).]

EPENDYMIS (Lat.), n. f. E^{2}p-e^{2}n′di^{2}m(du^{6}m)-i^{2}s. See Ependyma.

EPENDYMITIS (Lat.), n. f. E^{2}p-e^{2}n-di^{2}m(du^{2}m)-i(e)′ti^{2}s. Gen., *ependymit′idos* (*-is*). Fr., *épendymite.* Ger., *Gehirnhöhlenhautentzündung.* Inflammation of the ependyma. [A, 320 (α, 21).]

ÉPÈNE (Fr.), n. A-pe^{2}n. See Epenchyma.

EPENOTRICHUS (Lat.), n. m. E^{2}p-e^{2}n-o^{2}t′ri^{2}k(ri^{2}ch^2)-u^{3}s-(u^{4}s). The *Adriantum capillus Veneris.* [B, 180 (α, 24).]

ÉPENTE (Fr.), n. A-pa^{3}n^{2}t. See Épeautre.

EPERIÉS (Magyar), n. E^{2}p′e^{2}r-i^2-as. A place in the county of Sarós, Hungary, where there are two gaseous and chalybeate springs (*Borluth* and *Czemethe*), also brine-baths. [L, 30, 37 (α, 14).]

EPERLANUS (Lat.), n. m. E(a)-pe^{2}r-lan(la^{3}n)′u^{3}s(u^{4}s). Fr., *éperlan.* Ger., *Eperlan, Stint.* The smelt (*Osmenus e.*). [L, 94 (α, 14).]

ÉPERON (Fr.), n. A-pe^2-ro^{2}n^2. See Calcar (2d def.), Calcar avis and Spur.—**E. de chevalier.** See Delphinium *Ajacis.*—**E. de la Vierge.** See Delphinium *consolida.*

ÉPERONNÉ (Fr.), adj. A-pe^2-ron-na. See Calcaratus (1st def.).

ÉPERONNELLE (Fr.), n. A-pe^2-ron-ne^{2}l. 1. The *Rubia cruciata* (*Galium cruciatum*). 2. The *Lappa major.* [B, 38 (α, 14), 121 (α, 24).]

ÉPERONNIÈRE (Fr.), n. A-pe^2-ron-ne-e^{2}r. The genus *Linaria.* [α, 24.]

EPERUA (Lat.), n. f. E(a)-pe^{2}r′u^2(u)-a^3. Fr., *épéru, épérue.* A genus of leguminous plants, of the *Cæsalpineæ,* indigenous to tropical America, having emetic qualities. [A, 385 (α, 21); B, 42, 121 (α, 24).]—**E. falcata** [Aublet]. Fr., *épéru en forme de faux.* The *wallaba* of British Guiana; a species said to furnish the *balsamum antarthriticum indicum* of commerce. A decoction of its bitter bark is employed by the Indians as an emetic, and the resin as an application to cuts. [B, 5, 19, 173 (α, 24).]

ÉPERVIER (Fr.), n. A-pe^{2}r-ve-a. See Accipiter.

ÉPERVIÈRE (Fr.), n. A-pe^{2}r-ve-e^{2}r. 1. A place in the department of the Maine-et-Loire, France, where there are mineral springs. 2. The genus *Hieracium.* [B, 121 (α, 24); L, 49, 87, 105 (α, 14).] See Accipitrina.—**E. à larges feuilles.** The *Hieracium latifolium.* [B, 173 (α, 24).]—**E. bulbeuse.** The *Hieracium bulbosum.* [B, 173 (α, 24).]—**E. cotonneuse.** The *Hieracium pilosella,* var. *tomentosum.* [B, 173 (α, 24).]—**E. couleur de feu.** The *Hieracium aurantiacum.* [B, 173 (α, 24).]—**E. déchirée.** The *Hieracium murorum,* var. *laciniatum.* [B, 173 (α, 24).]—**E. de Savoie.** The *Hieracium sabaudum.* [B, 173 (α, 24).]—**E. des bois.** The *Hieracium murorum,* var. *nemorosum.* [B, 173 (α, 24).]—**E. douteuse.** The *Hieracium auricula.* [B, 173 (α, 24).]—**E. ombellifère.** The *Hieracium umbellatum.* [B, 173 (α, 24).]—**E. piloselle.** The *Hieracium pilosella.* [B, 173 (α, 24).]—**E. tachetée.** The *Hieracium murorum,* var. *maculatum.* [B, 173 (α, 24).]—**E. très velue.** The *Hieracium murorum,* var. *pilosissimum.* [B, 173 (α, 24).]

ÉPETIT (Fr.), n. A-pe^2-te. An aphrodisiac plant indigenous to Cayenne, not yet classified. [B, 38, 47, 88 (α, 14).]

EPHEBA (Lat.), n. f. E^{2}f-e(a)′ba^3. Gr., ἐφήβη (from ἐπί, upon, and ἥβη, puberty). Ger., *mannbar werdende Jungfrau.* A young woman verging on puberty. [L, 50 (α, 14).]

EPHEBÆON (Lat.), **EPHEBÆUM** (Lat.), n′s n. E^{2}f-e^2(a)-be′(ba^3′e^2)-on, -u^{3}m(u^{4}m). Gr., ἐφήβαιον. Fr., *éphèbe.* Ger., *behaarte Schaamgegend* (1st def.). 1. The pubes. 2. The attainment of puberty. [L, 43, 50, 84 (α, 14).]

EPHEBEIA (Lat.), **EPHEBIA** (Lat.), n′s f. E^{2}f-e^2(a)-bi′(be^2′-i^2)-a^3, -bi(be)′a^3. Gr., ἐφηβεία. Ger., *Mannbarkeitsperiode.* The period of puberty. [L, 50 (α, 14).]

EPHEBOS (Lat.), n. m. E^{2}f-e(a)′bo^{2}s. Gr., ἔφηβος. A male who has arrived at puberty. [A, 311 (α, 14).]

EPHEBOTES (Lat.), n. f. E^{2}f-e(a)′bo^{2}t-ez(as). Gen., *ephebotet′os* (*-is*). Gr., ἐφηβότης. See Ephebeia.

EPHEBUS (Lat.), n. m. E^{2}f-e(a)′bu^{3}s(bu^{4}s). See Ephebos.

EPHEDRA (Lat.), n. f. E^{2}f′e^{2}d-ra^3. Gr., ἐφέδρα (from ἐπί, upon, and ἕδρα, a seat). Fr., *éphédra.* 1. An ancient apparatus for the reduction of dislocations. [L, 84.] 2. The sea-grape; of Linnæus, a genus of the *Genetaceæ.* [B, 42, 275 (α, 24).]—**E. antisyphilitica.** Canutillo, tepopote, whore-house tea, teamster's tea; a species growing in Arizona and New Mexico, much used in the form of decoction as a remedy for gonorrhœa. It contains a glucoside which splits up on decomposition into sugar and an amorphous substance called *ephedrin.* [B, 66; "Proc. of the Am. Pharm. Assoc.," xxvii (α, 14).]—**E. distachya.** Fr., *e. à deux épis, raisin de mer.* Ger., *zweiähriges Meerträubchen.* 1. A species the astringent fruit and aments (Lat., *amenta uvæ marinæ*) of which are used in diarrhœa and leucorrhœa. In Russia the berries are eaten. [B, 173, 180, 275 (α, 24).] 2. Of Pallas, see *E. monostachya.*—**E. equisetina.** Of Bunge, a species growing in Asia; used by the Kirghiz as an antisyphilitic. ["Proc. of the Am. Pharm. Assoc.," xi (α, 14).]—**E. flava.** An Asiatic species, employed as an astringent and diaphoretic. ["New Comm. Pl. and Drugs," No. 9, 1886, p. 31 (B); "Proc. of the Am. Pharm. Assoc.," xxiv, xxxiv (α, 14).]—**E. fragilis.** Ger., *brüchiges Meerträubchen.* A species found in the Levant, Crete, and northern Africa, where it is employed as a remedy for hæmorrhage and diarrhœa. ["New Comm. Pl. and Drugs," No. 9, 1886, p. 31; B; B, 180 (α, 24).]—**E. maritima.** See *E. distachya.*—**E. monostachya, E. polygonoides.** Fr., *e. à un seul épi.* Ger., *einähriges Meerträubchen.* A species found in eastern Europe and Siberia; the leaves were once official as *folia ephedræ* (seu *ephedræ monostachyæ*). In Siberia the whole plant is used in decoction as a sudorific in rheumatism. The fruit is edible. [B, 173, 180 (α, 24).]—**E. trifurcata.** A shrub, probably identical with the *canutillo* of southern Texas, which is used as a remedy in gonorrhœa, leucorrhœa, and renal diseases, and as a vulnerary and styptic. ["New Comm. Pl. and Drugs," No. 9, 1886, p. 31 (B).]—**E. vulgaris.** See *E. distachya.*—**Folia ephedræ.** The leaves of *E. monostachya.* [B, 180 (α, 24).]

EPHEDRACEÆ (Lat.), n. f. pl. E^{2}f-e^{2}d-ra(ra^3)′se(ke^2)-e(a^3-e^2). Fr., *éphédracées.* Of Dumortier, a family of the *Ephedrarieæ* (of Link, an order of the *Amentaceæ*), comprising the genus *Ephedra* or the *Ephedra* and *Batis* of Dumortier. [B, 170 (α, 24).]

EPHEDRÆUS (Lat.), adj. E^{2}f-e^{2}d-re′(ra^3′e^2)-u^{3}s(u^{4}s). Fr., *éphédré.* Composed of superimposed joints. [L, 180.]

EPHEDRANA (Lat.), n. pl. E^{2}f-e^{2}d′ra^{2}n(ra^{3}n)-a^3. Gr., ἐφέδρανα. Fr., *éphédranes.* The buttocks. [L, 84.]

EPHEDRARIEÆ (Lat.), n. f. pl. E^{2}f-e^{2}d-ra(ra^3)-ri(ri^2)′e^2-e-(a^3-e^2). Of Dumortier, an order of the *Julosepalœ,* consisting of the families *Ephedraceæ* and *Casuarineæ.* [B, 170 (α, 24).]

EPHEDREÆ (Lat.), n. f. pl. E^{2}f-e^{2}d′re^2-e(a^3-e^2). Of Reichenbach, a division of the *Taxeæ,* comprising *Ephedra* and *Batis;* in 1831, a division of the *Taxineæ,* consisting of the genus *Ephedra;* of Spach, a tribe of the *Taxineæ,* consisting of *Gnetum* and *Ephedra.* [B, 170 (α, 24).]

EPHEDRIN, n. E^{2}f′e^{2}d-ri^{2}n. An amorphous substance obtained, along with glucose, by the decomposition of the glucoside contained in *ephedra antisyphilitica;* believed to be the active principle of that plant. [B, 66.]

EPHEDRINÆ (Lat.), n. f. pl. E^{2}f-e^{2}d-rin(ren)′e(a^3-e^2). Of Nees, a tribe of the *Coniferæ,* consisting of the genus *Ephedra.* [B, 121, 170 (α, 24).]

EPHEDRINE, n. E^{2}f′e^{2}d-ren. Fr., *éphédrine.* Ger., *Ephedrin.* An alkaloid obtained from *Ephedra distachya.* ["Edinb. Med. Jour.," Jan., 1888, p. 675.]—**E. hydrochloride.** A salt crystallizing in colorless needles, soluble in 4 parts of water, easily soluble in alcohol; used as a mydriatic. ["Am. Drugg.," May, 1888, quoted in "Proc. of the Am. Pharm. Assoc.," xxxvi (α, 14).]

EPHEDROCEPHALUS (Lat.), n. m. E^{2}f-e^{2}d-ro(ro^3)-se^{2}f(ke^{2}f)′-a^{2}l(a^{3}l)-u^{3}s(u^{4}s). From ἐφέδρα, a sitting upon, and κεφαλή, the head. A genus of the *Tœniadœ* in the larval state. [L, 16.]

EPHELCIS (Lat.), n. f. E^{2}f-e^{2}l′si^{2}s(ki^{2}s). Gen., *ephel′cidos* (*-is*). Gr., ἐφελκίς. Fr., *éphelce.* Ger., *Geschwürkruste* (1st def.), *Blut-* (oder *Eiter-*) *Klumpchen.* 1. A crust covering an ulcer. 2. A clot of blood expectorated in coughing. [L, 41, 43, 50, 135 (α, 14).]

ÉPHÉLIDE (Fr.), n. A-fa-led. See Ephelis.—**E's blanches.** See Vitiligo.—**E's lentiformes.** Freckles. [L, 41.]—**E. noire, E. panachée.** Varieties of ephelis scorbutica. [L, 43.]—**E. persistante.** A variety of ephelis hepatica. [L, 43.]—**E. scorbutique.** See Ephelis *scorbutica.*—**E. lentiforme solaire.** See Ephelis *lenticularis solaris.*

EPHELIDES (Lat.), n. f., pl. of *ephelis* (*q. v.*). E^{2}f-e^{2}l(al)′i^{2}d-ez(e^{2}s).

EPHELIDOPHACOSIS (Lat.), n. f. E^{2}f-e^{2}l-i^{2}d-o(o^3)-fa^2(fa^3)-kos′i^{2}s. Gen., *ephelidophacos′eos* (*-is*). From ἐφηλίδες, freckles, and φακός, the lentil. Fr., *éphélidophacose.* Ger., *linsenfarbige Sonnenflecken.* The condition of having freckles of a lentil-color. [L, 50.]

EPHELIS (Lat.), n. f. E^{2}f-e(a)′li^{2}s. Gen., *ephel′idos* (*-is*). Gr., ἐφηλις, ἐπηλις (from ἐπί, upon, and ἥλιος, the sun). Fr., *éphélide.* Ger., *Sommersprosse, Sonnenfleck.* It., *efelide.* Sp., *efélide.* 1. Originally, a cutaneous disease due to exposure to the sun. 2. Lentigo. 3. Chloasma caloricum. 4. Any cutaneous affection characterized by discoloration of the surface. [G.] See Epichrosis and Decoloratio. 5. Of Fries, a genus of the *Discomycetes,* tribe *Phacidiaceæ.* [B, 121 (α, 24).]—**E. ab igne.** Fr., *tache de brûlure, éphélide (lentiforme) ignéale.* Syn.: *e.* (*lenticularis*) *ignealis, maculæ ab igne.* A form of chloasma of the legs and thighs observed in peasant women accustomed to sit over charcoal braziers. [G, 17.] Cf. Trouts.—**E. alba.** See Vitiligo.—**E. a sole.** See Chloasma *caloricum.*—**E. gravidarum.** See Chloasma *gravidarum.*—**E. hepatica.** Fr., *éphélides hépatiques.* See Chloasma *hepaticum.*—**E. ignealis.** Fr., *éphélides igneales.* See *E. ab igne.*—**E. lenticularis.** See Lentigo.—**E. lenticularis solaris.** Fr., *éphélide lentiforme solaire.* Lentigo due to exposure to the sun. [G, 17.]—**E. lentigo** [Frank]. Circular yellow spots of chloasma resembling lentigo. [G.]—**E. lutea.** Icterus neonatorum. [G, 17.]—**E. scorbutica.** Fr., *éphélide scorbutique.* See Purpura *scorbutica.*—**E. solaris.** See Erythema *caloricum* and Chloasma *caloricum.*—**E. syphilitica.** Pigmentary stains left by a syphilitic eruption. [G.]—**E. umbrosa.** See Chloasma.

EPHELODES (Lat.), adj. E^{2}f-e^{2}l(al)-od′ez(as). Gr., ἐφηλώδης (from ἐφηλίς [see Ephelis], and εἶδος, resemblance). Like freckles. [A, 322 (α, 21).]

EPHELOTES (Lat.), n. f. E^{2}f-e^{2}l(al)′o^{2}t-ez(as). Gen., *ephelote′tos* (*-is*). Gr., ἐφηλότης. See Leucoma.

EPHEMERA (Lat.), n. f. E^{2}f-e^{2}m(am)'e^{2}r-a^3. From ἐφήμερος, ephemeral. Fr., *éphémère*. Ger., *ephemerisches* (oder *eintägiges*) *Fieber*. 1. See *Ephemeral* FEVER. 2. A fly that exists but one day. 3. Of Batsch, a family of the *Diales*. [A, 66, 326 (α, 14); B, 121 (α, 24); D, 3; L, 56.]—**Bösartige E.** (Ger.), **E. anglica, E. britannica.** See SUDOR *anglicus*.—**E. maligna.** See SUDOR *anglicus*.—**E. protracta.** That form of ephemeral fever which is protracted through two days or longer. [D, 3.]—**E. puerperalis.** Fr., *poil.* The ephemeral fever of lying-in women. [A, 42.]—**E. sudatoria.** See SUDOR *anglicus*.

EPHEMERAL, adj. E^{2}f-e^{2}m'e^{2}r-a^{3}l. Gr., ἐφήμερος. Lat., *ephemerus*. Fr., *éphémère*. Ger., *ephemerisch, eintägig*. It., *effimero*. Sp., *efímero*. Of brief duration; enduring for only a day. [B, 1, 19 (α, 24).]

EPHEMERIDES (Lat.), n. f., pl. of *ephemeris* (*q. v.*). E^{2}f-em(am)-e^{2}r'i^{2}d-ez(e^{2}s).

EPHEMERINUS (Lat.), adj. E^{2}f-em(am)-e^{2}r'i^{2}n-u^{3}s(u^{4}s). Gr., ἐφημερινός. See EPHEMERAL.

EPHEMERIS (Lat.), n. f. E^{2}f-e^{2}m(am)'e^{2}r-i^{2}s. Gen., *ephemer'idos* (*-is*). Gr., ἐφημερίς. 1. A book for recording the events of each day; a diary. [A, 387.] 2. Of Van Helmont, a disease the accessions of which occur at certain phases of the moon. [L, 94.]

EPHEMEROCNIDOSIS (Lat.), n. f. E^{2}f-e^{2}m(am)-e^{2}r-o^{2}k-ni^{2}d-o'si^{2}s. Gen., *ephemerocnidos'eos* (*-is*). From ἐφήμερος, ephemeral, and κνίδωσις, an itching. Fr., *ephémérocnidose*. Ger., *eintägiges Nesselfieber*. Ephemeral urticaria. [L, 50.]

EPHEMERON (Lat.), n. n. E^{2}f-e^{2}m(am)'e^{2}r-o^{2}n. Gr., ἐφήμερον. The *Colchicum autumnale*. [B, 46, 88 (α, 14).]

EPHEMEROPYRA (Lat.), n. f. E^{2}f-em(am)-e^{2}r-o^{2}p'i^{2}r(u^{6}r)-a^3. From ἐφήμερος, ephemeral, and πῦρ, feverish heat. Fr., *éphéméropyre*. Ger., *tägliches hitziges Fieber*. See *Ephemeral* FEVER.

EPHEMEROUS, adj. E^{2}f-e^{2}m'e^{2}r-u^{3}s. See EPHEMERAL.

EPHEMERUM (Lat.), n. n. E^{2}f-e^{2}m(am)'e^{2}r-u^{3}m(u^{4}m). 1. The genus *Tricapsularis*. 2. The *Tradescantia virginica*. [B, 121 (α, 24).]—**E. congestum.** The *Tradescantia virginica*. [B, 173 (α, 24).]

EPHEMERUS (Lat.), adj. E^{2}f-e^{2}m(am)'e^{2}r-u^{3}s(u^{4}s). See EPHEMERAL.

EPHESIS (Lat.), n. f. E^{2}f'e^{2}s-i^{2}s. Gen., *ephes'eos* (*eph'esis*). Gr., ἔφεσις (from ἐφίεσθαι, to long for). A desire, longing; especially the lascivious desire of women for the embrace of men. [A, 325 (α, 21).]

EPHEU (Ger.), n. A'foi. The *Hedera helix*. [L, 43, 135.]—**Amerikanischer E.** See AMPELOPSIS *quinque folia*.—**Ambolnescher E.** The *Hedera umbellifera*. [B, 180 (α, 24).]—**Baumartiger E.** The *Hedera arborea*. [B, 180 (α, 24).]—**E'artig.** Hederaceous. [L, 43.]—**E'beeren.** The fruit of *Hedera helix*. [B, 180 (α, 24).]—**E'blätter.** The leaves of the *Hedera ilex*. [B, 180 (α, 24).]—**E'gummi, E'harz.** The resin of *Hedera helix*. [B, 180 (α, 24).]—**Gemeiner E., Gewöhnlicher E.** The *Hedera helix*. [B, 180 (α, 24).]—**Handblättriger E.** The *Hedera scandens*. [B, 180 (α, 24).]—**Kletternder E.** The *Hedera helix*. [L, 80.]

EPHIALTES (Lat.), n. m. E^{2}f-i^2-a^{2}lt(a^{2}lt)'ez(as). Gen., *ephialt'u* (*-œ*). Gr., ἐφιάλτης (from ἐπί, upon, and ἅλλεσθαι, to leap). Fr., *éphialte*. Ger., *Alpdrücken*. Nightmare. [A, 311 (α, 17).]—**E. hypochondriacus.** Hypochondriacal hallucinations. [α, 29.]—**E. nocturnus.** Nightmare. [L, 29 (α, 29).]—**E. vigilantium.** An oppression resembling nightmare but coming on during wakefulness. [L, 29 (α, 29).]

EPHIALTIA (Lat.), n. f. E^{2}f-i^2-a^{2}l(a^{2}l)'shi^2(ti^2)-a^3. Gr., ἐφιαλτία (from ἐφιάλτης, nightmare). Fr., *pivoine*. Ger., *Päonie*. An old name for the pæony, because it was supposed to prevent nightmare. [Pliny (A, 387).]

ÉPHIDROSE (Fr.), n. A-fe-droz. See EPHIDROSIS.—**E. bleue.** See EPHIDROSIS *cærulea*.—**E. des exanthèmes.** See EPHIDROSIS *exanthematum*.—**E. fébrile intermittente.** See FEBRIS *sudatoria*.—**E. jaune.** See EPHIDROSIS *flava*.—**E. lactée, E. laiteuse.** See GALACTIDROSIS.—**E. mielleuse.** See EPHIDROSIS *mellea*.—**E. noire.** See EPHIDROSIS *nigra*.—**E. sablonneuse, E. saline.** See EPHIDROSIS *arenosa*.—**E. sanglante, E. sanguinolente.** See HÆMATIDROSIS.

EPHIDROSIS (Lat.), n. f. E^{2}f-i^{2}d-ro'si^{2}s. Gen., *ephidros'eos* (*-is*). Gr., ἐφίδρωσις (from ἐφιδροῦν, to sweat). Fr., *éphidrose*. Ger., *Ephidrose, Schwitzen*. 1. Sweating (gentle, copious, or critical). 2. Of Schönlein, a chronic, non-febrile disease attended with increased perspiration. 3. Of Fuchs, any perspiratory disease, the lowest form of his *Eczematoses*. [G, 5, 8, 10.]—**E. acida.** Fr., *éphidrose acide*. A condition in which the perspiration is sour. [G, 17.]—**E. arenosa.** Fr., *éphidrose sablonneuse* (ou *saline*). Literally, sandy or gritty e.; perspiration attended with a deposit of the saline constituents of the sweat upon the skin. [G, 17.] Cf. URIDROSIS *crystallina*.—**E. cærulea.** Fr., *éphidrose bleue*. Chromidrosis characterized by blue sweat. [G, 17, 52.]—**E. cruenta.** Fr., *éphidrose sanglante* (ou *sanguinolente*). See HÆMATIDROSIS.—**E. diaphoretica.** See *E. syncoptica*.—**E. discolor.** See CHROMIDROSIS.—**E. exanthematum.** Fr., *éphidrose des exanthèmes*. The sweating attendant on the exanthematous fevers. [G, 17.]—**E. febrilis.** Fr., *éphidrose fébrile*. Sweating at the crisis of certain fevers: critical sweating. [G, 17.]—**E. febrilis intermittens.** Fr., *éphidrose fébrile intermittente*. See FEBRIS *sudatoria*.—**E. flava.** Fr., *éphidrose jaune*. Chromidrosis characterized by yellow sweat. [G, 17.]—**E. hectica.** Fr., *éphidrose hectique*. Sweating attending hectic fever. [G, 17.]—**E. idiopathica.** See HYPERIDROSIS.—**E. lactea.** Fr., *éphidrose laiteuse* (ou *lactée*). See GALACTIDROSIS.—**E. lateralis.** Fr., *éphidrose latérale* (ou *d'un des cotés du corps*). Hyperidrosis affecting one lateral half of the body. [G, 17.]—**E. mellea.** Fr., *éphidrose mielleuse*. According to Sauvages, perspiration having the color and consistence of honey; perhaps seborrhœa oleosa. [G, 17.]—**E. nigra.** Fr., *éphidrose noire*. Black sweat (said to have been produced after taking a scruple of fulminating gold). [G, 17.]—**E. oleaginosa.** See *E. mellea*.—**E. olens.** See OSMIDROSIS.—**E. partialis.** See HYPERIDROSIS *localis*.—**E. profusa.** See HYPERIDROSIS.—**E. saburralis.** Fr., *éphidrose provenant de la saburre*. E. due to a saburral condition of the system. [B, 17.]—**E. scorbutica.** Fr., *éphidrose scorbutique*. Hyperidrosis due to scurvy. [G, 17.]—**E. saccharata.** A form of paridrosis said to occur in diabetes mellitus, and in which sugar is present in the sweat. [G.]—**E. spontanea.** Fr., *éphidrose spontanee*. See HYPERIDROSIS.—**E. syncoptica.** Fr., *éphidrose syncopale*. The cold sweating of faintness. [G, 17.]—**E. tincta.** See CHROMIDROSIS.—**E. unilateralis.** See *E. lateralis*.—**E. urinosa.** Fr., *éphidrose urineuse*. See URIDROSIS.—**E. vinosa.** Fr., *éphidrose vineuse*. According to Sauvages, sweat having the color of red wine. [G, 17.]—**E. viridis.** Fr., *éphidrose verte*. Green sweat (observed in the axillæ). [G, 17.]—**Partial e.** See HYPERIDROSIS *localis*.

EPHIPPIAL, adj. E^{2}f-i^{2}p'i^2-a^{2}l. Gr., ἐφίππιος. Relating to the ephippium. [L, 11.]

EPHIPPION (Lat.), n. n. E^{2}f-i^{2}p'pi^2-o^{2}n. See EPHIPPIUM.

EPHIPPIORRHYNCHUS (Lat.), adj. E^{2}f-i^{2}p-pi^2-o^{2}r-ri^{2}n^{2}k-(ru^{6}n^{2}ch^2)'u^{3}s(u^{4}s). From ἐφίππιον, a saddle-cloth, and ῥύγχος, a beak. Fr., *éphippiorrhynque*. Having a saddle-shaped prominence on the beak. [L, 180.]

EPHIPPIUM (Lat.), n. n. E^{2}f-i^{2}p'pi^2-u^{3}m(u^{4}m). Gr., ἐφίππιον (from ἐπί, upon, and ἵππος, a horse). Fr., *éphippion*. Ger., *Türkensattel* (1st def.). 1. See SELLA *turcica*. 2. A receptacle upon the back of the carapace of certain *Crustacea* which contains the winter eggs. During the fall it is cast off, and floats around until spring, when the eggs are hatched. [L, 11, 14, 50, 115.]

EPHODIST, n. E^{2}f'o^{2}d-i^{2}st. From ἔφοδος, social or commercial intercourse. Of von Pettenkofer, one who believes in the doctrine that certain epidemic diseases are spread by fomites adhering to persons coming from localities where those diseases prevail. ["Lancet," July 3, 1886; "Glasgow Med. Jour.," Aug., 1886, p. 151.]

EPHODOS (Lat.). **EPHODUS** (Lat.), n's f. E^{2}f'o^{2}d-o^{2}s, -u^{3}s-(u^{4}s). Gr., ἔφοδος (from ἐπί, upon, and ὁδός, a way). 1. Of Hippocrates, an approach or access of a disease. 2. An excrementory opening. [L, 84.]

EPHYPOGÆOCARPUS (Lat.), adj. E^{2}f-i^{2}p(u^{6}p)-o(o^3)-je-(ga^3-e^2)-o(o^3)-ka^{3}rp'u^{3}s(u^{4}s). From ἐπί, upon, ὑπό, below, γαῖα, the earth, and καρπός, a fruit. Fr., *éphypogéocarpe*. Ger., *über und unterirdisch fruchtbringend*. Having fruit growing both above and under the surface of the earth. [L, 50.]

EPHYPOGÆUS (Lat.). **EPHYPOGEUS** (Lat.), adj's. E^{2}f-i^{2}p(u^{6}p)-o(o^3)-je'(ga^{3}e^2)-u^{3}s(u^{4}s), -je(ga)'u^{3}s(u^{4}s). From ἐπί, upon, ὑπό, below, and γαῖα, the earth. See EPHYPOGÆOCARPUS.

ÉPI (Fr.), n. A-pe. 1. See *Spica* BANDAGE. 2. See SPIKE.—**En é.** Having the secreting sacs ranged about a common excretory duct (said of glands); in botany, spicate. [A, 518.]—**E. celtique.** The *Valeriana celtica*. [B, 180 (α, 24).]—**E. composé.** See *Compound* SPIKE.—**E. d'eau.** The *Potamogeton natans*. [B, 121 (α, 24).]—**E. de lait.** The *Ornithogalum pyrenaicum*. [B, 121 (α, 24).]—**E. de la vierge.** The *Ornithogalum pyramidale*. [B, 46 (α, 14).]—**E. de nard.** The root of *Valeriana jatamansi*. [B, 173 (α, 24).]—**E. des céréales.** See *Compound* SPIKE.—**E. des marais.** The *Stachys palustris*. [B, 88 (α, 14).]—**E. du vent.** See AGROSTIS *spica venti*.—**E. fleuri.** The *Stachys germanica*. [B, 173 (α, 24).]—**E. sauvage.** The *Asarum europæum*. [B, 38, 46, 88 (α, 14).]—**E. simple.** See *Simple* SPIKE.

ÉPIAIRE (Fr.), n. A-pe-a^{2}r. The genus *Stachys*, especially the *Stachys palustris*. [A, 385 (α, 21); B, 121 (α, 24).]—**E. d'Allemagne.** The *Stachys germanica*. [B, 173 (α, 24).]—**E. des bois.** The *Stachys silvatica*. [B, 173 (α, 24).]—**E. des champs.** The *Stachys arvensis*. [B, 173 (α, 24).]—**E. des marais.** The *Stachys palustris*. [B, 173 (α, 24).]

EPIALA (Lat.), n. f. E(a)-pi(pi^2)'a^{2}l(a^{3}l)-a^3. 1. See EPIALOS. 2. See EPHIALTES.

EPIALES (Lat.), n. f. E(a)-pi(pi^2)'a^{2}l(a^{3}l)-ez(as). Gen., *epialet'os* (*-is*). Gr., ἠπιάλης. See EPHIALTES.

EPIALOS (Lat.), **EPIALUS** (Lat.), n's m. E(a)-pi(pi^2)'a^{2}l(a^{3}l)-os, -u^{3}s(u^{4}s). Gr., ἠπίαλος. Fr., *épiale, épial*. A fever with a heavy chill; a kind of tertian fever. Of Galen, a fever with violent shivering; of Hippocrates, the chill of ague. [A, 311 (α, 17); L, 50, 84, 135 (α, 14).]

EPIAMA (Lat.), n. n. E(a)-pi(pi^2)'a^{2}m(a^{3}m)-a^3. Gen., *epiam'atos* (*-is*). Gr., ἠπίαμα (from ἠπιᾶν, to assuage). A palliative remedy. [L, 50 (α, 14).]

EPIAN, n. E-pi^2'a^{2}n. Fr., *épian*. See FRAMBŒSIA.

EPIANDROUS, adj. E^{2}p-i^2-a^{2}n'dru^{2}s. From ἐπί, upon, and ἀνήρ, a male. Situated upon the stamens (said of parts inverted on the andrœcium). [α, 24.]

ÉPIARTHRE (Fr.), adj. A-pe-a^{3}rtr'. From ἐπί, upon, and ἄρθρον, a joint. Situated on the upper surface of an appendage of an arthropod. [L.]

EPIÄTHYLIN (Ger.), n. A-pe-at-u^{6}l-en'. Epiethylin. [B.]

EPIBASAL, adj. E^{2}p-i^2-ba'sa^{2}l. From ἐπί, upon, and βάσις, a base. Situated in front of the basal wall (said of the anterior half of a proembryo). [B, 279.]

ÉPIBATÉRIE (Fr.), n. A-pe-ba^3-ta-re. The genus *Cocculus*. [B, 121 (α, 24).]

EPIBLAST, n. E^{2}p'i^2-bla^{2}st. Lat., *epiblastus* (from ἐπί, upon, and βλαστός, a germ). Fr., *épiblaste*. Ger., *seröses Keimblatt*

[Pander], *animales Blatt* [von Baer], *Hornblatt*, *sensorielles Blatt* [Remak]. It., Sp., *epiblasto*. 1. The outer, neuro-epidermal, or corneous layer of the blastoderm ; of Balfour, the outermost of the three layers into which the blastoderm divides at the area germinativa. 2. A projection on the anterior side of the embryo in some grasses (*e. g.*, oats and rice), which is not (as formerly supposed) a rudimentary secondary cotyledon, but merely an outgrowth of the radicular end of the scutellum. [B, 77 (*a*, 24).]—**Neural e.** That part of the e. that gives rise to the nervous system. [J, 89.]

EPIBLASTANUS (Lat.), n. E^{2}p-i^2-bla^{2}st(bla^{3}st)-an(a^{3}n)′-u^{3}s-(u^{4}s). See Epiblast (2d def.).

EPIBLASTESIS (Lat.), n. f. E^{2}p-i^2-bla^{2}st(bla^{3}st)-e(a)′si^{2}s. Gen., *epiblastes′eos* (*-is*). From ἐπί, upon, and βλάστησις, a sprouting. Fr., *épiblastèse*. In botany, an enlargement of the centre which contains reproductive corpuscles, due to the development of the corpuscles themselves. [L, 41 (*a*, 14).]

EPIBLASTIC, adj. E^{2}p-i^2-bla^{2}st′i^{2}k. Lat., *epiblasticus*, *epiblasteticus*. Fr., *épiblastique*, *épiblastétique*. Ger., *epiblastisch*. Pertaining to the epiblast. [L.]

EPIBLASTUS (Lat.), n. m. E^{2}p-i^2-bla^{2}st(bla^{3}st)′u^{3}s(u^{4}s). See Epiblast (2d def.).

EPIBLEMA (Lat.), n. n. E^{2}p-i^2-ble(bla)′ma^3. Gen., *epiblem′atos* (*-is*). From ἐπί, upon, and βλῆμα, a wound. Fr., *épiblème*. 1. See Catablema. 2. In botany, the external, cellular covering of roots. 3. Of R. Brown, a genus of orchids, tribe *Neotteæ*, indigenous to Australia. [B, 77, 121 (*a*, 24).]

EPIBLEPHARON (Lat.), n. n. E^{2}p-i^2-ble^{2}f′a^{2}r(a^{3}r)-o^{2}n. From ἐπί, upon, and βλέφαρον, the eyelid. See Epicanthis.

EPIBOLE (Lat.). n. f. E^{2}p-i^{2}b′o^{2}l-e(a). Gen., *epib′oles*. Gr., ἐπιβολή (from ἐπιβάλλειν, to cast upon). Fr., *épibolie*. 1. See Ephialtes. 2. See Epiboly.

EPIBOLIC, adj. E^{2}p-i^2-bo^{2}l′i^{2}k. Pertaining to epibole. [L, 353.]

EPIBOLY, n. E^{2}p-i^{2}b′o^{2}l-i^2. In embryology, the inclosure of the hypoblast by the multiplication and extension of the cells of the epiblast ; opposed to emboly, in which the hypoblast is invaginated into the segmentation cavity. [J, 1.]

EPIBOSCIS (Lat.), n. f. E^{2}p-i^2-bo^{2}s′si^{2}s(ki^{2}s). Gen., *epibo′scidos* (*-is*). Gr., ἐπιβοσκίς (from ἐπί, upon, and βόσκειν, to feed). Ger., *Saugrüssel*. The proboscis of an insect. [L. 50 (*a*, 14).]

EPIBRANCHIAL, adj. E^{2}p-i^2-bra^{2}n^{2}k′i^2-a^{2}l. From ἐπί, upon, and βράγχια, the gills. Lying upon or over the branchiæ. [L, 11.]

EPIBROCHE (Lat.), n. f. E^{2}p-i^{2}b′ro^2-ke(ch^{2}a). Gen., *epib′roches*. Gr., ἐπιβροχή (from ἐπιβρέχειν, to water). See Epantlesis. [L, 94.]

EPIBROMHYDRIN, n. E^{2}p-i^2-brom-hi′dri^{2}n. Ger., *E.* Glyceryl oxybromide ; a liquid, C_3H_5.OBr, boiling at 130° C. [B, 4.]

EPIBULBAR, adj. E^{2}p-i^2-bu^{3}lb′a^{3}r. From ἐπί, upon, and *bulbus*, the globe of the eye. Resting on or overlying the eyeball. [F.]

EPICÆROS (Lat.), adj. E^{2}p-i^2-se′(ka^3′e^2)-ro^{2}s. Gr., ἐπίκαιρος (from ἐπί, upon, and καιρός, the proper time). Of symptoms, important ; of certain parts of the body, vital ; of wounds, dangerous ; of diseases, malignant. [Hippocrates (A, 311 [*a*, 17]).]

EPICALYCIA (Lat.), n. f. E^{2}p-i^2-ka^{2}l(ka^{3}l)-i^{2}s(u^{6}k)′i^2-a^3. From ἐπί, upon, and κάλυξ, a calyx. Fr., *épicalicie*. Of Desvaux, a class of plants with stamens inserted on the calyx. [B, 1 (*a*, 24).]

EPICALYX (Lat.), n. m. E^{2}p-i^{2}k′a^{2}l(a^{3}l)-i^{2}x(u^{6}x). Gen., *epical′ycos* (*-is*). From ἐπί, upon, and κάλυξ, a calyx. Fr., *épicalice*. Ger., *Aussenkelch*. 1. The involucre of a flower. 2. The whorl of bracts below the calyx and so resembling it as to make the flower appear double, as in the mallows. [B. 77, 291 (*a*, 24).]

EPICANTHIS (Lat.), **EPICANTHUS** (Lat.), n's f. and m. E^{2}p-i^2-ka^{2}n(ka^{3}n)′thi^{2}s, -thu^{3}s(thu^{4}s). From ἐπί, upon, and κανθός, the canthus. Fr., *épicanthis*. Ger., *Epicanthis*. It., *epicantite*. Sp., *epicantis*. 1. An old term for the canthus of the eye. 2. A rare deformity, usually congenital and bilateral, in which a fold of loose skin stretches across from the inner end of the brow to the bridge or side of the nose, and hides the inner canthus. [F.]

ÉPICARDIATOPIE (Fr.), n. A-pe-ka^{3}r-de-a^3-to-pe. From ἐπί, upon, καρδία, the heart, and ἄτοπος, out of place. Upward displacement of the heart. [L, 41 (*a*, 14).]

EPICARDIUM (Lat.), n. n. E^{2}p-i^2-ka^{3}rd′i^2-u^{3}m(u^{4}m). From ἐπί, upon, and καρδία, the heart. Fr., *épicarde*. Ger., *Epicardie*. The visceral layer of the pericardium. [L. 332.]

EPICARIDA (Lat.), n. n. pl. E^{2}p-i^2-ka^{3}r′i^{2}d-a^3. From ἐπί, upon, and κάρ, the head. The *Isopoda*. [L, 240.]

EPICARP, n. E^{2}p′i^2-ka^{3}rp. Lat., *epicarpium* (from ἐπί. upon, and καρπός, a fruit). Fr., *épicarpe*. Ger., *äussere Fruchthaut*. The outer layer of the pericarp. [B, 1, 291 (*a*, 24).]

EPICARPANTHUS (Lat.), adj. E^{2}p-i^2-ka^{3}rp-a^{2}n(a^{3}n)′thu^{3}s-(thu^{4}s). From ἐπί, upon. καρπός, a fruit, and ἄνθος, a flower. Fr., *épicarpanthe*. Of plants, having the flowers supported by the ovary. [L, 41, 180.]

EPICARPIC, adj. E^{2}p-i^2-ka^{3}rp′i^{2}k. Lat., *epicarpicus*, *epicarpius*. Fr., *épicarpique*, *épicarpié*. Having the flowers and stamens supported by the fruit. [L, 180.] Cf. Epicarpanthus.

EPICARPIDIUM (Lat.), n. n. E^{2}p-i^2-ka^{3}rp-i^{2}d′i-u^{3}m(u^{4}m). See Epicarp.

EPICARPIUM (Lat.), n. n. E^{2}p-i^2-ka^{3}rp′i^2-u^{3}m(u^{4}m). From ἐπί, upon, and καρπός, a fruit (1st def.) or the wrist (2d def.). 1. See Epicarp. 2. A febrifuge remedy containing hellebore, pepper, camphor, garlic, onions, etc., anciently applied to the wrist in the form of a bracelet. [L, 44, 50 (*a*. 14).]

EPICARPIUS (Lat.), adj. E^{2}p-i^2-ka^{3}rp′i^2-u^{3}s(u^{4}s). Gr., ἐπικάρπιος. On or around the carpus or a fruit ; as a n., in the f. pl., *Epicarpiæ*, of Scopoli, a tribe of plants comprising the *Polypremea*, *Aparines*, *Opulinæ*, and *Caprifolia*. [A, 322 (*a*, 21) ; B, 170 (*a*, 24).]

EPICARPURUS (Lat.), n. m. E^{2}p-i^2-ka^{3}rp-u^2(u)′ru^{3}s(ru^{4}s). Of Blume, a genus of the *Urticaceæ*, tribe *Moreæ*. [B, 42 (*a*, 24).]—**E. orientalis.** The *Streblus asper*. [B, 245.]

EPICARPUS (Lat.), n. m. E^{2}p-i^2-ka^{3}rp′u^{3}s(u^{4}s). See Epicarp and Epicarpium.

EPICAULIS (Lat.), adj. E^{2}p-i^2-ka^{4}l(ka^3′u^{4}l)-i^{2}s. From ἐπί, upon, and καυλός, a stem. Fr., *épicaule*. Growing or living on the stems of plants. [L, 41, 180.]

EPICAUMA (Lat.), n. n. E^{2}p-i^2-ka^{4}m(ka^3′u^{4}m)-a^3. Gen., *epicaum′atos* (*-is*). Gr., ἐπίκαυμα (from ἐπικᾶν, to burn on the surface). Fr., *épicaume* (3d def.). Ger., *Brandblase* (2d def.), *brandige Augenlidentzündung* (4th def.). 1. A caustic. 2. A superficial burn. 3. A phlyctæna of the cornea. 4. A gangrenous inflammation of the eyelids. [A, 322 (*a*, 21) ; L, 41, 44, 50, 135.]

EPICAUSIS (Lat.), n. f. E^{2}p-i^2-ka^{4}s′(ka^3′us)-i^{2}s. Gen., *epicaus′eos* (*-is*). Gr., ἐπίκαυσις. See Epicauma (2d def.).

EPICAUTA (Lat.), n. f. E^{2}p-i^2-ka^{4}t′(ka^3′u^{4}t)-a^3. The genus *Lytta*. [L, 354.]—**E. cinerea.** See Lytta *marginata*.—**E. pennsylvanica.** See Lytta *atrata*.

ÉPICE (Fr.), n. A-pes. See Spice.

EPICENTRAL, adj. E^{2}p-i^2-se^{2}nt′ra^{2}l. From ἐπί, upon, and κέντρος, a centre. Situated upon or connected with the centrum of a vertebra. [L, 14.]

ÉPICÉA (Fr.), n. A-pe-sa-a^3. See Abies *excelsa*.

EPICEPHALUS (Lat.), n. m. E^{2}p-i^2-se^{2}f(ke^{2}f)′a^{2}l(a^{3}l)-u^{3}s(u^{4}s). From ἐπί, upon, and κεφαλή, the head. See Epicomus.

EPICERAS (Lat.), n. E^{2}p-i^{2}s′i^{2}k)′e^{2}r-a^{2}s(a^{3}s). Gen., *epicer′atos* (*-is*). From ἐπί, upon, and κέρας, a horn. The *Trigonella fœnum græcum*. [B, 115 (*a*, 24).]

EPICERASTICOS (Lat.), **EPICERASTICUS** (Lat.), adj's. E^{2}p-i-se^{2}r(ke^{2}r)-a^{2}s(a^{3}s)′ti^2-ko^{2}s, -ku^{3}s(ku^{4}s). Gr., ἐπικεραστικός (from ἐπί, upon, and κέρας, a horn). Fr., *épicérastique*. Ger., *mildernd*, *verdünnend*. See Cataceraticus.

EPICERATOHYAL, adj. E^{2}p-i^2-se^{2}r″a^{2}t-o-hi′a^{2}l. From ἐπί, upon, κέρας, a horn, and υ, the letter u. Situated upon or above the ceratohyal bone. [L.]

EPICERCUS (Lat.), adj. E^{2}p-i^2-su^{6}r(ke^{2}r)′ku^{3}s(ku^{4}s). From ἐπί, upon, and κέρκος, the tail. Fr., *épicerque*. Having rattles in the tail ; as a n., in the m. pl., *Epicerci*, a group of *Ophidians* (the rattlesnakes). [L, 41, 116, 180.]

EPICEREBRAL, adj. E^{2}p-i^2-ce^{2}r′e^2-bra^{2}l. From ἐπί, upon, and *cerebrum*, the brain. Overlying the brain. [*a*, 18.] See *E.* space.

ÉPICESTE (Fr.), n. A-pe-se^{2}st. The *Arum maculatum*. [B, 121 (*a*, 24).]

EPICHARIS (Lat.), n. f. E^{2}p-i^{2}k(i^{2}ch^2)′a^3-ri^{2}s. Gen., *epichar′eos* (*-ich′aris*). Gr., ἐπίχαρις (from ἐπί, upon, and χάρις, grace). Of Blume, a genus of the *Meliaceæ*, tribe *Trichilieæ*, indigenous to the Moluccas. [B, 42 (*a*, 24).]—**E. Bailloni, E. Loureiri.** Fr.. *bois de santal rouge* [Fr. Cod.]. Red sandal-wood ; two species found in the Moluccas the first of which is one of the sources of the sandal-wood of Cochin-China. [Pierre (B, 121 [*a*, 14]).]

EPICHEILIUM (Lat.), n. n. E^{2}p-i^2-kil′(ch^{2}e^2-el′)-i^2-u^{3}m(u^{4}m). From ἐπί, upon, and χεῖλος, the lip. Fr., *épichile*. In orchids, the superior (posterior) segment of the lip when it is divided into three parts. [B, 1 (*a*, 24).]

EPICHEMIS (Lat.), n. f. E^{2}p-i^2-kem(ch^{2}am)′i^{2}s. Gen., *epichem′idos* (*-is*). From ἐπί, upon, and χημή, a shell. Fr., *épichème*. In the *Arachnida*, an accessory articulation situated at the base of the tibia. [L, 180.]

EPICHILIUM (Lat.), n. n. E^{2}p-i^2-kil(ch^{2}el)′i^2-u^{3}m(u^{4}m). See Epicheilium.

EPICHLAMYDEÆ (Lat.), n. f. pl. E^{2}p-i^2-kla^{2}m(ch^{2}la^{3}m)-i^{2}d-(u^{6}d)′e^2-e(a^3-e^2). From ἐπί, upon, and χλαμύς, a mantle. Fr., *épichlamydées*. Of Agardh, a class of the *Phanerocotyledoneæ incompletæ*, comprising the *Ulmaceæ*, *Laurinæ*, *Santalaceæ*, *Elæagneæ*, *Thymeleæ*, and *Proteaceæ*. [B, 170 (*a*, 24).]

EPICHLORBROMHYDRIN, n. E^{2}p-i-klor-brom-hi′dri^{2}n. Fr., *épichlorobromhydrine*. A substance, C_3H_4ClBr, obtained by the action of potash on chlordibromhydrin. [B, 38 (*a*, 14).]

EPICHLORHYDRIN, n. E^{2}p-i^2-klor-hi′dri^{2}n. Fr., *épichlorhydrine*. Ger.. *E.* Glyceryl oxychloride ; a clear liquid, C_3H_5.OCl, resembling chloroform, boiling at about 119° C. [B.]

EPICHNUS (Lat.), n. m. E^{2}p-i^{2}k(i^{2}ch^2)′nu^{3}s(nus). Gr., ἐπίχνους (from ἐπί, upon, and χνόος, down). Of Hippocrates, a wool-like accumulation on the eye. [A, 325 (*a*, 21).]

EPICHOLOS (Lat.), **EPICHOLUS** (Lat.), adj's. E^{2}p-i^{2}k-(i^{2}ch^2)′o^{2}l-o^{2}s, -u^{3}s(u^{4}s). Gr., ἐπίχολος (from ἐπί, upon, and χόλος, bile). Fr., *épichole*. 1. Bilious. 2. Passionate, choleric. 3. Forming bile. [L, 50 (*a*, 14).]

EPICHORDAL, adj. E^{2}p-i^2-ko^{2}rd′a^{2}l. From ἐπί, upon, and χορδή, a cord. Relating to structures, especially parts of the brain, situated above or dorsad of the notochord. [Wilder, "N. Y. Med. Jour.," 1885 (J).]

EPICHORDIS (Lat.), n. f. E^{2}p-i^2-ko^{2}rd(ch^{2}o^{2}rd)′i^{2}s. Gen., *epichord′idos* (*-is*). Gr., ἐπιχορδίς (from ἐπί, upon, and χορδή, the guts). Fr., *épichorde*. Ger., *Gekröse*. The mesentery. [L, 43, 50.]

EPICHORIAL, adj. E^{2}p-i^2-ko′ri^2-a^{2}l. Fr., *épichorial*. On or against the chorion or the derma ; pertaining to the epichorion [A, 385 (*a* 21).]

EPICHORION (Lat.), n. n. E^{2}p-i^2-ko^{2}r(ch^{2}o^{2}r)'i^2-o^{2}n. Gr., ἐπιχόριον (from ἐπί, upon, and χόριον [see CHORION]). Fr., *épichorion.* 1. See EPIDERMIS. 2. Of Chaussier, the decidua reflexa. [A, 43, 45.]

EPICHORIOS (Lat.), adj. E^{2}p-i^2-kor(ch^{2}or)'i^2-os. Gr., ἐπιχώριος (from ἐπί, upon, and χωρίον, a place). Fr., *épichorique.* See ENDEMIC.

EPICHORIUM (Lat.), n. n. E^{2}p-i^2-kor(ch^{2}o^{2}r)'i^2-u^{3}m(u^{4}m). See EPICHORION.

EPICHROSIS (Lat.), n. f. E^{2}p-i^2-kros(ch^{2}ros)'i^{2}s. Gen., *epichros'eos* (*-is*). Gr., ἐπίχρωσις, a spot or stain (from ἐπιχρώζειν or ἐπιχρωννύναι, to smear over with a color, to stain). Ger., *Farbenanflug, leichte Färbung.* Simple discoloration of the surface of the skin. [G, 52.] See DECOLORATIO and SPILOSIS.—**E. alphosis.** See ALBINISM.—**E. aurigo.** Yellowness of the skin. [G, 52.] See ICTERUS and ICTERUS *neonatorum.*—**E. ephelis.** See CHLOASMA *caloricum.*—**E. lenticula.** See LENTIGO.—**E. leucasmus.** See VITILIGO.—**E. partialis.** See SPILOSIS.—**E. pœcilia.** Variegated e. ; vitiligo or albinismus partialis (*q. v.*). [G, 52.]—**E. spilus.** Permanent brown circular patches on the skin, sometimes slightly elevated and crested with tufts of hair ; nævus pilosus. [G, 52.]

EPICHYSIS (Lat.), n. f. E^{2}p-i^{2}k(i^{2}ch^2)'i^2(u^6)-si^{2}s. Gen., *epichys'eos* (*-ich'ysis*). Gr., ἐπίχυσις (from ἐπιχεῖν, to pour upon). See AFFUSION.

EPICLEMA (Lat.), n. n. E^{2}p-i^2-klem(klam)'a^3. Gen., *epiclem'atos* (*-is*). From ἐπί, upon, and κλῆμα, a twig. The epidermis of the organs of amphibious plants. [B, 121 (*a*, 24).]

EPICLINAL, adj. E^{2}p-i^2-klin'a^{2}l. Lat., *epiclinus* (from ἐπί, upon, and κλινη, a bed). Fr., *épicline.* Inserted upon the receptacle (said of plant-organs). [B, 19, 38.]

EPICLINOUS, adj. E^{2}p-i^2-klin'u^{3}s. See EPICLINAL.

EPICŒLE, n. E^{2}p'i^2-sel. Lat., *epicœla* (from ἐπί, upon, and κοιλίς, a cavity). 1. A body cavity formed, as in the *Deuterostomata*, by an invagination of the epiblast. ["Am. Naturalist," ix, p. 68 (*a*, 32).] 2. Of B. G. Wilder, the fourth ventricle of the brain. [K.]

EPICŒLIDES (Lat.), n. f. pl. E^{2}p-i^2-se^{2}l'(ko^2'e^{2}l)-i^{2}d-ez(e^{2}s). From ἐπί, upon, and κοιλία, a hollow. An old term for the upper eyelid and afterward the eyelashes.

EPICŒLOME, n. E^{2}p-i^2-sel-om'. From ἐπί, upon, and κοίλωμα, a cavity. Ger., *Epicölom.* The extension of the cœloma into a myotome. [Van Whye, "Arch. f. mikr. Anat.," xxxiii, p. 465 (J).]

EPICŒMA (Lat.), n. n. E^{2}p-i^2-sem(ko^2'e^{2}m)-a^3. Gen., *epicœm'atos* (*-is*). From ἐπικοιμᾶσθαι, to rest upon. A resting upon, a lying down. [A, 322 (*a*, 21).]

EPICŒMASIS (Lat.), n. f. E^{2}p-i^2-sem'(ko^2'em)-a^3-si^{2}s. Gen., *epicœmas'eos* (*-cœm'asis*). Gr., ἐπικοίμησις (from ἐπικοιμᾶσθαι, to fall asleep after). Fr., *épicœmasie.* A lying down ; sleep. [A, 325 (*a*, 21).]

EPICOLIC, adj. E^{2}p-i^2-ko^{2}l'i^{2}k. Lat., *epicolicus* (from ἐπί, upon, and κῶλον, the colon. Fr., *épicolique.* Ger., *am Grimmdarm befindlich.* Overlying the colon. [A, 325 (*a*, 21) ; L, 41, 50, 56, 94 (*a*, 14).]

EPICOLLESIS (Lat.), n. f. E^{2}p-i^2-ko^{2}l-le(la)'si^{2}s. Gen., *epicolles'eos* (*-is*). From ἐπί, upon, and κόλλησις, a glueing. See AGGLUTINATION.

EPICOMUS (Lat.), n. m. E^{2}p-i^{2}k'o^{2}m-u^{3}s(u^{4}s). From ἐπί, upon, and κόμη, the hair of the head. Fr., *épicome.* Of G. St.-Hilaire, a monster having two heads, one of which is incompletely developed and inserted at the top of the other head. [L, 41, 44, 87 (*a*, 14).]

EPICONDYLAR, adj. E^{2}p-i^2-ko^{2}n'di^{2}l-a^{3}r. Fr., *épicondylien.* Pertaining to the epicondyle. [A, 301 (*a*, 21).]

EPICONDYLE, n. E^{2}p-i^2-ko^{2}n'di^{2}l. Lat., *epicondylus* (from ἐπί, upon, and κόνδυλος, a condyle). Fr., *épicondyle.* Ger., *Epicondyl.* Of Chaussier, the external condyle of the humerus. [C.]—**Inner e.** The internal condyle of the humerus. [*a*, 29.]

EPICONDYLOCUBITALIS (Lat.), n. f. E^{2}p-i^2-ko^{2}n''di^{2}l(du^{6}l)-o(o^3)-ku^2(ku^4)-bi^{2}t-a(a^3)'li^{2}s. From ἐπί, upon, κόνδυλος, a condyle, and *cubitalis*, cubital. Fr., *épicondylo-cubital.* The anconeus muscle. [A, 299 (L).]

ÉPICONDYLO-CUBITO-MÉTACARPAL (Fr.), n. A-pe-ko^{2}n^2-de-lo-ku^6-be-to-ma-ta^3-ka^{3}r-pa^{3}l. See EXTENSOR *carpi ulnaris.*

ÉPICONDYLO-PHALANGÉAL (Fr.), n. A-pe-ko^{2}n^2-de-lo-fa^3-la^{3}n^2-zha-a^{3}l. See EXTENSOR *digitorum communis manus.*

EPICONDYLO-PRÆMETACARPEUS (Lat.), n. m. E^{2}p-i^2-ko^{2}n''di^{2}l(du^{6}l)-o(o^3)-pre(pra^3-e^2)-me^{2}t-a^3-ka^{3}rp'e^2-u^{3}s(u^{4}s). Fr., *épicondylo-prémétacarpien.* See EXTENSOR *metacarpi magnus.*

EPICONDYLO-PRÆPHALANGEUS (Lat.), n. m. E^{2}p-i^2-ko^{2}n''di^{2}l(du^{6}l)-o(o^3)-pre(pra^3-e^2)-fa^{2}l(fa^{3}l)-a^{2}n^2(a^{3}n^2)'je(ge^2)-u^{3}s-(u^{4}s). Fr., *épicondylo-pré-phalangien, extenseur antérieur des phalanges.* Ger., *Armbeinmuskel* (oder *Strecker*) *des Fesselkron und Hufbeins, Hufbeinstrecker, langer Hufbeinstrecker* (oder *Zehenstrecker*). The analogue in the solipeds of the extensor communis digitorum. [L.]

EPICONDYLO-RADIALIS (Lat.), n. m. E^{2}p-i^2-ko^{2}n-di^{2}l-(du^{6}l)-o(o^3)-ra^{2}d(ra^{3}d)-i^2-al(a^{3}l)'i^{2}s. Fr., *épicondylo-radial.* See SUPINATOR *radii brevis.*

EPI-CONDYLO-SUPERUNGUINALIS (Lat.), n. f. E^{2}p-i^2-ko^{2}n''di^{2}l(du^{6}l)-o(o^3)-su-pe^{2}r-u^{2}n^2(un^2)'gwi^{2}n-a(a^3)'li^{2}s. See EXTENSOR *communis digitorum.*

EPICONDYLO-SUPRACARPEUS (Lat.), n. m. E^{2}p-i^2-ko^{2}n''-di^{2}l(du^{6}l)-o(o^3)-su^2(su)-pra^3-ka^{3}rp'e^2-u^{3}s(u^{4}s). Fr., *cubital postérieur, épicondylo-sus-carpien.* Ger., *äusserer Kniebeuger* (oder *Beuger der Vorderfusswurzel*). It., *flessore externo del metacarpo, cubitale posteriore, epitroclo-* (o *epicondilo-*) *sopra-carpeo.* The analogue of the extensor carpi ulnaris of man found in the lower animals. [L.]

EPICONDYLO-SUPRAMETACARPIANUS (Lat.), adj. E^{2}p-i^2-ko^{2}n''di^{2}l(du^{6}l)-o(o^3)-su^2(su^4)-pra^3-me^{2}t-a^3-ka^{3}rp-i-an(a^{3}n)'-u^{3}s(u^{4}s). Fr., *épicondylo-sus-métacarpien.* The extensor carpi radialis brevior.

EPICONDYLO-SUPRAPHALANGETTIANUS (Lat.), n. m. E^{2}p-i^2-ko^{2}n''di^{2}l(du^{6}l)-o(o^3)-su^2(su^4)-pra^3-fal(fa^{3}l)-a^{2}n(a^{3}n^2)-je^{2}t-(ge^{2}t)-ti^2-a(a^3)'nu^{3}s(nu^{4}s). Fr., *épicondylo-sus-phalangettien.* The extensor digitorum communis. [L, 116.]—**E.-s.-p. minimi digiti.** Fr., *épicondylo-sus-phalangettien du petit doigt.* The extensor proprius minimi digiti. [L, 116.]

EPICONDYLUS (Lat.), n. m. E^{2}p-i^2-ko^{2}n'di^{2}l(du^{6}l)-u^{3}s(u^{4}s). See EPICONDYLE.—**E. extensorius.** The external condyle of the humerus. [*a*, 29.]—**E. flexorius.** The internal condyle of the humerus. [*a*, 29.]—**E. humeri externus.** The external condyle of the humerus. [*a*, 29.]—**E. femoris lateralis.** The outer tuberosity of the femur. [L, 332.]—**E. femoris medialis.** The inner tuberosity of the femur. [L, 332.]

EPICONIOIDEI (Lat.), n. m. pl. E^{2}p-i^2-ko^{2}n-i^2-o(o^2)-i^{2}d(ed)'-e^2-i(e). Of Nylander, a series of *Lichens*, comprising the *Caliciei, Tylophorei*, and *Sphærophorei.* [B, 77 (*a*, 24).]

EPICOPHOSIS (Lat.), n. f. E^{2}p-i^2-ko-fo'si^{2}s. Gen., *epicophos'eos* (*-is*). From ἐπί, upon, and κώφωσις, deafness. Fr., *épicophose.* Ger., *Folgetaubheit.* Deafness supervening upon or secondary to some disease. [F.]

EPICORACO-HUMERAL, adj. E^{2}p-i^2-ko^{2}r''a^{2}k-o-hu^2'me^{2}r-a^{2}l. From ἐπί, upon, κόραξ, a crow, and *humerus*, the shoulder. Relating to or connected with the humerus and the epicoracoid bone. ["Proc. of the Zool. Soc.," 1874, p. 76 (L).]

EPICORACOID, adj. E^{2}p-i^2-ko^{2}r'a^{2}k-oid. From ἐπί, upon, κόραξ, the crow, and εἶδος, resemblance. Fr., *épicoracoïde.* Situated upon or above the coracoid bone or process. [L.] Cf. *E.* BONE.

EPICOROLLATUS (Lat.), adj. E^{2}p-i^2-ko^{2}r-o^{2}l-lat(la^{3}t)'u^{3}s(u^{4}s). From ἐπί, upon (see also COROLLA). Fr., *épicorollé.* Having an epigynous corolla. [L, 180.]

EPICOROLLEÆ (Lat.), n. f. pl. E^{2}p-i^2-ko^{2}r-o^{2}l'le^2-e(a^3-e^2). Fr., *épicorollées.* Of Jussieu, a division of dicotyledons, including the *Synantheræ* and *Corisantheræ.* [B, 1, 170 (*a*, 24).]

ÉPICOSTAL (Fr.), adj. A-pe-kos-ta^{3}l. From ἐπί, upon, and *costa*, a rib. On the ribs. [A, 385 (*a*, 21).]

EPICOTYL, n. E^{2}p-i^2-ko^{2}t'i^{2}l. From ἐπί, upon, and κοτύλη, a socket. In botany, that part of the embryo-stem which is above the cotyledon or cotyledons. [B, 291 (*a*, 24).]

ÉPICOTYLÉAL (Fr.), n. A-pe-ko-te-la-a^{3}l Of Geoffroy St.-Hilaire, the metapterygoid bone in fishes. [L, 14.]

EPICOTYLEDONARY, adj. E^{2}p-i^2-co^{2}t-i^2-led'o^{2}n-a-ri^2. Situated above the cotyledons (said of the epicotyl). [B, 279, 291 (*a*, 24).]

EPICOTYLEDONES (Lat.), n. m. E^{2}p-i^2-ko^{2}t-i^{2}l(u^{6}l)-e^{2}d(ad)'-o^{2}n-ez(e^{2}s). Of Van Beneden, see ARTHROPODA.

EPICRANIAL, adj. E^{2}p-i^2-kran'i^2-a^{2}l. Gr., ἐπικράνιος. Lat., *epicranius.* Fr., *épicranien.* Pertaining to the epicranium or the upper part of the skull. [L.]

ÉPICRANIEN (Fr.), adj. A-pe-kra^3-ne-a^{2}n^2. See EPICRANIAL ; as a n., see OCCIPITO-FRONTALIS.

EPICRANIUM (Lat.), n. n. E^{2}p-i^2-kran(kra^{3}n)'i^2-u^{3}m(u^{4}m). From ἐπί, upon, and κρανίον, the skull. Fr., *épicrâne.* Ger., *Schädelhaut, Schädelhaube.* It., *epicranio.* Sp., *epicráneo.* 1. The soft parts covering the cranium. 2. The dorsal wall of the head of an insect. [B, 100 ; L, 41, 43, 50.]

EPICRANIUS (Lat.), adj. E^{2}p-i^2-kran(kra^{3}n)'i^2-u^{3}s(u^{4}s). See EPICRANIAL ; as a n., see OCCIPITO-FRONTALIS.—**E. frontalis.** Ger., *Stirnmuskel.* The frontal portion of the occipito-frontalis. [L, 332.]—**E. occipitalis.** Ger., *Hinterhauptmuskel.* The occipital portion of the occipito-frontalis. [L, 332.]—**E. temporalis.** The attrahens aurem muscle. [A, 262 (L).]

EPICRASIS (Lat.), n. f. E^{2}p-i^2-kras(kra^{3}s)'i^{2}s. Gen., *epicras'eos* (*-is*). Gr., ἐπίκρασις (from ἐπί, upon, and κρᾶσις, a mixing). Fr., *épicrase.* Ger., *Epicrase.* An old term for alterative treatment. [L, 41, 43, 50, 135 (*a*, 14).]

EPICRASTICUS (Lat.), adj. E^{2}p-i^2-kra^{2}s(kra^{3}s)'ti^2-ku^{3}s(ku^{4}s). From ἐπίκρασις, a tempering. Fr., *épicrastique.* Ger., *epikrastisch.* It., *epicratico.* Sp., *epicrático.* Tempering, softening. [L, 41, 50, 135 (*a*, 14).]

EPICRATIS (Lat.), n. f. E^{2}p-i^2-krat(kra^{3}t)'i^{2}s. Gen., *epicrat'idos* (*-is*). From ἐπί, upon, and κράς, the head. Of Hippocrates, a fine napkin or head-covering. [L, 94.]

EPICRISIS (Lat.), n. f. E^{2}p-i^{2}k'ri^2-si^{2}s. Gen., *epicri'seos* (*-ic'risis*). Gr., ἐπίκρισις (from ἐπικρίνειν, to decide [1st or 3d def's], or ἐπί, in addition, and κρίσις, a crisis [2d def.]). Fr., *épicrise.* Ger., *Epikrise, Beurtheilung* (1st def.). It., *epicrisi.* Sp., *e.* 1. A conclusion as to the nature, probable termination, etc., of a disease. 2. A secondary critical occurrence. [L, 41, 43, 50, 135 (*a*, 14).] 3. Concluding critical remarks in a clinical history or an essay. [A, 518.]

EPICRUSIS (Lat.), n's f. E^{2}p-i-krus'i^{2}s. Gen., *epicrus'eos* (*-is*). Gr., ἐπίκρουσις (from ἐπικρούειν, to hammer). Ger., *Klopfcur* (1st def.), *Peitschung* (2d def.). 1. A percussion with light sticks, formerly applied to the limbs of boys to make them plump ; also massage by percussion. 2. See FLAGELLATION. [L, 50, 94, 135 (*a*, 14).]

EPICTENION (Lat.), **EPICTENIUM** (Lat.), n's n. E^{2}p-i^{2}k-te^{2}n'i^2-o^{2}n, -u^{3}m(u^{4}m). Gr., ἐπικτένιον (from ἐπί, upon, and κτείς, the pubes). Of Hippocrates, the pubic hair. [L, 50, 84 (*a*, 14).]

EPICTETUS (Lat.), adj. E^{2}p-i^{2}k-te(ta)'tu^{3}s(tu^{4}s). Gr., ἐπίκτητος (from ἐπικτᾶσθαι, to gain besides). Ger., *erworben.* Of a disease, acquired. [L, 50 (*a*, 14).]

EPICYEMA (Lat.), n. n. E^{2}p-i^2-si(ku^6)-e(a)'ma^3. Gen., *epicyem'atos* (*-is*). Gr., ἐπικύημα (from ἐπικυεῖν, to become pregnant during pregnancy). Fr., *épicyème.* Ger., *Nebenleibesfrucht.* Of Hippocrates, a fœtus engendered by the impregnation of a woman who is already pregnant; also a mole. [L, 41, 50, 84, 135 (*a*, 14).]

EPICYESIS (Lat.), n. f. E^{2}p-i^2-si(ku^6)-e(a)'si^{2}s. Gen., *epicyes'eos* (*-is*). Gr., ἐπικύησις. Fr., *épicièse.* Ger., *Ueberfruchtung.* See SUPERFŒTATION.

EPICYLIS (Lat.), **EPICYLIUM** (Lat.), n's f. and n. E^{2}p-i^{2}s-(i^{2}k)'i^{2}l(u^{6}l)-is, -i^2-si^{2}l(ku^{6}l)'i^2-u^{3}m(u^{4}m). Gen., *epicyl'idos* (*-is*), *-ii.* Gr., ἐπίκυλις, ἐπικύλιον. Fr., *épicyle, épicylion.* Ger., *oberes Augenlid.* An upper eyelid. [L, 50.]

EPICYSTIC, adj. E^{2}p-i^2-si^{2}st'i^{2}k. From ἐπί, upon, and κύστις, the bladder. Situated above the urinary bladder; suprapubic and connected with the bladder (said of a fistula). [J. D. S. Davis, "N. Y. Med. Jour.," Apr. 13, 1889, p. 416.]

EPICYSTOTOMY, n. E^{2}p-i^2-si^{2}st-o^{2}t'o-mi^2. Lat., *epicystotomia* (from ἐπί, upon, κύστις, the bladder, and τέμνειν, to cut). Fr., *épicystotomie, taille sus-pubienne.* Ger., *Epicystotomie, höher Steinschnitt.* It., *epicistotomia.* Sp., *epicistotomia.* See *Suprapubic* CYSTOTOMY.

EPICYTE, n. E^{2}p'i^2-sit. From ἐπί, upon, and κύτος, a cell. Fr., *épicyte.* The cuticular investment of a cell. [L, 321.]

EPIDELOS (Lat.), adj. E^{2}p-i^2-del(dal)'o^{2}s. Gr., ἐπίδηλος (from ἐπί, upon, and δῆλος, evident). Of Hippocrates, indicative (of a crisis to come); as a n., see PUBERTY. [A, 311 (*a*, 30); L, 94.]

EPIDEMESIS (Lat.), **EPIDEMIA** (Lat.), n's f. E^{2}p-i^2-de^{2}m-(dam)-e(a)'si^{2}s, -dem(dam)'i^2-a^3. Gr., ἐπιδήμησις, ἐπιδημία (from ἐπιδημεῖν, to prevail epidemically). The prevalence of an epidemic disease; also the disease itself. [A, 387.]

EPIDEMIC, adj. E^{2}p-i^2-de^{2}m'i^{2}k. Gr., ἐπιδημητικός. Lat., *epidemicus.* Fr., *épidémique.* Ger., *epidemisch.* It., *epidemico.* Sp., *epidémico.* Affecting a great many individuals in rapid succession, but due to some agency that has been brought from afar and not generated in the locality, thus differing from *endemic* (said of diseases); as a n. (Lat., *epidemia;* Fr., *épidémie;* Ger., *Epidemie*), a particular instance of the prevalence of such a disease; also the disease itself.—**Milk e.** An e. disseminated by means of infected milk. ["Lancet," Feb. 7, 1885, p. 265.]

EPIDEMICITY, n. E^{2}p-i^2-de^{2}m-i^{2}s'i^{2}t-i^2. From ἐπίδημος, among the people. Fr., *épidémicité.* The character of being epidemic. [D, 41.]

ÉPIDÉMIE (Fr.), n. A-pe-da-me. See EPIDEMIC.—**E. d'Azannon.** See PARALYSIE *douloureuse aigue.*

EPIDEMIOGRAPHY, EPIDEMIOLOGY, n's. E^{2}p-i^2-de^{2}m-i^2-o^{2}g'ra^{2}f-i^2, -o^{2}l'o-ji^2. Lat., *epidemiographia, epidemiologia* (from ἐπιδημία, an epidemic, and γράφειν, to record, or λόγος, understanding). Fr., *épidémiographie, épidémiologie.* Ger., *Epidemiographie, Epidemiologie, Seuchenlehre.* The scientific study of epidemic diseases. [A, 301, 322 (*a*, 21).]

EPIDEMY, n. E^{2}p'i^2-de^{2}m-i^2. Gr., ἐπιδημία. See EPIDEMIC.

ÉPIDENDRE (Fr.), n. A-pe-da^{3}n^{2}dr'. See EPIDENDRUM.—**E. à fenilles obtuses** (Fr.). See EPIDENDRUM *obtusifolium.*—**E. à fenilles ténues** (Fr.). See EPIDENDRUM *tenuifolium.*—**E. à fleurs en queue.** See EPIDENDRUM *candatum.*—**E. en coquille.** See EPIDENDRUM *cochleatum.*—**E. irisée.** The *Cattleya bicolor.* [B, 121 (*a*, 24).]—**E. jaune.** See EPIDENDRUM *luteum.*—**E. peint.** See EPIDENDRUM *scriptum.*

EPIDENDREÆ (Lat.), n. f. pl. E^{2}p-i^2-de^{2}n'dre^2-e(a^3-e^2). Fr., *épidendrées.* 1. Of Humboldt, Bonpland, and Kunth, a section (of Lindley, a suborder; of Bartling, a division; of Bentham and Hooker, a tribe) of the *Orchideæ*, comprising the *Vandeæ, Epidendreæ*, and *Malaxideæ*, or the *Pleurothalleæ, Malaxeæ, Liparieæ, Dendrobieæ, Erieæ, Bletieæ, Cœlogyneæ, Stenoglosseæ*, and *Lœlieæ.* 2. Of Reichenbach, a division of the *Ceriorchideæ*, comprising the *Vandeæ* and *E. genuinæ.* 3. Of Lindley (1826), a tribe of the *E.* (see 1st def.), subsequently a tribe (of Reichenbach [1828] a division) of the *Orchideæ;* of Dumortier, a subtribe of the *Epidendrineæ.* [B, 42, 121, 170 (*a*, 24).]

EPIDENDRINEÆ (Lat.), n. f. pl. E^{2}p-i^2-de^{2}n-dri^{2}n'e^2-e(a^3-e^2). Of Dumortier, a tribe of the *Cerorchideæ*, comprising the *Epidendreæ* and *Vandeæ.* [B, 121, 170 (*a*, 24).]

EPIDENDRIUS (Lat.), adj. E^{2}p-i^2-de^{2}n'dri^2-u^{3}s(u^{4}s). From ἐπί, upon, and δένδρον, a tree. Fr., *épidendre.* Growing upon trees. [L, 41.]

EPIDENDRON (Lat.). **EPIDENDRUM** (Lat.), n's n. E^{2}p-i^2-de^{2}n'dro^{2}n, -dru^{3}m(dru^{4}m). From ἐπί, upon, and δένδρον, a tree. Fr., *épidendre.* A genus of epiphytic orchids found in the southern and tropical regions of North America. [B, 42 (*a*, 24).]—**E. auriculatum.** Fr., *épidendre auriculé.* A species employed in Chili as a galactagogue and vermifuge. [B, 173 (*a*, 24); L, 105.]—**E. bifidum.** A species used in the Antilles as a purgative, diuretic, and vermifuge. [L, 49.]—**E. caudatum.** Fr., *épidendre à fleurs en queue.* A species indigenous to the West Indies; used as an antispasmodic. [B, 173 (*a*, 24).]—**E. cochleatum.** Fr., *épidendre en coquille.* A species indigenous to Santo Domingo, the leaves of which are used in infusion as an antispasmodic and expectorant. [B, 173 (*a*, 24).]—**E. luteum.** Fr., *épidendre jaune.* A species indigenous to Chilli, an infusion of which is used as a galactagogue. [B, 173 (*a*, 24).]—**E. obtusifolium.** Fr., *épidendre à feuilles obtuses.* A species indigenous to the Antilles; used as an external stimulant and internally as a vermifuge. [B, 173 (*a*, 24).]—**E. ovatum.** See ANANTALI.—**E. scriptum.** Fr., *épidendre peint.* A species indigenous to India, called *bala pola.* The root, mixed with rice, is applied to abscesses. [B, 173 (*a*, 24); L, 105.]—**E. spathulatum.** A species indigenous to the East Indies. The leaves, boiled in oil, are used as an emollient, and the powder is employed in the treatment of diarrhœa and pectoral diseases. [B, 180 (*a*, 24).]—**E. tenuifolium.** Fr., *épidendre à feuilles ténues.* A variety having a musky, astringent root; used as an anodyne in the form of a poultice, and internally (powdered and macerated in vinegar) for hæmorrhoids, leucorrhœa, etc. [B, 173 (*a*, 24).]—**E. vanilla.** See VANILLA *aromatica.*

EPIDENDRUS (Lat.), adj. E^{2}p-i^2-de^{2}n'dru^{3}s(dru^{4}s). See EPIDENDRIUS.

EPIDERIS (Lat.), n. f. E^{2}p-i^{2}d'e^{2}r-i^{2}s. Gen., *epide'ridos* (*-is*). Gr., ἐπίδερις. See EPIDERRHIS.

EPIDERM, n. E^{2}p'i^2-du^{5}rm. See EPIDERMIS and EPIBLAST.

EPIDERMA (Lat.), n. n. E^{2}p-i^2-du^{5}rm(de^{2}rm)'a^3. Gen., *epiderm'atos* (*-is*). See EPIDERMIS.

EPIDERMAL, adj. E^{2}p-i^2-du^{5}rm'a^{2}l. See EPIDERMIC.

EPIDERMATA (Lat.), n. n. pl. E^{2}p-i^2-du^{5}rm(de^{2}rm)'a^3-ta^3. Abnormal growths of the epidermis. [G.]

EPIDERMATIC, adj. E^{2}p-i^2-du^{5}rm-a^{2}t'i^{2}k. A more correct form of *epidermic* (*q. v.*).

EPIDERMATIS (Lat.), n. f. E^{2}p-i^2-du^{5}rm(de^{2}rm)'a(a^3)-ti^{2}s. Gen., *epidermat'idos* (*-is*). See EPIDERMIS.

EPIDERMATOID, adj. E^{2}p-i^2-du^{5}rm'a-toid. From ἐπί, upon, δέρμα, the skin, and εἶδος, resemblance. Pertaining to or resembling the epidermis. [L, 56.]

EPIDERMEÆ (Lat.), n. f. pl. E^{2}p-i^2-du^{5}rm(de^{2}rm)'e^2-e(a^3-e^2). Fr., *épidermées.* Of Bonnemaison, a family of the *Hydrophytæ*, comprising *Grammita, Torularia, Sphacelaria*, and others. [B, 170 (*a*, 24).]

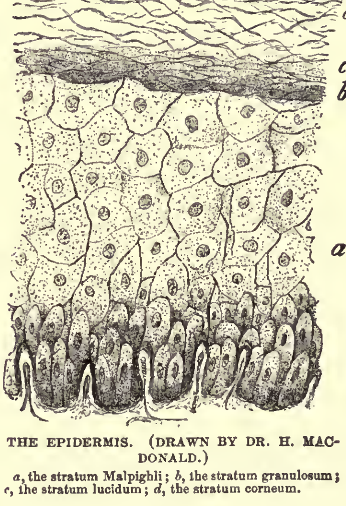
EPIDERMEOUS, EPIDERMIC, adj's. E^{2}p-i^2-du^{5}rm'e-u^{3}s, -i^{2}k. Lat., *epidermicus.* Fr., *épidermique.* Ger., *epidermisch.* Pertaining to the epidermis or consisting of the cells of the epidermis. [J.]

EPIDERMICULA (Lat.), n. f. E^{2}p-i^2-du^{5}rm(de^{2}rm)-i^{2}k'u^2(u^4)-la^3. The continuous layer of flattened cells forming a cuticula or ectal covering for the hairs of men and animals and for the hoofs of ruminants. It is absent from the human nails. [J, 31.]

EPIDERMIDAL, adj. E^{2}p-i^2-du^{5}rm'i^{2}d-a^{2}l. See EPIDERMIC.

EPIDERMIDOID, adj. E^{2}p-i^2-du^{5}rm'i^2-doid. Fr., *épidermoïde.* Pertaining to or like the epidermis. [L, 107.]

EPIDERMIDOLYSIS (Lat.), n. f. E^{2}p-i^2-du^{5}rm(de^{2}rm)-i^2-do^{2}l'i^2(u^6)-si^{2}s. Gen., *epidermidolys'eos* (*-ol'ysis*). From ἐπίδερμις, the epidermis, and, λύσις, a loosening. Fr., *épidermidolyse.* Ger., *Ablösung des Oberhäutchens.* Loosening or separation of the epidermis. [L, 50.]



EPIDERMIDOMYCOSIS (Lat.), n. f. E^{2}p-i^2-du^{5}rm(de^{2}rm)''-i^{2}d-o(o^3)-mi^{2}k(mu^{6}k)-o'si^{2}s. Gen., *epidermidomycos'eos* (*-is*). For deriv., see EPIDERMIS and MYCOSIS. Any disease produced by the growth of a vegetable parasite in the epidermis. [G.]

EPIDERMIDONOSUS (Lat.), n. f. E^{2}p-i^2-du^{5}rm(de^{2}rm)-i^{2}d-o^{2}n'o^{2}s-u^{3}s(u^{4}s). From ἐπίδερμις, the epidermis, and νόσος, a disease. See EPIDERMIDOSIS.

EPIDERMIDOPHYTON (Lat.), n. n. E^{2}p-i^2-du^{5}rm(de^{2}rm) i^{2}d-o^{2}f'i^{2}t(u^{6}t)-o^{2}n. From ἐπίδερμις, the epidermis, and φυτόν, a plant. A fungus found in the scales of patches of psoriasis. [Lang, Volkmann's "Samml. klin. Vortr.," No. 208, quoted in "Edinb. Med. Jour.," Apr., 1882; "Mntsh. f. prakt. Dermat.," 1888, No. 21, p. 1116, and x, 4, p. 183.]

EPIDERMIDOSIS (Lat.), n. f. E^{2}p-i^2-du^{5}rm(de^{2}rm)-i^2-do'-si^{2}s. Gen., *epidermidos'eos* (*-is*). From ἐπίδερμις, the epidermis. A disease of the epidermis. In the pl., *epidermidoses* (Ger., *Epidermidosen, Wachsthumsanomalien der Oberhaut und ihrer Anfangsgebilde*), in Auspitz's classification of skin diseases, the eighth class, embracing diseases of the epidermis and its appendages, and including the orders *Keratonosi, Chromatoses*, and *Akanthoses.* [G, 4.]

EPIDERMIS (Lat.), n. f. E^{2}p-i^2-du^{5}rm-(de^{2}rm)'i^{2}s. Gen., *epiderm'idos* (*-is*). Gr., ἐπίδερμις (from ἐπί, upon, and δέρμα, the skin). Fr., *épiderme, couche cuticulaire* (ou *épidermique*), *surpeau.* Ger., *E., Oberhaut.* It., *epidermide.* Sp., *e.* 1. The epiderm, cuticle, or scarf-skin; the epithelial or cellular covering of the corium. Its deep or ental surface is accurately molded upon the corium, while the ectal surface forms the outside of the body. It is composed of several layers of cells differing

THE EPIDERMIS. (DRAWN BY DR. H. MACDONALD.)

a, the stratum Malpighii; *b*, the stratum granulosum; *c*, the stratum lucidum; *d*, the stratum corneum.

in character in different layers (see STRATUM *corneum*, STRATUM *lucidum*, and RETE *mucosum*). 2. The horny layer (*stratum corneum*) of the skin. 3. A layer of animal matter found upon the exterior of the shells of many living molluscs. [J, 82.] 4. In botany, the primary covering of plants, consisting usually of one, but sometimes of two or three, layers of cells, which lie in close juxtaposition without open spaces, except for stomata and water-pores. The outer face of the epidermic cell-wall is thickened and cutinized. [B, 291 (*a*, 24); J, 26, 31, 35; L, 147.]—**E'abschilferung** (Ger.). Exfoliation of the e. [Auspitz (G).]—**E'borke.** A crust formed of e. scales. [G.]—**Eigentliche E.** (Ger.). See STRATUM *corneum*.—**E'fortsatz** (Ger.). A continuation of or sprout from the epidermis. [H.]—**E'gebilde** (Ger.). An e. or epithelium. ["Arch. f. Anat. u. Phys.," 1842 (J).]—**E'schichten.** The layers or strata of the e. [G.]—**E'schuppen, E'schüppchen.** Epidermic scales. [A, 521.]—**E'überzug.** See *E.*—**Proper e.** The inner layers of e. (4th def.) apart from the cuticle. [B, 77 (*a*, 24).]—**True e.** See STRATUM *corneum*.

ÉPIDERMISATION (Fr.), n. A-pe-de^{2}r-me-za^3-se-o^{3}n^2. The formation of epidermis. [A, 385 (*a*, 21).]

EPIDERMIUM (Lat.), n. n. E^{2}p-i^2-du^{5}rm(de^{2}rm)'i^2-u^{3}m(u^{4}m). See EPIDERMIS.

EPIDERMOID, adj. E^{2}p-i^2-du^{5}rm'oid. Lat., *epidermoides* (from ἐπιδερμίς, the epidermis, and εἶδος, resemblance). Fr., *épidermoïde.* Ger., *oberhautähnlich.* Pertaining to or resembling the epidermis; epidermic. [G.]

EPIDERMOLYSIS (Lat.), n. f. E^{2}p-i^2-du^{5}rm(de^{2}rm)-o^{2}l'i^2-(u^6)-si^{2}s. See EPIDERMIDOLYSIS.—**E. bullosa hereditaria.** Fr., *épidermolyse bulleuse héréditaire, disposition héréditaire aux éruptions bulleuses.* Ger., *hereditäre Anlage zur Blasenbildung.* An inherited predisposition to the formation of bullæ. [Köbner, "Dtsch. med. Woch.," 1886, No. 2; "Ann. de dermat. et de syphil.," Mar., 1886, p. 155.]

EPIDERMO-MUSCULAR, adj. E^{2}p-i^2-du^{5}rm''o-mu^{3}s'ku^2-la^{3}r. See NEURO-MUSCULAR.

ÉPIDERMOPHORE (Fr.), adj. A-pe-de^{2}r-mo-for. From ἐπιδερμίς, epidermis, and φορεῖν, to carry. Bearing or covered with epidermis. [A, 385 (*a*, 21).]

EPIDERMOPHYTON (Lat.), n. n. E^{2}p-i^2-du^{5}rm(de^{2}rm)-o^{2}f'-i^{2}t(u^{6}t)-o^{2}n. See EPIDERMIDOPHYTON.

EPIDERMOSE, n. E^{2}p-i^2-du^{5}rm'os. Fr., *épidermose.* Ger., *E.* A substance obtained by treating fresh fibrin with diluted hydrochloric acid; according to Mulder, identical with protein binoxide. [L, 41 (*a*, 14).]

EPIDERRHIS (Lat.), n. f. E^{2}p-i^2-de^{2}r'ri^{2}s. Gen., *epider'rhidos (-is).* Gr., ἐπιδεῤῥίς. The clitoris. [A, 387.]

EPIDESIS (Lat.), n. f. E^{2}p-i^{2}d'e^{2}s-i^{2}s. Gen., *epides'eos (-id'esis).* Gr., ἐπίδεσις (from ἐπιδεῖν, to bind). Fr., *épidèse.* Ger., *Verbinden einer Wunde, Unterbindung.* The process of binding up a wound or compressing a blood-vessel by means of a bandage. [L, 50, 135 (*a*, 14).]

EPIDESMA (Lat.), **EPIDESMIS** (Lat.), **EPIDESMIUM** (Lat.), n's n., f., and n. E^{2}p-i^2-de^{2}z(de^{2}s)'ma^3, -mi^{2}s, -mi^2-u^{3}m-(u^{4}m). Gen., *epides'matos (-is), -midos (-is), -mii.* See EPIDESMUS.

EPIDESMOCHARTA (Lat.), n. f. E^{2}p-i^2-de^{2}z(de^{2}s)''mo-(mo^3)-ka^{3}rt(ch^{2}a^{3}rt)'a^3. From ἐπίδεσμος, a bandage, and χάρτης, paper. Ger., *Verbandpapier.* Of Ducommun, paper impregnated with powdered charcoal; used for surgical dressings. [L, 50 (*a*, 14).]

EPIDESMOS (Lat.), **EPIDESMUM** (Lat.), **EPIDESMUS** (Lat.), n's m., n., and m. E^{2}p-i^2-de^{2}z(de^{2}s)'mo^{2}s, -mu^{3}m(mu^{4}m), -mu^{3}s(mu^{4}s). Gr., ἐπίδεσμος (from ἐπιδεῖν, to bind on). Fr., *épidesme.* Of Hippocrates and Aristotle, a surgical bandage. [L, 50, 349.]

ÉPIDIAPHRAGMOTOPIE [Piorry] (Fr.), **ÉPIDIAPHRATOPIE** [Piorry] (Fr.), n's. A-pe-de-a^3-fra^{3}g-mo-to-pe, -fra^3-to-pe. From ἐπί, augm., διάφραγμα, the diaphragm, and ἄτοπος, out of place. Displacement of the diaphragm upward. [L, 50, 82 (*a*, 14).]

EPIDIBROMHYDRIN, n. E^{2}p-i^2-di-brom-hi'dri^{2}n. Fr., *épidibromhydrine.* A body, $C_3H_4Br_2$, resulting from the action of potassium on tribromhydrin. [L, 41 (*a*, 14).]

EPIDICHLORHYDRIN, n. E^{2}p-i^2-di-klor-hi'dri^{2}n. Fr., *épidichlorhydrine.* A body, $C_3H_4Cl_2$, analogous to epidibromhydrin, resulting from the action of potassium on glyceric trichlorhydrin. [L, 41 (*a*, 14).]

EPIDIDYMICUS (Lat.), adj. E^{2}p-i^2-di(di^2)-di^{2}m(du^{6}m)'i^{2}k-u^{3}s(u^{4}s). Pertaining to or connected with the epididymis. [L, 332.]

ÉPIDIDYMIE [Piorry] (Fr.), n. A-pe-de-de-me. See EPIDIDYMITIS.

EPIDIDYMIS (Lat.), n. f. E^{2}p-i^2-di^{2}d'i^2(u^6)-mi^{2}s. Gen., *epididym'idos (-is).* Gr., ἐπιδιδυμίς (from ἐπί, upon, and δίδυμος, the testicle). Fr., *épididyme.* Ger., *Nebenhode.* 1. A long, narrow body attached to the posterior border of the testicle. Its upper and larger extremity is termed the globus major, its lower the globus minor, and the intervening portion the body. It consists principally of the canal of the e., into which the coni vasculosi empty at the upper end, and which, after being greatly convoluted, is continuous below with the vas deferens. Cf. VAS *deferens.* 2. In birds, an organ associated with the testicle, apparently the remnant of the primordial kidney. [L, 343.]

EPIDIDYMITIS (Lat.), n. f. E^{2}p-i^2-di^{2}d-i^2(u^6)-mit(met)'i^{2}s. Gen., *epididymit'idos (-is).* From ἐπιδιδυμίς (see also *-itis**). Fr., *épididymite.* Ger., *Nebenhodenentzündung).* Inflammation of the epididymis. The acute form, which commonly occurs as a complication of gonorrhœa, is usually attended with much swelling and intense pain, together with fever. The chronic form generally accompanies chronic urethral inflammation, and often leads to the formation of abscesses. [A, 326 (*a*, 21); G.]—**E. blennorrhagica.** Gonorrhœal e.—**E. caseosa.** See *Tuberculous e.*—**E. gonorrhoica.** Gonorrhœal e.—**E. pyorrhoica.** E. ending in suppuration. [Z. Ssysran, "Russk. Med.," 29, 1886; "Dtsch. Med.-Ztg.," Nov. 11, 1886, p. 1014.]—**E. tuberculosa.** See *Tuberculous e.*—**E. urethralis.** E., usually acute, due to inflammation or irritation within the urethra. [G.]—**Gonorrhœal e.** Lat., *e. gonorrhoica.* Fr., *épididymite blennorrhagique, chaude-pisse tombée dans les bourses.* Acute e. complicating gonorrhœa. [G.]—**Pseudo-tuberculous e.** Fr., *épididymite-pseudo-tuberculeuse.* A variety of e., really an indolent tumefaction, occurring almost exclusively in the course of gleet; often mistaken for tuberculous e. [L, 88 (*a*, 14).]—**Syphilitic e.** Lat., *e. syphilitica.* Fr., *épididymite syphilitique.* E. due to syphilis; usually affecting the head of the epididymis and forming a round, hard tumor. The testicle is rarely involved. [G.]—**Tuberculous e.** Lat., *e. tuberculosa, e. caseosa.* Fr., *épididymite tuberculeuse.* E. due to tubercular deposit, causing a swelling that leads to suppuration and often results in persistent fistulæ. [A, 326 (*a*, 14).]

EPIDISCAL, adj. E^{2}p-i^2-di^{2}sk'a^{2}l. Fr., *epidiscalis* (from ἐπί, upon, and δίσκος, a disc). Fr., *épidiscal.* Of stamens, inserted on the upper surface of the disc. [B, 1 (*a*, 24).]

EPIDOSIS (Lat.), n. f. E^{2}p-i^{2}d'o(o^2)-si^{2}s. Gen., *epidos'eos (-id'osis).* Gr., ἐπίδοσις (from ἐπιδιδόναι, to increase). Fr., *épidose.* Ger., *Zunahme.* 1. Growth, enlargement, swelling. 2. Exacerbation (of a disease). [A, 322 (*a*, 21).]

EPIDROME (Lat.), **EPIDROMIA** (Lat.), **EPIDROMIS** (Lat.), n's. E^{2}p-i^{2}d'ro^{2}m-e(a), -i^{2}d-rom(ro^{2}m)'i^2-a^3, -i^{2}d'ro^{2}m-i^{2}s. Gr., ἐπιδρομή (from ἐπιδραμεῖν, to run over). Fr., *épidrome.* Ger., *Blutanlauf.* Congestion resulting from constriction. [L, 43, 50, 135 (*a*, 14).]

EPIDURAL, adj. E^{2}p-i^2-du^2'ra^{2}l. From ἐπί, upon, and *durus* (see DURA). Situated upon or outside the dura. [J.]

ÉPIÉ (Fr.), adj. A-pe-a. See SPICATE.

ÉPIENCÉPHALE (Fr.), n. A-pe-a^{3}n^2-sa-fa^{3}l. See EPENCEPHALON.

ÉPIENTÈRE (Fr.), n. A-pe-a^{3}n^2-te^{2}r. The gastro-pulmonary mucous membrane. [L, 41.]

EPIETHYLIN, n. E^{2}p-i^2-e^{2}th'i^{2}l-i^{2}n. Ger., *Epiäthylin.* Glyceryl oxyethyl ether; a liquid, $C_3H_5O(OC_2H_5) = C_5H_{10}O_2$, of agreeable odor. [B, 4.]

EPIFAGUS (Lat.), n. f. E^{2}p-i^2-fag(fa^{3}g)'u^{3}s(u^{4}s). See EPIPHEGUS.

EPIFOLLICULITIS (Lat.), n. f. E^{2}p-i^2-fo^{2}l-li^2-ku^2(ku^4)-li(le)'-ti^{2}s. Gen., *epifolliculit'idos (-is).* From ἐπί, upon, and *folliculus*, a follicle (see also *-itis**). Of E. Besnier, an inflammation of the epidermis of the scalp localized about the hair-follicles. ["Mntsh. f. prakt. Dermat.," ix, 10, Nov. 15, 1889, p. 474.] Cf. FOLLICULITIS *epilatoria.*

EPIFRONTALIS (Lat.), adj. E^{2}p-i^2-fro^{2}n-tal(ta^{3}l)'i^{2}s. From ἐπί, upon, and *frons*, the forehead. See EPIPROSOPIUS.

EPIGÆA (Lat.), n. f. E^{2}p-i^2-je'(ga^3-a')-a^3. From ἐπί, upon, and γαῖα, the earth. Fr., *épigée.* Ger., *Grundstrauch.* It., *corbezzolo.* Sp., *fresal.* Of Linnæus, a genus of ericaceous plants, referred by Bentham and Hooker to the *Andromedeæ.* [B, 42 (*a*, 24).]—**E. repens.** Trailing arbutus, American ground laurel, may-flower; a species the leaves and stems of which are used like uva ursi and buchu in diseases of the urinary organs and pelvic viscera. According to Darlington, it has been thought to injure cattle if eaten. [B, 5, 34 (*a*, 24).]—**Extractum epigææ fluidum.** A preparation made by moistening 16 troy ounces of *E. repens* in moderately fine powder with 6 fl. oz. of diluted alcohol, packing in a conical percolator and pouring diluted alcohol over it until 3 pints of fluid are obtained; reserving the 6 fl. oz., evaporating the remainder to 6 fl. oz., adding 8 troy ounces of sugar while hot, mixing with the reserved portion and straining. ["Proc. of the Am. Pharm. Assoc.," xi (*a*, 14).]

EPIGÆA REPENS. [A, 327.]

EPIGÆAL, EPIGÆAN, EPIGÆOUS, adj's. E^{2}p-i^2-je'a^{2}l, -a^{2}n, -u^{3}s. Gr., ἐπίγαιος (from ἐπί, upon, and γαῖα, the earth). Lat., *epigæus.* Fr., *épigé.* Ger., *oberirdisch.* Of plants, growing upon and close to the surface of the earth. [B, 121, 123 (*a*, 24).]

EPIGASTRALGIA (Lat.), n. f. E^{2}p-i^2-ga^{2}st(ga^{3}st)-ra^{2}l(ra^{3}l)'-ji(gi^2)-a^3. From ἐπιγάστριον, the epigastrium, and ἄλγος, pain. Fr., *épigastralgie.* Ger., *Schmerz im Epigastrium.* Pain in the epigastrium. [Huchard, "Union méd.," Aug. 4, 1883, p. 197 (D).]

ÉPIGASTRE (Fr.), n. A-pe-ga^{3}str'. See EPIGASTRIUM.

EPIGASTRIAL, EPIGASTRIC, adj's. E^{2}p-i^2-ga^{2}st'ri^2-a^{2}l, -ri^{2}k. Lat., *epigastricus, epigastrius* (from ἐπί, upon, and γαστήρ, the stomach). Fr., *épigastrique.* Ger., *epigastrisch.* It., *epigastrico.* Sp., *epigástrico.* Pertaining to the epigastrium. [*a*, 17.]

EPIGASTRIOCELE (Lat.), n. f. E^{2}p-i^2-ga^{2}st(ga^{3}st)-ri^2-o(o^3)-se(ka)'le(la); in Eng., e^{2}p-i^2-ga^{2}st'ri^2-o-sel. From ἐπιγάστριον, the

epigastrium, and κήλη, a tumor. Fr., *épigastrocèle*. Ger., *Oberbauchbruch*. A hernia in the epigastrium. [E.]

EPIGASTRION (Lat.), **EPIGASTRIUM** (Lat.), n's n. E^{2}p-i^2-ga^{2}st(ga^{3}st)'ri^2-o^{2}n, -u^{3}m(u^{4}m). Gr., ἐπιγάστριον (from ἐπί, upon, and γαστήρ, the stomach). Fr., *épigastre*. Ger., *E.*, *Oberbauchgegend*. 1. Lit., that which lies upon or over the stomach; the superior central region of the abdomen, containing the middle and pyloric end of the stomach, the left lobe of the liver and the lobus Spigelii, the hepatic vessels, the cœliac axis, the semilunar ganglia, the pancreas, and parts of the aorta, vena cava, vena azygos, and thoracic duct. [A, 478 (α, 17).] 2. The first ventral segment in the *Hexapoda*. [L, 343.]

EPIGASTRIUS (Lat.), adj. E^{2}p-i^2-ga^{2}st(ga^{3}st)'ri^2-u^{3}s(u^{4}s). Gr., ἐπιγάστριος. Epigastric; as a n., a double monster in which one embryo is undeveloped, and is connected as a free or subcutaneous parasitic mass with the epigastric region of the other. [A, 326 (α, 21).]

EPIGASTROCELE (Lat.), n. f. E^{2}p-i^2-ga^{2}s(ga^{3}s)-tro-se(ka)'-le(la); in Eng., e^{2}p-i^2-ga^{2}s'tro-sel. See EPIGASTRIOCELE.

ÉPIGÉ (Fr.), adj. A-pe-zha. See EPIGÆOUS.

EPIGENE, adj. E^{2}p'i^2-jen. See EPIGENOUS.

EPIGENEMA (Lat.), n. n. E^{2}p-i^2-je^{2}n(ge^{2}n)-e(a)'ma^3. See EPIGENNEMA.

EPIGENESIS (Lat.), n. f. E^{2}p-i^2-je^{2}n(ge^{2}n)'e^{2}s-i^{2}s. Gen., *epigenes'eos* (*-gen'esis*). Gr., ἐπιγένεσις (from ἐπιγίγνεσθαι, to be born after). Fr., *épigénèse*. Ger., *E.* 1. Of Robin (1867), the formation of anatomical elements by growth upon other elements (*e. g.*, in the case of the connective-tissue corpuscles, which arise by a cone-like prolongation of transparent matter from the embryoplastic nuclei produced by genesis or free cell-formation). [J, 27.] 2. Of Wolff, the doctrine that organs are progressively formed and differentiated from a homogeneous germ. [A, 8; A, 301 (α, 21); L, 121.]

EPIGENESIST, n. E^{2}p-i^2-je^{2}n'e^{2}s-i^{2}st. Fr., *épigénésiste*. One who believes in the theory of epigenesis. [L, 32, 56.]

ÉPIGÉNIE (Fr.), n. A-pe-zha-ne. See EPIGENY.

EPIGENNEMA (Lat.), n. n. E^{2}p-i^2-je^{2}n(ge^{2}n)-ne(na)'ma^3. Gen., *epigennem'atos* (*-is*). Gr., ἐπιγέννημα (from ἐπιγεννᾶν, to produce after). Fr., *épigénème*. Ger., *Nacherzeugte*. Of Galen, an after-symptom; one that shows itself late in the course of a disease or occurs as the result of a disease that is past. [A, 211 (α, 17); A, 387; L, 50.]

EPIGENOUS, adj. E^{2}p-i^{2}j'e^{2}n-u^{3}s. Lat., *epigenus* (from ἐπί, upon, and γίγνεσθαι, to be born). Fr., *épigène*. Ger., *epigenisch*. 1. Of Link, growing upon the upper surface of a leaf or other part (said of *Fungi*). [B, 1, 19 (α, 24).] 2. Presenting the phenomenon of epigeny. [L, 180.]

EPIGENY, n. E^{2}p-i^{2}j'e^{2}n-i^2. Lat., *epigenia* (from ἐπί, upon, and γεννᾶν, to engender). Fr., *épigénie*. A phenomenon which takes place when a crystallized mineral undergoes, without change of form, chemical changes consisting in the loss of one of its elements and the admission of another, or in the admission of another only. [A, 301 (α, 21).]

EPIGEOUS, adj. E^{2}p-i^2-je'u^{3}s. See EPIGÆOUS.

EPIGIGNOMENON (Lat.), **EPIGINEMA** (Lat.), **EPIGINESIS** (Lat.), **EPIGINOMENON** (Lat.), n's n., n., f., and n. E^{2}p-i^2-gi^{2}g-no^{2}m'e^{2}n-o^{2}n, -gi^2-ne(na)'ma^3, -gi^{2}n'e^{2}s-i^{2}s, -gi^2-no^{2}m'e^{2}n-o^{2}n. Gen., *epiginem'atos* (*-is*), *epigines'eos* (*epigin'esis*). See EPIGENNEMA.

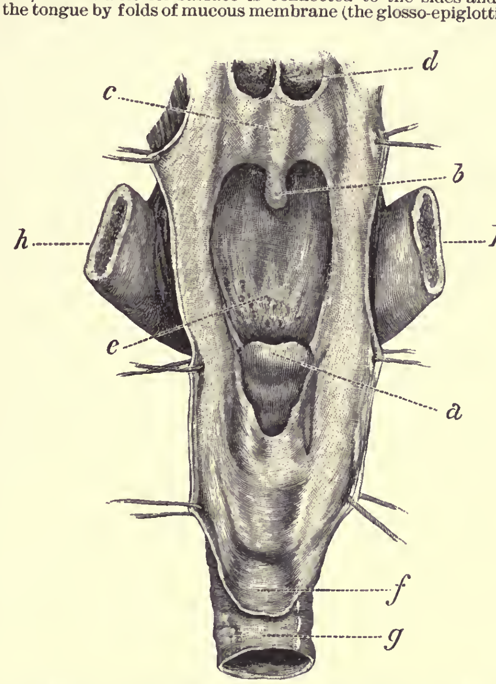
EPIGLOSSA (Lat.), n. f. E^{2}p-i^2-glo^{2}s(glos)'sa^3. From ἐπί, upon, and γλῶσσα, the tongue. Fr., *épiglosse*. Of Savigny, a peculiar organ of the mouth of the *Hymenoptera*. [L, 180.]

EPIGLOSSIS (Lat.), n. f. E^{2}p-i^2-glo^{2}s(glos)'si^{2}s. Gen., *epiglos'sidos* (*-is*). See EPIGLOTTIS.

EPIGLOSSUM (Lat.), n. n. E^{2}p-i^2-glo^{2}s(glos)'su^{3}m(su^{4}m). The *Ruscus aculeatus*. [L, 116.]

EPIGLOTTIARYTÆNOIDEUS (Lat.), adj. E^{2}p-i^2-glo^{2}t-(glot)-ti^2-a^{2}r(a^{3}r)-i^2(u^6)-ten(ta^3-e^{2}n)-o(o^2)-i^{2}d(ed)'e^2-u^{3}s(u^{4}s). See EPIGLOTTIDEO-ARYTÆNOIDEUS.

EPIGLOTTIC, adj. E^{2}p-i^2-glo^{2}t'i^{2}k. Lat., *epiglotticus*, *epiglottideus* (from ἐπί, upon, and γλῶσσα, the tongue). Fr., *épiglottique*. Ger., *Epiglottis betreffend*. Pertaining to the epiglottis. [C.]



EPIGLOTTICOPALATINUS (Lat.), adj. E^{2}p-i^2-glo^{2}t(glot)''-ti^2-ko(ko^3)-pa^{2}l(pa^{3}l)-a^3-tin(ten)'u^{3}s(u^{4}s). Pertaining to or connected with the epiglottis and the soft palate. [L, 332.]

EPIGLOTTIDEAN, adj. E^{2}p-i^2-glo^{2}t-ti^{2}d'e-a^{2}n. Lat., *epiglottideus*. See EPIGLOTTIC.

EPIGLOTTIDEO-ARYTÆNOIDEUS (Lat.), adj. E^{2}p-i^2-glo^{2}t(glot)-ti^{2}d''e^2-o(o^3)-a^{2}r(a^{3}r)-i^2(u^6)-te^{2}n(ta^3-e^{2}n)-o(o^2)-i^{2}d(ed)'e^2-u^{3}s(u^{4}s). Pertaining to or connected with the epiglottis and the arytænoid cartilages; as a n., see ARYTÆNO-EPIGLOTTIDEUS. [L, 332.]

EPIGLOTTIDITIS (Lat.), n. f. E^{2}p-i^2-glo^{2}t(glot)-ti^2-di(de)'ti^{2}s. Gen., *epiglottidit'idos* (*-is*). From ἐπιγλωττίς, the epiglottis (see also *-itis**). Fr., *épiglottite*. Ger., *Kehldeckelentzündung*. Inflammation of the epiglottis. [L, 50 (α, 14).]

EPIGLOTTIS (Lat.), n. f. E^{2}p-i^2-glo^{2}t(glot)'ti^{2}s. Gen., *epiglot'tidos* (*-is*). Gr., ἐπιγλωττίς, ἐπιγλωσσίς (from ἐπί, upon, and γλῶσσα, the tongue). Fr., *épiglotte*. Ger., *Kehldeckel*. It., *epiglottide*. Sp., *epiglotis*. 1. A thin leaf-shaped lamella of yellow fibro-cartilage, placed behind the tongue and in front of the superior opening of the larynx, which it closes during deglutition. Its free extremity is broad and rounded; its attached end is narrow and is connected to the receding angle between the two alæ of the thyreoid cartilage by the thyreo-epiglottic ligament, and to the posterior surface of the body of the hyoid bone by the hyo-epiglottic ligament; and its anterior surface is connected to the sides and base of the tongue by folds of mucous membrane (the glosso-epiglottidean ligaments). [L, 115.] 2. Of Straus, the diaphragm of the horned ring which forms the lips of the stigmata in insects. [L, 180.]—E'muskeln (Ger.). See THYREO-EPIGLOTTIDEUS and ARYTÆNO-EPIGLOTTIDEUS *superior* and *inferior*.—E'wulst (Ger.). See TUBERCULUM *epiglottidis*.

THE EPIGLOTTIS AS SEEN FROM BEHIND. (AFTER WEISSE.)

a, the epiglottis; *b*, the uvula; *c*, the soft palate; *d*, the posterior nares; *e*, the tongue; *f*, the œsophagus; *g*, the trachea; *h*, the inferior maxillary bone.

EPIGLOTTITIS (Lat.), n. f. E^{2}p-i^2-glo^{2}t(glot)-ti(te)'ti^{2}s. Gen., *epiglottit'idos* (*-is*). See EPIGLOTTIDITIS.

EPIGLOTTUM (Lat.), n. n. E^{2}p-i^2-glo^{2}t(glot)'tu^{3}m(tu^{4}m). Of Paracelsus, a silver instrument for elevating the eyelids. [L, 84.]

EPIGLUTIS (Lat.), n. f. E^{2}p-i^2-glu^2(glu)'ti^{2}s. Gen., *epiglut'idos* (*-is*). Gr., ἐπιγλουτίς (from ἐπί, upon, and γλουτός, the rump). Fr., *épigloute*. The upper part of the buttocks. [L, 84.]

EPIGNATH, n. E^{2}p'i^{2}g-na^{2}th. Lat., *epignathus* (from ἐπί, upon, and γνάθος the jaw). Fr., *épignathe*. 1. The supplementary or complementary portion of a gnathite, usually cirriform. [L, 49, 87, 158.] 2. See EPIGNATHUS (3d def.).

EPIGNATHOUS, adj. E^{2}p-i^{2}g'nath-u^{3}s. Lat., *epignathus*. Fr., *épignathe*. Hook-billed (*i. e.*, having the upper mandible longer than the lower one, and the tip bent over). [L, 221, 343.]

EPIGNATHUS (Lat.), adj. and n. m. E^{2}p-i^{2}g'na^{2}th(na^{3}th)-u^{3}s-(u^{4}s). Fr., *épignathe*. 1. (Adj.) see EPIGNATHOUS. 2. See EPIGNATH (1st def.). 3. A double monster in which one individual is arrested in development and remains attached to the jaw of the other. [A, 326 (α, 21).]

EPIGONATIS (Lat.), n. f. E^{2}p-i^2-go^{2}n'a^3-ti^{2}s. Gen., *epigonat'idos* (*-is*). Gr., ἐπιγονατίς (from ἐπί, upon, and γόνυ, the knee). Fr., *épigonate*. Ger., *Kniescheibe*. Of Hippocrates, the patella. [L, 32, 84.]

EPIGONE, n. E^{2}p-i^{2}g'o^{2}n-e(a). Gen., *epig'ones*. Gr., ἐπιγονή (from ἐπιγίγνεσθαι, to be born after). Lat., *e.*, *epigonium* (2d def.). Fr., *épigone*. Ger., *Fruchtknopfdecke* (2d def.). 1. See SUPERFŒTATION. 2. The membranous cap or flask inclosing the spore-case of the *Hepaticæ* and mosses; the basal portion of the archegone which surrounds the oosphere. [B, 19, 77, 121, 123 (α, 24).]

EPIGONIS (Lat.), n. f. E^{2}p-i^{2}g'o^{2}n-i^{2}s. Gen., *epigon'idos* (*-is*). See EPIGONATIS.

EPIGONIUM (Lat.), n. n. E^{2}p-i^2-gon(go^{2}n)'i^2-u^{3}m(u^{4}m). See EPIGONE (2d def.).

EPIGONON (Lat.), **EPIGONUM** (Lat.), n's n. E^{2}p-i^{2}g'o^{2}n-o^{2}n, -u^{3}m(u^{4}m). Gr., ἐπίγονον (from ἐπιγίγνεσθαι, to be born after). Fr., *épigone*. See EPICYEMA.

EPIGRAMMA (Lat.), n. n. E^{2}f-i^2-gra^{2}m(gra^{3}m)'ma^3. Gen., *epigram'matos* (*-is*). Gr., ἐπίγραμμα (from ἐπιγράφειν, to write upon). Fr., *épigramme*. Ger., *Oberstrich*. A gelatinous operculum with which certain molluscs close their shells temporarily. [L, 41, 180.]

EPIGUNIS (Lat.), n. f. E^{2}p-i^2-gu^2(gu)'ni^{2}s. Gen., *epigun'idos* (*-is*). Gr., ἐπιγουνίς (from ἐπί, upon, and γόνυ, the knee). Ger., *Kniemuskel*. 1. The muscular mass in the thigh above the knee; in the pl., *epigunides*, of Rufus of Ephesus, those muscles which

have their attachment at the knee. [A, 311 (a, 17); L, 50, 84.] 2. See Epigonatis.

EPIGYNÆ (Lat.), n. f. pl. E^{2}p-i^{2}j(i^{2}g)'i^2(u^6)-ne(na^3-e^2). Fr., *épigynées.* Ger., *Oberweibige.* 1. Of Lindley, cohorts with an epigynous insertion: (*a*) A cohort of the *Polypetalæ*, consisting of the *Onagrales, Myrtales, Carnales, Cucurbitales*, and *Begoniales*; (*b*) a cohort of the *Monopetalæ*, consisting of the *Campanales, Goodenales, Cinchonales, Capriales*, and *Stellales*; and (*c*) a cohort of the *Endogenæ*, comprising the *Amomales, Narcissales, Ixiales, Bromeliales*, and *Hydrales.* 2. Of Bentham and Hooker, a series of the *Monocotyledones*, comprising the *Scitamineæ, Bromeliaceæ, Hæmodoraceæ, Irideæ, Amaryllideæ, Taccaceæ*, and *Dioscoreaceæ.* [B, 42, 121, 170 (a, 24).]

ÉPIGYNE (Fr.), adj. A-pe-zhen. See Epigynous.

EPIGYNIA (Lat.), n. f. E^{2}p-i^2-ji^{2}n(gu^{6}n)'i^2-a^3. See Epigyny.

EPIGYNICUS (Lat.), adj. E^{2}p-i^2-ji^{2}n(gu^{6}n)'i^{2}k-u^{3}s(u^{4}s). See Epigynous.

EPIGYNIUM (Lat.), n. n. E^{2}p-i^2-ji^{2}n(gu^{6}n)'i^2-u^{3}m(u^{4}m). Of Klotzsch, a genus of East Indian shrubs, of the *Vacciniaceæ*, now referred to *Vaccinium.* [B, 19 (a, 24).]—**E. leucobotrys.** The *Vaccinium leucobotrys.* [B, 19 (a, 24).]

EPIGYNOPHORICUS (Lat.), adj. E^{2}p-i^2-ji^{2}n(gu^{6}n)-o(o^3)-fo^{2}r'-i^{2}k-u^{3}s(u^{4}s). From ἐπί, upon, γυνή, a female, and φορεῖν, to bear. Fr., *épigynophorique.* Of Mirbel, said of the nectary when it is placed under the ovary at the top of the gynophore. [B, 1 (a, 24).]

EPIGYNOUS, adj. E^{2}p-i^{2}j'i^2-nu^{3}s. Lat., *epigynus* (from ἐπί, upon, and γυνή, a female). Fr., *épigyne.* Ger., *epigynisch, oberweibig.* Upon the pistil (said of floral organs when they appear to be inserted on the summit of the ovary). [B, 1, 19, 121, 123, 291 (a, 24).] Cf. Hypogynous and Perigynous.

EPIGYNY, n. E^{2}p-i^{2}j'i^2-ni^2. Lat., *epigynia.* Fr., *épigynie.* Ger., *Oberweibigkeit.* The state of being epigynous. [a, 24.]

EPIHYAL, adj. E^{2}p-i^2-hi'a^{2}l. From ἐπί, upon, and ὑοειδής, hyoid. Fr., *épi-hyal.* Lying above, upon, or against the hyoid bone; as a n., in the pl., *e's*, in comparative anatomy, the stylohyoid ligaments. [A, 385 (a, 21); L.]

EPIHYMATA (Lat.), n. n. pl. E^{2}p-i^2-him(hu^{6}m)'a^3-ta^3. From ἐπί, upon, and ὑμήν, the skin. In Young's classification of diseases, an order of the *Paramorphiæ* characterized by frequently recurring eruptions. [L, 290.]

ÉPIHYSSOPE (Fr.), n. A-pe-es-sop. The genus *Cuscuta.* [L, 41.]

EPILAMPRIDÆ (Lat.), n. f. pl. E^{2}p-i^2-la^{2}m(la^{3}m)'pri^2-de-(da^3-e^2). See Blattariæ.

ÉPILANCE (Fr.), n. A-pe-la^{3}n^{2}s. A form of epilepsy peculiar to birds. [L, 42.]

EPILARYNGEUS (Lat.), adj. E^{2}p-i^2-la^3-ri^{2}n(ru^{6}n^2)'je^2(ge^2)-u^{3}s(u^{4}s). From ἐπί, upon, and λάρυγξ, the larynx. Fr., *épilaryngien, surlaryngien.* Ger., *über dem Kehlkopf gelegen.* Situated above the larynx; as a n., in the m. sing., *e.* (Fr., *voix épilaryngienne* [ou *surlaryngienne*], Ger., *Uberkehlkopfstimme, Fistelstimme*), of Bennati, the falsetto voice. [L, 50 (a, 14).]

ÉPILATEUR (Fr.), adj. A-pe-la^3-tu^{5}r. See Depilatory.

EPILATHERA (Lat.), n. f. E^{2}p-i^2-la^{2}th(la^{3}th)'e^{2}r-a^3. Of Johnson, microscopic anatomy. [A, 325 (a, 21).]

EPILATION, n. E^{2}p-i^2-la'shu^{3}n. Lat., *epilatio* (from *e* priv., and *pilus*, a hair). Fr., *épilation.* Ger., *E., Epiliren, Enthaarung.* It., *epilazione.* Sp., *epilación.* The act of plucking out hairs by the roots. [G.] Cf. Depilation.

EPILATORY, adj. E^{2}p'i-la-to-ri^2. Lat., *epilatorius.* Fr., *épilatoire.* Ger., *enthaarend.* It., Sp., *epilatorio.* See Depilatory.

EPILEMMA (Lat.), n. n. E^{2}p-i^2-le^{2}m'ma^3. Gen., *epilem'matos* (*-is*). From ἐπί, upon, and λέμμα, a husk. Ger., *Epilemm, Perineuralscheide.* The perineurium of very small nerve funiculi. [Kühne, "Zeit. f. Biol.," 1886, p. 72 (J).]

EPILEMPSIS [Hippocrates] (Lat.), **EPILENTIA** [Paracelsus] (Lat.), n's f. E^{2}p-i^2-le^{2}mp(lamp)'si^{2}s, -le^{2}n'shi^2(ti^2)-a^3. Gen., *epilemp'seos* (*-is*), *-lent'iæ.* Gr., ἐπίληψις. See Epilepsy.

EPILEPSIA (Lat.), n. f. E^{2}p-i^2-lep(lap)'si^2-a^3. See Epilepsy. —**E. ab inanitione.** Epilepsy from insufficiency of food. [L, 84.] —**E. acetonica.** Epilepsy accompanied with acetonuria. [Von Jaksch, "Ztschr. f. klin. Med.," x, p. 362; "Ctrlbl. f. klin. Med.," May 29, 1886, p. 389.]—**E. a cruditate ventriculi.** Epilepsy from indigestion. [L, 84.]—**E. acuta infantilis.** See *Infantile* eclampsia. [L, 57.]—**E. a dolore.** Epilepsy occasioned by pain. [L, 84.] —**E. a veneno.** Epilepsy from poisoning. [L, 84.]—**E. corticalis.** See *Cortical* epilepsy.—**E. dromica et trochaica.** Of Semmola, a form of procursive epilepsy resembling chorea major. [Berger (A, 319).]—**E. ex onanismo.** Epilepsy caused by onanism. [L, 84.]—**E. gravior.** Fr., *grand mal.* The severe form of epilepsy as opposed to *e. mitior*, or the mild form. The paroxysm consists of four stages. In the first there are loss of consciousness, sudden falling, pallor of the face, and sometimes a sharp cry. These all occur simultaneously and with or without warning. In the second stage, which occurs in from two to forty seconds after the first, there are clonic spasms which gradually involve most of the voluntary muscles, but are usually more pronounced on one side than on the other. The third stage comes on in from two to three minutes, and in it there is a gradual return to consciousness and power over the muscles. In the fourth or after-stage there are lassitude and stupor, which last for about an hour. [J. Oliver, "Brain," Oct., 1888, p. 343; D, 35.]—**E. hydrargyrica.** Sp., *e. hidrargirica.* Epilepsy induced by mercurial poisoning. [D, 70.]—**E. larvata.** See *Larvated* epilepsy and *Masked* epilepsy.—**E. mitior.** Fr., *petit mal.* A mild form of epilepsy in which there is more or less impairment of consciousness, but usually no apparent spasm. There may be only momentary confusion of thought, vertigo, or pallor of the countenance, the attack being limited to an aura. [D, 35.]—**E. procursiva.** See *Procursive* epilepsy.—**E. puerilis.** The convulsions of childhood. [D.]—**E. retinæ.** See *Epileptoid* amaurosis.—**E. saltatoria.** A species of chorea associated with and resulting from repeated attacks of epilepsy, affecting the voluntary muscles of the lower extremities particularly, and causing the person to assume, when walking, the attitude of one dancing in a ring. [a, 23.]—**E. saturnina.** See *Saturnine* epilepsy.—**E. spinalis.** See *Spinal* epilepsy.—**E. traumatica.** See *Traumatic* epilepsy.—**E. trochaica.** See *E. dromica et trochaica.*—**E. uterina.** See *Uterine* epilepsy.—**E. vasomotoria.** Epilepsy in which the attacks are preceded by extreme contraction of the arteries, as seen in the face and extremities. [A, 326 (a, 14).]—**E. verminosa.** Epilepsy due to intestinal worms. [L, 84.]—**E. vertiginosa.** See *Epileptic* vertigo.

EPILEPSIE (Ger.), n. Ap-e-le^{2}p-ze'. See Epilepsy.—**Bleie'.** See *Saturnine* epilepsy.—**Netzhaute'.** See *Epileptoid* amaurosis.—**Rindene'.** See *Cortical* epilepsy.—**Säufere'.** See *Alcoholic* epilepsy.—**Ursprüngliche E.** See *Idiopathic* epilepsy.

ÉPILEPSIE (Fr.), n. A-pe-le^{2}p-se. See Epilepsy.—**E. aigue.** See Eclampsia.—**E. cocaïnique.** Convulsive attacks resembling those of true epilepsy, produced by large doses of cocaine. ["Sem. méd.," Oct. 9, 1889, p. 384 (a, 18).]—**E. de la rétine.** See *Epileptoid* amaurosis.—**E. éclamptique.** See Eclampsia.—**E. hémiplégique.** See *Cortical* epilepsy.—**E. larvée.** See *Larvated* epilepsy and *Masked* epilepsy.—**E. partielle.** See *Cortical* epilepsy.—**E. pleurétique.** Attacks of syncope with general or partial convulsions produced by irrigation of the pleural cavity. [Escherich, "Ctrbl. f. d. med. Wssnsch.," Jan. 12, 1884 (B).]—**E. simulée.** See *Feigned* epilepsy.—**E. sympathique.** See *Reflex* epilepsy.

ÉPILEPSIQUE (Fr.), adj. A-pe-le^{2}p-zek. See Epileptic.

EPILEPSY, n. E^{2}p'i^2-le^{2}p-si^2. Gr., ἐπιληψία (from ἐπιλαμβάνειν, to seize). Lat., *epilepsia.* Fr., *épilepsie.* Ger., *Epilepsie, Fallsucht.* It., *epilessia.* Sp., *epilepsia.* The falling sickness; a morbid condition characterized by paroxysms of general clonic convulsions (Fr., *grand mal*) and the phenomena described under Epilepsia *gravior*, or by attacks (Fr., *petit mal*) such as are described under Epilepsia *mitior*, or by seizures varying more or less from those types. When the disease is severe and long-continued it is apt to give rise to mental deterioration.—**Abdominal e.** Reflex e. due to some disturbance in the abdominal organs. [D, 70.]—**Abortive e.** See Epilepsia *mitior.*—**Acute e.** Fr., *épilepsie éclamptique.* See Eclampsia.—**Alcoholic e.** Fr., *épilepsie alcoolique.* Ger., *Säuferepilepsie.* E. due to alcoholism. [L, 88 (a, 14).]—**Auditory e., Aural e., Auricular e.** E. due to some morbid condition of the ear, especially excessive labyrinthine pressure. [Boucheron, "Rev. mens. de laryng. et d'otol.," July, 1888; "N. Y. Med. Jour.," Aug. 18, 1888, p. 188.]—**Cardiac e.** Fr., *épilepsie cardiaque.* A form of e. attributed to disorder of the cerebral circulation brought about by heart disease. As described by Lemoine, the paroxysm is preceded by an aura originating in the cardiac region, palpitation, præcordial anxiety, and a sensation as of a rush of blood to the head. ["N. Y. Med. Jour.," Oct. 15, 1887, p. 438.]—**Central e.** E. due to disease of the brain or the spinal cord. [D, 25.]—**Cerebral e.** [M. Hall]. Fr., *épilepsie cérébrale.* See Epilepsia *mitior.*—**Congestive e.** Fr., *épilepsie congestive.* E. dependent on hyperæmia. [Truc, "Lyon méd.," Apr. 5, 1885 (a, 29).]—**Cortical e.** Lat., *epilepsia corticalis.* Fr., *épilepsie corticale.* Ger., *Rindenepilepsie, corticale Epilepsie.* Syn.: *hemiplegic e., partial e., focal e., Jacksonian e., hemispasm.* A condition, due to some lesion of the cerebral cortex (generally a central convolution), in which the convulsive movements affect at first only a portion of the muscles (usually those of an upper limb), but may eventually become general. Often consciousness is not lost during the attack. The affected limb has a tendency to manifest paresis, then paralysis and contracture. [M. Rosenthal (A, 319).]—**Diurnal e.** E. in which the seizures occur mostly by day.—**Eccentric e.** See *Reflex e.*—**E. of syphilis.** See *Syphilitic e.*—**Experimental e.** E. artificially induced for experimental purposes. [B.]—**Feigned e.** Fr., *épilepsie simulée.* The performance by which an impostor seeks to give the impression that he is a sufferer from e.; usually an imitation of the paroxysm of epilepsia gravior. It may be detected by exposing the eye to a strong light, when the pupil will contract, whereas in genuine e. it remains dilated. [D, 25.]—**Focal e.** See *Cortical e.*—**Gastric e.** E. due to gastric irritation. ["Dublin Jour. of Med. Sci.," May, 1888, p. 384.]—**Gastro-intestinal e.** Epileptoid convulsions of gastro-intestinal origin. ["Union méd.," 1883, xxxv, p. 51 (a, 29).]—**Hemiplegic e.** Fr., *épilepsie hémiplégique.* See *Cortical e.*—**Hysterical e.** See Hystero-epilepsy.—**Idiopathic e.** Fr., *épilepsie idiopathique.* Ger., *ursprüngliche Epilepsie.* E. occurring without a definitely known cause; thought by many to be chiefly due to morbid excitation, and disease of the medulla oblongata and the pons Varolii in consequence of anæmia. [D, 47.]—**Infantile e.** See Eclampsia *infantum.*—**Intestinal e.** See *Gastro-intestinal e.*—**Jacksonian e.** Fr., *épilepsie Jacksonienne.* Cortical e. (*q. v.*); so called because its pathology was established by Hughlings Jackson. [D, 35.]—**Larvated e.** Lat., *epilepsia larvata.* Fr., *épilepsie larvée.* Of Axenfeld, a delirious condition following the period of collapse after an epileptoid attack occurring in an alcoholic patient. [D, 43.]—**Laryngeal e.** See *Laryngeal* vertigo.—**Latent e.** A form of e. dependent upon an irritation in the stomach or elsewhere, the attacks ceasing on removal of the irritation, but being likely to return upon any indulgence, alcoholic, sexual, or dietetic. ["Med. Record," Mar. 1, 1890, p. 250 (a, 29).]—**Lead e.** See *Saturnine e.*—**Maniacal e., Masked e.** Lat., *epilepsia larvata.* Fr., *épilepsie larvée.* An abortive or irregular form of e. in which there may be no convulsions, but intellectual derangement or some other irregular phenomenon. [Thorne, "St. Bartholomew's Hosp. Rep.," vi (D).]—

Matutinal e. E. in which the seizures occur mostly in the morning.—**Menstrual e.** E. in which the seizures are associated with menstruation. [H. A. Kelly, "N. Y. Med. Jour.," Apr. 3, 1886, p. 390.]—**Motorial e.** See *Cortical e.*—**Nocturnal e.** 1. E. in which the seizures occur mostly by night. 2. Of the Arabs, nightmare. [B, 117.]—**Partial e.** Fr., *é. partielle.* See *Cortical e.*—**Peripheral e.** See *Reflex e.*—**Procursive e.** Lat., *epilepsia procursiva.* Fr., *épilepsie procursive.* A form of irregular e. in which the patient runs forward at the onset of an attack. ["Arch. de Neurol.," Sept., 1888, p. 234; "Lancet," May 11, 1889, p. 949.] Cf. EPILEPSIA *dromica el trochaica.*—**Provoked spinal e.** See *Ankle* CLONUS.—**Psychic e.** See *Masked e.*—**Reflex e.** Lat., *epilepsia reflexa.* E. in which the convulsions are due to reflex irritation. [A, 326 (α, 14).]—**Renal e.** Fr., *épilepsie rénale.* See *Albuminuric* ECLAMPSIA.—**Retinal e.** See *Epileptoid* AMAUROSIS.—**Saturnine e.** Lat., *epilepsia saturnina.* Fr., *épilepsie saturnine.* Ger., *Bleiepilepsie.* A condition in which, as the result of chronic lead poisoning, epileptoid convulsions occur very suddenly, without an aura, and are followed by coma. [L. Lewin (A, 319).]—**Senile e.** Fr., *épilepsie sénile.* Ger., *Greisenepilepsie.* E. occurring in advanced life; usually due to cerebral endarteritis, and the ensuing localized nutritive derangements in the cortex or the basal ganglia. [Lewis (α, 18).]—**Sensory e.** Fr., *épilepsie sensorielle.* A form of e. originating in the sensory areas of the brain and associated with amaurosis, hemianæsthesia, and certain vague movements of the tongue, face, or limbs, but not always with convulsions. An aura is often present, loss of consciousness is the rule, and the patient may gradually become demented, as in ordinary e. [Lewis (α, 18).]—**Sexual e.** E. occurring where sexual causes are ætiological factors. [α, 29.]—**Simulated e.** Fr., *épilepsie simulée.*. See *Feigned e.*—**Spinal e.** Lat., *epilepsia spinalis.* Fr., *épilepsie spinale.* 1. Of Brown-Séquard, the paroxysms of violent tremulous movements in the lower extremities which coexist with certain affections of the spinal cord; so called from their resemblance to the convulsions of e. [D, 35.] 2. Of M. Hall, see EPILEPSIA *gravior.*—**Sympathetic e.** Fr., *épilepsie sympathique.* See *Reflex e.*—**Symptomatic e.** Fr., *épilepsie symptomatique.* See *Central e.*—**Syphilitic e.** Fr., *épilepsie syphilitique.* Ger., *syphilitische Epilepsie.* E. due to syphilis. The irritative lesion is most frequently a meningo-encephalitis, and the convulsions are monospasmodic. [D, 47.]—**Thalamic e.** Of W. A. Hammond, a form of e. characterized by hallucinations, depending on a lesion of the optic thalamus. ["Arch. of Sci. Med.," Aug., 1880 (D, 34).]—**Traumatic e.** Lat., *epilepsia traumatica.* Fr., *épilepsie traumatique.* Ger., *traumatische Epilepsie.* E. resulting from traumatism, especially of the vertex of the skull. [Hamilton (D, 43).]—**Uterine e.** Lat., *epilepsia uterina.* 1. An old term for hystero-epilepsy. [A, 66.] 2. Reflex e. due to uterine disease. [D, 70.]—**Vaso-motor e.** See EPILEPSIA *vasomotoria.*

EPILEPTIC, adj. E^{2}p-i^2-le^{2}p′ti^{2}k. Gr., ἐπιληπτικός, ἐπίληπτος. Lat., *epilepticus, epileptus.* Fr., *épileptique, épilepsique.* Ger., *epileptisch, fallsüchtig.* Pertaining to, affected with, or of the nature of, epilepsy; as a n. (Ger., *Epileptiker*), a person affected with, or a remedy used in, epilepsy. [D; L, 56 (α, 17).]

EPILEPTICISM [Althaus], n. E^{2}p-i^2-le^{2}p′ti^3-si^{2}z′m. See STATUS *epilepticus.*

EPILEPTIFORM, adj. E^{2}p-i^2-le^{2}p′ti^3-fo^{3}rm. From ἐπίληπτος, epileptic. and *forma*, form. Fr., *épileptiforme.* Ger., *e.* See EPILEPTOID.

EPILEPTIGENOUS, adj. E^{2}p-i^2-le^{2}p-ti^{2}j′e^{2}n-u^{3}s. See EPILEPTOGENOUS.

ÉPILEPTISANT (Fr.), adj. A-pe-le^{2}p-te-za^{3}n^2. Producing epileptoid convulsions (said of drugs, such as absinthe). ["Sem. méd.," Nov. 13, 1889, p. 424 (α, 18).]

EPILEPTOGENIC, EPILEPTOGENOUS, adj's. E^{2}p-i^2-le^{2}pt-o-je^{2}n′i^{2}k, -o^{2}j′e^{2}n-u^{3}s. From ἐπίληπτος, epileptic, and γεννᾶν, to engender. Fr., *épileptogène.* Ger., *epileptogen.* Giving rise to epileptoid convulsions when irritated (see *E.* ZONE). ["Ctrlbl. f. d. med. Wissnsch.," March 18, 1882, p. 187 (B).]

EPILEPTOID, adj. E^{2}p-i^2-le^{2}p′toid. Erom ἐπίληπτος, ep′leptic, and εἶδος, resemblance. Fr., *épileptoïde.* Ger., *e.* Resembling epilepsy or an epileptic convulsion. As a n., of Griesinger, a person of a class who suffer from megrim, vertigo, dyspepsia, syncope, hallucinations, and all kinds of abnormal sensations. These symptoms come on periodically and paroxysmally, and occur in persons who have an hereditary neuropathic disposition. [Althaus (α, 29).]

ÉPILEPTOÏQUE (Fr.), adj. A-pe-le^{2}p-to-ek. See EPILEPTIC and EPILEPTOID.

EPILESTE (Fr.), n. E^{2}p-e-le^{2}st. In Provence, the *Arum maculatum.* [B, 88 (α, 14).]

EPILETIA (Lat.), n. f. E^{2}p-i^2-le(la)′shi^2(ti^2)-a^3. An incorrect form of *epilepsia* (*q. v.*).

EPILEPTUS (Lat.), adj. E^{2}p-i^2-le^{2}p(lap)′tu^{3}s(tu^{4}s). See EPILEPTIC.

ÉPILEUR (Fr.), **ÉPILEUSE** (Fr.), n's. A-pe-lu^{5}r, -lu^{5}z. An attendant in a bathing establishment who extracts superfluous hairs. [F. J. Leviseur, "N. Y. Med. Jour.," July 13, 1889, p. 43.]

EPILIREN (Ger.), n. E^{2}p-i^2-le′re^{2}n. See EPILATION.

EPILITHEÆ (Lat.). n. f. pl. E^{2}p-i^2-li^{2}th′e^2-e(a^3-e^2). A tribe of the *Nyctagineæ*, consisting of the genus *Epilithes.* [B, 19, 42, 121, 170 (α, 24).]

ÉPILLET (Fr.), n. A-pel-ya. See SPICULE.

ÉPILOBE (Fr.), n. A-pe-lob. See EPILOBIUM.—**E. à épi, E. à feuilles étroites.** See EPILOBIUM *angustifolium.*—**E. à feuilles larges.** See EPILOBIUM *latifolium.*—**E. en épi.** See EPILOBIUM *angustifolium.*—**E. pubescent, E. velu.** See EPILOBIUM *hirsutum.*

EPILOBEÆ (Lat.), n. f. pl. E^{2}p-i^2-lob′e^2-e(a^3-e^2). Of Lindley, a tribe of the *Onagraceæ*, corresponding nearly to the *Epilobieæ* of Endlicher. The *Epilobiaceæ* (Fr., *épilobiacées*) are: of Meissner, a tribe of the *Onagrariæ*, comprising the *Jussieæ, Onagreæ, Gaureæ,* and *Fuchsieæ*; of Ventenat (also called *Epilobianæ*), an order comprising *Trapa, Circœa, Epilobium,* etc. The *Epilobieæ* (Fr., *épilobiées*) are: of Spach, a section of the *Onagreæ*; of Reichenbach, a subdivision of the *Œnothereæ*, consisting of the *Camissonieæ* (or afterward the *Sphærostigmeæ*), *Onagreæ*, and *Zauschnerieæ*; of Endlicher and others, a tribe of the *Œnothereæ*, consisting of *Epilobium*, etc. The *Epilobineæ* (Fr., *épilobinées*) of Spach are a section (of Torrey and Gray a subtribe) of the *Onagreæ.* [B, 34, 121, 170 (α, 24).]

EPILOBIUM (Lat.), n. n. E^{2}p-i^2-lob(lo^{2}b)′i^2-u^{3}m(u^{4}m). Fr., *épilobe.* Ger., *Weiderich, Weidenröschen.* It., *epilobio.* Sp., *epilobo.* The willow herb; of Linnæus, a genus of the *Onagrarieæ.* [B, 19, 42, 173, 180, 275 (α, 24).]—**E. angustifolium, E. antonianum.** Fr., *épilobe à feuilles étroites, osier fleuri, laurier* (ou *osier*) *de Saint-Antoine, laurier faux.* Ger., *schmalblättriger Weiderich, Feuerkraut, Unholdenkraut.* The rose-willow or bay, the οἰνοθήρα of Dioscorides. The leaves and roots are said to be demulcent, tonic, and astringent, were formerly in use as *radix et herba lysimachiæ chamœnerion*, and are now employed by the eclectics, in decoction, infusion, or cataplasm, as astringent remedies. In the north of Europe the plant is eaten like the *E. rosmarinifolium*, its leaves are used in France in making beer, and in Kamtchatka as a tea. [B, 5, 173, 180 (α, 24); L, 41.]—**E. Gesneri.** See *E. angustifolium.*—**E. hirsutum.** Fr., *épilobe pubescent* (ou *velu*). Blooming-Sally, cherry-pie, custard-cups, codlings-and-cream; a tall species with a peculiar acidulous odor, said to be used like *E. angustifolium.* [B, 19 (α, 24); L, 41 (α, 14).]—**E. latifolium.** Fr., *épilobe à feuilles larges.* A broad-leaved variety of *E. angustifolium.* [B, 173 (α, 24).]—**E. rosmarinifolium.** A species having properties analogous to those of *E. angustifolium.* An infusion of its root was anciently supposed to subdue wild beasts. In Siberia and Kamtchatka it is employed in infusion to sweeten an alcoholic beverage made from the petioles of *Acanthus mollis*, and in Sweden the buds and young shoots are eaten as greens. [B, 121 (α, 24).]—**E. spicatum.** Fr., *épilobe à épi.* See *E. angustifolium.*—**E. tetragonum.** A species having similar properties to those of *E. rosmarinifolium.* [B, 121 (α, 24).]

EPIMANES (Lat.), adj. E^{2}p-i^{2}m′a^{2}n(a^{3}n)-ez(as). Gr., ἐπιμανής. Affected with an insane longing. [A, 387.]

EPIMEDIEÆ (Lat.), n. f. pl. E^{2}p-i^2-me^{2}d(mad)-i(i^2)′e^2-e(a^3-e^2). Syn., *Epimedineæ* [Spach]. 1. Of Dumortier, a tribe of the *Berberideæ*, comprising *Leontice* and *Epimedium.* 2. Of Reichenbach, a section of the *Berbereæ*, comprising *Epimedium*, etc. [B, 170 (α, 24).]

EPIMEDIUM (Lat.), n. n. E^{2}p′i^2-med(mad)′i^2-u^{3}m(u^{4}m). Gr., ἐπιμήδιον. Fr., *épimède.* Ger., *Sockenblume, Bischofsmütze.* 1. A genus of the *Berbereæ.* 2. Of Dioscorides, the *E. alpinum.* [A, 311 (α, 17); B, 19, 42, 121 (α, 24).]—**E. alpinum.** Fr., *épimède des Alpes, chapeau d'évêque.* Ger., *Alpensockenblume.* A species having sudorific and alexipharmac properties, and used in pectoral disorders. [B, 121 (α, 24); L, 41 (α, 14).]

EPIMELIS (Lat.), adj. E^{2}p-i^2-mel(mal)′i^{2}s. Gen., *epimel′idos* (*-is*). Gr., ἐπιμηλίς (from ἐπί, upon, and μῆλον, an apple). Parasitic on an apple-tree or a fruit-tree; as a n., of Galen, the *Arbutus unedo* (of Dioscorides, the *Mespilus germanica* or the *Cotoneaster vulgaris*). [L, 50, 87, 105 (α, 14).]

EPIMELIUM (Lat.), n. n. E^{2}p-i(e)-mel(me^{2}l)′i^2-u^{3}m(u^{4}m). From πιμελή, fat. A fatty tumor. [L, 290.]

EPIMENIA (Lat.), n. n. pl. E^{2}p-i^2-men(man)′i^2-a^3. Gr., ἐπιμήνια (from ἐπί, upon, and μήν, a month). See CATAMENIA.

EPIMENOCNIDOSIS (Lat.), n. f. E^{2}p-i^2-men(man)′o^{2}k-ni^{2}d-(ned)-os′i^{2}s. Gen., *epimenocnidos′eos* (*-is*). From ἐπιμήνιος, monthly, and κνίδωσις, itching. Fr., *épiménocnidose.* Ger., *andauernde Nesselausschlag.* A persistent form of urticaria. [L, 50.]

EPIMENOPHACOSIS (Lat.), n. f. E^{2}p-i^2-men(man)-o(o^3)-fa^3-kos′i^{2}s. Gen., *epimenophacos′eos* (*-is*). From ἐπιμήνιος, monthly, and φάκωσις, a being freckled. Ger., *bleibende Leberfleckenkrankheit.* Chronic lentigo. [L, 50 (α, 14).]

EPIMERAL, adj. E^{2}p-i^2-me′ra^{2}l. Fr., *épiméral.* Pertaining to or of the nature of an epimere.

EPIMERE, EPIMERITE, n's. E^{2}p′i^2-mer, e^{2}p-i^2-mer′it. Lat., *epimerus, epimeron, epimerum* (from ἐπί, upon, and μηρός, a limb). Fr., *épimère.* Ger., *Epimer.* 1. In the *Crustaceæ*, that portion of a somite that lies between the sternum and the articulation of the appendage. [L, 11.] 2. See PLEURON. 3. In the *Hexapoda*, one of the lateral pieces of each segment of the thorax. [Audouin (L, 180).] 4. In the *Septata*, a proboscis-like appendage often found on the protomerite. [L, 121.] 5. In embryology, the dorsal part of a metamere giving rise to a myotome. [J.] Cf. MYOMERE.

EPIMETRIUM (Lat.), n. n. E^{2}p-i^2-me^{2}t(mat)′ri^2-u^{3}m(u^{4}m). Fr., *épimètre.* From ἐπί, upon, and μήτρα, womb. Of Bernhardi, in botany, a membranous part, also the hair which envelops the ovary upon one side. [L, 41, 180.]

EPIMORIOS (Lat.), adj. E^{2}p-i^2-mo^{2}r′i^2-o^{2}s. Gr., ἐπιμόριος (from ἐπί, upon, and μόριον, a portion). Superpartial, containing or consisting of a whole, plus a fractional part; as a n., in the n., *epimorion*, an irregular pulse. [Galen (L, 84).]

EPIMYLIS (Lat.), n. f. E^{2}p-i^{2}m′i^2(u^6)-li^{2}s. Gen., *epimyl′idos* (*-is*). From ἐπί, upon, and μύλη, the knee-pan. See PATELLA.

ÉPINARD (Fr.), n. A-pe-nar. The genus *Spinacia.* [B, 121 (α, 24).]—**E. cornu.** The *Spinacia spinosa.* [L, 41.]—**E. d'Amérique.** See BASELLA *rubra.*—**E. de Cayenne.** The *Phytolacca octandra* (*mexicana*). [B, 46, 173 (α, 24).]—**E. de Chine.** See BASELLA *alba.*—**E. de Flandres.** A variety of *Spinacia* having milky leaves. [L, 41.]—**E. de Hollande.** The *Spinacia inermis.*

[B, 19 (*a*, 24).]—**E. de la Chine.** See Basella *alba.* [B, 88.]—**E. de la Guiane.** The *Phytolacca octandra.* [B, 121, 173 (*a*, 24).]—**E. de la Nouvelle Zélande.** The *Tetragonia expansa.* [B, 121, 173 (*a*, 24).]—**E. de muraille.** The *Parietaria officinalis.* [B, 121, 173 (*a*, 24).]—**E. des Indes.** See Basella *rubra.*—**E. d'hiver.** The *Spinacia spinosa.* [B, 19 (*a*, 24).]—**E. doux.** The *Phytolacca decandra.* [B, 173 (*a*, 24).]—**E. du Malabar.** See Basella *rubra.*—**E. épineux.** See Amarantus *spinosus.*—**E. fraise.** See Blitum *capitatum.*—**E. immortel.** The *Rumex patientia.* [B, 121, 173 (*a*, 24).]—**E. inerme.** The *Spinacia inermis.* [L, 41.]—**E. malabare.** See Amarantus *spinosus.*—**E. marron.** See Amarantus *oleraceus.*—**E. sauvage.** See Chenopodium *bonus Henricus.*

EPINASTIC, adj. E^{2}p-i^2-na^{2}s'ti^{2}k. Of De Vries, having the quality of epinasty. [B, 229 (*a*, 24).] Cf. Hyponastic.

EPINASTY, n. E^{2}p'i^2-na^{2}s-ti^2. From **ἐπί**, above, and **ναστός**, close-pressed. Fr., *épinastie.* Ger., *Epinastie.* A curvature produced by disproportionate growth on the upper side of an extended plant-organ. [B, 121, 291 (*a*, 24).]

ÉPINAY (Fr.), n. A-pe-na. A place in the department of the Seine-Inférieure, France, where there is a cold ferruginous and slightly laxative spring. [L, 87, 105 (*a*, 14).]

ÉPINE (Fr.), n. A-pen. 1. A thorn. 2. In anatomy, a spine. 3. The genus *Mespilus.* [L.]—**E. à cerise.** The *Zizyphus vulgaris.* [B, 121, 173 (*a*, 24).]—**E. aigrette.** The *Berberis vulgaris.* [B, 173 (*a*, 24).]—**E. aigue.** The *Cotoneaster pyracantha.* [B, 173 (*a*. 24).]—**E. amère.** The *Paliurus aculeatus.* [L, 41.]—**E. arabique.** A species of *Acacia.* [L, 41.]—**E. ardente.** The *Cotoneaster pyracantha.* [B, 173 (*a*, 24).—**E. basilaire.** See *Pharyngeal* spine.—**E. blanche.** The *Silybum murianum* and *Mespilus oxyacantha.* [B, 173 (*a*, 24).]—**E. blanche des champs** (ou sauvage). The *Onopordon acanthium.* [B, 38, 46, 121, 173 (*a*, 24).]—**E. croisée.** The *Gleditschia meliloba.* [L, 41.]—**E. d'Afrique.** The *Lycium afrum.* [*a*, 24.]—**E. de bœuf.** The *Ononis repens*, the *Ononis natrix*, and the *Ononis spinosa.* [B, 121, 173 (*a*, 24); B, 46 (*a*, 14).]—**E. de bouc.** The *Spiræa aruncus* and the *Astragalus massiliensis.* [B, 121, 173 (*a*, 24).]—**E. de cerf.** The *Rhamnus cathartica.* [B, 121, 173 (*a*, 24).]—**E. de Christ.** The *Ilex aquifolium* and the *Paliurus aculeatus* (*australis*). [B, 121, 173 (*a*, 24).]—**E. d'Égypte.** The *Mimosa farnesiana* and the *Mimosa nilotica.* [B, 46, 88 (*a*, 14).]—**E. de Jérusalem.** The *Parkinsonia aculeata.* [B, 173 (*a*, 24).]—**E. de l'omoplate.** The spine of the scapula. [L, 7.]—**E. de renard.** See Astragalus *massiliensis.*—**E's des os iliaques.** The spinous processes of the ilium. [A, 301.]—**E. d'Espagne.** The *Mespilus azarolus.* [B, 173 (*a*, 24).]—**E. de Spix.** See Process *of Spix.*—**E. dorsale.** The vertebral column. [L, 88 (*a*, 14).]—**E. du coronal.** See Crista *galli.*—**E. du dos.** The vertebral column. [L, 41, 43.]—**E. du Levant.** The *Mespilus tanacetifolia.* [L, 41.]—**E. du nez.** See *Nasal* spine.—**E. du pubis.** See Spine *of the pubes.*—**E. du radius.** The styloid process of the radius. [L, 32.]—**E. du sphénoïde.** The spinous process of the sphenoid bone. [L, 43.]—**E. du tibia.** The spinous process of the tibia. [L, 88 (*a*, 14).]—**E. étoilée.** The *Centaurea calcitrapa.* [B, 38, 46 (*a*, 14).]—**E. Fleurie.** The *Mespilus oxyacantha.* [B, 173 (*a*, 24).]—**E. iliaque.** A spine of the ilium.—**E. iliaque antéro-supérieure.** See *Anterior superior* spine *of the ilium.*—**E. iliaque antéro-inférieure.** See *Anterior inferior* spine *of the ilium.*—**E. iliaque postéro-inférieure.** See *Posterior inferior* spine *of the ilium.*—**E. ischiatique.** The spine of the ischium. [L, 43.]—**E. jaune.** The *Scolymus hispanicus.* [B, 121, 173 (*a*, 24).]—**E. marante.** The *Hippophæ rhamnoides.* [B, 121, 173 (*a*, 24).]—**E. noire.** The *Prunus spinosa.* [B, 121, 173 (*a*, 24).]—**E. puante.** The *Rhamnus infectoria.* [B, 121 (*a*, 24).]—**E. sanguine.** The *Cratægus sanguinea* and the *Onopordon acanthium.* [B, 121 (*a*, 24).]—**E. sciatique.** See Spine *of the ischium.*—**E. sphénoïdale.** The spine of the sphenoid bone. [L, 7.]—**E. tourjours verte.** The *Ilex aquifolium.* [B, 173 (*a*, 24).]—**E.-vinette.** See the major list.—**Noble é.** The *Mespilus oxyacantha.* [B, 173 (*a*, 24).]

EPINEMA (Lat.). n. n. E^{2}p-i^2-nem(nam)'a^3. Gen., *epinem'atos* (*-is*). From **ἐπί**, upon, and **νῆμα**, a thread. Fr., *épinème.* The superior part of the thread of the stamens in the *Compositæ.* [L, 41, 180.]

EPINEMESIS (Lat.). n. f. E^{2}p-i^2-ne^{2}m-e(a)'si^{2}s. Gen., *epinemes'eos* (*-is*). Gr., **ἐπινέμησις** (from **ἐπινέμειν**, to distribute). Distribution, dissemination. [A, 387.]

EPINEPHELOS (Lat.), **EPINEPHELUS** (Lat.), adj's. E^{2}p-i^2-ne^{2}f'e^{2}l-o^{2}s, -u^{3}s(u^{4}s). Gr., **ἐπινέφελος** (from **ἐπί**, upon, and **νεφέλη**, a cloud). Fr., *épinéphèle.* Cloudy (said of urine). [A, 325 (*a*, 21); L, 84.]

EPINEPHRITIS (Lat.), n. f. E^{2}p-i^2-ne^{2}f-ri(re)'ti^{2}s. Gen., *epinephrit'idos* (*-is*). From **ἐπί**, upon, and **νεφρός**, the kidney (see also *-itis**). Fr., *épinéphrite.* Inflammation of the suprarenal capsule. [L, 41.]

ÉPINETTE (Fr.), n. A-pe-ne^{2}t. A species of *Abies.* [B, 121, 173 (*a*, 24).]—**E. à la bière.** The *Abies nigra.* [B, 173 (*a*, 24).]—**E. blanche.** See Abies *alba.*—**E. noire.** See Abies *nigra.*—**E. rouge.** The *Larix americana.* [B, 19, 121, 173 (*a*, 24).]

EPINEURAL, adj. E^{2}p-i^2-nu^2'ra^{2}l. From **ἐπί**, upon, and **νεῦρον**, a nerve. Situated or connected with the neural arch or spine of a vertebra. [L, 14.]—**E'häutchen** (Ger.). The lamellæ of the epineurium. [J.]

EPINEURIUM (Lat.), n. n. E^{2}p-i^2-nu^2'ri^2-u^{3}m(u^{4}m). From **ἐπί**, upon, and **νεῦρον**, a nerve. Fr., *tissu périfasciculaire.* Ger., *E., Epineuralscheide, äusseres Neurilemm.* Syn.: *cellular sheath.* Of Key and Retzius, the general connective tissue of a nerve, exclusive of the perineurium and endoneurium. [J, 67, 74, 181.] See Perineurium and Endoneurium.

ÉPINEUX (Fr.), adj. A-pe-nu^5. Spinous; as a n. in the pl., of Latreille and Illiger, a family of the *Mammifera.* [B, 121; L, 180.]—**E. du cou.** See Dorso-spinalis.—**E. jaune.** The *Xanthoxylon clava Herculis.* [A, 385 (*a*, 21).]

ÉPINE-VINETTE (Fr.), n. A-pen-ve-ne^{2}t. The genus *Berberis*, especially the *Berberis vulgaris.* [A, 518.]—**Pastilles d'é.-v.** See *Rotulæ* berberum (under Berberis).—**Rob d'é.-v.** See *Rob* berberum (under Berberis).—**Sirop d'é.-v.** See *Sirop de* berberis.

ÉPINGLE (Fr.), n. A-pa^{2}n^{2}g'l. A pin. [L, 43.]—**E. à suture.** A suture pin. [L, 88 (*a*, 14).]

ÉPINIER (Fr.), adj. A-pe-ne-a. Spinal; as a n., the *Fringilla spinus*, and, in the f., *épinière*, the *Mespilus oxyacantha.* [A, 385 (*a*, 21); B, 121, 173 (*a*, 24).]

EPINOEMA (Lat.), n. n. E^{2}p-i^2-no(no^2)-e(a)'ma^3. Gen., *epinoem'atos* (*-is*). Gr., **ἐπινόημα** (from **ἐπινοεῖν**, to contrive). Of Hippocrates, a sort of ladder formerly used for reducing distortions. [A, 325 (*a*, 21).]

EPINOTION (Lat.), **EPINOTIUM** (Lat.), n's n. E^{2}p-i^2-not'-i^2-o^{2}n, -u^{3}m(u^{4}m). From **ἐπί**, upon, and **νῶτον**, the back. Fr., *épinotion.* See Scapula.

EPINOSIC, adj. E^{2}p-i^2-nos'i^{2}k. Gr., **ἐπίνοσος** (from **ἐπί**, upon, and **νόσος**, a disease). Sickly; of a locality, unwholesome. [A, 387.]

EPINYCTIDES (Lat.), n. f., pl. of *epinyctis* (*q. v.*). E^{2}p-i^2-ni^{2}k-(nu^{6}k)'ti^{2}d-ez(e^{2}s).

EPINYCTIS (Lat.), n. f. E^{2}p-i^2-ni^{2}k(nu^{6}k)'ti^{2}s. Gen., *epinyct'idos* (*-is*). Gr., **ἐπινυκτίς** (from **ἐπί**, upon, and **νύξ**, night). Fr., *épinyctide.* Ger., *Nachtblatter.* Of the old Greek and Latin writers, an affection of the skin the precise character of which is uncertain, described as consisting of pustules surrounded by red areolæ, occurring only at night, disappearing in the daytime, and accompanied with severe pain. According to Galen, the term owes its employment to the fact that the affection begins at night. Later writers have applied the name to a cutaneous disease of which intense itching at night is the characteristic feature, the only lesion, according to Bazin, being a transient erythema. [Celsus (G, 13).] Cf. Pompholyx e.—**E. pruriginosa.** Of Sauvages, an itching eruption, affecting chiefly the arms and legs, which occurs in the morning on getting out of bed, and disappears on returning to bed at night; probably urticaria. [G, 17.]—**E. vulgaris.** A variety of e. described as characterized by the development of painful phlyctænæ at night, usually on the legs. [G, 17.]

EPINYCTOPOMPHOLYX (Lat.), n. f. E^{2}p-i^2-ni^{2}k(nu^{6}k)-to-(to^3)-po^{2}m'fo^{2}l-i^{2}x(u^{6}x). From **ἐπινύκτιος**, nightly, and **πομφόλυξ**, a bleb. Ger., *nächtliche Brennblasen.* See Pompholyx *epinyctis.*

EPIŒCIA (Lat.), n. f. E^{2}p-i^2-es'(o^2-ek')-i^2-a^2. From **ἐπί**, upon, and **οἶκος**, a house. Fr., *épiœcie.* Ger., *Epioecie.* Of Ozanam, an epidemic limited to a very circumscribed locality, such as a house or a ship. [A, 301 (*a*, 21).]

EPIOLA (Lat.), **EPIOLES** (Lat.), **EPIOLOS** (Lat.), **EPIOLUS** (Lat.), n's f., f., m., and m. E(a)-pi(pi^2)'o^{2}l-a^3, -ez(as), -o^{2}s, -u^{3}s(u^{4}s). Gr., **ἠπιόλης, ἠπίολος.** Nightmare. [A, 387.]

EPIOMIDE, n. E^{2}p-i^2-om'i^{2}d. From **ἐπί**, upon, and **ὦμος**, the shoulder. Fr., *épiomide.* The upper part of the shoulder. [A, 301 (*a*, 21).]

EPIONE (Lat.), n. f. E^{2}p(ap)-i(i^2)'o^{2}n-e(a). Gen., *epi'ones.* From **ἤπιος**, tender. Fr., *épione.* 1. Of Osiander, a mucous membrane. [A, 301 (*a*, 21).] 2. Of Dutrochet, the decidua. [A, 43, 45.]

EPIOS (Lat.), adj. E(a)'pi^2-o^{2}s. Gr., **ἤπιος.** Mild, gentle; as a n., of Hippocrates, a mild epidemic. [L, 50, 84.]

EPIOSTRACUM (Lat.), n. n. E^{2}p-i^2-o^{2}s'tra^{2}k(tra^{3}k)-u^{3}m(u^{4}m). From **ἐπί**, upon, and **ὄστρακον**, a shell. The external layer of the cuticular integument of the *Crustacea.* [L, 168.] Cf. Ectostracum and Endostracum.

EPIOTIC, adj. E^{2}p-i^2-o'ti^{2}k. From **ἐπί**, upon, and **οὖς**, the ear. Fr., *épiotique.* Situated upon the capsule of the ear. [L.] Cf. *E.* bone.

EPIPACTIS (Lat.), n. f. E^{2}p-i^2-pa^{2}k(pa^{3}k)'ti^{2}s. Gen., *epipac'tidos* (*-is*). Gr., **ἐπιπακτίς.** Fr., *épipactis.* Ger., *Sumpfwurz.* A genus of orchids of the *Neottieæ.* The *Epipacteæ* (Fr., *épipactées*) of Reichenbach are a division of the *Orchideæ genuinæ.* [B, 42, 170 (*a*, 24).]—**E. latifolia.** Fr., *épipactis à larges feuilles, helléborine.* Ger., *breitblättrige Sumpfwurz, Cymbelblume.* A species found in Europe. It was once used as a detersive and vulnerary, and the root, *radix helleborines latifoliæ*, in the treatment of gout. [B, 173, 180 (*a*, 24).]—**E. nidus avis.** Fr., *épipactis nid d'oiseau.* The *Neottia nidus avis.* [B, 173 (*a*, 24).]—**E. ovata.** Fr., *épipactis à doubles feuilles.* The *Listera ovata.* [B, 180 (*a*, 24).]—**E. unilateralis.** Fr., *épipactis unilatérale.* A species found in Chili, where the Indians use it in dysuria. [B, 173 (*a*, 24).]—**E. viridiflora.** A species formerly used like *E. latifolia*, and closely resembling it. [B, 180 (*a*, 24).]

EPIPAROXYSMUS (Lat.), n. m. E^{2}p-i^2-pa^{2}r(pa^{3}r)-o^{2}x-i^{2}z(u^{6}s)'-mu^{3}s(mu^{4}s). From **ἐπί**, upon, and **παροξυσμός**, a paroxysm. Fr., *épiparoxysme.* Ger., *verfrühter Paroxysmus.* A paroxysm which recurs with abnormal frequency. [L, 41, 43, 50, 135.]

EPIPASTIC (Lat.), adj. E^{2}p-i^2-pa^{2}st'i^{2}k. From **ἐπιπάσσειν**, to sprinkle upon. Fr., *épipastique.* Ger., *aufgestreut.* Of the nature of or to be used as an epipastos. [L, 41, 50, 116.]

EPIPASTOS (Lat.), **EPIPASTUS** (Lat.), n's m. E^{2}p-i^2-pa^{2}s-(pa^{3}s)'tos. -tu^{3}s(tu^{4}s). Gr., **ἐπιπαστός.** Ger., *Streupulver.* A dusting powder. [L, 15.]

EPIPECHY (Lat.), n. n. E^{2}p-i^2-pek(pach^2)'i^2(u^6). Gen., *epipech'eos* (*-is*). Gr., **ἐπίπηχυ** (from **ἐπί**, above, and **πῆχος**, the forearm). The arm above the elbow. [L, 50, 84.]

EPIPEDOMETER, n. E^{2}p-i^2-pe-do^{2}m'e-tu^{5}r. From **ἐπίπεδον**, a plane, and **μέτρον**, a measure. An instrument devised by M. J.

Roberts for measuring complex distortions of the body in which torsion is associated with angular deviation. ["Med. Record," Feb. 21, 1885, p. 197.]

EPIPEPHYCOS (Lat.), adj. E2p-i2-pe2f'i(u6)-ko2s. Gr., ἐπιπεφυκός (from ἐπί, upon, and φύειν, to grow). See ADVENTITIOUS (4th def.).

EPIPERIPHERAL, adj. E2p-i2-pe2r-i2f'e2-ra2l. From ἐπί, upon, and περιφέρεια, a periphery. At the periphery, exterior; said of anything, especially a sensation, caused by a stimulus acting on the periphery or exterior of the body. [H. Spencer (J).]

EPIPETALEOUS, EPIPETALOUS, adj's. E2p-i2-pe2t-a'le-u3s, -pe2t'a2l-u3s. Lat., *epipetalatus, epipetaleus, epipetalus* (from ἐπί, upon, and πέταλον, a petal). Fr., *épipétale, épipétalique.* Having the stamens inserted on or adnate to the petals. The *Epipetaleæ, Epipetalæ*, or *Epipetalia* (Fr., *épipétalie*) of Jussieu are a class of the *Dicotyledones* so characterized. [B, 1, 121, 170 (*a*, 24).]

EPIPETIOLANEUS (Lat.), adj. E2p-i2-pe2t-i2-o-lan(la3n)'e2-u3s(u4s). From ἐπί, upon, and *petiolus*, a petiole. Fr., *épipétioléen.* Of stipules, adhering to the upper part of the petiole. [B, 1 (*a*, 24).]

EPIPETRON (Lat.), n. n. E2p-i2-pe2t'ro2n. From ἐπί, upon, and πέτρα, a rock. Of Hippocrates, an edible plant, a species of *Sedum*; of Pliny, the *Clinopodium vulgare.* [B, 46, 88 (*a*, 14).]

EPIPHÆNOMENON (Lat.), n. E2p-i2-fe(fa3-e2)-no2m'e2n-o2n. Gr., ἐπιφαινόμενον (from ἐπιφαίνειν, to show forth). Fr., *épiphénomène.* An exceptional and superadded phenomenon; one that is not a necessary part of a train of phenomena. [L, 41, 84.]

EPIPHANEIA (Lat.), **EPIPHANIA** (Lat.), n'sf. E2p-i2-fa2n-(fa3n)-i'(e2'i2)-a3, -i(e)'a3. Gr., ἐπιφάνεια (from ἐπιφαίνειν, to show forth). Fr., *épiphanie* (3d def.). 1. The cutaneous surface. 2. The surface or outside as opposed to the substance of a thing. 3. An apparition, manifestation. [A, 311 (*a*, 17); L, 41.]

EPIPHARYNGEAL, adj. E2p-i2-fa2r-i2n'je-a2l. From ἐπί, upon, and φάρυγξ, the pharynx. Situated upon or above the pharynx. [L.] Cf. *E.* BONE.

EPIPHARYNX (Lat.), n. f. E2p-i2f'a2r(a3r)-i2n2x(u6n2x). Gen., *epipharyn'gos* (*-is*). From ἐπί, upon, and φάρυγξ, the pharynx. Fr., *épipharynx.* A median, fleshy lobe which overhangs the oral aperture of certain insects, acting as a valve to close the pharynx. [L, 11, 41, 180.]

EPIPHEGUS (Lat.), n. f. E2p-i2-feg(fag)'u3s(u4s). From ἐπί, upon, and φηγός, the beech-tree. Fr., *épiphégus.* Ger., *Krebswurz.* Of Nuttall, a genus of herbs, of the *Orobanchaceæ.* [B, 42 (*a*, 24).]—**E. americana, E. virginiana.** Beech-drops, the only species; found in all parts of North America. It is a brownish, fleshy herb, parasitic on the roots of *Fagus ferruginea* and *Taxus canadensis.* It has been used in diarrhœa, and the powdered root, known as *cancer-root*, is applied to obstinate cancroid ulcers, and is said to have been an ingredient in a once famous secret remedy known as *Martin's cancer powder.* [B, 5, 19, 42, 173, 180 (*a*, 24).]

EPIPHENOMENON, n. E2p-i2-fe2n-o2m'e2n-o2n. See EPIPHÆNOMENON.

EPIPHLEBOS (Lat.), adj. E2p-i2f'le2b-o2s. Gr., ἐπίφλεβος (from ἐπί, upon, and φλέψ, a vein). Having large veins. [L, 50, 84.]

EPIPHLEGIA (Lat.), n. f. E2p-i2-flej(fle2g)'i2-a3. From ἐπιφλέγειν, to set on fire. See INFLAMMATION.

EPIPHLŒODES (Lat.), adj. E2p-i2-fle(flo2-e2)-od'ez(as). From ἐπί, upon, φλοιός, bark, and εἶδος, resemblance. Fr., *épiphléode.* Of lichens, growing on the surface of the bark of a tree. [L, 41, 180.]

EPIPHLŒUM (Lat.), n. n. E2p-i2-fle'(flo2'e2)-u3m(u4m). From ἐπί, upon, and φλοιός, bark. Fr., *épiphléon.* The outer or corky layer of the cellular portion of bark. [B, 19, 77, 291 (*a*, 24).]

EPIPHLOGISMA (Lat.), **EPIPHLOGISMUS** (Lat.), n's n. and m. E2p-i2-flo(flo2)-ji2z(gi2s)'ma3, -mu3s(mu4s). Gen., *epiphlogis'matos* (*-is*), *-mi.* Gr., ἐπιφλόγισμα. Fr., *épiphlogisme, chaleur brûlante.* 1. Of Hippocrates, an inflamed part, a pustule, herpes. [G.] 2. Of other Greek writers, erysipelas. 3. A slight inflammation of the skin. [A, 311 (*a*, 17); L, 50 (*a*, 14).]

EPIPHLOGODES (Lat.), adj. E2p-i2-flo(flo2)-go'dez(das). Gr., ἐπιφλογώδης. Ger., *geröthet, leichtentzündet.* Reddened, slightly inflamed. [L, 50 (*a*, 14).]

EPIPHLOGOSIS (Lat.), n. f. E2p-i2-flo(flo2)-gos'i2s. Gen., *epiphlogos'eos* (*-is*). From ἐπί, intens., and φλόγωσις, a burning. Fr., *épiphlogose.* Ger., *Epiphlogose.* Of Lobstein, the second degree of an inflammatory process. [L, 41, 50.]

EPIPHORA (Lat.), n. f. E2p-i2f'o2r-a3. Gr., ἐπιφορά (from ἐπιφέρειν, to bring upon). Fr., *épiphora, larmoiement* (2d def.). Ger., *Thränenfluss* (2d def.). It., *epifora.* Sp., *epífora.* 1. Any morbid flux. 2. The watery eye; a more or less constant overflow of tears upon the cheeks, due to eversion, tumefaction or narrowing of the puncta lacrimalia, or to stoppage of the nasal duct. In Young's classification of diseases, a genus of the *Apocenoses.* 3. A genus of orchids. [D, 20; F; L, 290.]—**E. alvi.** See DIARRHŒA.—**E. arthritica.** E. dependent upon a narrowing of the punctum lacrimale caused by rheumatism. [*a*, 29.]—**E. catarrhalis.** E. dependent upon a narrowing of the punctum lacrimale due to a catarrhal inflammation of the conjunctiva. [*a*, 29.]—**E. dacryadenitide.** E. due to dacryocystitis. [L.]—**E. erethica.** E. due to the presence of an irritating substance. [A, 29.]—**E. exanthematica.** E. occurring during an eruptive disease and dependent on the conjunctivitis caused by that disease. [*a*, 29.]—**E. impetiginosa.** E. accompanying impetigo. [*a*, 29.]—**E. intermittens.** E. appearing periodically. [*a*, 29.]—**E. lacrimalis** [Cullen]. See *E.* (2d def.).—**E. lactea.** Galactorrhœa. [L, 290.]—**E. ptyalismus** [Cullen]. See PTYALISMUS.—**E. sanguinea, E. scorbutica.** An increased secretion of tears mixed with blood which occurs in scurvy. [De Wecker (*a*, 29).]—**E. venerea.** A form of e. which occurs in a stage of syphilis. The tissues about the punctum are thickened and swollen without an abnormal quantity of secretion. [A, 29.]

EPIPHOROS (Lat.), **EPIPHORUS** (Lat.), adj's. E2p-i2f'o2r-o2s, -u3s(u4s). Gr., ἐπίφορος (from ἐπιφέρειν, to bring upon). 1. Of Hippocrates, (*a*) salacious; (*b*) easily conceiving; (*c*) pregnant, approaching confinement. 2. Of Theophrastus, near the time of bearing (said of plants). 3. Disposed to bear or to be fructified. [A, 311 (*a*, 17); L, 50 (*a*, 14).]

EPIPHRAGM, n. E2p'i2-fra2m. Gr., ἐπίφραγμα (from ἐπιφράσσειν, to block up). Lat., *epiphragma.* Fr., *épiphragme, épistome* (2d def.). Ger., *Querfell, Querhaut.* 1. A thin cellular membrane stretching across the mouth of the capsule in urn-mosses. [B, 1, 19, 97 (*a*, 24).] 2. A membranous or calcareous operculum with which certain molluscs close their shells during the period of hibernation. [L, 41, 43, 180, 354.]

ÉPIPHYLLANTHE (Fr.), adj. A-pe-fel-la3n2t. From ἐπί, upon, φύλλον, a leaf, and ἄνθος, a flower. Having flowers growing upon the leaves. [B, 38; L, 42.]

ÉPIPHYLLE (Fr.), adj. A-pe-fel. See EPIPHYLLOUS; as a n., an epiphyllous organ. [A, 518.]

EPIPHYLLOCARPOUS, adj. E2p-i2-fi2l-o-ka3rp'u3s. Lat., *epiphyllocarpus* (from ἐπί, upon, φύλλον, a leaf, and καρπός, a fruit). Bearing fruit on the leaves (said of ferns). [*a*, 24.]

EPIPHYLLOSPERMÆ (Lat.), n. f. pl. E2p-i2-fi2l(fu6l)-o(o3)-spu6rm(spe2rm)'e(a3-e2). From ἐπί, upon, φύλλον, a leaf, and σπέρμα, a seed. Fr., *épiphyllospermées.* 1. Of Rupp and others, a group of ferns having their fructification upon the backs of the fronds. 2. Of Sprengel, a division of the *Ateliæ* (cryptogams). [B, 1, 121, 170 (*a*, 24).]

EPIPHYLLOSPERMATOUS, EPIPHYLLOSPERMOUS, adj's. E2p-i2-fi2l-o-spu6rm'a2t-u3s, -spu6rm'u3s. Lat., *epiphyllospermus.* Fr., *épiphyllosperme.* Ger., *blattsamig.* Having seeds or other fructification upon the backs of the leaves. [B, 1 (*a*, 24).]

EPIPHYLLOUS, adj. E2p-i2-fi2l'u3s. Lat., *epiphyllus* (from ἐπί, upon, and φύλλον, a leaf). Fr., *épiphylle.* Ger., *auf dem Blatte.* 1. Situated upon a leaf (said of flowers or other organs). 2. Living upon leaves (said of certain lichens). [B, 1, 19, 121, 123 (*a*, 24).]

EPIPHYSAL, EPIPHYSARY, adj's. E2p-i2f'i2s-a2l, -a-ri2. See EPIPHYSEAL.

EPIPHYSE (Ger.), n. E2p-i2-fu6z'e2. See EPIPHYSIS.—**E'nablosung.** See *E'nlösung.*—**E'nausstülpung.** The rudimentary epiphysis cerebri. [I, 17 (K).]—**E'nkern.** The centre of ossification of an epiphysis. ["Ztschr. f. Biol.," xvi, p. 76 (D).]—**E'nknorpel.** See *Intermediary* CARTILAGE (2d def.).—**E'nlösung.** Separation of an epiphysis.—**E'nplatte.** See *Epiphyseal* PLATE.—**E'ntrennung.** See *E'nlösung.*

ÉPIPHYSE (Fr.), n. A-pe-fez. See EPIPHYSIS.—**E. de la piemère.** See *Chorioid* PLEXUS.

EPIPHYSEAL, EPIPHYSIAL, adj's. E2p-i2-fi2s'e2-a2l, -i2-a2l. Fr., *épiphysaire.* 1. Pertaining to or of the nature of an epiphysis. [L.] 2. Pertaining to the epiphysis cerebri. [I.]

EPIPHYSEITIS (Lat.), n. f. E2p-i2-fi2s(fu6s)-e2-i(e)'ti2s. Gen., *epiphyseit'idos* (*-is*). Inflammation of an epiphysis. [*a*, 29.]

EPIPHYSIS (Lat.), n. f. E2p-i2f'i2(u6)-si2s. Gen., *epiphys'eos* (*-iph'isis*). Gr., ἐπίφυσις (from ἐπί, upon, and φύειν, to grow). Fr., *épiphyse.* Ger., *Epiphyse, Knochenansatz* (1st and 2d def's). 1. A portion of a long bone formed at either extremity from a secondary or tertiary centre of ossification and united to the shaft during early life by an intervening layer of cartilage which in time ossifies. [C.] 2. A bony eminence or process. [C.] 3. A small swelling upon the edge of the eyelid. [L, 349.]—**E. acetabuli.** See *Cotyloid* BONE.—**E. cerebri.** A small reddish body situated at the posterior part of the third ventricle between the corpora quadrigemina. Microscopically it consists of follicles separated by connective tissue. These are lined by epithelial cells and contain corpora amylacea, calcium salts, and fat. Its function is unknown. [I, 15.]—**E. cruris longioris incudis.** See *Orbicular* BONE.—**E. ilii anterior.** See *Cotyloid* BONE.—**E. incudis.** See *Orbicular* BONE.—**E. medullaris.** Of Willis, an obscure term for a tract of nerve-fibres which extend from the corpora striata to the corpora quadrigemina. [I, 3 (K).]—**E. piæ matris** [Paré]. See *Chorioid* PLEXUS.

EPIPHYTÆ (Lat.), n. f. pl. E2p-i2f'i2t(u6t)-e(a3-e2). Of Link, an order of his *Anandræ.* [B, 170 (*a*, 24).]

EPIPHYTAL, adj. E2p-i2f'i2t-a2l. Lat., *epiphytus* (from ἐπί, upon, and φύειν, to grow). Fr., *épiphytaire, épiphytique, épiphyte.* Ger., *epiphytisch.* Pertaining to or having the characters of an epiphyte. [B, 1, 123 (*a*, 24).]

EPIPHYTE, n. E2p'i2-fit. Lat., *epiphyton* (from ἐπί, upon, and φύειν, to grow). Fr., *épiphyte.* Ger., *Epiphyt.* 1. A vegetable ectoparasite. 2. A plant having aerial roots and growing on another plant as a mechanical support. [B, 1, 19, 77, 121 (*a*, 24).]

EPIPHYTIC, EPIPHYTICAL, adj's. E2p-i2-fi2t'i2k-a2l. See EPIPHYTAL.

EPIPHYTISM, n. E2p-i2f'i2t-i2z'm. Fr., *épiphytisme.* The production of epiphytes; also the state of being an epiphyte. [A, 301 (*a*, 21).]

EPIPHYTON (Lat.), n. n. E2p-i2f'i2(u6)-to2n. See EPIPHYTE.

EPIPHYTUS (Lat.), adj. E2p-i2f'i2(u6)-tu3s(tu4s). See EPIPHYTAL.

EPIPHYTY, n. E2p-i2f'i2t-i2. Fr., *épiphytie.* A wide-spread prevalence of any disease of plants; also the disease so prevailing. [L, 41.]

EPIPIGMA (Lat.), n. n. E2p-i2-pi2g'ma3. Gen., *epipig'matos* (*-is*). Fr., *épipigme*. An old apparatus for reducing dislocations of the shoulder. [L, 41, 50.]

EPIPLASMA (Lat.), n. n. E2p-i2-pla2z(pla3s)'ma3. Gen., *epiplas'matos* (*-is*). Gr., ἐπίπλασμα (from ἐπί, upon, and πλάσμα, formed matter). See ECTOPLASMA and CATAPLASM.

EPIPLEGIA (Lat.), n. f. E2p-i2-ple(pla)'ji2(gi2)-a3. From ἐπί, upon, and πληγή, a stroke. See HEMIPLEGIA.

EPIPLEMPHRAXIS (Lat.), n. f. E2p-i2-ple2m-fra2x(fra3x)'-i2s. Gen., *epiplemphrax'eos* (*-is*). See EPIPLOEMPHRAXIS.

EPIPLEROSIS (Lat.), n. f. E2p-i2-ple(pla)-ro'si2s. Gen., *epipleros'eos* (*-is*). Gr., ἐπιπλήρωσις (from ἐπιπληροῦν, to fill up again). Fr., *épiplérose*. Ger., *Überfüllung*. Fullness, repletion, engorgement. [L, 50.]

EPIPLEUR, n. E2p'i2-plu2r. Fr., *épipleure*. See EPIPLEURON.—**Pre-oral e.** See *Pre-oral* HOOD.

EPIPLEURA (Lat.), n. f. E2p-i2-plu2'ra3. From ἐπί, upon, and πλευρά, a rib. In birds, a process projecting obliquely backward from a vertebral rib. [L, 343.]

EPIPLEURAL, adj. E2p-i2-plu'ra2l. From ἐπί, upon, and πλευρά, a rib or the side. 1. Situated on the side of the thorax. 2. Relating to the epipleuron. 3. Situated on or connected with the pleurapophysis of a vertebra. [L, 14.]

EPIPLEURON (Lat.), n. n. E2p-i2-plu2'ro2n. A lateral outgrowth on each side of the body-wall of *Amphioxus*, extending from the head to the anus. These outgrowths join anteriorly to form the pre-oral hood, and posteriorly, near the anus, to form a median ventral fin. [L, 121.]

EPIPLOCE (Lat.), n. f. E2p-i2p'lo(lo2)-se(ka). Gen., *epip'loces*. Gr., ἐπιπλοκή (from ἐπιπλέκειν, to interweave). 1. An involution, entwining. 2. Sexual congress. 3. In pharmacy, a mixture. [L, 94.] —**E. intestinalis, E. intestinorum.** Ger., *Darmverwickelung*. See VOLVULUS.

EPIPLOCELE (Lat.), n. f. E2p-i2-plo(plo3)-sel(kal)'e(a); in Eng., e2p-i2p'lo-sel. Gen., *epiploceles*. Gr., ἐπιπλοκήλη (from ἐπίπλοον, the omentum, and κήλη, a tumor). Fr., *épiplocèle*. Ger., *Netzbruch*. A hernia containing omentum. [E.]

EPIPLOCOMISTES (Lat.), n. m. E2p-i2-plo(plo3)-ko2m-i2st'-ez(as). Gen., *epiplocomis'tæ*. Gr., ἐπιπλοκομιστής (from ἐπίπλοον, omentum, and κομιστή, nourishment). Ger., *Schmeerbauch*. Of Galen, a person who is corpulent in the belly. [L, 50 (*a*, 14).]

EPIPLOCYSTOSCHEOCELE (Lat.), n. f. E2p-i2p'''lo(lo3)-si2st(ku6st)-o2sk(o2sch2)''e2-o(o3)-sel(kal)'e; in Eng., e2p-i2p''lo-si2st-o2sk'e2-o-sel. Gen., *epiplocystoscheocel'es*. From ἐπίπλοον, the omentum, κύστις, the bladder, ὄσχεον, the scrotum, and κήλη, a tumor. Ger., *Netzblasenhodensackbruch*. A scrotal hernia containing omentum and the urinary bladder. [E.]

EPIPLOEMPHRAXIS (Lat.), n. f. E2p-i2-plo(plo3)-e2m-fra2x'-(fra3x)'i2s. Gen., *epiploemphrax'eos* (*-is*). From ἐπίπλοον, the mesentery, and ἔμφραξις, a stoppage. Fr., *épiploëmphraxie*. Ger., *Ueberfüllung und Verstopfung des Netzes*. An old term for engorgement of the omentum. [L, 50.]

EPIPLO-ENTEROCELE (Lat.), n. f. E2p-i2-plo(plo3)-e2n-te2r-o(o3)-sel(kal)'e(a); in Eng., e2p i2p''lo-e2n'te2r-o-sel. Gen., *epiploenterocel'es*. From ἐπίπλοον, the mesentery, ἔντερον, the intestine, and κήλη, a tumor. See ENTERO-EPIPLOCELE.

EPIPLO-ENTEROSCHEOCELE (Lat.), n. f. E2p-i2p''lo-(lo3)-e2nt-e2r-o2sk(o2sch2)-e2-o(o3)-sel(kal)'e(a); in Eng., e2p-i2p''lo-e2nt-e2r-o2sk'e2-o-sel. Gen., *epiplo enteroscheocel'es*. From ἐπίπλοον, the omentum, ἔντερον, an intestine, ὄσχεον, the scrotum, and κήλη, a tumor. Fr., *épiplo-entéroschéocèle*. Ger., *Darmnetzhodensackbruch*. A scrotal hernia containing omentum and intestine. [E.]

EPIPLOIC, adj. E2p-i2-plo'i2k. Lat., *epiploicus* (from ἐπίπλοον, the mesentery). Fr., *épiploïque*. Ger., *zum Netze gehörig*. Of or pertaining to the omentum. [C.]

EPIPLO-ISCHIOCELE (Lat.), n. f. E2p-i2-plo(plo3)-i2s-ki2-(ch2i2)-o(o3)-sel(kal)'e(a); in Eng., e2p-i2p''lo-i2sk'e2-o-sel. Gen., *epiploischiocel'es*. From ἐπίπλοον, the mesentery, ἰσχίον, the ischium, and κήλη, a tumor. Fr., *épiplo-ischiocèle*. Ger., *Netzgesässbruch*. An omental hernia through the sciatic notch. [E.]

EPIPLOITIS (Lat.), n. f. E2p-i2-plo2-i(e)'ti2s. Gen., *epiploit'idos* (*-is*). From ἐπίπλοον, the omentum (see also *-itis* *). Fr., *épiploïte*. Ger., *Netzentzündung*. Inflammation of the omentum. [L, 41, 50, 88 (*a*, 14).]

EPIPLOMEROCELE (Lat.), n f. E2p-i2-plo(plo3)-me(ma)-ro-(ro3)-sel(kal)'e(a); in Eng., e2p-i2p-lo-me2r'o-sel. Gen., *epiplomerocel'es*. From ἐπίπλοον, the omentum, μηρός, the thigh, and κήλη, a tumor. Fr., *épiplo-mérocèle*. Ger., *Netzschenkelbruch*. Omental femoral hernia. [E.]

EPIPLOMPHALOCELE (Lat.), **EPIPLOMPHALON** (Lat.), **EPIPLOMPHALUS** (Lat.), **EPIPLOOMPHALON** (Lat.), n's f., n., m., and n. E2p-i2-plo2m-fa2l(fa3l)-o(o3)-sel(kal)'e-(a), -plo2m'fa2l(fa3l)-o2n, -u3s(u4s), -o2n; in Eng., e2p-i2p-lo2m'fa2l-o-sel. Gen., *epiplomphalocel'es*. From ἐπίπλοον, the omentum, ὄμφαλος, the navel, and κήλη, a tumor. Fr., *épiplomphale*. Ger., *Netznabelbruch*. An umbilical hernia containing omentum. [E.]

EPIPLOOCELE (Lat.), n. f. E2p-i2p-lo2-o(o3)-sel(kal)'e(a); in Eng., e2p-i2-plo'o-sel. See EPIPLOCELE.

EPIPLOON (Lat.), n. n. E2p-i2'plo(plo2)-o2n. Gr., ἐπίπλοον (from ἐπί, upon, and πλεῖν, to float). Fr., *épiploon*. See OMENTUM. —**Colic e.** Fr., *épiploon colique*. See *Colic* OMENTUM.—**Cystocolic e.** Fr., *épiploon cystico-colique*. An omental prominence sometimes found connecting the gall-bladder with the duodenum, forming the anterior border of the foramen of Winslow. [Bricon, "Progr. méd.," Jan. 14, 1888, p. 27.]—**E. majus.** See *Great* OMENTUM.—**E. minus.** See *Lesser* OMENTUM.—**Gastro-colic e.** Fr., *épiploon gastro-colique*. See *Great* OMENTUM.—**Gastro-hepatic e.** Fr., *épiploon gastro-hépatique*. See *Lesser* OMENTUM.—**Gastro-splenic e.** Fr., *épiploon gastro-splénique*. See *Gastro-splenic* OMENTUM.

EPIPLOSARCOMPHALOCELE (Lat.), **EPIPLOSARCOMPHALON** (Lat.), **EPIPLOSARCOMPHALUS** (Lat.), n's f., n., and m. E2p-i2-plo(plo3)-sa3rk-o2m-fa2l(fa3l)-o(o3)-sel(kal)'e(a), -o2m'fa2l(fa3l)-o2n, -u3s(u4s); in Eng., e2p-i2p''lo-sa3rk-o2m'fa2l-o-sel. Gen., *epiplosarcomphalocel'es*. From ἐπίπλοον, the omentum, σάρξ, flesh, ὄμφαλος, the navel, and κήλη, a tumor. Fr., *épiplo-sarcomphale*. Ger., *Netznabelfleischbruch*. An umbilical hernia containing omentum which has become indurated. [E.]

EPIPLOSCHEOCELE (Lat.), n. f. E2p-i2-plo2s-ke2(ch2e2)-o-(o3)-sel(kal)'e(a); in Eng., e2p-i2p-lo2sk'e2-o-sel. Gen., *epiploscheocel'es*. From ἐπίπλοον, the omentum, ὄσχεον, the scrotum, and κήλη, a tumor. Fr., *épiploschéocèle*. Ger., *Netzhodensackbruch*. Scrotal hernia of the omentum. [E.]

EPIPLOUM (Lat.), n. n. E2p-i2p'lo2-u3m(u4m). Gr., ἐπίπλοον. See OMENTUM.

EPIPODICUS (Lat.), adj. E2p-i2-pod(po2d)'i2k-u3s(u4s). Fr., *épipodique*. Ger., *epipodisch*. Of plant-organs, inserted or situated on the epipodium (2d def.). [B, 1 (*a*, 24).]

EPIPODIUM (Lat.), n. n. E2p-i2-pod(po2d)'i2-u3m(u4m). Fr., *épipode*. 1. A wing-like appendage (one on each side) developed from the side of the anterior extremity of a pteropod. [L, 147.] 2. In botany, of Richard, a form of disc (seen in the *Cruciferæ*) consisting of glands on the stipe of the ovary; also the stalk of the disc. [B, 1, 19 (*a*, 24).]

EPIPOGEUS (Lat.), **EPIPOGIUS** (Lat.), adj's. E2p-i2-po'je2-(ge2)-u3s(u4s), -po'ji2(gi2)-u3s(u4s). From ἐπί, upon, and πώγων, the beard. Fr., *épipoge*. Having a bearded root (*i. e.*, one with finely divided fibres). The *Epipogieæ* of Blume are a tribe of orchids of the *Arethuseæ*. [B, 170 (*a*, 24).]

EPIPOLÆOS (Lat.), **EPIPOLÆUS** (Lat.), adj's. E2p-i-po-(po2)-le'(la3'e2)-o2s, -u3s(u4s). Gr., ἐπιπόλαιος (from ἐπιπολή, a surface). Of Hippocrates, superficial; of a disease, not dangerous. [A, 311 (*a*, 17); L, 84.]

EPIPOLASIS (Lat.), **EPIPOLASMUS** (Lat.), n's f. and m. E2p-i2-po2l'a3-si2s, -po(po2)-la2z(la3s)'mu3s(mu4s). Gr., ἐπιπόλασις (from ἐπιπολή, a surface). Fr., *épipolase*, *épipolie*. Ger., *Epipolase*. 1. Of Hippocrates, a being on or coming to the surface; fluctuation and excess of the humors. 2. Plethora. 3. Sublimation. 4. See FLUORESCENCE. [A, 311 (*a*, 17), 325 (*a*, 21); L, 41, 84, 116.]

EPIPOLIC, adj. E2p-i2-po2l'i2k. Fr., *épipolique*. Relating to fluorescence. [L, 56.]

EPIPOMA (Lat.), n. n. E2p-i2po'ma3. Gen., *epipom'atos* (*-is*). Gr., ἐπίπωμα. 1. A cover. 2. Of the ancients, an apparatus for reducing dislocations of the shoulder. [A, 322 (*a*, 21).]

EPIPOROMA (Lat.), n. n. E2p-i2-po-ro'ma3. Gen., *epiporom'atos* (*-is*). Gr., ἐπιπώρωμα (from ἐπιπωρᾶσθαι, to become callous on the surface). Ger., *Schwiele*. Sp., *e*. See CALLUS.

EPIPOROSIS (Lat.), n. f. E2p-i2-po-ro'si2s. Gen., *epiporos'eos* (*-is*). Gr., ἐπιπώρωσις. Ger., *Bildung des Epiporoma*. The formation of callus. [L, 50.]

EPIPREMNUM (Lat.), n. n. E2p-i2-pre2m'nu3m(nu4m). Of Schott and Brown, a genus of the *Aroideæ*, one of the chief sources of tonga. ["Proc. of the Am. Pharm. Assoc.," xxx (*a*, 14); B, 245.]

EPIPROSOPIUM (Lat.), n. n. E2p-i2-pro2s-op'i2-u3m(u4m). From ἐπί, upon, and πρόσωπον, the face. Fr., *épiprosopie*. Ger., *Stirnpflaster*, *Stirnmittel*. A plaster or other local application for the face. [L, 50.]

EPIPSILOUS, adj. E2p-i-psi'lu3s. From ἐπί, upon, and ψιλός, bald. Destitute of hairs above (said of the upper surface of leaves, etc.). [*a*, 24.]

EPIPSYCHE (Lat.), n. f. E2p-i2p-si2(su6)'ke(ch2a). Gen., *epipsych'es*. From ἐπί, upon, and ψυχή, a soul. See EPENCEPHALON.

EPIPTERIC, adj. E2p-i2p-te2r'i2k. From ἐπί, upon, and πτερόν, a wing. Fr., *épiptère*. Situated on the greater wing of the sphenoid bone. [L.] See *E.* BONE.

EPIPTERON (Lat.), n. n. E2p-i2p'te2r o2n. Of Dioscorides, the *Lemna minor*. [B, 88 (*a*, 14).]

EPIPTEROUS, adj. E-pi2p'te2r-u3s. Lat., *epipterus*, *epipteratus* (from ἐπί, upon, and πτερόν, a wing). Fr., *épiptère*. Of Mirbel, furnished with a wing at the top (like the fruit of the maple). [B, 1, 19 (*a*, 24).]

EPIPTERYGOID, adj. E-pi2p-te2r'i2-goid. From ἐπί, upon, πτέρυξ, a wing, and εἶδος, resemblance. Situated on or above the pterygoid bone. [L.] Cf. *E.* BONE.

EPIPTYCHE (Lat.), n. f. E2p-i2p'ti2(tu6)-ke(ch2a). Gen., *epip'tyches*. Gr., ἐπιπτυχή. 1. A cover (see OPERCULUM). 2. A fold. [L, 50 (*a*, 14).]

EPIPTYXIS (Lat.), n. f. E2p-i2p-ti2x(tu6x)'i2s. Gen., *epiptyx'eos* (*-is*). Gr., ἐπίπτυξις. 1. The placing of a cover. 2. The closing of an opening. [L, 50 (*a*, 14).]

EPIPUBIC, adj. E2p-i2-pu2'bi2k. From ἐπί, upon, and *pubes* (*q. v.*). Situated upon or over the pubes (see *E.* BONE). [B.]

EPIRRHÆNICUS (Lat.), adj. E2p-i2r-ren'(ra3'e2n)-i2k-u3s-(u4s). From ἐπιῤῥαίνειν, to sprinkle upon. Pertaining to sprinkling. [A, 322 (*a*, 21).]

EPIRRHANSIS (Lat.), n. E2p-i2r-ran(ra3n)'si2s. Gen., *epirrhan'seos* (*-is*). From ἐπιῤῥαίνειν, to sprinkle. Ger., *Aufsprengen*. Irrigation, sprinkling. [A, 322 (*a*, 21).]

EPIRRHOE (Lat.), **EPIRRHŒA** (Lat.), n's f. E^{2}p-i^{2}r'ro-(ro^2)-e(a), -i^{2}r-re'(ro^2'e^2)-a^3. Gen., *epir'rhoes.* Gr., ἐπιῤῥοή, ἐπίῤῥοια (from ἐπιῤῥεῖν, to flow upon). Fr., *épirrhée.* Ger., *Zufluss.* An afflux of humors. [L, 32, 41.]

EPIRRHIZOUS, adj. E^{2}p-i^{2}r-riz'u^{3}s. Lat., *epirrhizus* (from ἐπί, upon, and ῥίζα, a root). Fr., *épirrhize.* Ger., *wurzelwuchernd.* Of Mirbel, parasitic on the roots of a plant. [B, 1, 19 (*a*, 24).]

EPISARCIDIUM (Lat.), n. n. E^{2}p-i^2-sa^{3}rk-i^{2}d'i^2-u^{3}m(u^{4}m). From ἐπί, upon, and σάρξ, flesh. See ANASARCA.

EPISCHESIS (Lat.), n. f. E^{2}p-i^{2}sk(i^{2}sch^2)'e^{2}s-i^{2}s Gen., *epische'seos* (*-isch'esis*). Gr., ἐπίσχεσις. Fr., *épischèse.* Ger., *Zurückhaltung.* Of Galen, suppression or retention of the secretions; in the pl., *Epischeses*, of Young, diseases characterized by suppression or retention. [A, 325 (*a*, 21); L, 290.]

EPISCHETICUS (Lat.), adj. E^{2}p-i^{2}s-ke^{2}t(ch^{2}e^{2}t)'i^{2}k-u^{3}s(u^{4}s). Gr., ἐπισχετικός (from ἐπέχειν, to check). Pertaining to, arising from, or suffering from, epischesis. [A, 322 (*a*, 21).]

EPISCHION (Lat.), n. n. E^{2}p-i^{2}s'ki^2(ch^{2}i^2)-o^{2}n. From ἐπί, upon, and ἰσχίον, the ischium. Fr., *épischion.* The pubic bone. [L, 41, 50 (*a*, 14).]

EPISCHOMENIA (Lat.), n. f. E^{2}p-i^{2}sk(i^{2}sch^2)-o(o^3)-me(ma)'-ni^2-a^3. From ἐπίσχειν, to suppress, and μηναῖα, the menses. Fr., *épischoménie.* Ger., *Menstruationssuppression.* Suppression of the menses. [A, 301 (*a*, 21).]

EPISCHYONTA (Lat.), n. n. pl. E^{2}p-i^{2}s-ki^2(ch^{2}u^6)-o^{2}n(on)'ta^3. Gr., ἐπισχύοντα (from ἐπισχύειν, to make strong). Lat., *roborantia.* Ger., *stärkende Mittel.* Invigorating medicines, restoratives. [A, 322 (*a*, 14); *a*, 21.]

EPISCLERAL, adj. E^{2}p i^2-skler'a^{2}l. Lat., *episcleralis* (from ἐπί, upon, and σκληρός, hard). Fr., *épiscléral.* Situated on the sclera. [L, 332.]

EPISCLERITIS (Lat.), n. f. E^{2}p-i^2-skle^2(skla)-ri(re)'ti^{2}s. Gen., *episclerit'idos* (*-is*). Fr., *épisclérite.* Inflammation of the subconjunctival connective tissue and of the superficial layers of the sclera. [F.]

EPISCLEROTIC, adj. E^{2}p-i^2-skle^{2}r-o^{2}t'i^{2}k. See EPISCLERAL.

EPISCOPALIS (Lat.), adj. E^{2}p-i^{2}s-ko(ko^3)-pal(pa^{3}l)'i^{2}s. From ἐπίσκοπος, a bishop. Lit., pertaining to a bishop (see MITRAL). [A, 322 (*a*, 21).]

EPISCOPE, n. E^{2}p'i^2-skop. From ἐπί, upon, and σκοπεῖν, to view. Ger., *Episkop.* An instrument for the visual examination of a surface.—**Electric e.** Ger., *elektrisches Episkop.* A form of magic lantern or stereopticon, devised by Rennie, in which the electric light is used for illuminating opaque objects or physiological experiments on a table. The image of these highly illuminated objects is projected upon a gypsum plate, and thus made visible to a large audience. ["Med. Record," May 24, 1890, p. 592 (J).]

EPISCOTISTER (Lat.), n. m. E^{2}p-i^2-sko^{2}t-i^{2}st'u^{5}r(ar). Gen., *episcotister'os* (*-is*). From ἐπισκοτίζειν, to throw a shadow over. An instrument for testing the sensitiveness of the eye, invented by Talbot and improved by Aubert, consisting of two black, metallic discs, in each of which four octants are cut out. The discs are placed one on the other, and can be so rotated round their centres that the non-excised octants of the upper disc cover any arbitrary parts of the excised lower disc. By means of a screw arrangement the two discs may be fastened in their opposed position, and the degrees of the free sectors may be read off on a scale. The glass to be examined is then brought close to the disc, which is rapidly rotated like Masson's discs, so that a gray circle is produced. If we now look alternately through the disc and through the glass toward a white surface, we can, by displacement of the sectors of the first, equalize the diminution of the light produced by it with that produced by the glass. [F.]

ÉPISCUTE (Fr.), **ÉPISCUTUM** (Fr.), n's. A-pes-ku^{6}t, a-pes-ku^6-tu^{6}m. From ἐπί, upon, and *scutum* (*q. v.*). A part above the scutum of insects. [A, 322 (*a*, 21).]

EPISEIÆMATOMA (Lat.), n. n. E^{2}p-i^2-si(se^2-i^2)-e^{2}m(a^3 am)-a^{2}t(a^{3}t)-o'ma^3. Gen., *episeiœmatom'atos* (*-is*). From ἐπίσειον. the pubes, and αἷμα, blood. Ger., *Episiohämatom.* Hæmatoma of the vulva.

EPISEIITIS (Lat.), n. f. E^{2}p-i^2-si(se^2-i^2)-i(e)'ti^{2}s. Gen., *episeiit'idos* (*-is*). Inflammation of the vulva or of the pubic region. [A, 322 (*a*, 21).]

EPISEIOCELE (Lat.), n. f. E^{2}p-i^2-si(se^2-i^2)-o(o^3)-sel(kal)'e(a); in Eng., e^{2}p-i^2-zi'o-sel. Gen., *episeiocel'es.* From ἐπίσειον, the pubes, and κήλη, a tumor. Fr., *épisiocèle.* Ger., *Schaamlefzenbruch.* A pudendal hernia; also any swelling of the vulva. [A, 301 (*a*, 21).]

EPISEIOCLEISIS (Lat.), n. f. E^{2}p-i^{2}s-i(e^2-i^2)-o(o^3)-klis'(kle^2-es')-i^{2}s. Gen., *episeiocleis'eos* (*-is*). From ἐπίσειον, the pubes, and κλεῖσις, a shutting up. Fr., *épisioclisie.* Ger., *Episiokleisis.* The operation of closing the vulva by causing adhesion of the labia, so that the urine and the menses are voided by the rectum, a recto-vaginal fistula having been formed. [Kaltenbach, "Ctrlbl. f. Gyn.," 1883, No. 48; Heilbrun, *ibid.*, June 27, 1885, p. 404.]

EPISEIŒDEMA (Lat.), n. n. E^{2}p-i^{2}s-i(e^2-i^2)-e^{2}d(o^2-e^{2}d)-e(a)'ma^3. Gen., *episiœdem'atos* (*-is*). From ἐπίσειον, the region of the pubes, and οἴδημα, a tumor. Fr., *épisiœdeme.* Ger., *Schaamlefzenœdem.* Œdema of the vulva. [A, 322 (*a*, 21).]

EPISEIO-ELYTRORRHAPHY, n. E^{2}p-i^{2}z-i-o-e^{2}l-i^2-tror'-ra^{2}f-i^2. From ἐπίσειον, the pubes, ἔλυτρον, the vagina, and ῥαφή, a suture. The operation of closing a ruptured perinæum and narrowing the vagina by suture, for the support of a prolapsed uterus. [L, 20 (*a*, 14).]

EPISEIOHÆMATOMA (Lat.), n. n. E^{2}p-i^2-si(se^2-i^2)-o(o^3)-he^{2}m(ha^3-am)-a^{2}t(a^{3}t)-o'ma^3. See EPISEIÆMATOMA.

EPISEIOITIS (Lat.), n. f. E^{2}p-i^2-si(se^2-i^2)-o(o^3)-i(e)'ti^{2}s. See EPISEIITIS.

EPISEION (Lat.), n. n. E^{2}p-i^2-si'(se^2'i^2)-on. Gr., ἐπίσειον. Ger., *äussere Schaam.* Of Hippocrates, the pubes. [L, 50, 84.]

EPISEIONCUS (Lat.), n. m. E^{2}p-i^2-si'(sa'i^2)-o^{2}n^2'ku^{3}s(ku^{4}s). From ἐπίσειον, the pubes, and ὄγκος, a mass. Ger., *Schaamlefzengeschwulst.* Pubic swelling, especially of the labia pudendi. [L, 50, 107.]

EPISEIO-PERINÆORRHAPHY, n. E^{2}p-i^2-si''o-pe^{2}r-i^2-ne-o^{2}r'ra^{2}f-i^2. From ἐπίσειον, the pubes. περίναιον, the perinæum, and ῥαφή, a seam. See EPISEIO-ELYTRORRHAPHY.

EPISEIOPHYMA (Lat.), n. n. E^{2}p-i^2-si(se^2-i^2)-o(o^3)-fi(fu^6)'ma^3. Gen., *episeiophym'atos* (*-is*). From ἐπίσειον, the pubes, and φῦμα, a tumor. Fr., *épisiophyme.* Ger., *Schaamlefzenbeule.* A tumor of the pubic region or of the vulva. [L, 50 (*a*, 14).]

EPISEIORRHAGIA (Lat.), n. f. E^{2}p-i^2-si(se^2-i^2)-o^{2}r-ra(ra^3)'-ji^2(gi^2)-a^3. From ἐπίσειον, the pubes, and ῥηγνύναι, to break forth. Fr., *épisiorrhagie.* Ger., *Schaamblutung.* Hæmorrhage from the vulva. [L, 41, 50.]

EPISEIORRHAPHY, n. E^{2}p-i^{2}s-i-o^{2}r'ra^{2}f-i^2. Lat., *episeiorrhaphia* (from ἐπίσειον, the pubes, and ῥαφή, a seam). Fr., *épisiorrhaphie.* Ger., *Episiorrhaphie, Schaamlefzenvernähung, Schaamnaht.* The operation of repairing a lacerated perinæum by suture.

EPISEIOSTENOSIS (Lat.), n. f. E^{2}p-i^{2}s-i(e^2-i^2)-o(o^3)-ste^{2}n-o'-si^{2}s. Gen., *episiostenos'eos* (*-is*). From ἐπίσειον, the pubes, and στένωσις, a narrowing. Fr., *épisiosténose.* Contraction or closure of the vulva. [A, 385 (*a*, 21).]

EPISEIOTOMY, n. E^{2}p-i^2-si-o^{2}t'o-mi^2. Lat., *episeiotomia* (from ἐπίσειον, the pubes, and τέμνειν, to cut). Fr., *épisiotomie.* Ger., *Episiotomie, blutige Erweiterung der Schaamspalte.* The operation of incising the perinæum in cases of rigidity, to prevent its laceration during delivery.

EPISEMASIA (Lat.), n. f. E^{2}p-i^2-sem(sam)-as(a^{3}s)'i^2-a^3. Gr., ἐπισημασία (from ἐπισημαίνειν, to set a mark upon). Fr., *épisémasie.* A diagnostic or prognostic sign. [A, 322 (*a*, 21).]

EPISEPALOUS, adj. E^{2}p-i^2-se^{2}p'a^{2}l-u^{3}s. Lat., *episepalus.* Fr., *épisépale.* Situated on or adherent to the sepals (said of stamens and glands). [B, 1, 77 (*a*, 24).]

EPISIOCELE (Lat.), n. f. E^{2}p-i^{2}s-i^2(e)-o(o^3)-sel(kal)'e(a); in Eng., e^{2}p-i^{2}z'i^2-o-sel. See EPISEIOCELE.

ÉPISIOCLISIE (Fr.), n. A-pe-ze-o-kle-ze. See EPISEIOCLEISIS.

EPISIŒDEMA (Lat.), n. n. E^{2}p-i^{2}s(es)-i^2-e^{2}d(o^2-e^{2}d)-e(a)'ma^3. See EPISEIŒDEMA.

EPISIO-ELYTRORRHAPHY, n. E^{2}p-i^{2}s''i^2-o-e^{2}l-i^{2}t-ro^{2}r'-ra^{2}f-i^2. See EPISEIO-ELYTRORRHAPHY.

EPISIOHÆMATOMA (Lat.), n. n. E^{2}p-i^2-si^2(se)-o-he^{2}m(ha^3-am)-a^{2}t(a^{3}t)-o'ma^3. See EPISEIÆMATOMA.

EPISIOITIS (Lat.), n. f. E^{2}p-i^{2}s-i^2(e)-o(o^3)-i(e)'tis. See EPISEIITIS.

EPISION (Lat.), n. n. E^{2}p-i^2-si(se)'o^{2}n. See EPISEION.

EPISIONCUS (Lat.), n. m. E^{2}p-i^2-si^2(se)-o^{2}n^2'ku^{3}s(ku^{4}s). See EPISEIONCUS.

EPISIO-PERINÆORRHAPHY, n. See EPISEIO-PERINÆORRHAPHY.

EPISIOPHYMA (Lat.), n. n. E^{2}p-i^{2}s-i^2(e)-o(o^3)-fi(fu^6)'ma^3. See EPISEIOPHYMA.

EPISIORRHAGIA (Lat.), n. f. E^{2}p-i^{2}s-i^2(e)-or-ra^3'ji^2(gi^2)-a^3. See EPISEIORRHAGIA.

EPISIORRHAPHY, n. E^{2}p-i^2-si^2-o^{2}r'ra^{2}f-i^2. See EPISEIORRHAPHY.

EPISIOSTENOSIS (Lat.), n. f. E^{2}p-i^2-si^2(se)-o(o^3)-ste^{2}n-o'si^{2}s. See EPISEIOSTENOSIS.

EPISIOTOMY, n. E^{2}p-i^{2}s-i^2-o^{2}t'o-mi^2. See EPISEIOTOMY.

EPISKELETAL, adj. E^{2}p-i^2-ske^{2}l'e^{2}t-a^{2}l. From ἐπί, upon, and σκελετόν, a mummy. Of Huxley, situated above the endoskeleton and taking their origin in the protovertebræ (said of muscular fibres). [L, 12 (*a*, 27).]

EPISKOTISTER (Lat.), n. m. See EPISCOTISTER.

EPISPADIA (Lat.), n. f. E^{2}p-i^{2}s-pad(pa^{3}d)'i^2-a^3. See ANASPADIAS.

EPISPADIAN, n. E^{2}p-i^2-spad'i^2-a^{2}n. Lat., *epispadiœus.* See ANASPADIAC.

EPISPADIAS (Lat.), **EPISPADIASIS** (Lat.), n's f. E^{2}p-i^2-spad(spa^{3}d)'i^2-a^{2}s(a^{3}s), -spad(spa^{3}d)-i^2-a(a^3)'si^{2}s. Gen., *epispadi'ados* (*-is*), *ias'eos* (*-is*). From ἐπί, above, and σπᾶν, to dislocate. Fr., *épispadias.* Ger., *Epispadie.* A deformity in which the urethra of the male terminates at some point above the normal situation of the meatus. [Englisch (A, 319).]—**E. glandis** [Bergh]. Fr., *épispadia balanique* (ou *glandaire*). Syn.: *fissura incomplete* [Dolbeau]. A variety in which the urethra terminates on the dorsum of the glans penis. [Englisch (A, 319); L, 88 (*a*, 14).]—**E. penis.** Fr., *épispadias complet.* Syn.: *fissura completa* [Dolbeau]. A form in which the fissure on the dorsum of the penis extends back of the glans.

EPISPADIC, adj. E^{2}p-i^2-spad'i^{2}k. Pertaining to epispadias; as a n., a person affected with epispadias.

EPISPASIS (Lat.), n. f. E^{2}p-i^{2}s'pa^3-si^{2}s. Gen., *epispa'seos* (*-ispa'sis*). Gr., ἐπίσπασις (from ἐπισπᾶν, to draw after). Fr., *épispase.* Ger., *kunftlicher Auschlag.* A cutaneous eruption produced by medical treatment. [L, 41, 44.]

EPISPASMOS (Lat.), **EPISPASMUS** (Lat.), n's m. E^{2}p-i^2-spa^{2}z(spa^{3}s)'mo^{2}s, -mu^{3}s(mu^{4}s). Gr., ἐπισπασμός. Fr., *épispasme.* Ger., *Einathmen.* Hurried respiration. [A, 518; L, 41, 44, 50.]

EPISPASTIC, adj. E^{2}p-i^2-spa^{2}st'i^{2}k. Gr., ἐπισπαστικός (from ἐπισπᾶν, to draw after). Lat., *epispasticus*. Fr., *épispastique*. Ger., *epispastisch*. It., *epispastico*. Sp., *epispástico*. See DRAWING; as a n. (Ger., *Zugmittel*), a preparation which, when applied to the skin, acts as a rubefacient or vesicant. [L, 41, 44, 50.]

EPISPASTICA (Lat.), n. n. pl. E^{2}p-i^2-spa^{2}st(spa^{3}st)'i^{2}k-a^3. Fr., *épispastiques*. 1. Epispastic remedies. 2. Of Dumeril, a family of the *Coleoptera* having vesicating properties. [L, 180.]—**E. pruriginantia.** Of E. Richter, e. (1st def.) that cause burning, pricking, and itching of the skin. [Bernatzik (A, 319).]—**E. pustulantia.** Ger., *pustelbildende Mittel*. E. (1st def.) that give rise to the formation of pustules. [Bernatzik (A, 319).]—**E. rubefacientia.** Rubefacient applications. [Bernatzik (A, 319).]—**E. suppurantia.** Ger., *eiterziehende (geschwürbildende) Mittel*. E. (1st def.) that cause prolonged suppuration. [Bernatzik (A, 319).]—**E. vesicantia.** Ger., *blasenziehende Mittel*. Vesicating applications. [Bernatzik (A, 319).]

EPISPERM, n. E^{2}p'i^2-spu^{5}rm. Lat., *epispermum* (from ἐπί, upon, and σπέρμα, a seed). Fr., *épisperme*. Ger., *Samenhülle*. 1. The skin of a seed (see TESTA). 2. The membranous sac containing the spores of certain algæ (see PERISPORE). [B, 1, 19, 77, 121 (a, 24).]

EPISPERMATIC, EPISPERMIC, adj's. E^{2}p-i^2-spu^{5}rm-a^{2}t'i^{2}k, -spu^{5}rm'i^{2}k. Lat., *epispermaticus*. Fr., *épispermatique*. Of Richard, like or pertaining to the episperm (said of an embryo, which may be recognized by its tegument). [B, 1 (a, 24).]

EPISPHÆRION (Lat.), n. n. E^{2}p-i^2-sfe'(sfa^3'e^2)-ri^2-o^{2}n. Gr., ἐπισφαίριον (from ἐπί, upon, and σφαῖρα, a ball). Fr., *épisphérie*. See CONVOLUTION.

EPISPLENITIS (Lat.), n. f. E^{2}p-i^2-sple^{2}n(splan)-i(e)'ti^{2}s. Gen., *episplenit'idos (-is)*. From ἐπί, upon, and σπλήν, the spleen (see also *-itis**). Fr., *épisplénite*. Inflammation of the capsule of the spleen. [A, 518.]

EPISPORANGEIUM (Lat.), n. n. E^{2}p-i^2-spor(spo^{2}r)-a^{2}n(a^{2}n^2)-ji'(ge^2-e')-u^{3}m(u^{4}m). From ἐπί, upon, σπόρος, a seed, and ἀγγεῖον, a vessel. Fr., *épisporange*. Ger., *Schleierchen*. Of Bernhardi, the indusium of ferns. [B, 1, 19 (a, 24).]

EPISPORE, n. E^{2}p'i^2-spor. Fr., *épispore*. The hard, cellular membrane of a spore. [A, 396 (a, 21).]

EPISPOREUS (Lat.), adj. E^{2}p-i^2-spor(spo^{2}r)'e^2-u^{3}s(u^{4}s). Fr., *épisporé*. Provided with epispores; as a n., in the f. pl., *Episporeæ*, an order of the *Fucaceæ*, comprising the *Laminarieæ*, *Sporochneæ*, *Dictyoteæ*, and *Chordarieæ*. [A, 385 (a, 21); B, 170 (a, 24).]

EPISPORIUM (Lat.), n. n. E^{2}p-i^2-spor(spo^{2}r)'i^2-u^{3}m(u^{4}m). See EPISPORE.

EPISTACTICUS (Lat.), adj. E^{2}p-i^2-sta^{2}k(sta^{3}k)'ti^2-ku^{3}s(ku^{4}s). Pertaining to, proceeding from, or suffering with, epistaxis. [A, 322 (a, 21).]

EPISTACTISCHESIS (Lat.), n. f. E^{2}p-i^2-sta^{2}k(sta^{3}k)-ti^{2}s'ke^2-(che^2)-si^{2}s. Gen., *epistactisches'eos (-isches'is)*. From ἐπίσταξις, epistaxis, and ἰσχεῖν, to restrain. Fr., *épistactischèse*. Ger., *Stillungdes Nasenblutens*. The suppression of epistaxis. [L, 50, 135.]

EPISTAGMOS (Lat.), n. m. E^{2}p-i^2-sta^{2}g(sta^{3}g)'mo^{2}s. Gr., ἐπισταγμός (from ἐπιστάζειν, to instill). 1. Instillation. 2. Of Dioscorides, catarrh. [A, 325 (a, 21).]

EPISTAMINAL, adj. E^{2}p-i^2-sta^{2}m'i^{2}n-a^{2}l. Lat., *epistaminalis* (from ἐπί, upon, and στήμων, a stamen). Fr., *épistaminale*. Ger., *auf den Griffeln verwachsen*. Adherent to the stamens (said of glands). [B, 1 (a, 24).]

EPISTAMINEUS (Lat.), adj. E^{2}p-i^2-sta^{2}m(sta^{3}m)-i^{2}n'e^2-u^{3}s-(u^{4}s). Fr., *épistaminé*. Having the stamens epigynous; as a n., in the f. pl., *Epistamineæ* (Fr., *épistaminées*; syn.: *epistaminia* [Jussieu]), a class of apetalous dicotyledons so characterized. [B, 1, 170 (a, 24).]

EPISTAPHYLINUS (Lat.), n. m. E^{2}p-i^{2}s-ta^{2}f(ta^{3}f)-i^{2}l(u^{6}l)-i-(e)'nu^{3}s(nu^{4}s). From ἐπί, upon, and σταφυλή, the uvula. Fr., *épistaphylin*. See AZYGOS *uvulæ*.

EPISTASIS (Lat.), n. f. E^{2}p-i^{2}s'ta^3-si^{2}s. Gen., *epistas'eos (-is'tasis)*. Gr., ἐπίστασις (from ἐφιστάναι, to place upon). Fr., *épistase*. Ger., *Harnschaum* (2d def.). 1. A stoppage, as of hæmorrhage. 2. Scum on the surface of urine. [A, 311 (a, 17); 322 (a, 21); L, 41, 50, 135.]

EPISTATION, n. E-pi^{2}s-ta'shu^{3}n. From *e* intens., and *pistare*, to pound repeatedly. Fr., *épistation*. Reduction to a paste by pounding. [L, 32, 41.]

EPISTAXIS (Lat.), n. f. E^{2}p-i^2-sta^{2}x(sta^{3}x)'i^{2}s. Gen., *epistax'eos (-is)*. Gr., ἐπίσταξις (from ἐπιστάζειν, to instill). Fr., *épistaxis, saignement du nez, hémorrhinée*. Ger., *Nasenbluten*. It., *epistassi*. Sp., *e*. Hæmorrhage from the nasal passages. [D, 1.]—**Nidal e.** E. occurring when nidation has reached its climax. [Aveling, "Brit. Med. Jour.," May 22, 1886, p. 980 (a, 17).]—**Primary e.** E. from some morbid condition in the nose. [Lefferts (A, 63).]—**Secondary e.** E. due to some abnormal constitutional condition. [Lefferts (A, 63).]—**Uterine e.** Fr., *épistaxis uterine* [Gubler]. See METROSTAXIS.

EPISTEMONICUS (Lat.), adj. E^{2}p-i^2-ste^{2}m(stam)-o^{2}n'i^{2}k-u^{3}s-(u^{4}s). From ἐπί, upon, and στήμων, a filament. Fr., *épistémonique*. Resting upon the stamen. [L, 50.]

EPISTERNAL, adj. E^{2}p-i^2-stu^{5}rn'a^{2}l. Lat., *episternalis* (from ἐπί, upon, and στέρνον, the sternum). Fr., *episternal*. Situated above the sternum; connected with the sternal pieces on both sides. [L, 180.]

EPISTERNUM (Lat.), n. n. E^{2}p-i^2-stu^{5}rn(ste^{2}rn)'u^{3}m(u^{4}m). Fr., *épisternum*. 1. See EPIMERON (1st def.). 2. The interclavicle, a small bone found in some lower animals, connecting the præsternum and the clavicle, to which it is often fused. [L, 153.]

EPISTHOTONUS (Lat.), n. m. E^{2}p-i^{2}s-tho^{2}t'o^{2}n-u^{3}s(u^{4}s). See EMPROSTHOTONUS.

EPISTOME, n. E^{2}p'i^{2}s-tom. Lat., *epistoma*, *epistomium* (from ἐπί, upon, and στόμα, the mouth). Fr., *épistome*. Ger., *Epistom*. 1. In the *Polyzoa*, a valve-like organ which arches over the mouth. 2. In the *Crustacea*, a broad plate in front of the mouth somewhat pentagonal in shape, continuous behind with the labrum, prolonged anteriorly in the middle line into a point, and having on each side a cavity for articulation with the antennæ. [L, 11, 147, 168; "Amer. Nat.," i, p. 64; "Quart. Jour. of Micr. Sci.," xxx, p. 131 (L).]

EPISTOMI (Lat.), n. m. pl. E^{2}p-i^{2}s'to(to^2)-mi(me). Fr., *épistomées*. Of Bridel, a class of *Musci frondosi*, consisting of the *Gymnostomi* (*Calymperes*) and *Peristomi* (*Polytrichum* and *Catharinœa*). [B, 170 (a, 24).]

EPISTOMIAL, adj. E^{2}p-i^{2}s-to^{2}m'i^2-a^{2}l. Relating to or connected with the epistome. [L, 121.]

EPISTOMION (Lat.), **EPISTOMIS** (Lat.), **EPISTOMIUM** (Lat.), n's n., f., and n. E^{2}p-i^{2}s-tom(to^{2}m)'i^2-o^{2}n, -i^{2}s'to^{2}m-i^{2}s, -i^{2}s-tom(to^{2}m)'i^2-u^{3}m(u^{3}m). Gr., ἐπιστόμιον (from ἐπί, upon, and στόμα, the mouth). 1. See EPISTOME. 2. In pharmacy, a glass stopper. [L, 135 (a, 14).]

EPISTOMUS (Lat.), adj. E^{2}p-i^{2}s'to^{2}m-u^{3}s(u^{4}s). Fr., *épistome*. Ger., *verschlossen-* (oder *verdeckt-*) *mundig*. Having the mouth covered (said of mosses having the orifice of the urn closed by a horizontal membrane). [L, 180.] Cf. EPIPHRAGM.

EPISTROPHALUS (Lat.), n. m. E^{2}p-i^{2}s-tro^{2}f'a^{2}l(a^{3}l)-u^{3}s(u^{4}s). See EPISTROPHEUS.

EPISTROPHE (Lat.), n. f. E^{2}p-i^{2}s'tro(tro^2)-fe(fa). Gen., *epis'trophes*. Gr., ἐπιστροφή (from ἐπιστρέφειν, to turn about). 1. A return, relapse. [A, 387.] 2. In botany, the arrangement of chlorophyll granules upon the upper and lower faces of cells at night or when not under the influence of a strong light. [B, 229 (a, 24).] Cf. APOSTROPHE.

EPISTROPHEUS (Lat.), n. m. E^{2}p-i^{2}s-trof(tro^{2}f)'e^2-u^{3}s(u^{4}s). Fr., *épistrophée*. Ger., *zweiter Halswirbel*. See AXIS (8th def.).

EPISTROPHIA (Lat.), n. E^{2}p-i^{2}s-trof(tro^{2}f)'i^2-a^3. See EPISTROPHEUS.

EPISTROPHICO-ATLANTICUS (Lat.), adj. E^{2}p-i^{2}s-tro^{2}f''-i^{2}k-o(o^3)-a^{2}t(a^{3}t)-la^{2}nt(la^{3}nt)'i^{2}k-u^{3}s(u^{4}s). See ATLANTO-AXIAL.

EPISTROPHICO-OCCIPITAL (Fr.), adj. A-pe-stro-fe-ko-o^{2}k-se-pe-ta^{3}l. Pertaining to the axis (8th def.) and to the occiput (said of the muscles of the neck). [L, 41.]

EPISTROPHIS (Lat.), n. f. E^{2}p-i^{2}s'tro^{2}f-i^{2}s. Gen., *epistroph'idos (-is)*. See AXIS (8th def.).

EPISYLVIAN [B. G. Wilder], adj. E^{2}p-i^2-si^{2}l'vi^2-a^{2}n. From ἐπί, upon, and *Sylvius*, the Latinized name of Jacques Dubois. Above the Sylvian fissure (said of a branch of the fissure). [I.]

EPISYNANCHE (Lat.), n. f. E^{2}p-i^2-si^{2}n(su^{6}n)-a^{2}n^2(a^{3}n^2)'ke-(ch^{2}a). Gen., *episynanch'es*. Gr., ἐπισυνάγχη. Fr., *épisynanche*. 1. Parasynanche. 2. Of C. Hoffmann, paralysis of the velum palati. [A, 322 (a, 21); A, 518.]

EPISYNANGINE (Fr.), n. A-pe-ze-na^{3}n^2-zhen. Spasm of the pharynx. [L, 32, 41.]

EPISYNTHESIS (Lat.), n. f. E^{2}p-i^2-si^{2}n(su^{6}n)'the^2-si^{2}s. Gen., *episynthe'seos (-sy'nthesis)*. Gr., ἐπισύνθεσις from ἐπί, upon, and σύνθεσις, synthesis). Fr., *épisynthèse*. Ger., *wiederholtes Zusammensetzen*. An additional compounding. [A, 322 (a, 21).]

EPISYNTHETICUS (Lat.), adj. E^{2}p-i^2-si^{2}n(su^{6}n)-the^{2}t'i^{2}k-u^{3}s-(u^{4}s). Gr., ἐπισυνθετικός. Fr., *épisynthétique*. Ger., *episynthetisch*. It., *episintetico*. Sp., *episintético*. Pertaining to episynthesis; as a n., in the m. pl., *episynthetici* (Fr., *épisynthétiques*, Ger., *Episynthetiker*), an ancient class of physicians professing eclecticism. [A, 385 (a, 21); L, 94.]

EPITASIS (Lat.), n. f. E^{2}p-i^{2}t'a^3-si^{2}s. Gen., *epitas'eos (-it'asis)*. Gr., ἐπίτασις (from ἐπιτείνειν, to stretch over). Fr., *épitase*. Ger., *Verstärkung*. It., *epitasi*. Sp., *epitasis*. 1. Of Hippocrates, an access of disease; a paroxysm which precedes a fever or other illness. 2. Extension. [A, 311 (a, 17); L, 41, 50 (a, 14), 94.]

EPITECNOS (Lat.), adj. E^{2}p-i^2-te^{2}k'no^{2}s. Gr., ἐπίτεκνος (from ἐπιτίκτειν, to bring forth). Of Hippocrates, capable of bearing children, fruitful; as a n., in the f. sing., *epitecne*, according to Marchi and Aquilino, a very fruitful woman. [L, 50 (a, 14).]

EPITEL (Ger.), n. E^{2}p-e-te^{2}l'. See EPITHEL and EPITHELIUM.

EPITELIUM (Lat.), n. n. E^{2}p-i^2-tel(tal)'i^2-u^{3}m(u^{4}m). See EPITHELIUM.

ÉPITESTE (Fr.), n. A-pe-te^{2}st. The *Arum maculatum*. [B, 121, 173 (a, 24).]

EPITEX (Lat.), adj. E^{2}p'i^2-te^{2}x. Gr., ἐπίτεξ (from ἐπιτίκτειν, to bring forth). Of Hippocrates, about to bring forth. [A, 325 (a, 21).]

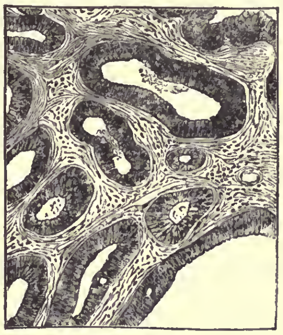
EPITHALAMIC, adj. E^{2}p-i^2-tha^{2}l'a^{2}m-i^{2}k. From ἐπί, upon, and θάλαμος, a thalamus. Of B. G. Wilder, situated on the optic thalamus. [L.]

EPITHALLINE, adj. E^{2}p-i^2-tha^{2}l'i^{2}n. From ἐπί, upon, and θαλλός, a thallus. Fr., *épithallin*. In botany, situated on the thallus. [A, 385 (a, 21).]

EPITHEL (Ger.), n. E^{2}p-e-te^{2}l'. See EPITHELIUM.—**Blasene'.** An e. containing a great many goblet cells. [J.]—**Chrotale'.** See *Ectodermic* EPITHELIUM.—**Cloakene'.** The epithelium lining the cloaca, especially in the embryo. ["Arch. f. mikr. Anat.," xxxiii, p. 487 (J).]—**Coelome'.** See *Mesodermic* EPITHELIUM.—**Decke'.** See *Protective* EPITHELIUM.—**Drüsene'.** See *Glandular* EPITHELIUM.—**Eie'.** See *Egg*-EPITHELIUM.—**Eierstockse'.** See *Germinal* EPITHELIUM (2d def.).—**Einfaches Plattene'.** See *Pavement*

EPITHELIUM.—**Einschichtiges E.** See *Simple* EPITHELIUM.—**Eiröhrene'.** The epithelium of the egg-tubes of insects. ["Arch. f. Anat. u Phys.," 1856, p. 87 (J).]—**Ende', Endoblastisches E.** See *Entodermic* EPITHELIUM.—**E'ähnlich.** See EPITHELIOID.—**E'auskleidung.** See EPITHELIUM.—**E'belag, E'bekleidung.** An epithelial investment. [A, 521.]—**E'brei.** A pap-like mass of epithelium. [A, 521.]—**E'cylinder.** See *Epithelial* CAST.—**E'decke.** See *E'bekleidung.*—**E'haufen.** A mass of epithelium. [A, 521.]—**E.-Gewebe.** See *Epithelial* TISSUE.—**E'hügel.** Taste-bud-like organs found in the oral mucosa of reptiles. [Leydig, "Arch. f. mikr. Anat.," 1872, p. 317 (J).]—**E'körper.** The epithelial part of a composite organ. [J.]—**E'krebs.** See *Epithelial* CANCER.—**E'lage.** A layer of epithelial cells. [J.]—**E'knospen.** Nerve end-organs having the general structure of taste-buds. They are found in all vertebrates except birds, and are mostly confined to the oral mucosa. [J, 157.]—**E'mosaik.** The mosaic appearance of the cells of a pavement epithelium in full view, or of a columnar epithelium when the ends of the cells are seen. [J.]—**E'perle.** See *Epithelial* PEARLS.—**E'saum.** A layer of epithelium appearing like a border or seam upon an organ when it is cut into sections. ["Arch. f. mikr. Anat.," xxviii, p. 267 (J).]—**E'scheide.** A sheath of epithelium (applied especially to the part of the enamel organ not giving rise to enamel, but surrounding the roots of the teeth and projected into the pulp cavity to give rise to the dentin). ["Arch. f. mikr. Anat.," xi, p. 77, xxix, p. 376 (J).]—**E'schicht.** See *E'lage.*—**E'schlauch.** Epithelium in the form of a sac or tube. [J.]—**E'sprossen.** Epithelial formations on the chorionic villi, consisting of protoplasm and nuclei, but without a defined cell-outline. [A, 8; H.]—**E'theil.** The epithelial part of composite organs like the hypophysis cerebri. ["Arch. f. mikr. Anat.," xxviii, p. 278 (J).]—**E'verlust.** Loss of epithelium. [A, 521.]—**E'wucherung.** Proliferation of epithelium. [A, 521.]—**E'zelle.** See *Epithelial* CELL.—**Exe', Exoblastisches E.** See *Ectodermic* EPITHELIUM.—**Flimmere'.** See *Ciliated* EPITHELIUM.—**Follikele.** See *Follicular* EPITHELIUM.—**Gastrale'.** See *Entodermic* EPITHELIUM.—**Gefässe'.** See *Vascular* EPITHELIUM.—**Geschichtetes E.** See *Stratified* EPITHELIUM.—**Geschmackse'.** The epithelium of taste-buds. [J, 67.]—**Keime'.** See *Germinal* EPITHELIUM.—**Kubisches E.** See *Cuboidal* EPITHELIUM.—**Mutterliches E.** See *Maternal* EPITHELIUM.—**Mese', Mesoblastisches E.** See *Mesodermic* EPITHELIUM.—**Palisadene'.** See *Columnar* EPITHELIUM.—**Pflastere'.** See *Pavement* EPITHELIUM.—**Plattene'.** See *Pavement* EPITHELIUM and *Stratified* EPITHELIUM. [J.]—**Rieche'.** See *Olfactory* EPITHELIUM.—**Schleimhaute'.** The epithelium of a mucous membrane. [J.]—**Schmelze'.** See *Enamel* EPITHELIUM.—**Sexuale'.** See *Germinal* EPITHELIUM.—**Stäbchene'.** See *Fibrillated* EPITHELIUM.—**Trübes E.** See *Dusky* EPITHELIUM.—**Uebergangse'.** See *Transitional* EPITHELIUM.—**Wimpere'.** See *Ciliated* EPITHELIUM.—**Zottene'.** Epithelium of villi, especially of the intestinal villi.—**Zylindere'len.** See *Cylindrical* EPITHELIUM.

ÉPITHÉLANGIOCHONDROMYXOSARCOME (Fr.), n. A-pe-tal-a^3n^2-zhi^2-o-ko^3n^2-dro-mex-o-sa^3r-kom. A composite tumor found in the parotid gland, of which the chief element is sarcomatous tissue, but which also contains mucous tissue, nodules of cartilage, glandular epithelium, and vessels of new formation. [Cornil and Ranvier (a, 18).]



EPITHELIA (Lat.), n. f. sing. and n. pl. E^2p-i^2-thel(thal)'i^2-a^3. 1. (Sing.) of Ruysch, the cuticular covering of the red part of the lips. [J, 30.] 2. Pl. of *epithelium* (*q. v.*).

EPITHELIAC, adj. E^2p-i^2-thel'i^2-a^2k. See EPITHELIAL.

EPITHELIAL, adj. E^2p-i^2-thel'i^2-a^2l. Lat., *epithelialis.* Fr., *épithelial.* Ger., *e.* It., *epiteliale, epitelico.* Sp., *epitelial, epitélico.* Pertaining to or composed of epithelium. [J.]—**E'auskleidung** (Ger.). See *E'bekleidung.*—**E'bekleidung** (Ger.). An e. covering. [J.]—**E'blatt** (Ger.). A layer or membrane composed of e. cells. [J.]—**E'cylinder** (Ger.). See *E.* CAST and *Columnar* CELLS.—**E'geschwulst** (Ger.). See EPITHELIOMA.—**E'gewebe** (Ger.). See *E.* TISSUE.—**E'krebs** (Ger.). See *Epithelial* CANCER.—**E'schicht** (Ger.). A layer of epithelium. [J.]—**E'schichtung** (Ger.). The formation of epithelial layers. [J.]—**E'sprossen** (Ger.). See EPITHEL*sprossen.*—**E'wulst** (Ger.). The e. ridges or swellings in the canalis cochlearis of the developing cochlea. The larger of these ridges is nearer the columella and forms ultimately the cubical e. of the sulcus spiralis; the smaller ridge is nearer the ligamentum spirale and gives rise to the organ of Corti. [J, 55, 75, 157.]

EPITHELIOID, adj. E^2p-i^2-thel'i^2-oid. From ἐπί, upon, θηλή, the nipple, and εἶδος, resemblance. Fr., *épithélioïde.* Ger., *epithelähnlich.* Resembling epithelium (said of [*a*] all epithelium-like coverings in tissues derived from the mesoblast and never having had any connection with the archenteron of the embryo. It therefore includes the cellular linings of the heart, the blood-vessels and lymph-vessels, the joints, and the connective-tissue spaces. Such linings are also sometimes called true endothelium [Prudden (J, 55); J, 19]. [*b*] An epithelium-like covering in connective-tissue spaces covering nerve-funiculi, etc.; sometimes also called endothelioid. The cellular lining of the vascular system and the cœlomic or pleuro-peritoneal spaces is in this case called endothelium). [Schaefer (J, 30).] Cf. EPITHELIUM.

EPITHELIOMA (Lat.), n. n. E^2p-i^2-thel(thal)-i^2-o'ma^3. Gen., *epitheliom'atos* (*-is*). Fr., *épithéliome, épithélioma.* Ger., *Epitheliom.* It., Sp., *epitelioma.* See *Epithelial* CANCER.—**Calcific e., Calcified e.** Fr., *épithéliome calcifié.* An e. that has undergone calcareous degeneration. [L, 88 (a, 14).]—**Cancroid e.** See *Epithelial* CANCER.—**Colloid e.** See *Colloid* CANCER.—**Columnar e.** See *Cylindrical e.*—**Corneous e.** An e. the cells of which resemble the outer layer of epidermal cells. [a, 29.]—**Cylindrical e.** Fr., *épithéliome à cellules cylindriques.* Adenoid or cylindroid epithelial cancer; a variety of e. in which the epithelial cells resemble ordinary columnar epithelia and the structure itself is quite like ordinary mucous membrane. [E.]—**Cylindro-cellular e.** Of J. W. S. Gouley, a cylindrical e. ["N. Y. Med. Jour.," Oct. 13, 1888, p. 393.]—**Cylindro-cellular ino-e.** A variety of Gouley's cylindro-cellular e. containing fibrous tissue. ["N. Y. Med. Jour.," Oct. 13, 1888, p. 393.]—**Cystic e.** An e. which contains hollow spaces filled with fluid. [a, 29.]—**Diffuse e.** A form of epithelioma characterized by a rapid infiltration of the surrounding connective tissue with epithelial cells, especially between the muscles and along the vessels and nerves. [L, 88 (a, 29).]—**E. contagiosum** [Neisser], **E. molluscum** [Virchow]. See MOLLUSCUM *contagiosum.*—**E. myxomatodes psammosum.** A peculiar form of tumor found in the third ventricle of the brain, resembling a very soft myxoma; characterized by milk-white, granular contents. [A, 326 (a, 21).]—**Flat-celled e.** See *Squamous e.*—**Glandular e.** A form of e. which occurs in mucous membranes, especially of the nasal fossæ and the soft palate, of very slow growth and not very malignant. It is composed of gland cells. [a, 29.]—**Hyperino-e.** [Gouley]. See *Scirrhous* CANCER.—**Ino-e.** Of J. W. S. Gouley, an e. containing fibrous tissue. ["N. Y. Med. Jour.," Oct. 13, 1888, p. 393.]—**Keratoid squamo-cellular e.** Of J. W. S. Gouley, a variety of squamo-cellular e. in which the cells resemble those of the horny layer of the epidermis. ["N. Y. Med. Jour.," Oct. 13, 1888, p. 393.]—**Lobulated e.** Fr., *epithéliome lobulé.* An e. divided irregularly into lobes. [L, 88 (a, 29).]—**Multiple cystic e.** A form of e. in which cysts are formed as a result of mucoid degeneration, and the fusion of contiguous drops of fluid. The cysts are scattered and the contents are either clear or turbid, colorless or stained. [E, 25.]—**Myxoid squamo-cellular e.** Of Gouley, a squamo-cellular e. with cells resembling those of the rete mucosum. ["N. Y. Med. Jour.," Oct. 13, 1888, p. 393.]—**Papillary cylindro-cellular ino-e.** Of Gouley, a cylindro-cellular e. containing fibrous tissue and having papillary projections from its surface. ["N. Y. Med. Jour.," Oct. 13, 1888, p. 393.]—**Papillary e.** Fr., *épithéliome papillaire.* Ger., *Papillargeschwulst, Zottengeschwulst.* Syn.: *papilloma.* An e. with papillary outgrowths from its surface. [Birch-Hirschfeld (A, 319).] Cf. PAPILLOMA.—**Papillary squamo-cellular e.** Of Gouley, a squamo-cellular e. with papillary outgrowths. ["N. Y. Med. Jour.," Oct. 13, 1888, p. 393.]—**Pavement-celled e.** A form of e. in which the cells resemble those of pavement epithelium. [a, 29.]—**Papillomatous e.** See *Papillary e.*—**Pearly pavement-celled e.** A pavement-celled e. in which groups of cells have united to form globules, or epithelial pearls, in the centre of each lobule. L, 88 (a, 29).]—**Polymorpho-cellular e.** Of Gouley, an e. made up of cells of various forms. ["N. Y. Med. Jour.," Oct. 13, 1888, p. 393.]—**Polymorpho-cellular hyperino-e.** Of Gouley, a polymorpho-cellular e. containing a great amount of fibrous tissue. ["N. Y. Med. Jour.," Oct. 13, 1888, p. 393.]—**Polymorpho-cellular ino-e.** Of Gouley, a polymorpho-cellular e. containing fibrous tissue. ["N. Y. Med. Jour.," Oct. 13, 1888, p. 393.]—**Squamo-cellular e.** [Gouley], **Squamous-celled e., Squamous e.** A variety of e. in which the cells resemble those of squamous epithelium and form masses which are very like the follicles of cutaneous glands. [E.]—**Teleangeiectatic cylindro-cellular ino-e.** Of Gouley, a cylindro-cellular ino-e. containing dilated blood-vessels. ["N. Y. Med. Jour.," Oct. 13, 1888, p. 393.]—**Teleangeiectatic polymorpho-cellular ino-e.** Of Gouley, a polymorpho-cellular ino-e. containing dilated blood-vessels. ["N. Y. Med. Jour.," Oct. 13, 1888, p. 393.]—**Tubular e., Tubular tessellated-celled e.** Fr., *épitheliome tubulé.* See CYLINDROMA.—**Villous e.** An e. on the inner surface of the bladder, which grows in the shape of branched villi. [Billroth (a, 29).]

COLUMNAR EPITHELIOMA. (A, 364.)

ÉPITHÉLIOMA (Fr.), n. A-pe-ta-le-o-ma^3. See EPITHELIOMA.

EPITHELIOMATOUS, adj. E^2p-i^2-thel-i^2-o^2m'a^2t-u^3s. Fr., *épithéliomateux.* Pertaining to or of the nature of epithelioma. [A, 385 (a, 21).]

ÉPITHÉLIOME. A-pe-ta-le-om. See EPITHELIOMA.—**E. à cellules cylindriques.** See *Cylindrical* EPITHELIOMA.—**E. adamantin.** A form of epithelioma found about the jaws, characterized by the presence of adamantine epithelium. [L. Malassez, "Arch. de physiol.," 1885, Nos. 6, 8; "Gaz. hebdom. de méd. et de chir.," Dec. 4, 1885, p. 802 (a, 29).]—**E. calcifié des glandes sébacées.** A benign osteoid tumor of the sebaceous glands, constituting a variety of pavement epithelioma in which the cells are calcified wholly or in part. The stroma is of connective tissue, but may become fibrous or osseous. It usually develops in childhood or youth, and most commonly in females. [Chenantais, rev. in "Progr. méd.," May 6, 1882, p. 351.]—**E. carcinomateux.** A form of epithelioma characterized by polyedral cells without well-defined characteristics. The masses are numerous and disposed in alveoli, which gives the tumor the appearance of a carcinoma. [L. Malassez, *l. c.* (a, 29).]—**E. diffus.** See *Diffuse* EPITHELIOMA.—**E. lobulé.** See *Lobulated* EPITHELIOMA.—**E. malpighien.** A form of epithelioma characterized by the presence of Malpighian cells with or without epidermic pearls. [L. Malassez, *l. c.* (a, 29).]—**E. pavimenteux perlé.** See *Pearly pavement-celled* EPITHELIUM.

EPITHELIO-MUSCULAR, adj. E^2p-i^2-thel''i^2-o-mu^3sk'u^2-la^3r. Having the characteristics of both epithelium and muscle. [J.] See *Muscle*-EPITHELIUM.

ÉPITHELIQUE (Fr.), adj. A-pe-ta-lek. See EPITHELIAL.

EPITHELIUM (Lat.), n. n. E^{2}p-i^2-thel(thal)'i^2-u^{3}m(u^{4}m). From ἐπί, upon, and θηλή, the nipple. Fr., *épithélium*. Ger., *Epithel*. It., Sp., *epitelio*. 1. A covering for free surfaces, composed of cells joined at their edges and forming one or more complete layers. Nerves are present in some forms of e. (*e. g.*, the dermal e.), but blood-vessels seem to be absent, except in a few invertebrates. The term is restricted by some writers to the cellular coverings of the skin and mucous membranes, as distinguished from *endothelium* (1st def.). [J.] See Plate II. 2. In botany, the layer of thin-walled, transparent cells that line the vacuoles of plant-tissue, or form the epidermis of the petals of young plants. [B, 19, 121 (*a*, 24).] 3. In the pl., *epidothelia* (Fr., *épithéliums*; Ger., *Epithelien*), epithelial cells; or the e. of two or more situations in the body. [J.]—**Alveolar e.** The e. of the alveoli of glands or of the lungs. [J.]—**Amniotic e.** An e. composed mostly of cuboid or flattened cells somewhat separated and connected by clearly defined intercellular bridges. ["Jour. of Morph.," ii, p. 388 (J).]—**Amœboid epithelia.** Ger., *amöboide Epithelien*. Fixed cells like an e. which take food into themselves by sending out pseudopodia-like processes and enveloping it. Such cells are found in the entoderm of cœlenterates and in the blastoderm of some dipterous insects (*e. g.*, *Chironomus*). [Gruber, "Zool. Anz.," 1879, p. 277; Metschnikoff, *ibid.*, 1880, p. 261 (J).] See also *Intracellular* DIGESTION.—**Areolar e.** The e. of the areola of a mamma. [J, 69.]—**Bacillated epithelia.** Epithelia made up of bacillated cells; of Heitzmann, the columnar cells of the small intestine which, according to him, have short, rod-like processes at their free extremity. [J.]—**Calyciform e.** Fr., *épithélium caliciforme*. An e. containing many goblet cells. [J.]—**Ciliary e., Ciliated e.** Lat., *epithelium vibrans*. Fr., *épithélium cylindrique vibratile* (ou *à cils vibratiles*). Ger., *Flimmerepithel*, *Winperepithel*. It., *epitelio vibratile*. Sp., *epitelio ciliar*. An e. in which the free ends of the cells composing it bear cilia. It is usually composed of a layer of ciliated columnar cells with broad free ends and slender attached ends, while between the attached ends there are one or more layers of rounder cells. In man, ciliated e. is present in the air-passages, the uterus, the Falloppian tubes, the vasa efferentia, the coni vasculosi, the beginning of the epididymis, the convoluted tubules of the kidney, the excretory ducts of the small racemose glands of the tongue and pharynx, and, in the embryo, the larynx, the œsophagus, and part of the stomach. [J, 30, 31, 32, 35.]—**Columnar e.** Lat., *e. cylindricum*. Fr., *épithélium cylindrique* (ou *prismatique*). Ger., *Cylinderepithel*, *Palisadenepithel*. An e. composed of columnar cells (*e. g.*, the e. of the stomach and intestine). [J.] See *Columnar* CELLS.—**Cuboidal e.** Fr., *épithélium cuboïdal*. Ger., *kubisches Epithel*. E. in which the cells composing it are cuboidal. [J.]—**Cylinder-e., Cylindrical e.** See *Columnar e.*—**Dusky e.** Ger., *trübes Epithel*. An e. which is cloudy and partly opaque, owing to the presence of dark granules, oil globules, etc. (*e. g.*, the e. of the convoluted tubules of the kidney). [J, 32, 35; "Arch. f. mikr. Anat.," 1874, p. 4 (J).] See *Fibrillated e.*—**Ectodermic e.** Ger., *Chrotalepithel*, *Exepithel*, *exoblastisches Epithel*. E. derived from the ectoderm (*e. g.*, the epidermis, and the e. of the cœliæ of the central nervous system). [J, 30; "Jena. Zeit.," 1884, p. 206 (J).]—**Egg e.** See under EGG.—**Enamel e.** Lat., *membrana adamantina*. Fr., *membrane de l'émail*. Ger., *Schmelzepithel*. See CUTICULA *dentis*.—**Enteric e.** Cells in the embryo which form the rudiment of the cellular lining of the enteron; in a general sense, the e. of the alimentary canal and the organs derived from it. ["Jour. of Morph.," i (J).]—**Entodermic e.** Ger., *Endepithel*, *endoblastisches Epithel*, *Gastralepithel*. The e. derived from the entoderm (*e. g.*, the e. of the alimentary canal except the mouth). [J, 30; "Jena. Zeit.," 1884, p. 206 (J).]—**E.-cell.** See *Epithelial* CELL.—**E. ciliatum.** See *Ciliated e.*—**E. cylindricum, E. cylindriforme.** See *Columnar e.*—**E. deciduum uteri.** Of Meyer, the decidua. [A, 112.]—**E. fusiforme.** See *Vascular* ENDOTHELIUM.—**E. lamellosum.** See *Pavement e.*—**E.-like.** See EPITHELIOID.—**E. micans.** See *Ciliated e.*—**E. of the Graafian follicle.** See MEMBRANA *granulosa*.—**E. polyedricum.** See *Pavement e.*—**E. spurium.** See ENDOTHELIUM.—**E. tabulare.** See *Pavement e.*—**E. vibrans, E. vibratorium.** See *Ciliated e.*—**False e.** See ENDOTHELIUM (1st def.).—**Fibrillated e.** Fr., *épithélium strié* (ou *à bâtonnets*), *e. fibrillé*. Ger., *Stäbchenepithel*. Syn.: *rod e.* E. in which the cells composing it appear as if formed of rods or straight fibrils. It is found in parts of the uriniferous tubules and in the ducts of the salivary glands. [J, 26, 42; "Arch. f. mikr. Anat.," 1877, p. 310 (J).]—**Flattened e.** See *Pavement e.*—**Flimmere'** (Ger.). See *Ciliated e.*—**Follicular e.** Fr., *membrane granuleuse*. Ger., *Follikelepithel*. The epithelium lining the Graafian follicle and inclosing the ovum. [J, 35.]—**Fusiform e.** See *Vascular* ENDOTHELIUM.—**Germ e., Germinal e., Germinative e.** Lat., *regio germinativa* [Waldeyer]. Fr., *épithélium germinatif*. Ger., *Keimepithel*, *Eierstocksepithel* (2d def.), *Sexualepithel*. Syn.: *Wolffian ridge*. 1. An accumulation of the e. that lines the pleuro-peritoneal space of the embryo, being that portion situated at the mesial side of each mesonephros, from which the spermatozooids or the ovarian ova take their origin. [A, 5.] 2. The cylindrical cells covering the greater part of the ovary and finally sinking into it to form ova or the membrana granulosa. [J, 1, 30, 35.]—**Glandular e.** Fr., *épithélium glandulaire*. Ger., *Drüsenepithel*. Syn.: *spheroidal e.*, *secreting e.* The e. which constitutes the proper secreting substance of a gland; generally composed of spheroidal cells. [J.] See also *Gland*-CELLS.—**Intestinal e.** See *Columnar e.*—**Lamellar e.** See *Pavement e.*—**Laminar e., Laminated e.** See *Stratified e.*—**Lymphatic e.** The e. of the lymphatic vessels. [J.]—**Malpighian e.** See *Mucous e.*—**Maternal e.** Ger., *mutterliches E.* The e. of the uterus in contradistinction to that of the developing embryo. ["Arch. f. mikr. Anat.," xxxiii, p. 425 (J).]—**Mesodermic e.** Ger., *Coelomepithel*, *Mesepithel*, *mesoblastisches Epithel*. An e. originating from the mesoderm, such as the e. of the vascular system, the peritonæum, etc. [J.] Cf. *E.* (1st def.).—**Mucous e.** 1. The rete mucosum. 2. The entire epidermis in the embryo, except the epitrichium. [J, 89.]—**Muscle-e., Myo-e.** Ger., *Muskelepithel*. An epithelial-like arrangement of cellular elements, composed of a cell-like body (myoblast) which acts as an epithelial cell, and of processes which extend from the base of the epithelial part and ramify in the tissues. The processes act as muscular fibres, and are often striated. [J, Z, 11.]—**Nerve e.** Fr., *épithélium sensoriel*. Ger., *Nervenepithel*. Syn.: *sensory e.* An e. in which sensory cells are mingled with ordinary epithelial cells (supporting cells) and form, directly or indirectly, the peripheral termination of nerves in the organs of sense (see Plate II, Fig. 12). [J, 26, 30, 31, 35, 157, 158.]—**Nucleated e.** Fr., *épithelium nucléaire*. An epithelium-like covering consisting of a granular mass containing many free nuclei. Its existence is denied by Ranvier. [J, 31, 33.]—**Olfactory e.** Fr., *épithélium olfactif*. Ger., *Riechepithel*. 1. The e. lining the proper olfactory region of the nasal cavity. It consists of ordinary columnar and the proper olfactory cells. [J.] 2. A variety of e. in the *Mollusca* regarded as having olfactory functions. [L, 121.] Cf. OSPHRADIUM.—**Ovarian e.** See *Germinal e.* (2d def.).—**Palisade e.** See *Columnar e.*—**Pavement e.** Lat., *e. lamellosum* (seu *polyedricum*). Fr., *épithélium pavimenteux*. Ger., *Plattenepithel*, *Pflasterepithel*. An e. composed of flattened or plate-like cells. It may be simple, as in the alveoli of the lungs, or stratified, as in the epidermis and in the epithelium of the mouth. In stratified pavement epithelia the deeper cells are usually columnar or rounded. [J, 24.]—**Peritoneal e.** See *Peritoneal* ENDOTHELIUM.—**Pigmentary e., Pigmented e.** Fr., *épithélium pigmenté*. Ger., *Pigmentepithel*. An e. in which the cells composing it contain a greater or less amount of pigment, as in the retina. [J, 26, 31.] See *Pigment*-CELLS.—**Plaster e.** Ger., *Pflastere'*. See *Pavement e.*—**Polyedral e., Polygonal e., Polyhedral e.** See *Pavement e.*—**Prismatic e.** Fr., *épithélium prismatique*. See *Columnar e.*—**Protective e.** Fr., *épithélium de revêtement*. Ger., *Deckepithel*, *Chrotalepithel*. An e. which serves especially for protection, like the epidermis, in contradistinction to an e. serving for secretion or sensation, like glandular and olfactory epithelia. [J.]—**Pyramidal e.** See *Columnar e.*—**Reserved epithelia.** See *Marginal* CELLS.—**Rod e.** See *Fibrillated e.*—**Scaly e.** See *Pavement e.*—**Secreting e., Secretory e.** See *Glandular e.*—**Sense e.** E. in the lower animals which is regarded as having sensory (*e. g.*, olfactory) functions. [L, 121.]—**Sensory e.** See *Nerve e.*—**Serous e.** The e. of a serous membrane. [J.]—**Simple e.** Fr., *épithélium simple*. Ger., *einschichtiges Epithel*. An e. composed of a single layer of cells, like the e. of the intestine and of the alveoli of the lungs. [J.]—**Spheroidal e.** See *Glandular e.* and ÉPITHÉLIUM *sphérique*.—**Squamous e.** See *Pavement e.*—**Stratified e.** Fr., *épithélium stratifié*. Ger., *geschichtetes Epithel*, *Plattenepithel*. It., *epitelio stratificato*. An e. composed of two or more superimposed layers. [J, 30, 42.]—**Striated e.** E. in which the cells are striated, as in the duct of a salivary gland and in some of the tubules of the kidney. [C.]—**Subcapsular e.** An epithelioid lining of the ental or internal aspect of the capsule of the nerve cells of spinal ganglia. [J, 31, 83.]—**Surface e.** The e. on the surface of an organ, in contradistinction to that which sinks into its substance to form glands, as in the stomach. [J.]—**Tabular e.** See *Pavement e.*—**Tegumentary e.** See EPIDERMIS.—**Tessellated e.** See *Pavement e.*—**Transitional e.** Fr., *épithélium mixte*. Ger., *Uebergangsepithel*. An e. composed of two or more layers of cells which dovetail into each other, not giving a distinctly stratified appearance. It is neither stratified nor simple, but appears as if it were in a stage of transition from one to the other. [J, 16.]—**Vascular e.** See *Vascular* ENDOTHELIUM.—**Vibratile e., Vibrating e.** See *Ciliated e.*—**Yolk e.** In the developing ova of cephalopods, an extension of the blastoderm to inclose the food-yolk. ["Ann. des sci. nat.," zool., vi, p. 243 (J).]

ÉPITHÉLIUM (Fr.), n. A-pe-ta-le-u^{4}m. See EPITHELIUM.—**E. à bâtonnets.** See *Fibrillated* EPITHELIUM.—**E. à cils vibratiles.** See *Ciliated* EPITHELIUM.—**E. crénelé.** An epithelium in which part or all of the cells appear toothed or spined, as in the stratum mucosum of the skin and in the lymphatic capillaries (see Plate II). [J, 31, 83.]—**E. cubique.** See *Cuboidal* EPITHELIUM.—**E. cutané.** See EPIDERMIS.—**E. cylindrique vibratile.** See *Ciliary* EPITHELIUM.—**E. dentelé.** An epithelium composed in part of prickle-cells (see Plate II, Fig. 8). [J, 31.]—**E. de revêtement.** See *Protective* EPITHELIUM.—**E. fibrillé.** See *Fibrillated* EPITHELIUM.—**E. germinatif.** See *Germinal* EPITHELIUM.—**E. herissé.** An e. containing prickle cells. [J.]—**E. infiltré.** A morbid inward growth of epithelium. [L, 41 (*a*, 14).]—**E. lamelleux.** See *Pavement* EPITHELIUM.—**E. mixte.** See *Transitional* EPITHELIUM.—**E. pavimenteux, E. plat.** See *Pavement* EPITHELIUM.—**E. prismatique.** See *Columnar* EPITHELIUM.—**E. sécréteur.** See *Glandular* EPITHELIUM.—**E. sinueux.** E. in which the cells have a sinuous outline, as in the lymphatic capillaries. [J.]—**E. sphérique.** The epithelium of ductless glands; in invertebrates, the epithelium of the glands and mucous membrane. [J, 33.]

EPITHEM, n. E^{2}p'i^2-the^{2}m. Gr., ἐπίθεμα (from ἐπιτιθέναι, to lay on). Lat., *epithema*. Fr., *épitheme*. Ger., *Umschlag*. A medicinal preparation for external application, exclusive, according to some authors, of plasters and ointments. [A, 325, 385 (*a*, 21); A, 387; L, 50, 105, 135 (*a*, 14).]—**Antipodagric e.** Fr., *épithème antigoutteux de Bories*. A mixture of 2 parts of opium, 8 of camphor, 15 of ammoniacum, 50 of soap, and 250 of *eau de lareine d'Hongrie*. [B, 92, 97 (*a*, 14).]—**Solid cordial e.** See EPITHEMA *cordiale solidum*.—**Vermifuge e.** [Dutch Ph., 1805]. Fr., *épithème vermifuge*. An e. made by mixing 1 part each of powdered Socotrine aloes and theriaca of Andromachus, and a sufficient quantity of tincture of wormwood, spreading upon a piece of leather, and sprinkling upon its surface a few drops of essential oil of wormwood. [B, 97, 119 (*a*, 21).]

EPITHEMA (Lat.), n. n. E^{2}p-i^{2}th'e^{2}m-a^3, -i^{2}th-e(a)'ma^3. Gen., *epithem'atos* (*-is*). Gr., ἐπίθεμα, ἐπίθημα (from ἐπιτιθέναι, to lay on). Fr., *épithème*. Ger., *Umschlag* (1st def.), *Schnabelaufsatz* (2d def.). 1. See EPITHEM. 2. In birds, a horn-like excrescence on the upper mandible. [L, 121.]—**E. cordiale solidum.** Syn.: *solid cordial epithem*. A plaster designed for application over the heart; made

by spreading upon sheepskin a mixture of conserves of *Dianthus caryophyllos* and roses, of each ½ oz.; confections of alkermes and hyacinths, of each 1½ dr.; and Venice treacle and the species diamargariti, of each 1 dr. [B, 89.]—**E. générale.** A preparation made by mixing 3 oz. each of the waters of the corn-poppy, lettuce, hyoscyamus, sage, verbena, and Damascene roses, and 1½ of troches of rhodium; designed to be applied warm to the head in cerebral disorders. [B, 89.]

ÉPITHÈME (Fr.), n. A-pe-te^{2}m. See EPITHEMA and EPITHEM.—**E. antigoutteux de Bories.** See *Antipodagric* EPITHEM.—**E. argileux.** Of P. Vigier, a triturated mixture of 1 part of water, 2 parts of glycerin, and 3 of finely powdered argillaceous earth; employed as a dressing for ulcers. [B, 92 (α, 14).]—**E. opiacé camphré de Mourre.** A preparation made by mixing 15 grammes each of camphor, hyoscyamus, and red poppies, and 0·60 gramme of opium, with a sufficiency of vinegar; used in hysteria, gastralgia, neuralgia, and hemiplegia. [B, 92 (α, 14).]—**E. rubéfiant de Lepage.** A preparation made by macerating for 12 hours 1 part of dried powder of horseradish in 2 parts of water, adding 3 of 90-per-cent. alcohol, agitating the mass for 5 or 6 hours, expressing, and filtering. [B, 92 (α, 14).]

EPITHESIS (Lat.), n. f. E^{2}p-i^{2}th'e^2-si^{2}s. Gen., *epithe'seos* (*-ith'esis*). Gr., ἐπίθεσις (from ἐπιτιθέναι, to place upon). An old term for an application (as of splints, etc.). [L, 84.]

EPITHYMBRUM (Lat.), n. n. E^{2}p-i^2-thi^{2}m(thu^{6}m)'bru^{3}m-(bru^{4}m). Gr., ἐπίθυμβρον (from ἐπί, upon, and θύμβρα, savory). The *Satureia montana.* [L, 94.]

EPITHYME (Fr.), n. A-pe-tem. The *Cuscuta epithymum.* [B, 88, 121, 173 (α, 24).]

EPITHYMIA (Lat.), n. f. E^{2}p-i^2-thim(thu^{6}m)'i^2-a^3. Gr., ἐπιθυμία. Fr., *épithymie.* Ger., *Begierde, heftiges Verlangen.* Of Hippocrates, a yearning, craving, or longing. [L, 50 (α, 14).]

EPITHYMIAMA (Lat.), n. n. E^{2}p-i^2-thi^{2}m(thu^{6}m)-i^2-a(a^3)'ma^3. Gen., *epithymiam'atos* (*-is*). Gr., ἐπιθυμίαμα (from ἐπιθυμιᾶν, to fumigate). 1. A fumigation. 2. Incense. [A, 387.]

EPITHYMION (Lat.), **EPITHYMON** (Lat.), **EPITHYMUM** (Lat.), n's n. E^{2}p-i^2-thim(thu^{6}m)'i^2-o^{2}n, -i^{2}th'i^{2}m(u^{6}m)-o^{2}n, -u^{3}m (u^{4}m). Gr., ἐπίθυμιον, ἐπίθυμον (from ἐπί, upon, and θύμος, thyme). See CUSCUTA *epithymum.*

EPITOCOS (Lat.), adj. E^{2}p-i^{2}t'o^{2}k-o^{2}s. Gr., ἐπίτοκος (from ἐπιτίκτειν, to bring forth). Of Hippocrates, pregnant. [A, 325 (α, 21); L, 94.]

EPITONOS (Lat.), **EPITONUS** (Lat.), adj's. E^{2}p-i^{2}t'o^{2}n-o^{2}s, -u^{3}s(u^{4}s). Gr., ἐπίτονος (from ἐπιτείνειν, to stretch). On the stretch, tightly drawn; as a n., anything stretched from one point to another; also spasm superadded to the symptoms of a disease. [L, 50 (α, 14).]

EPITRICHIAL, adj. E^{2}p-i^2-tri^{2}k'i^2-a^{2}l. Lat., *epitrichialis.* Pertaining to the epitrichium. [J.]—**E'schicht** (Ger.). Of Kerbert, see STRATUM *epitrichiale.*

EPITRICHIUM (Lat.), n. n. E^{2}p-i^2-tri^{2}k(tri^{2}ch^2)'i^2-u^{3}m(u^{4}m). From ἐπί, upon, and θρίξ, hair. See STRATUM *epitrichiale.*

EPITROCHANTERIAN, adj. E^{2}p-i^2-tro-ka^{2}n-te'ri^2-a^{2}n. From ἐπί, upon, and τροχαντήρ, a trochanter. Situated upon the trochanters. [L, 14.]

EPITROCHLEA (Lat.), n. f. E^{2}p-i^2-trok(tro^{2}ch^2)'le^2-a^3. From ἐπί, upon, and τροχαλία, a pulley. Fr., *épitrochlée.* Ger., *innerer Knorren des Oberarms.* It., *epitroclea.* Sp., *epitróclea.* Of Chaussier, the internal condyle of the humerus. [C.]

EPITROCHLEAR, adj. E^{2}p-i^2-tro^{2}k'le^2-a^{3}r. Fr., *épitrochléen, épitrochléal.* Attached to the epitrochlea (said of certain muscles of the forearm). [A, 518.]

EPITROCHLEO-ANCONÆUS (Lat.), n. m. E^{2}p-i^2-tro^{2}k-(tro^{2}ch^2)''le^2-o(o^3)-a^{2}n^2(a^{3}n^2)-ko^{2}n-e'(a^3'e^2)-u^{3}s(u^{4}s). From ἐπί, upon, τροχαλία, a case or sheath, and ἀγκών, the elbow. Of Gruber, an anomalous bundle of muscular fibres extending between the olecranon and the internal condyle of the humerus and arching over the ulnar nerve.

EPITROCHLEO-CUBITALIS (Lat.), n. m. E^{2}p-i^2-tro^{2}k-(tro^{2}ch^2)'le^2-o(o^3)-ku^2(ku^4)-bi^{2}t-a(a^3)'li^{2}s. See FLEXOR *carpi ulnaris.*

EPITROCHLEO-PALMARIS (Lat.), n. m. E^{2}p-i^2-trok-(tro^{2}ch^2)''le^2-o(o^3)-pa^{2}l(pa^{3}l)-ma(ma^3)'ri^{2}s. Fr., *épitrochleo-palmaire.* See PALMARIS *longus.*

EPITROCHLEO-PHALANGEUS (Lat.), n. m. E^{2}p-i^2-trok-(tro^{2}ch^2)-le^2-o(o^3)-fa^{2}l(fa^{3}l)-a^{2}n(a^{3}n^2)'je^2(ge^2)-u^{3}s(u^{4}s). From ἐπί, upon, τροχαλία, a case or sheath, and φάλαγξ, a phalanx. Fr., *fléchisseur superficiel* (ou *sublime*) *des phalanges.* The analogue of the flexor sublimis digitorum of man, found in the lower animals. [L.]

EPITROCHLEO-RADIALIS (Lat.), n. m. E^{2}p-i^2-tro^{2}k-(tro^{2}ch^2)''le^2-o(o^3)-rad(ra^{3}d)-i^2 a(a^3)'li^{2}s. From ἐπί, upon, τροχαλία, a case, and *radius* (*q. v.*). Fr., *épitrochleo-radial.* See PRONATOR *radii teres.*

EPITROCHLEO-SUPERCARPEUS (Lat.), n. E^{2}p-i^2-tro^{2}k-(tro^{2}ch^2)-le^2-o(o^3)-su^2(su^4)-pe^{2}r-ka^{3}rp'e^2-u^{3}s(u^{4}s). From ἐπί, upon, τροχιλέα, a case or sheath, *super*, above, and καρπός, the carpus. Fr., *fléchisseur oblique du métacarpe, cubital antérieure, epitrochleo-suscarpien.* The analogue of the flexor carpi ulnaris of man, found in the lower mammals. [L.]

ÉPITROCHLO-ANCONÉ (Fr.), n. A-pe-tro-klo-a^{3}n^2-ko-na. See EPITROCHLEO-ANCONÆUS, and, for other French words in *Epitrochlo-*, see the corresponding Latin words in *Epitrochleo-.*

EPITROPOUS, adj. E^{2}p-i^{2}t'ro^{2}p-u^{3}s. Lat., *epitropus* (from ἐπιτρέπειν, to turn to). Fr., *épitrope.* Of ovules, curved so that their rhaphe is external if they are ascending and internal if they are descending. [B, 121 (α, 24).] Cf. APOTROPAL.

EPITYMPANIC (Lat.), adj. E^{2}p-i^2-ti^{2}m-pa^{2}n'i^{2}k. Lat., *epitympanicus* (from ἐπί, upon, and τύμπανον, the tympanum). Fr., *épitympanique.* Situated upon or above the tympanum or the tympanic region. [L, 14.] Cf. *E.* BONE.

EPIURAUX (Fr.), n. pl. A-pe-u^6-ro. From ἐπί, upon, and οὐρα, a tail. Bones homologous to the hyuraux, found in the caudal extremity of some fishes. [α, 27.]

EPIUS (Lat.), adj. E(a)'pi^2-u^{3}s(u^{4}s). See EPIOS.

EPIVERTEBRAL [Grant], adj. E^{2}p-i^2-vu^{6}rt'e-bra^{2}l. From ἐπί, upon, and *vertebra* (*q. v.*). Fr., *épial.* Situated upon a vertebra; as a n., a spinous process of a vertebra. [L, 14.]

EPIVITELLIANS, n. pl. E^{2}p-i^2-vi^2-te^{2}l'i^2-a^{2}nz. Of Van Beneden, see ARTHROPODA.

EPIXYLONÆ (Lat.), n. m. pl. E^{2}p-i^{2}x-i^{2}l(u^{6}l)'o^{2}n-e(a^3-e^2). From ἐπί, upon, and ξύλον, wood. Fr., *épixylones.* Ger., *Schmarotzerpflanzen.* Plants which grow and vegetate upon the trunks of trees and upon other wood. [L, 180.]

EPIZOA (Lat.), n. n., pl. of *epizoon* (*q. v.*). E^{2}p-i^2-zo'a^3.

EPIZOAIRE (Fr.), n. A-pe-zo-a^{2}r. See EPIZOON.

EPIZOAN, n. E^{2}p-i^2-zo'a^{2}n. See EPIZOON.

EPIZOARIA (Lat.), n. n. E^{2}p-i^2-zo-a(a^3)'ri^2-a^3. Fr., *épizoaires.* Ger., *Schmarotzerthiere.* 1. Of Lamarck, external animal parasites. 2. Of De Blainville, a family corresponding to the *Heteropoda.* [L, 180.]

EPIZOARIS (Lat.), adj. E^{2}p-i^2-zo(zo^2)-a(a^3)'ri^{2}s. See EPIZOIC.

EPIZOIC (Lat.), adj. E^{2}p-i^2-zo'i^{2}k. Lat., *epizoaris, epizoicus.* Fr., *épizoïque.* Of or pertaining to the *Epizoa.* [B, 100.]

EPIZOICIDE, n. E^{2}p-i^2-zo'i^2-sid. From ἐπί, upon, ζῷον, an animal, and *cædere*, to kill. Fr., *épizoïcide.* A remedy that destroys epizoa. [A, 385 (α, 21).]

EPIZOON (Lat.), n. n. E^{2}p-i^2-zo'o^{2}n. From ἐπί, upon, and ζῷον, an animal. Ger., *Schmarotzerthier, E.* An external animal parasite. The *Epizoa* (Fr., *épizoaires*; Ger., *Epizoen*) comprise those animals that live as parasites on the integument of other animals, and, in a restricted sense, a division of *Crustacea* parasitic upon fishes. [A, 326 (α, 21); L, 14, 50.]

EPIZOONOSOLOGIA (Lat.), n. f. E^{2}p-i^2-zo-o(o^3)-no^{2}s-o(o^3)-lo'ji(gi^2)-a^3. From ἐπί, upon, ζῷον, an animal, νόσος, a disease, and λόγος, understanding. Fr., *épizoonosologie.* Ger., *Viehseuchenlehre.* The science of epizootic diseases. [L, 41, 50 (α, 14).]

EPIZOONOSI (Lat.), n. f. pl. E^{2}p-i^2-zo-o^{2}n'o^{2}s-i(e). From ἐπί, upon, ζῷον, an animal, and νόσος, a disease. Ger., *Epizoönosen.* Diseases of the skin due to epizoa. [A, 326 (α, 21).]

EPIZOOTIA (Lat.), n. f. E^{2}p-i^2-zo-o'shi^2(ti^2)-a^3. Fr., *épizoötie.* Ger., *Epizoötie.* An epizootic disease. [A, 322 (α, 21).]

EPIZOOTIC, adj. E^{2}p-i^2-zo-o^{2}t'i^{2}k. Lat., *epizooticus.* Fr., *épizoötique.* Ger., *epizootisch.* It., *epizootico.* Sp., *epizoótico.* Prevailing among the lower animals after the manner of an epidemic in man; as a n. (Lat., *epizootia*; Fr., *épizoötie*; Ger., *Epizoötie, Viehseuche*), a disease so prevailing.

EPIZOOTIOLOGIA (Lat.), **EPIZOOTOLOGIA** (Lat.), n's f. E^{2}p-i^2-zo-o^{2}t-i^2-o^{2}l-oj(o^{2}g)'i^2-a^3, -o^{2}t-o^{2}l-oj(o^{2}g)'i^2-a^3. From ἐπί, upon, ζῷον, an animal, and λόγος, understanding. See EPIZOONOSOLOGIA.

EPIZOOTY, n. E^{2}p-i^2-zo'o-ti^2. Fr., *épizoötie.* Ger., *Thierseuche.* It., Sp., *epizootia.* An epizootic disease, and, as commonly used, a contagious epidemic catarrhal affection of the air-passages of horses. [L.]—**Chancrous e.** See MAL *de coit.*

EPLICATE, adj. E'pli-kat. Not folded; a term for æstivation. [α, 24.]

EPOCH, n. E^{2}p'o^{2}k. Gr., ἐποχή. Lat., *epoche.* Fr., *époque.* Lit., a suspension, cessation: conventionally, a definite point of time at which a notable change in the existing state of things takes place.—**Menstrual e.** 1. A menstrual period. 2. See MENOPAUSE.

EPOCHETEUSIS (Lat.), n. f. E^{2}p-o^{2}k(o^{2}ch^2)-e^{2}t-u^2'si^{2}s. Gen., *epocheteus'eos* (*-is*). From ἐποχετεύειν, to turn aside. See DERIVATION.

EPODE (Lat.), n. f. E^{2}p-od'e(a). Gen., *epod'es.* Gr., ἐπῳδή. See INCANTATION.

EPODOS (Lat.), **EPODUS** (Lat.), n's m. E^{2}p-od'o^{2}s, -u^{3}s(u^{4}s). Gr., ἐπῳδός (from ἐπάδειν, to sing to). Acting by incantation; as a n., one who practices incantation. [A, 322 (α, 21).]

EPODYNOS (Lat.), adj. E^{2}p-o'di^{2}n(du^{6}n)-o^{2}s. Gr., ἐπώδυνος (from ἐπί, upon, and ὀδύνη, pain). Very painful; causing or suffering great pain. [A, 325 (α, 21).]

EPŒDEON (Lat.), adj. E^{2}p-ed'(o^2'e^{2}d)-e^2-on^2(on). Gr., ἐποιδέων (from ἐποιδαίνειν, to swell up). Swelling, swollen. [A, 325 (α, 21).]

ÉPOINTURE (Fr.), n. A-pwa^{3}n^2-tu^{6}r. In domestic animals, a traumatic injury which renders one haunch lower than the other. [L, 42.]

EPOLLICATUS (Lat.), adj. E(a)-po^{2}l-li^2-ka(ka^3)'tu^{3}s(tu^{4}s). From *ex*, without, and *pollex*, the thumb. Fr., *épouce.* Ger., *ungedaumt.* Having no thumb (said of a bird's foot). [L, 180.]

EPOMIS (Lat.), n. f. E^{2}p-om'i^{2}s. Gen., *epom'idos* (*-is*). Gr., ἐπωμίς (from ἐπί, upon, and ὦμος, the shoulder). Fr., *épomide.* Ger., *Achsel.* Of Hippocrates, the shoulder). [A, 325.]

EPOMOPHORUS (Lat.), adj. E^{2}p-om-o^{2}f'o^{2}r-u^{3}s(u^{4}s). From ἐπί, upon, ὦμος, the shoulder, and φορεῖν, to bear. Fr., *épomophore.* Having a spot upon the shoulder shaped like an epaulet; as a n., the *Diomedea epomophora.* [L, 180.]

EPOMPHALICUM (Lat.), n. n. E^{2}p-o^{2}m-fa^{2}l(fa^{3}l)'i^{2}k-u^{3}m-(u^{4}m). Gr., ἐπομφαλικόν (from ἐπί, upon, and ὀμφαλός, the navel). Fr., *épomphale*. Ger., *Nabelmittel, Nabelpflaster*. A plaster or the like to be applied to the navel. [L, 41, 50, 135 (a, 14).]

EPOMPHALION (Lat.), **EPOMPHALIUM** (Lat.), **EPOMPHALUM** (Lat.), n's n. E^{2}p-o^{2}m-fa^{2}l(fa^{3}l)'i^2-o^{2}n, -u^{3}m(u^{4}m), -o^{2}m'fa^{2}l(fa^{3}l)-u^{3}m(u^{4}m). Gr., ἐπομφάλιον (from ἐπί, upon, and ὀμφαλός, the navel). 1. The region above the umbilicus. [L, 50 (a, 14).] 2. See EPOMPHALICUM.

EPONCODES (Lat.), adj. E^{2}p-o^{2}n-kod'ez(as). From ἐπί, upon, and ὀγκώδης, swelling. Pertaining to or proceeding from a superficial tumor. [A, 322 (a, 21).]

ÉPONGE (Fr.), n. A-po^{3}n^{2}zh. 1. See SPONGE. 2. See BEDEGAR. 3. Of the veterinarians, a soft, indolent tumor produced by pressure upon the instep of the horse. [L, 41, 87, 88, 105 (a, 14).]—**Charbon d'é.** See SPONGIA *usta*.—**Decoction d'é. brulée** [Dutch Ph., Niemann's Notes, 1811]. A preparation made by boiling 1 part of burnt sponge with 24 parts of water till the whole is reduced to one half. [B, 119 (a, 14).]—**E's achillées.** Fine, compact sponges, formerly worn beneath the helmet and armor to diminish the effect of blows. [L, 41 (a, 14).]—**E. à la cire, E. à la ficelle.** See *Compressed* SPONGE.—**E. brûlée.** See SPONGIA *usta*.—**E. brune Marseille.** See *E. commune*.—**E. calcinée.** See SPONGIA *usta*.—**E. commune.** The *Spongia usitatissima*. [A, 385 (a, 21).]—**E. d'églantier.** See *Fungus* CYNOSBATI (under CYNOSBATOS).—**E. de mer.** See SPONGIA *officinalis* and SPONGIA *usitatissima*.—**E. de platine.** See *Spongy* PLATINUM.—**E. douce de Syrie.** See *E. commune*.—**E. fine** [Fr. Cod.]. See SPONGIA *officinalis* and SPONGIA *usitatissima*.—**E. géline.** A rare species of sponge, coming from the coast of Morocco, of fine, porous texture, soapy to the touch, and generally cylindrical in form. [L, 41 (a, 14).]—**E. peluchée.** See SPONGIA *lacinulosa*.—**E. préparée.** See SPONGIA *præparata*.—**E. préparée à le cire** [Fr. Cod., 1868], **E. préparée à la ficelle.** See *Compressed* SPONGE.—**E. torréfiée** [Fr. Cod.]. See SPONGIA *usta*.—**E. usuelle, E. vulgaire.** See SPONGIA *usitatissima*.—**Poudre d'é. torréfiée** [Fr. Cod.]. See *Pulvis* SPONGIÆ *ustæ*.

EPONYCHIUM (Lat.), n. n. E^{2}p-o^{2}n-i^{2}k(u^{6}ch^2)'i^2-u^{3}m(u^{4}m). From ἐπί, upon, and ὄνυξ, a nail. The remains of the corneous layer of the skin found in early fœtal life at the situations where the nails are to form and beneath which the true nails are developed. [G.]

EPOOPHORON (Lat.), n. n. Ep-o-o^{2}f'o^{2}r-o^{2}n. From ἐπί, upon, ᾠόν, an egg, and φορεῖν, to bear. Fr., *époöphore*. Ger., *Nebeneierstock*. Syn.: *parovarium*. Of Waldeyer, a body formed of the tubes of the upper part of the mesonephros in the female embryo. It is known also as the organ of Rosenmüller, and is the analogue of the epididymis of the male. [A. Thomson (A, 5).]

EPOPTIC, adj. E^{2}p-o^{2}p'ti^{2}k. Lat., *epopticus* (from ἐπί, upon, and ὄψεσθαι, to see). Fr., *époptique*. See FLUORESCENT.

ÉPOQUE (Fr.), n. A-pok. See EPOCH.

EPOSILINGA, n. Of the alchemists, see *Squama* FERRI.

EPOSTOMA (Lat.), **EPOSTOSIS** (Lat.), n's n. and f. E^{2}p-o^{2}st-o'ma^3, -si^{2}s. Gen., *epostom'atos* (*-is*), *-os'eos* (*-is*). From ἐπί, upon, and ὀστέον, a bone. Fr., *épostome*. See EXOSTOSIS.

EPOTICUM (Lat.), n. n. E^{2}p-o^{2}t(ot)'i^{2}k-u^{3}m(u^{4}m). From ἐπί, upon, and οὖς, the ear. Of Huxley, a portion of the embryonic pars petrosa of the temporal bone. [H.]

ÉPOUCÉ (Fr.), adj. A-pu-sa. See EPOLLICATUS.

EPPENHAUSEN (Ger.), n. E^{2}p'pe^{2}n-ha^{3}u^{4}z-e^{2}n. A place in Westphalia, where there is a gaseous spring containing calcium sulphate. [L, 49, 105.]

EPPICH (Ger.), n. E^{2}p'pi^{2}ch^2. The APIUM *graveolens*, HEDERA *helix*, and RANUNCULUS *ficaria*. [B, 38, 48, 88, 180 (a, 14).]—**E'blätter.** The leaves of *Hedera helix*. [B, 180 (a, 24).]—**Kleiner E.** The *Helosciadium nodiflorum*. [B, 180 (a, 24).]—**Wilder E'.** See DAUCUS *macedonius*.

ÉPRAULT (Fr.), n. A-pro. The *Apium graveolens*. [B, 88, 121, 173 (a, 24).]

ÉPREINTES (Fr.), n. pl. A-pra^{2}n^{2}t. The pains of rectal tenesmus, also those of labor. [A, 385.]

ÉPREUVE (Fr.), n. A-pru^{5}v. See TEST.

EPROBOSCIDEA (Lat.), n. n. pl. E(a)-pro(pro^2)-bo^{2}s-si^{2}d-(ki^{2}d)'e^2-a^3. From *e* priv., and προβοσκίς, a proboscis. A subsection of the *Cyclorrhapha* characterized by having no proboscis. [L, 121.]

ÉPROUVETTE (Fr.), n. A-pru-ve^{2}t. 1. A sound. 2. A graduated glass tube closed at one end, for measuring gases and liquids. [L, 41.]

EPS, n. E^{2}ps. The *Populus tremula*. [A, 505 (a, 21).]

EPSEMA (Lat.), n. n. E^{2}p-se(sa)'ma^3. Gen., *epsem'atos* (*-is*). See HEPSEMA.

EPSESIS (Lat.), n. f. E^{2}p-se(sa)'si^{2}s. Gen., *epses'eos* (*-is*). See HEPSESIS.

EPSILOMENOS (Lat.), adj. E^{2}p-si^{2}l-o^{2}m(om)'e^{2}n-o^{2}s. Gr., ἐψιλώμενος (from ψιλοῦν, to strip bare). Denuded. [A, 325 (a, 21).]

EPSILON-BACILLUS (Lat.), n. m. E^{2}p-si(se)'lo^{2}n-ba^{2}s(ba^{3}k)-i^{2}l''lu^{3}s(lu^{4}s). See under BACILLUS.

EPSOM, n. E^{2}p'so^{2}m. A place in Surrey County, England, where there is a spring containing magnesium sulphate. [L, 41, 87, 105 (a, 14).] See *E.* SALTS.

EPSOMITE, n. E^{2}p'su^{3}m-it. 1. Native magnesium. 2. See *Epsom* SALTS. [A, 301 (a, 21); a, 14.]

EPTINGEN (Ger.), n. E^{2}p'ti^{2}n^2-e^{2}n. A place in the canton of Basel-Land, Switzerland, where there is a cold spring containing alum and calcium and magnesium sulphates. [L, 30, 41, 49, 135 (a, 14).]

ÉPUISEMENT (Fr.), n. A-pwez-ma^{3}n^2. Faintness or exhaustion; in popular language, especially sexual exhaustion in the male. [A, 301.]—**E. nerveux.** See NEURASTHENIA.

EPULIS (Lat.), n. f. E^{2}p-u^2(u)'li^{2}s. Gen., *epul'idos* (*-is*). Gr., ἐπουλίς (from ἐπί, upon, and οὖλον, the gum). Fr., *épulide, épulie, épulis*. Ger., *E., Zahnfleischschwamm*. An old term for many different tumors of the gum or of the alveolar process of the maxilla. [A, 518; E.]

EPULOSIS (Lat.), n. f. E^{2}p-u^2(u)-los'i^{2}s. Gen., *epul'oseos* (*-is*). Gr., ἐπούλωσις (from ἐπουλοῦν, to cicatrize). See CICATRIZATION.

EPULOTIC, adj. E^{2}p-u^{2}l-o^{2}t'i^{2}k. Gr., ἐπουλωτικός. Lat., *epuloticus*. Fr., *épulotique, cicatrisant*. Ger., *vernarbend*. Promoting cicatrization (said of topical remedies). [L, 94, 105 (a, 21).]

EPURATION, n. A-pu^6-ra^3-si^2-o^{3}n^2. E^{2}p-u^2-ra'shu^{3}n. Fr., *épuration*. See DEPURATION.

ÉPURE (Fr.), **ÉPURGE** [Fr. Cod.] (Fr.), n's. A-pu^{6}r, -pu^{6}rzh. The *Euphorbia lathyris*. [A, 301 (a, 21).]—**Huile d'é.** [Fr. Cod.]. A highly purgative fixed oil obtained by expression from the seeds of *Euphorbia lathyris*; used as a substitute for croton-oil. [A, 301; B.]

ÉPYRÈLE (Fr.), n. A-pe-re^{2}l. See *Empyreumatic* OIL.—**E. animale.** See *Dippel's animal* OIL.

EQUAL, adj. E'kwa^{2}l. Gr., ἴσος, ὅμοιος. Lat., *æqualis, æquus*. Fr., *égal*. Ger., *gleich, gleichförmig*. In botany, having the same proportions, regular. [L, 107.]

ÉQUARRISSAGE (Fr.), n. A-ka^{3}r-res-sa^{3}zh. Ger., *Abhäuten*. The process of skinning a dead animal. [A, 518.]

ÉQUATEUR (Fr.), n. A-ka^3-tu^{5}r. An equator. [A, 301.]—**E. de l'œil.** See ÆQUATOR OCULI.

EQUATION, n. E-kwa'zhu^{3}n. Lat., *æquatio*. Fr., *équation*. Ger., *Gleichung*. In chemistry, the notation of a process of decomposition and recomposition in the form of an algebraic formula in which the numbers of atoms of each element are the same on each side of the sign of equality. [A, 518.]

EQUATOR, n. E-kwa'to^{2}r. Lat., *æquator*. Fr., *équateur*. Ger., *Aequator, Gleicher*. A line dividing the surface of a sphere into two equal portions.—**E. of the chorion.** An e. parallel to the blastoderm. [H.]—**E. of the eye.** See ÆQUATOR OCULI.—**Magnetic e.** Fr., *equateur magnetique*. A line resulting from the revolution of the paths of the electric currents encircling the earth from east to west and everywhere perpendicular to the magnetic meridian. [B, 21 (a, 27).]

EQUATORIAL, adj. E-kwa^3-to'ri^2-a^{2}l. Fr., *équatoriel*. Ger., *äquatorial*. Pertaining to, coincident with, or parallel with an equator.

EQUEREPANAR, n. According to Loefling, the name given by the natives on the upper Orinoco to the *Cissampelos pareira*. [B, 46, 88 (a, 14).]

EQUIANGULAR, adj. E-kwi^2-a^{2}n^2'gu^{2}l-a^{3}r. From *æquus*, equal, and *angulus*, an angle. Fr., *équiangle*. Ger., *gleichwinkelig*. Having all the angles equal.

EQUIBIRADIATE, adj. E-kwi^2-bi-rad'i^2-at. From *æquus*, equal, *bis*, twice, and *radius*, a ray. Having two equal rays. [L, 121.]

EQUIDÆ (Lat.), n. m. pl. E^{2}k'wi^{2}d-e(a^3-e^2). From *equus*, the horse. Fr., *équides*. A family of the *Ungulata* (of Gray, a family of the *Mammifera*), having the horse as the type. [L, 180, 270.]

EQUIDIFFERENT, adj. E-qui^2-di^{2}f'e^{2}r-e^{2}nt. Having a common difference. [a, 29.]

EQUIDILATE, adj. E-kwi^2-dl'lat. Fr., *équidilaté*. See EQUILATE.

EQUIFORMAL, adj. E-kwi^2-fo^{2}rm'a^{2}l. From *æquus*, equal, and *forma*, form. Of the same shape. [L, 121.]

ÉQUILARGE (Fr.), adj. A-ke-la^{3}rzh. See EQUILATE.

EQUILATE, adj. E'kwi^2-lat. Lat., *æquilatus* (from *æquus*, equal, and *latus*, broad). Fr., *équilarge, équilaté*. Ger., *gleichbreitig*. Of the same size throughout (said of the corolla tube). [B, 1, 123 (a, 24).]

EQUILIBRATION, n. E-kwi^2-li^2-bra'shu^{3}n. From *æquus*, equal, and *librare*, to balance. Fr., *équilibration*. Ger., *Gleichgewichtsetzen*. The act of maintaining an even balance of the body in standing or walking; supposed to be governed by impressions from the labyrinth, and more especially from the semicircular canals. [F.]

ÉQUILIBRE (Fr.), adj. A-ke-lebr'. See EQUILIBRIUM.

EQUILIBRIUM, n. n. E(a)-kwi^2-li(le)'bri^2-u^{3}m(u^{4}m), e-kwi^2-li^{2}b'ri^2-u^{3}m(u^{4}m). Lat., *æquilibrium* (from *æquus*, equal, and *librare*, to balance). Fr., *équilibre*. Ger., *Gleichgewicht*. It., Sp., *equilibrio*. Equipoise: the condition in which contending forces are equal.—**Indifferent e.** Ger., *gleichgültiges* (oder *indifferentes*) *Gleichgewicht*. An e. which persists independently of the positions taken by the body. [a, 24.]—**Mobile e.** Fr., *équilibre mobile*. The constant temperature maintained by neighboring bodies after a mutual exchange of heat in proportions varying with their capacities, which constancy is due to the fact that, heat e once attained, the subsequent emission is equal to the quantity of heat received. [B, 21 (a, 27).]—**Neutral e.** See *Indifferent e.*—**Nitrogenous e.** A condition of the system in which the amount of nitrogen in the egesta exactly equals that in the ingesta. [A, 333 (K).]—**Physiological e.** The condition of the system in which the ingesta exactly equal the egesta. [B.]—**Stable e.** Ger., *beständiges Gleichge-*

wicht. That state of a body which determines it to return to a given position from which it has been made to deviate. [*a*, 27.]—**Unstable e.** Ger., *unbeständiges Gleichgewicht.* That state of a body which determines an increased deviation from its state of equilibrium after it has been disturbed. [*a*, 27.]

EQUILOBED, adj. E'kwi^2-lobd. From *æquus*, equal, and *lobus*, a lobe. Consisting of two equal lobes; of fishes' tails, homocercal. [L, 147.]

ÉQUIN (Fr.), adj. A-ka^{2}n^2. See EQUINE; as a n., see PES *equinus.*

EQUINA (Lat.), n. f. sing. and n. pl. Ek-wi(we)'na^3. See EQUINIA and EQUIDÆ.

EQUINATED, adj. E^{2}k'wi^{2}n-at-e^{2}d. Inoculated with equinia. [L, 325.]

EQUINATION, n. E^{2}k-wi^{2}n-a'shu^{3}n. Inoculation with equinia.

EQUINE, adj. E^{2}k'wi^{2}n. Lat., *equinus* (from *equus*, the horse). Fr., *équin.* Ger., *pferdeartig.* Resembling or pertaining to the horse.

ÉQUINE (Fr.), n. A-ken. See EQUINIA.

EQUINIA (Lat.), n. f. E^{2}k-wi^{2}n(wen)'i^2-a^3. From *equus*, the horse. See FARCY, GREASE, GLANDERS, and HORSE-POX.—**E. glandulosa.** See GLANDERS.—**E. mitis.** See HORSE-POX.

EQUINIC ACID, n. E-kwi^{2}n'ik. From *equus*, the horse. Ger., *Equinsäure.* A nitrogenous acid which, according to Duval, is found united to a nitrogenous base in mares' milk. [B, 270 (*a*, 27).]

EQUINO-CAVUS (Lat.), n. m. E^2-kwi^{2}n(kwen)-o(o^3)-ka(ka^3)'-vu^{3}s(wu^{4}s). From *equinus* (*q. v.*), and *cavus*, hollow. That degree of dorsal pes equinus in which the sole of the foot becomes excessively hollowed and creased. [A, 77.]

EQUININE, n. E'kwi^{2}n-en. Of Farr, the zymotic principle of glanders. [*a*, 18.]

ÉQUINISME (Fr.), n. A-ke-nez'm. The state of being affected with pes equinus. [L, 41 (*a*, 14).]

ÉQUINISTE (Fr.), n. A-ke-nest. A believer in the theory that tetanus is contracted from the horse. [Verneuil, "Sem. méd.," Mar. 27, 1889, p. 98 (*a*, 18).]

EQUINOCTIAL, adj. E-kwi^2-no^{2}k'sha^{2}l. Lat., *æquinoctialis* (from *æquus*, equal, and *nox*, night. Fr., *équinoxial.* Ger., *äquinoctial.* It., *equinoziale.* Sp., *equinoccial.* In botany, see *E.* FLOWERS.

EQUINO-VARUS (Lat.), n. m. E^2-kwin(kwen)''o(o^3)-va(va^3)'-ru^{3}s(ru^{4}s). Fr., *pied-bot varus équin, pied varus equin, pied équin varus.* A form of club-foot consisting of a combination of pes equinus and pes varus.

EQUINUS (Lat.), adj. E^2-kwin(kwen)'u^{3}s(u^{4}s). See EQUINE; as a n., see PES *e.*—**Dorsal e.** That variety of pes e. in which the toes are flexed, so that the patient walks on their dorsal surface. [A, 77.]—**Plantar e.** That variety of pes e. in which the toes are extended throughout or only at the metatarso-phalangeal joint. [A, 77.]

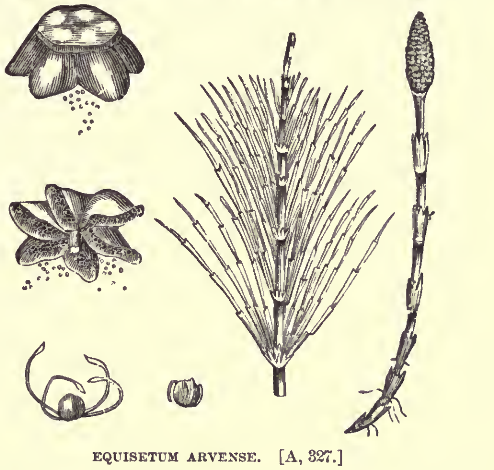
EQUIPEDAL, adj. E^{2}k-wi^{2}p'e^{2}d-a^{2}l. Fr., *équipède.* Ger., *gleichfüssig.* Equal-footed; having equal pairs of feet. [L, 14.]

EQUIPETALOUS, adj. E-kwi^2-pe^{2}t'a^{2}l-u^{3}s. From *æquus*, equal, and πέταλον, a petal. Fr., *équipétalé.* Ger., *gleichblättrig.* Having petals of nearly equal length. [L, 41.]

EQUIPOLLENCY, n. E-kwi^2-po^{2}l'e^{2}n-si^2. The state of being equipollent. [L, 14.]

EQUIPOLLENT, adj. E-kwi^2-po^{2}l'e^{2}nt. From *æquus*, equal, and *pollere*, to be powerful. Of equal power (said of opposing muscles). [L, 121.]

EQUIPOTENTIAL, adj. E-kwi^2-po-te^{2}n'sha^{2}l. From *æquus*, equal, and *potentia*, power. Having equal power (applied to electrified bodies having equal dynamic units). [L, 87 (*a*, 27).]

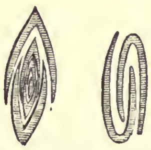


EQUISETACEOUS, adj. E-kwi^2-se-ta'shu^{3}s. Fr., *équisétacé.* Resembling the genus *Equisetum;* belonging to the *Equisetaceæ* (see under EQUISETUM). [*a*, 24.]

EQUISETATE, n. E^{2}k-wi^{2}s'e^{2}t-at. Lat., *equisetas.* Fr., *équisétate.* A salt of equisetic acid. [L, 41, 180 (*a*, 14).]

EQUISETIC ACID, n. E-kwi^2-set'i^{2}k. Lat., *acidum equiseticum.* Fr., *acide équisétique.* Ger., *Equisetsäure.* An acid derived from various species of *Equisetum*, now known to be aconitic acid. [B, 3.]

EQUISETIFORM, adj. E-kwi^2-se^{2}t'i^2-fo^{2}rm. From *equisetum* (*q. v.*), and *forma*, form. Resembling the genus *Equisetum.* [L.]



EQUISETUM (Lat.), n. n. E^{2}k-wi^2-set(sat)'u^{3}m(u^{4}m). From *equus*, the horse, and *seta*, coarse hair. Fr., *prêle.* Ger., *Schachtelhalen, Kannenkraut.* The horse-tail or scouring rush; the only genus of the *Equisetaceæ* (Fr., *équisétacées;* Ger., *Schafthalme, Schachtelhalme*), *Equiseta, Equiseteæ, Equisetineæ*, or *Equisetinæ*, which are divisions of cryptogamous plants formerly regarded as orders of the *Filicinæ*, but now raised to the position of a distinct class belonging to the grand division *Pteridophyta.* [B, 19, 121, 170, 180 (*a*, 24); B, 75, 245.]—**E. arvense.** Fr., *petil prêle, verrine, queue de rat* (ou *de renard*), *jaunetrole.* Ger., *Ackerkandelwisch, Ackerschachtelhalm, Kannenkraut, Zinnheu, Duwock, Pferdeschwanz, Katzenwedel.* The field-horse tail or bottle-brush; a species growing in meadows and low sandy places in Europe, North America, and northern Asia and Africa. The stalks (*herba equiseti* [*minoris*, seu *arvensis*], seu *caudæ equinæ minoris*) are mildly astringent and diuretic. [B, 34, 173, 180, 275 (*a*, 24).]—**E. eburneum, E. fluviatile.** Fr., *prêle des rivières.* Ger., *Flussschachtelhalm.* A species similar in appearance and properties to *E. arvense*, and used in England and Holland as *herba equiseti majoris.* It is said to increase the milk of the cow. It is probably the ἵππουρις of Dioscorides. [B, 173, 180 (*a*, 24).]—**E. giganteum.** Fr., *prêle géante.* Ger., *Riesenschachtelhalm.* A species found in the West Indies, where the roots and stalk are used as an astringent. [B,

EQUISETUM ARVENSE. [A, 327.]

173, 180 (*a*, 24).]—**E. hiemale.** Fr., *prêle d'hiver.* Ger., *Tischlerschachtelhalm, Winterschafthalm, Polirheu, Polirstroh.* The scouring rush; a species found in wet places throughout Europe, northern Asia and Africa, and North America. The stems, containing much silica, are used in scouring and polishing, and the stalks and branches (*herba equiseti majoris* [seu *mechanici*]) were formerly employed in Europe, and are again coming into use, usually in the form of infusion, in dropsy and diseases of the urinary passages. [B, 5, 173, 180 (*a*, 24).]—**E. limosum.** Fr., *prêle des bourbiers.* Ger., *Schlammschachtelhalm.* The smooth horse-tail; a species having diuretic properties, and used especially in cystitis; supposed to be the ἵππουρις ἑτέρα of Dioscorides. [B, 180, 275 (*a*, 24).]—**E. majus, E. mechanicum.** See *E. fluviatile.*—**E. minus.** See *E. arvense.*—**E. palustre.** Fr., *prêle des marais, grande prêle, herbe à écurer, queue de cheval.* Ger., *Sumpfschachtelhalm.* Cat-whistle; a species regarded by Haller as a most efficacious diuretic. [B, 180 (*a*, 24); "Proc. of the Am. Pharm. Assoc.," xxv (*a*, 14).]—**E. ramosum.** A variety of the *E. hiemale.* [B, 180 (*a*, 24).]—**E. telmateia.** See *E. fluviatile.*—**Herba equiseti.** The herb of *E. arvense.* [B, 180 (*a*, 24).]

EQUITANT, adj. E^2'kwi^2-ta^{2}nt. Lat., *equitans* (from *equitare*, to ride on horseback). Fr., *équitant, équitatif, à cheval.* Ger., *reitend.* Lit., riding; of leaves (like those of the *Iris*), vertical and folded lengthwise, so that each leaf toward the base overlaps the next. [B, 19, 291 (*a*, 24).]

EQUITANT LEAVES. (AFTER YOUMANS.)

EQUITATION, n. E^{2}k-wi^{2}t-a'shu^{3}n. Gr., ἱππεία. Lat., *equitatio.* Fr., *équitation.* Exercise by riding on horseback. [A, 301, 325 (*a*, 21).]

EQUITATIVUS (Lat.), adj. E^{2}k-wi^2-ta(ta^3)-ti(te)'vu^{3}s(wu^{4}s). See EQUITANT.

EQUIVALENCE, EQUIVALENCY, n's. E-kwi^{2}v'a^{2}l-e^{2}ns, -e^{2}ns-i^2. Lat., *æquivalentia.* Fr., *équivalence.* Ger., *Gleichwerthigkeit, Aequivalenz.* 1. The state of being equivalent; in chemistry, the combining weight of an element as compared with hydrogen. [B.] 2. In France, the assimilation of a foreign title or diploma to its French analogue. [A, 518.]

EQUIVALENT, adj. E-kwi^{2}v'a^{2}l-e^{2}nt. Lat., *æquivalens* (from *æquivalere*, to be worth the same). Fr., *équivalent.* Ger., *äquivalent, gleichwerthig.* It., Sp., *equivalente.* Of equal value; as a n., an e. number, a term formerly used for the amount by weight of an element which was capable of combining with 1 part by weight of hydrogen. Thus, the e. of oxygen was 8, because 8 parts of this element unite with 1 part of hydrogen to form water. The term, however, is now applied to the amount by weight of any element which can replace 1 part by weight of hydrogen in a compound. It is equal to the atomic weight of the element divided by the number representing its quantivalence. [B.]—**Endosmotic e.** The ratio obtained by dividing the quantity of the replacing liquid in osmotic action by the quantity replaced. [Cooke (*a*, 27).]—**Epileptic psychical e.** Of Spitzka, the mental disturbances which may take the place of an attack of epilepsy. [D, 36.]—**Osmotic e.** Fr., *équivalent osmotique.* The ratio between the diffusive powers of liquids or gases. [L, 158.]

EQUIVALVE, EQUIVALVED, adj's. E'kwi^2-va^{2}lv, -va^{2}lvd. Lat., *æquivalvis* (from *æquus*, equal, and *valva*, a valve). Fr., *équivalve.* Ger., *gleichschalig.* Having valves of equal size (said of bivalve shells). [B, 100.]

EQUIVOCAL, adj. E-kwi^{2}v'o-ka^{2}l. Lat., *æquivocus* (from *æquus*, alike, and *vox*, a voice). Fr., *équivoque.* Ger., *zweideutig, doppelsinnig.* In general, of uncertain character or significance; of generation, spontaneous.

EQUIVOROUS (Lat.), adj. E-kwi^{2}v'o-ru^{3}s. From *equus*, the horse, and *vorare*, to devour. See HIPPOPHAGOUS.

EQUUS (Lat.), n. m. Ek(e^{2}k)′wu^{3}s(wu^{4}s). Gr., ἵππος (1st def.). Fr., *cheval* (1st def.). Ger., *Pferd* (1st def.), *Blinzeln* (2d def.). 1. The horse; also a genus of the *Equidæ* typified by the horse. 2. Blinking. [A, 322, 325 (*a*, 21).—**Equi venter.** Horse-dung; formerly used externally as a styptic and internally in colic, in pleurisy, and as an ecbolic. [B, 87, 200 (*a*, 14).]—**E. asinus.** The ass. Various parts of its body were used in ancient medicine (*e. g.*, the fat, liver, and burnt hoofs [*ungulæ asinorum ustæ*]). Its milk is sometimes prescribed for weakly persons. [B, 180 (*a*, 14).]—**E. caballus.** The horse. Various parts of its body were employed in ancient medicine (*e. g.*, the blood of the male, the testes, and the lichenes, or callous excrescences on the legs). The milk of the mare is sometimes used in wasting diseases of children. [B, 180 (*a*, 14).]—**E. hemionus, E. onager.** Species found in Tartary; said to furnish the Chinese hockiak. [B, 180 (*a*, 14).]

ERA (Port.), n. A′ra^3. The *Hedera helix*. [B, 92 (*a*, 14).]

ÉRABLE (Fr.), n. A-ra^{3}b′l. See Acer.—**E. à feuilles de persil.** A variety of *Acer platanoides*. [B, 38 (*a*, 14).]—**E. à sucre.** See Acer *saccharinum*.—**E. blanc.** The *Acer eriocarpum* and the *Acer pseudo-platanus*. [A, 385 (*a*, 21); B, 46 (*a*, 14).]—**E. champêtre, E. commun.** The *Acer campestre*. [B, 173 (*a*, 24).]—**E. de Norvège.** The *Acer platanoides*. [B, 19 (*a*, 24).]—**E. de Virginie.** See Acer *rubrum*.—**E.-duret.** The *Acer hispanicum*.—**E. jaspé.** See Acer *pennsylvanicum*.—**E. négundo.** The *Negundo aceroides*. [B.]—**E. faux-platane.** The *Acer pseudo-platanus*. [A, 301.]—**E. plane, E. platane.** The *Acer platanoides*. [B, 38 (*a*, 14).]—**E. rouge.** See Acer *rubrum*.—**E. sycomore.** The *Acer pseudo-platanus*. [L, 41.]—**Grand é.** The *Acer pseudo-platanus*. [B, 173.]—**Petit é.** The *Acer campestre*. [B, 173.]

ERADIANS (Lat.), adj. E(a)-rad(ra^{3}d)′i^2-a^{2}nz(a^{3}ns). See Actinoid.

ERADICANS (Lat.), adj. E(a)-ra^{2}d(ra^{3}d)′i^2-ka^{2}nz(ka^{3}ns). See Eradicative.

ERADICATE, v. tr. E-ra^{2}d′i^2-kat. Lat., *eradicare* (from *e*, out by, and *radix*, the root). Fr., *arracher*. Ger., *ausrotten*, *eradiziren*. Lit., to pluck up by the roots; to remove entirely.

ERADICATION, n. E-ra^{2}d-i^2-ka′shu^{3}n. Lat., *eradicatio*. Fr., *éradication*, *arrachement*. Ger., *Ausrottung*, *Eradicirung*. Complete removal.

ERADICATIVE, adj. E-ra^{2}d′i^2-ka-ti^{2}v. Lat., *eradicans*, *eradicativus*. Fr., *éradicatif*. Ger., *ausrottend*, *eradicirend*. Pertaining to or accomplishing eradication (said anciently of powerful cathartics). [L, 94, 119 (*a*, 14).]

ERAGROSTIS (Lat.), n. f. E^{2}r(ar)-a^{2}g(a^{3}g)-ro^{2}st(rost)′i^{2}s. Gen., *eragrost′idos* (*-is*), *-grost′eos* (*-is*). From ἦρ, the spring, and ἄγρωστις (the name of several different grasses). Fr., *éragrostide*. Of Beauvois, a genus of grasses of the *Eragrosteæ* (a subtribe of the *Festuceæ*). The *Eragrostideæ* are a subtribe of the *Bromeæ*. [B, 42, 121, 170 (*a*, 24).]—**E. abyssinica.** A cultivated Abyssinian species, furnishing a large part of the food of the Abyssinians. [B, 245.]—**E. bipinnata, E. cynosurioides.** See Poa *cynosuroides*.—**E. major, E. megastachya.** The *Poa megastachya*. [B, 121 (*a*, 24).]—**E. Purshii.** A plant abundant in southern Utah, where the seed is used as food by the Indians. ["Proc. of the Am. Pharm. Assoc.," xxvii (*a*, 14).]

ÉRAILLEMENT (Fr.), n. A-ra^3-el-y′ma^{3}n^2. An excoriation to the edges of which the epidermis remains adherent at the border; an elongated excoration with irregular borders. [E, 24.]—**E. de la paupière.** Ectropion of the eyelid. [A, 301.]

ÉRAILLURE (Fr.), n. A-ra^3-el-yu^{6}r. See Éraillement.

ERAKÁ (Sanscr.), n. The *Typha elephantina*. [A, 479 (*a*, 21).]

ERANDI (Mah.), n. The *Ricinus communis*. [A, 479 (*a*, 21).]

ERANTHEMUM (Lat.), n. n. E^{2}r(ar)-a^{2}n(a^{3}n)′the^{2}m-u^{3}m(u^{4}m). Gr., ἠράνθεμον (from ἦρ, spring-time, and ἄνθεμον, a flower). Fr., *éranthème*. Ger., *Frühblume*. 1. An old name for some plant of the genus *Anthemis*. [A, 387.] 2. Of R. Brown, a genus of the *Eranthemeæ* (a subtribe of the *Justicieæ*). [B, 38, 42, 48, 88, 170 (*a*, 24).]

ERANTHIS (Lat.), n. f. E^{2}r(ar)-a^{2}n(a^{3}n)′thi^{2}s. Gen., *eran′thidos* (*-is*). Fr., *éranthe*. Ger., *Winterling*. Of Salisbury, a genus of ranunculaceous plants, referred by Bentham and Hooker to the *Helleboreæ*; of Baillon, a section of the genus *Helleborus*. [B, 42, 121, 180 (*a*, 24).]—**E. hiemalis.** Fr., *ellébore d'hiver*. Ger., *sternblüthiger Winterling*, *Winterwolfskraut*, *Winterchristwurz*. Winter aconite; a species found in central and southern Europe. The root, *radix hellebori hiemalis* (seu *aconite hiemalis*), has properties similar to those of *Helleborus niger*. [B, 19, 180 (*a*, 24).]

ERASINE, n. E-ras′en. A hydrocarbon obtained in California from the resin of *Pinus sabiniana*; a nearly colorless, mobile, aromatic liquid, used to remove grease-spots. ["Proc. of the Am. Pharm. Assoc.," xiv, xxvii (*a*, 14).] Cf. Abietene.

ERASION, n. E-ra′zhu^{3}n. Gr., ἀπόξυσις. Lat., *erasio* (from *eradere*, to scrape out). Fr., *érasion*. Ger., *Auskratzen*. A scraping out, removal (as of diseased tissue) by scraping. Cf. Arthrectomy.

ERAWAY, n. A native name for a plant found in Guinea, probably the *Croton tiglium*. [B, 38, 88, 200 (*a*. 14).]

ERBA (It.), n. Ar′ba^3. See Herb.—**E. acetina.** The *Fumaria officinalis*. [B, 125 (*a*, 14).]—**E. a cucchiaj.** The *Cochlearia officinalis*. [B, 125 (*a*, 14).]—**E. amara.** The *Chrysanthemum suaveolens*. [B, 125 (*a*, 14).]—**E. a scudi.** The *Lysimachia nummularia*. [B, 125 (*a*, 14).]—**E. benedetta.** The *Geum urbanum*. [B, 125 (*a*, 14).]—**E. bianca.** The *Artemisia vulgaris*. [B, 125 (*a*, 14).]—**E. britannica.** The *Rumex aquaticus*. [B, 125 (*a*. 14).]—**E. brusca.** The *Oxalis acetosella*. [B, 125 (*a*, 14).]—**E. buona.** The *Verbena officinalis*. [B, 125 (*a*, 14).]—**E. cannella.** The *Acorus calamus*. [B, 125 (*a*, 14).]—**E. cedrata.** The *Melissa officinalis*. ERBÄLLT (Ger.), adj. E^{2}r-balt′. See Verböllt.

ERBAUUNG (Ger.), n. E^{2}r-ba^3′u^4-un^2. Construction, mode of formation. [L, 81.]

ERBEN (Ger.), v. tr. E^{2}rb′e^{2}n. To inherit. [A, 521.]

ERBETO, n. In Provence, the genus *Beta*. [B, 121 (*a*, 24).]

ERBFÄLLIG (Ger.), adj. E^{2}rb′fal-li^{2}g. Hereditary. [A, 521.]

ERBGRIND (Ger.), n. E^{2}rb′gri^{2}nd. Favus. [G.]—**E′pilz.** See Achorion *Schönleinii*.

ERBIN CENDRÉ (Fr.), n. E^{2}r-ba^{2}n^2 sa^{3}n^2-dra. See Aira *canescens*.

ERBINE, n. U^{5}rb′en. Lat., *erbia*. Fr., *e*. Ger., *Erbinerde*. Native oxide of erbium. ["Proc. of the Am. Pharm. Assoc.," xxvii (*a*, 14); A, 385 (*a*, 21); L, 41, 49 (*a*, 14).]

ERBIUM (Lat.), n. m. U^{5}rb(e^{2}rb)′i^2-u^{3}m(u^{4}m). Fr., *e*. Ger., *E.* A metallic element not yet isolated, acting in compounds as a trivalent radicle. Symbol, Er; atomic weight, 169 or 170·5. [B, 3.]

ERBKRANKHEIT (Ger.), n. E^{2}rb′kra^{3}n^{2}k-hit. An inherited disease. [L, 43.]

ERBLASSEN (Ger.), n. E^{2}r-bla^{2}s′se^{2}n. Discoloration, pallor. [L, 80.]

ERBLEICHUNG (Ger.), n. E^{2}r-blich^2′un^2. Pallor. [*a*, 14.]

ERBLICH (Ger.), adj. E^{2}rb′li^{2}ch^2. Hereditary. [L, 43.]

ERBLICHKEIT (Ger.), n. E^{2}rb′li^{2}ch^2-kit. Heredity. [A, 319 (*a*, 21).]

ERBLINDEN (Ger.), n. E^{2}r-bli^{2}nd′e^{2}n. A becoming blind. [L, 80.]

ERBO, n. In Provence, an herb. [B, 121 (*a*, 24).]—**E. à escura.** The genus *Equisetum* and the genus *Chara*. [B, 121 (*a*, 24).]—**E. à touti li man.** The *Verbena officinalis*.—**E. au cantairo.** The *Erysimum officinale*. [B, 121 (*a*, 24).]—**E. de la chevelure.** The genus *Lysimachia*. [B, 121 (*a*, 24).]—**E. de la frauquo.** The genus *Chara*. [B, 121 (*a*, 24).]—**E. de noste-Damo.** See Cynoglossum *officinale*.—**E. dou gabin.** See Poa *trivialis*.—**E. dou prud'ome.** The *Salvia verbenaca*.—**E. i gu.** See Clematis *vitalba*.

ERBRECHEN (Ger.), n. E^{2}r-bre^{2}ch^2′e^{2}n. Vomiting. [*a*, 18.]—**E′erregend.** Emetic. [A, 521.]—**E′hemmend, E′hindernd, E′stillend.** Antemetic. [A, 521; L, 43, 80.]—**Falsches E.** Pretended vomiting. [L, 80.]—**Kothe′.** See *Stercoraceous* vomiting.—**Schwarzes E.** See *Black* vomit.—**Schweres E.** See Dysemesis.—**Unstillbares E.** Uncontrollable vomiting. [A, 521.]

ERBROCHENES (Ger.), n. E^{2}r-bro^{3}ch^2′e^{2}n-e^{2}s. Vomited matter. [A, 523.]

ERBSE (Ger.), n. E^{2}rb′ze^2. 1. A pea. 2. The genus *Pisum*. [B, 180 (*a*, 24).]—**Amerikanische E′n.** The seeds of *Abrus precatorius*. [B, 48.]—**Chinesische E.** A variety of pea growing in China which is ground into a meal, moistened with oil, and, after adding pepper, salt, thyme, and powdered laurel-leaves, allowed to ferment for some days. It is used as a digestive and cathartic. [L, 30 (*a*, 14).]—**E′nähnlich, E′nartig.** Pea-like or pea-soup-like. [A, 322; L, 80.]—**E′nbaum.** The *Robinia caragana*. [L, 80.]—**E′nbein.** See *Pisiform* bone.—**E′nblattern.** See Terminthus.—**E′nförmig.** See Pisiform.—**E′npocken.** See Terminthus.—**Gemeine E.** The *Pisum sativum*. [B, 180 (*a*, 24).]—**Herze′n.** The *Cardiospermum halicacabum*. [B, 180 (*a*, 24).]—**Paternostere′n.** See Abrus *precatorius*.—**Wundere′n.** The *Cardiospermum halicacabum*. [B, 180 (*a*, 24).]—**Zuckere′.** The *Pisum saccharatum*. [B.]

ERBÜBEL (Ger.), n. E^{2}rb'u^{6}b-e^{2}l. An inherited defect. [A, 521.]

ERDAPFEL (Ger.), n. E^{2}rd'a^{2}p-fe^{2}l. The root-tuber of *Helianthus tuberosus* and of *Solanum tuberosum.* [B, 180 (*a*, 24).]

ERDBAD (Ger.), n. E^{2}rd'ba^{3}d. See *Earth* BATH.

ERDBATHENGEL (Ger.), n. E^{2}rd-ba^{3}t-he^{2}n^2-e^{2}l. The *Veronica latifolia.* [B, 180 (*a*, 24).]

ERDBEERÄTHER (Ger.), n. m. E^{2}rd'bar-at-e^{2}r. A mixture of acetic ethylether, acetic amylether, and butyric-acid ether; used for giving a strawberry flavor to syrups and confections. [L, 37 (*a*, 14).]

ERDBEERBAUM (Ger.), n. E^{2}rd'bar-ba^3-u^{4}m. See ARBUTUS *unedo.*

ERDBEERBIRNE (Ger.), n. E^{2}rd'bar-bern-e^2. The fruit of *Cactus triangularis.* [B, 48 (*a*, 14).]

ERDBEERCUR (Ger.), n. E^{2}rd-bar-kur. A course of treatment of disease by means of a diet consisting largely of strawberries. [Kisch (A, 319).]

ERDBEERE (Ger.), n. E^{2}rd'bar-e^2. The strawberry (*Fragaria*). [B, 180 (*a*, 24).]—**Ananase'.** The *Fragaria grandiflora.* [B, 180 (*a*, 24).]—**Chili-E.** The *Fragaria chilensis.* [B, 180 (*a*, 24).]—**Garten-E.** The *Fragaria elatior.* [B, 180 (*a*, 24).]—**Gemeine E.** The *Fragaria vesca.* [B, 180 (*a*, 24).]—**Grossblumige E.** The *Fragaria grandiflora.* [B, 180 (*a*, 24).]—**Harte E.** The *Fragaria collina.* [B, 180 (*a*, 24).]—**Hochstengelige E.** The *Fragaria elatior.* [B, 180 (*a*, 24).]—**Hügele'.** The *Fragaria collina.* [B, 180.]—**Kahle Garten-E.** The *Fragaria virginiana.* [B, 180 (*a*, 24).]—**Knacke'.** The *Fragaria collina.* [B, 180.]—**Moschuse', Muscatellere'.** The *Fragaria elatior.* [B, 49.]—**Portugiesische E.** The *Fragaria collina.* [B, 49.]—**Scharlach-E., Virginische E.** The *Fragaria virginiana.* [B, 180.]—**Wald-E., Wilde E.** The *Fragaria vesca.* [B, 180 (*a*, 24).]—**Zimmte'.** The *Fragaria elatior.* [B, 180.]

ERDBEERGEIST (Ger.), n. E^{2}rd'bar-gist. A spirit distilled from fermented strawberry-juice. [L, 80.]

ERDBEERPOCKEN (Ger.), n. E^{2}rd'bar-po^{2}k-e^{2}n. Frambœsia. [L, 43, 80.]

ERDBEERSPINAT (Ger.), n. E^{2}rd'bar-spe-na^{3}t. See CHENOPODIUM *capitatum.*

ERDBEERSYRUP (Ger.), n. E^{2}rd'bar-su^6-rup. Strawberry-syrup. [L, 80.]

ERDBEERWASSER (Ger.), n. E^{2}rd'bar-wa^{3}s-e^{2}r. See *Aqua* FRAGARIÆ.

ERDBEERZUNGE (Ger.), n. E^{2}rd'bar-tzun^2-e^2. The "strawberry tongue" of scarlet fever. [A, 521.]

ERDBEWOHNEND (Ger.), adj. E^{2}rd'be^2-von-e^{2}nd. Living in earth. [L, 80.]

ERDBIRNE (Ger.), n. E^{2}rd'bern-e^2. The tuber of *Helianthus tuberosus.* [B, 180.]

ERDBLUME (Ger.), n. E^{2}rd'blum-e^2. The *Nostoc commune.* [L, 80.]

ERDBODEN (Ger.), n. E^{2}rd'bod-e^{2}n. See HUMUS.

ERDBROT (Ger.), n. E^{2}rd'brot. The *Cyclamen europæum.* [B, 180 (*a*, 24).]

ERDBURZELDORN (Ger.), n. E^{2}rd'burts-e^{2}l-do^{2}rn. The genus *Tribulus.* [L, 80.]

ERDCABINETT (Ger.), n. E^{2}rd'ka^{3}b-en-e^{2}t". See EARTH *closet.*

ERDCAUTSCHUC (Ger.), n. E^{2}rd'ka^3-u^{4}t-shuk. See DAPICHO and ZAPIS.

ERDE (Ger.), n. E^{2}rd'e^2. See EARTH.—**Alaune'.** See ALUM *earth.*—**Alkalische E.** Alkaline earth. [L, 80.]—**E'bad.** See *Earth* BATH.—**E. von Lemnos.** See *Lemnian* BOLE.—**Essbare E.** See *Edible* EARTH.—**Glasartige E.** Silex. [L, 80.]—**Japanische E.** See CATECHU.—**Lemnische E.** See *Lemnian* BOLE.—**Thierische E.** See *Animal* EARTH.

ERDEICHEL (Ger.), n. E^{2}rd'ich^2-e^{2}l. 1. The genus *Arachis.* 2. The *Lathyrus tuberosus.* 3. The *Helianthus tuberosus.* 4. The *Tuber cibarium.* [B, 48, 180 (*a*, 14); *a*, 24.]—**Unterirdische E.** See ARACHIS *hypogæa.*

ERDEICHELN (Ger.), n. E^{2}rd'ich^2-e^{2}ln. The *Spiræa filipendula.* [B, 180 (*a*, 24).]

ERDEPHEU (Ger.), n. E^{2}rd'e^2-foi. The *Nepeta glechoma.* [B, 180 (*a*, 24).]

ERDESSEN (Ger.), n. E^{2}rd'e^{2}s-se^{2}n. Dirt-eating. [A, 521.]

ERDGALLE (Ger.), n. E^{2}rd'ga^{3}l-le^2. 1. The *Erythræa centaurium.* 2. An old name for the roots of *Ophiorrhiza mungos.* [B, 180 (*a*, 24); L, 80.]

ERDHAFT (Ger.), adj. E^{2}rd'ha^{3}ft. Earthy. [L, 43.]

ERDHARZ (Ger.), n. E^{2}rd'ha^{3}rtz. Bitumen. [L, 81.]—**E'öl.** See ASPHALT *oil.*—**Gelbes E.** See AMBRA *flava.*—**Schwarzes E.** See ASPHALT. [B, 180 (*a*, 24).]

ERDJADI (Ar.), n. The *Menispermum edule.* [B, 88 (*a*, 14).]

ERDKASTANIEN (Ger.), n. E^{2}rd'ka^{3}st-a^{3}n-en. 1. The root of *Carum bulbo-castanum.* 2. The tubers of *Lathyrus tuberosus.* [B, 180 (*a*, 24); L, 43, 80.]

ERDKESTEN (Ger.), n. pl. E^{2}rd'ke^{2}st-e^{2}n. The tuberous roots of *Bunium* (*Carum*) *bulbo-castanum.* [B, 270.]

ERDKIEFER (Ger.), n. E^{2}rd'kef-e^{2}r. The *Ajuga chamæpitys*; also the *Coris monspeliensis.* [B, 180 (*a*, 24).]

ERDKOHLRÜBE (Ger.), n. E^{2}rd'kol-ru^{6}b-e^2. See BRASSICA *napobrassica.*

ERDLEBERKRAUT (Ger.), n. E^{2}rd'lab-e^{2}r-kra^3-u^{4}t. The *Peltidea canina.* [B, 48 (*a*, 14).]

ERDMANDEL (Ger.), n. E^{2}rd'ma^{3}nd-e^{2}l. The *Cyperus esculentus* and the *Lathyrus tuberosus.* [B, 180 (*a*, 24).]—**E'öl.** The oil of *Cyperus esculentus.* [L, 30 (*a*, 14).]

ERDMÄNNCHEN (Ger.), n. E^{2}rd'me^{2}n-ch^{2}e^{2}n. The root of *Atropa mandragora.* [L, 30 (*a*, 14).]

ERDMANTEL (Ger.), n. E^{2}rd'ma^{3}nt-e^{2}l. See CYPERUS *esculentus.*

ERDMOOS (Ger.), n. E^{2}rd'mos. The *Lycopodium clavatum.* [B, 48 (*a*, 14).]

ERDMORCHEL (Ger.), n. E^{2}rd'mo^{2}rch^2-e^{2}l. The *Tuber cibarium.* [L, 80.]

ERDNAPTHA (Ger.), n. E^{2}rd'na^{3}p-ta^3. Petroleum naphtha. [L, 80.]

ERDNUSS (Ger.), n. E^{2}rd'nus. 1. The root of *Carum bulbo-castanum.* 2. The root of *Lathyrus tuberosus.* 3. See ARACHIS *hypogæa.*—**Amerikanische E.** See APIOS *tuberosa.*—**E'öl.** See *Oleum* ARACHIDIS.

ERDOBENYE (Magyar), n. E^{2}rd'o^3-be^{2}n-ye^2. A place in Hungary where there is a chalybeate and aluminous spring. [A, 518.]

ERDÖL (Ger.), n. E^{2}rd'u^{6}l. See BITUMEN and PETROLEUM.

ERDORSEILLE (Ger.), n. E^{2}rd'o^{2}r-sal-y^2. The *Lecanora parella.* [B, 48, 131 (*a*, 14).]

ERDPECH (Ger.), n. E^{2}rd'pe^{2}ch^2. Mineral pitch. See ASPHALT.—**E'ig.** See BITUMINOUS.

ERDPFAU (Ger.), n. E^{2}rd'pfa^3-u^4. The *Cistus helianthemum.* [B, 131 (*a*, 14).]

ERDPFRIEM (Ger.), n. E^{2}rd'pfrem. The *Genista pilosa.* [B, 131 (*a*, 14).]

ERDPINKRAUT (Ger.), n. E^{2}rd'pi^{2}n-kra^3-u^{4}t. The herb of *Ajuga chamæpitys.* [B, 180 (*a*, 24).]

ERDPISTAZIE (Ger.), n. E^{2}rd'pi^{2}s-ta^{3}ts-e. See ARACHIS *hypogæa.*

ERDRAUCH (Ger.), n. E^{2}rd'ra^3-u^{4}ch^2. The genus *Fumaria.* [B, 180 (*a*, 24).]—**Dichter E.** The *Corydalis fabacea.* [L, 80.]—**E'extrakt.** See *Extractum* FUMARIÆ.—**E'kraut.** The herb of *Fumaria officinalis.* [B, 180 (*a*, 24).]—**E'saft.** See *Succus recens-expressus* FUMARIÆ.—**E'syrup.** See SYRUPUS *fumariæ.*—**Gelber E.** The *Corydalis capnoides.* [L, 80.]—**Gemeiner E.** The *Fumaria officinalis.* [B, 180 (*a*, 24).]—**Immergrüner E.** The *Corydalis glauca.* [L, 80.]—**Kleinblütiger E.** The *Fumaria parviflora.* [B, 180 (*a*, 24).]—**Knolliger E.** The *Corydalis Halleri.* [L, 80.]—**Officineller E.** The *Fumaria officinalis.* [L, 80.]—**Vaillants E.** The *Fumaria Vaillantii.* [B, 180 (*a*, 24).]

ERDRAUTE (Ger.), n. E^{2}rd'ra^3-u^{4}t-e^2. The *Fumaria officinalis.* [B, 180 (*a*, 24).]—**E'nkraut.** The herb of *Fumaria officinalis.* [*a*, 24.]

ERDROSE (Ger.), n. E^{2}rd'roz-e^2. The *Rosa pumila.* [B, 131 (*a*, 14).]

ERDROSSELN (Ger.), **ERDROSSELUNG** (Ger.), n's. E^{2}r'-dros-se^{2}l'n, -se^{2}l-un^2. See STRANGULATION.

ERDRÜBE (Ger.), n. E^{2}rd'ru^{6}b-e^2. The *Brassica campestris napobrassica.* [B, 180 (*a*, 24).]

ERDRÜCKUNG (Ger.), n. E^{2}r-dru^{6}k'un^2. See ÉCRASEMENT.

ERDSALZ (Ger.), n. E^{2}rd'za^{3}ltz. 1. Rock-salt. 2. Potassium nitrate. [L, 46 (*a*, 14).]

ERDSCHEIBE (Ger.), n. E^{2}rd'shib-e^2. The genus *Cyclamen.* [B, 180 (*a*, 24).]—**Gemeine E.** The *Cyclamen europæum.* [B, 180 (*a*, 24).]

ERDSCHEIBWURZ (Ger.), n. E^{2}rd'shib-vurts. The *Cyclamen europæum.* [B, 88.]

ERDSCHIERLING (Ger.), n. E^{2}rd'sher-li^{2}n^2. The *Conium maculatum.* [B, 180 (*a*, 24).]

ERDSCHNECKE (Ger.), n. E^{2}rd'shne^{2}k-e^2. See LIMAX.

ERDSCHOCKE (Ger.), n. E^{2}rd'sho^{3}k-e^2. The *Cynara scolymus.* [B, 131 (*a*, 14).]

ERDSCHOTE (Ger.), n. E^{2}rd'shot-e^2. The *Arachis hypogæa.* [B, 48, 131 (*a*, 14).]

ERDSCHWAMM (Ger.), n. E^{2}rd'shwa^{3}m. 1. The *Agaricus campestris.* 2. The *Tuber cibarium.* [B, 131 (*a*, 14).]

ERDSCHWEFEL (Ger.), n. E^{2}rd'shvaf-e^{2}l. The spores of *Lycopodium clavatum.* [L, 46 (*a*, 14).]

ERDSTACHELNUSS (Ger.), n. E^{2}rd'sta^{3}ch^2-e^{2}l-nus. The fruit of *Tribulus terrestris.* [B, 180 (*a*, 24).]

ERDSTERN (Ger.), n. E^{2}rd'ste^{2}rn. The *Geastrum quadrifidum.* [B, 180 (*a*, 24).]

ERDTAUSENDFUSS (Ger.), n. E^{2}rd'ta^3-u^{4}z-e^{2}nd-fus. The *Julus terrestris.* [L, 80.]

ERDTHEER (Ger.), n. E^{2}rd'tar. See BITUMEN.

ERDWACHS (Ger.), n. E^{2}rd'va^{3}ch^{2}s. See CERESIN.

ERDWEICH (Ger.), n. E^{2}rd'vich^2. The *Saponaria vaccaria.* [B, 180 (*a*, 24).]

ERDWEIDE (Ger.), n. E^{2}rd'vid-e^2. The *Salix triandra.* [B, 48, 131 (*a*, 14).]—**Gelbe E.** The *Salix incubacea.* [B, 48, 131 (*a*, 14).]

ERDWEIHRAUCH (Ger.), n. E^{2}rd'vi-ra^3-u^{4}ch^2. The *Ajuga chamæpitys* and *Veronica latifolia.* [B, 88 (*a*, 14); B, 180 (*a*, 24).]—**E'kraut.** The *Teucrium chamædrys.* [B, 180 (*a*, 24).]

ERDWINDE (Ger.), n. E^{2}rd'vi^{2}nd-e^2. The *Linaria elatine.* [B, 131 (*a*, 14).]

EREA, n. In Otaheite, the *Curcuma longa.* [B, 88 (*a*, 14).]

EREBINTHUS (Lat.), n. m. E^{2}r-e^2-bi^{2}nth'u^{3}s(u^{4}s). Gr., ἐρέβινθος. The Cicer *arietinum.* [B, 87, 88 (*a*, 14).]

ERECHSUS (Ar.), n. The *Glycyrrhiza glabra.* [B, 92 (*a*, 14).]

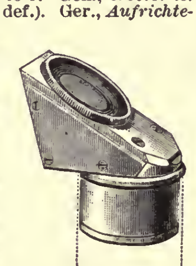
ERECHTHITES (Lat.), n. f. E^{2}r-e^{2}k(e^{2}ch^2)-thi(the)'tez(tas). From ἐρέχθειν, to trouble, because the species are troublesome weeds. 1. Of Dioscorides, the *Senecio vulgaris.* [B, 88.] 2. Of Rafinesque, a genus of the *Compositæ;* according to Baillon, a section of *Senecio.* [B, 34, 42, 121 (*a*, 24).] The *Erechthiteæ* are a division of the *Senecioneæ* (of Reichenbach, a subdivision of the *Conyzeæ*). [B, 170 (*a*, 24).]—**E. hieracifolia.** Fire- (or broom-) weed, mare's-tail; a species growing in moist woods and recent clearings, and said to infest the peppermint fields of Michigan. It has a bitter, disagreeable, somewhat acrid taste, and has been used as an astringent and antispasmodic. [B, 5, 34 (*a*, 24); "Proc. of the Am. Pharm. Assoc.," xxx (*a*, 14); "Drugs and Med. of N. Am.," Mar., 1887, p. 126.]

ERECT, adj. E-re^{2}kt'. Lat., *erectus* (from *erigere*, to set up). Fr., *dressé.* Ger., *aufrecht.* It., *eretto.* Sp., *derecho.* In a state of erection; of plant-organs, perpendicular, or nearly so. [B, 1, 121 (*a*, 24).]

ÉRECTEUR (Fr.), adj. A-re^{2}k-tu^{6}r. Producing erection; as a n., see Erector. [A, 301, 385 (*a*, 21).]

ERECTHITES (Lat.), n. f. See Erechthites.

ERECTI (Lat.), n. m. pl. E(a)-re^{2}k(rak)'ti(te). See Anthropidæ.



ERECTILE, adj. E-re^{2}kt'i^{2}l. Lat., *erectilis.* Fr., *érectile.* Ger., *aufrichtbar.* Capable of erection. [B, 121 (*a*, 24); L, 49, 343.] See *E.* tissue and *E.* tumor.

ERECTILITY, n. E-re^{2}k-ti^{2}l'i^{2}t-i^2. Gr., ὀρθοσύνη. Lat., *erectilitas.* Fr., *érectilité.* Ger., *Erectionsfähigkeit, Erectilität, Aufrichtbarkeit.* It., *erettilità.* Sp., *erectilidad.* Capability of erection. [A, 301, 322 (*a*, 21).]

ERECTION, n. E-re^{2}k'shu^{3}n. Gr., ὄρθωσις. Lat., *erectio* (from *erigere*, to erect). Fr., *érection.* Ger., *E., Aufrichtung, Steifwerden.* It., *erezione.* Sp., *erección.* The process of becoming or the state of being erect, as observed in the penis, the clitoris, and the nipples under the influence of erotic excitement or some other stimulus. In an e. of the penis or of the clitoris, the organ becomes swollen, elongated, and hard in consequence of its erectile tissue becoming turgid with blood; in an e. of the nipple, the increase in its supply of blood is an element of minor importance, the e. being little else than a protrusion of the organ by the action of the cutaneous muscular fibres surrounding it.—**Persistent e.** See Priapism.

ERECTOPATENS (Lat.), adj. E(a)-re^{2}k(rak)-to^{2}p'a^{2}t(a^{3}t)-e^{2}nz-(ans). From *erectus*, erect, and *patere*, to spread open. Ger., *aufrecht-abstehend.* In botany, in a position intermediate between erect and spreading (*patens*). [B, 198.]

ERECTOR (Lat.), n. m. E(a)-re^{2}k(rak)'to^{2}r. Gen., *erector'is.* Fr., *érecteur* (1st def.), *prisme redresseur* (2d def.). Ger., *Aufrichtemuskel* (1st def.). It., *erettore.* Sp., *e.* 1. A muscle the action of which is to cause erection or to straighten the vertebral column. 2. In microscopy, a prism for correcting the inversion of the image, frequently attached to the eye-piece of a microscope. [*a*, 27.]—**E. accessorius.** See Ischio-cavernosus *urethræ.*—**E. clitoridis.** Fr., *érecteur du clitoris.* See Ischio-cavernosus.—**E. coccygis.** See Sacro-coccygeus *superior.*—**E. nerves.** See Nervi *erigentes.*—**E. penis.** Fr., *érecteur de la verge.* See Ischio-cavernosus.—**E'es pilorum.** See Arrectores *pilorum.*—**E. spinæ, E. trunci.** The sacro-spinalis muscle. [L.]

AN ERECTOR.

EREDOPHYTUM (Lat.), n. n. E(a)-re-(ra)-do^{2}f'i^{2}t(u^{6}t)-u^{3}m-(u^{4}m). From ἐρείδειν, to fasten, and φυτόν, a plant. Fr., *érédophyte.* Of Necker, a genus of plants characterized by having the stamens and pistils held by a disc. [B, 170 (*a*, 24); L, 180.]

EREGMA (Lat.), **EREGMOS** (Lat.), n's n. and m. E^{2}r-e^{2}g'ma, -mo^{2}s. Gen., *ereg'matos (-is).* Gr., ἔρεγμα, ἐρεγμός. See Erigma.

EREISMA (Lat.), n. n. E^{2}r-is'(e^2'i^{2}s)-ma^3. Gen., *ereis'matos (-is).* Gr., ἔρεισμα (from ἐρείδειν, to prop). Fr., *éreisme.* 1. A support, especially a supporting bandage. 2. Of Kirby, a glutinous, bipartite, retractile organ situated between the claws of *Sminthurus* and used by it as a support. [L, 94, 119, 180 (*a*, 14).]

EREMACAUSIS (Lat.), n. f. E^2(a)-re^{2}m-a^3-ka^{4}s'(ka^3-u^{4}s')-i^{2}s. Gen., *eremacaus'eos (-is).* From ἠρέμα, slowly, and καῦσις, a burning. Fr., *érémacausie.* Of Liebig, the slow oxidation of organic matter (*e. g.*, humus) exposed to the action of the air. [A, 301; L, 44 (*a*, 14).]

EREMÆOS (Lat.), adj. E^2(a)-re^{2}m-e'(a^3-a')-o^{2}s. Quiet, gentle; of a fever, slight. [Hippocrates (A, 311 [*a*, 17]).]

ÉRÈME (Fr.), n. A-re^{2}m. See Eremus.

EREMOBLAST, n. E^{2}r'e^{2}m-o-bla^{2}st. From ἐρῆμος, solitary, and βλαστός, a germ. A vegetable cell (such as a pollen-grain) which separates from its connection with other cells to lead an independent existence. [B, 49.]

EREMOCARPUS (Lat.), n. m. E^{2}r-e^{2}m-o(o^3)-ka^{3}rp'u^{3}s(u^{4}s). Of Bentham, a genus of the *Euphorbiaceæ*, tribe *Crotoneæ.* [B, 42 (*a*, 24).]—**E. setigerus.** Ginger-leaf; a small annual herb indigenous to California. The whole plant, even when dried, has a strong, disagreeable odor. It is used externally, in decoction, in rhus-poisoning, and the root internally in pulmonary affections. [B, 19, 42, 121 (*a*, 24); "Proc. of the Am. Pharm. Assoc.," xxx (*a*, 14).]

EREMODAUCUS (Lat.), n. m. E^{2}r-e^{2}m-o(o^3)-da^{4}k'(da^3-u^{4}k)'-u^{3}s(u^{4}s). See Trachidium.

EREMOPHILA (Lat.), n. f. E^{2}r-e^{2}m(am)-o^{2}f'i^{2}l-a^3. From ἐρῆμος, solitary, and φιλεῖν, to love. Of R. Brown, a genus of the *Myoporineæ.* [B, 42 (*a*, 24).]—**E. Mitchelli.** A species the wood of which is feebly fragrant and known in Queensland as sandalwood. [E. M. Holmes, "Pharm. Jour. and Trans.," Mar. 27, 1886; "Am. Jour. of Pharm.," May, 1886, p. 254.]

EREMOPOMPHOLYX (Lat.), n. E^{2}r-em(am)-o(o^3)-po^{2}m'-fo^{2}l-i^{2}x(u^{6}x). Gen., *eremopompholʹygos (-is).* From ἐρῆμος, solitary, and πομφόλυξ, a bleb. Fr., *érémopompholyx.* Ger., *vereinzelte Brandblase.* See Pompholyx *solitaria.*

EREMUS (Lat.), adj. E^{2}r-em(am)'u^{3}s(u^{4}s). Gr., ἐρῆμος. Fr., *érème.* Ger., *alleinstehend, einsam.* Solitary; as a n., a ripe carpel separating from its neighbors. [A, 325 (*a*, 21); B, 1, 19 (*a*, 24).]

ERERBEN (Ger.), n. E^{2}r-e^{2}rb'e^{2}n. Heredity. [A, 523.]

ÉRÉRÉ (Fr.), n. A-ra-ra. The *Cola gabonensis.* [B, 121 (*a*, 24).]

ERETÆ (Lat.), n. pl. E^{2}r'e^{2}t-e(a^3-e^2). From ἐρέτης, a rower. Fr., *érètes.* Of Ritgen, a family of swimming birds. [L, 180.]

ERETHETIC, ERETHICAL, adj's. E^{2}r-e-the^{2}t'i^{2}k, -e^{2}th'-i^{2}k-a^{2}l. See Erethistic.

ERETHISM, n. E^{2}r'e-thi^{2}z'm. Gr., ἐρεθισμός (from ἐρεθίζειν, to irritate). Lat., *erithismus.* Fr., *éréthisme.* Ger., *Reiz, Erethismus.* It., Sp., *eretismo.* Exaggerated sensibility or irritability. A morbid degree of excitement or irritation. [A, 322 (*a*, 21).]

ERETHISMA (Lat.), n. n. E^{2}r-e^2-thi^{2}z(thi^{2}s)'ma^3. Gen., *erethis'matos (-is).* Gr., ἐρέθισμα. Ger., *Reizmittel.* An irritant. [A, 322.]

ERETHISMIC, adj. E^{2}r-e^2-thi^{2}z'mi^{2}k. See Erethistic.

ERETHISMUS (Lat.), n. m. E^{2}r-e^2-thi^{2}z(thi^{2}s)'mu^{3}s(mu^{4}s). Gr., ἐρεθισμός. Erethism; in Young's classification of diseases, a genus of the *Paraneurismi.* [L, 290.]—**E. agrypnia.** See Insomnia.—**E. arteriosus.** Arterial excitement. [L, 80.]—**E. ebriosorum.** See Delirium *tremens.*—**E. hydrophobia.** See Hydrophobia.—**E. micturitius** [Cullen]. See Enuresis.—**E. nervosus.** Nervous excitement. [L, 80.]—**E. nostalgia.** See Nostalgia.—**E. nymphomania.** See Nymphomania.—**E. oneinodynia.** Disturbed sleep. [L, 290.]—**E. satyriasis.** Incontinence in men. [L, 290.]—**E. simplex.** See Erethism.—**E. tropicus.** See Insolation.

ERETHISTIC, ERETHITIC, adj's. E^{2}r-e-thi^{2}st'i^{2}k, -thi^{2}t'-i^{2}k. Gr., ἐρεθιστικός (from ἐρεθίζειν, to irritate). Lat., *erethisticus, erethicus.* Fr., *éréthique.* Ger., *reizend.* It., *eretico.* Sp., *erético.* Causing or pertaining to erethism. [A, 322.]

ERETRIA (Lat.), **ERETRIAS** (Lat.), **ERETRIS** (Lat.), **ERETRIUS** (Lat.), n's f., m., f., and m. E^{2}r-e^{2}t'ri^2-a^3, -a^{2}s(a^{3}s), -ri^{2}s, -ri^2-u^{3}s(u^{4}s). Gr., ἐρετρία, ἐρετρίας. Of Dioscorides, a sort of clay found in Eretria, of which alkaline or aluminous varieties occurred; recommended as an absorbent and astringent. [L, 84, 94, 105 (*a*, 14).]

EREUGMOS (Lat.), **EREUGMUS** (Lat.), n's. E^2-ru^{2}g'mo^{2}s, -mu^{3}s(mu^{4}s). Gr., ἐρευγμα. See Eructation.

EREUMENUS (Lat.), adj. E(a)-ru^2'me^{2}n-u^{3}s(u^{4}s). Gr., ἐρευμενος. Cloudy (said of urine). [L, 119 (*a*, 14).]

EREUNAI, n. Of the Carib Indians in South America, the *Allamandra cathartica* (seu *Schottii*). [B, 88 (*a*, 14).]

EREUTHOS (Lat.), n. n. E^2-ru^{2}th'o^{2}s. Gen., *ereuth'eos (-is).* Gr., ἔρευθος. Of Hippocrates, a redness or flush. [A, 325 (*a*, 21).]

EREUXIS (Lat.), n. f. E^{2}r-u^{2}x'i^{2}s. Gen., *ereux'eos (-is).* Gr., ἔρευξις. See Ereugmus.

ERFAHRUNG (Ger.), n. E^{2}r-fa^{3}r'un^2. Experience, experimental knowledge, empiricism. [L, 80.]

ERFONDILIO (Sp.), n. E^{2}r-fon-del'i^2-o. The *Heracleum spondylium.* [B, 88 (*a*, 14).]

ERFRIEREN (Ger.), **ERFRIERUNG** (Ger.), n's. E^{2}r-frer'-e^{2}n, -un^2. See Congelation.

ERFRISCHUNG (Ger.), n. E^{2}r-fri^{2}sh'un^2. Refreshment, also the act of refreshing or denuding a part of the surface of the body in a plastic operation. [L, 80 (*a*, 14); B.]—**E'sstationen.** Places at which the wounded brought from the battle-field may be temporarily lodged for treatment. [B, 49.]

ERFROREN (Ger.), adj. E^{2}r-fror'e^{2}n. Frozen. [*a*, 14.]—**E'sein.** See Congelation.

ERFURT (Ger.), n. E^{2}r'furt. A place in Germany where there is a spring containing magnesium and calcium sulphates, sodium chloride, and magnesium carbonate. [L, 30, 37, 105 (*a*, 14).]

ERG, n. U^{5}rg. From ἔργον, work. The unit of energy; the amount of work done by a body moving through 1 ctm. in opposition to a force equal to 1 dyne. [B.]

ERGÄNZEND (Ger.), adj. E^{2}r-gants'e^{2}nd. See Complemental.

ERGÄNZUNG (Ger.), n. E^{2}r-gants'un^2. Completion. [B.]—**E'sfarben.** Complementary colors. [B.]—**E'sluft.** See *Residual* air.

ERGASIA (Lat.), n. f. E^{2}r-gaz(ga^{3}s)'i^2-a^3. Gr., ἐργασία. Fr., *ergasie.* Functional action. [L, 50 (*a*, 14).]

ERGASIMA (Lat.), n. f. E^{2}r-ga^{2}s(ga^{3}s)'i^{2}m-a^3. Gr., ἐργασίμη. Of Dioscorides, an inferior variety of myrrh. [L, 84, 94 (*a*, 14).]

ERGASIOMANIA (Lat.), n. f. E^{2}r-ga^{2}s(ga^{3}s)-i^2-o(o^3)-man-(ma^{3}n)'i^2-a^2. From ἐργασία, work, and μανία, madness. Fr., *er-*

gasiomanie. Ger., *Operirwuth.* A mania for performing operations. [L, 50 (*a*, 14).]

ERGASIOPHOBIA (Lat.), n. f. E^{2}r-ga^{2}s(ga^{3}s)-i^2-o(o^3)-fob-(fo^{2}b)'i^2-a^3. From ἐργασία, work, and φόβος, fear. Fr., *ergasiophobie.* Ger., *Furcht vor Operationen.* Dread of performing operations, also of having an operation performed. [A, 322 (*a*, 21).]

ERGASM, n. U^{5}rg'a^{2}z'm. Fr., *ergasme.* See Ergasia.

ERGASTERIUM (Lat.), n. n. E^{2}r-ga^{2}s(ga^{3}s)-te(ta)'ri^2-u^{3}m-(u^{4}m). Gr., ἐργαστήριον (from ἐργάζεσθαι, to work). 1. A laboratory. 2. The upper part of a distilling furnace, where the retort is placed. [L, 50, 84, 135 (*a*, 14).]

ERGASTICOS (Lat.), adj. E^{2}r-ga^{2}st(ga^{3}st)'i^{2}k-o^{2}s. Gr., ἐργαστικός. Fr., *ergastique.* 1. Of Hippocrates, able to work, working, functional; as a n., in the f., *ergastice*, the digestive process, and in the n., *ergasticon*, an organ. 2. Pertaining to work, or to an operation of any sort. [A, 311 (*a*, 17); A, 322, 325 (*a*, 21).]

ERGIESSUNG (Ger.), n. E^{2}r-ges'sun^2. An effusion, discharge, exudation, extravasation. [A, 521.]

ERGMA (Lat.), n. n. U^{5}rg(e^{2}rg)'ma^3. Gen., *erg'matos (-is).* Gr., ἔργμα. Of Hippocrates, an impediment, also a septum. [A, 325 (*a*, 21).]

ERGOSTAT, n. U^{5}r'go-sta^{2}t. From ἔργον, work, and ἱστάναι, to stand. Ger., *Arbeitssteller.* A machine for testing muscular power. G. Gaertner's e. consists of a crank for turning a wheel which is connected with a small wheel serving as the fulcrum of a weighted lever, with a registering index. ["Internat. klin. Rundsch.," Dec. 18, 1887, col. 1646.]

ERGOSTÉRINE (Fr.), n. E^{2}r-go-sta-ren. Of Tanret, a monatomic alcohol, $C_{52}H_{40}O_2H_2O_2$, resembling cholesterin, found in ergot. ["Compt. rend. de l'Acad. des sci."; "Nouv. rem.," Feb. 24, 1889, p. 97.]

ERGOT, n. U^{5}r'go^{2}t. Lat., *ergota* (1st def.). Fr., *e.*, *seigle ergoté* (1st def.). Ger., *Mutterkorn* (1st def.), *Loffenkorn.* It., *corno*, *sperone* (4th def.). Sp., *tizon*, *cuernicillo* (1st def.), *cornezuelo.* 1. The sclerotium ("compact mycelium or spawn" [Br. Ph.]) of *Claviceps purpurea*, developed within the paleæ of numerous grasses, and especially of rye. All the e's probably have the medicinal qualities of e. of rye (*q. v.*). 2. In the horse, a small, corneous mass growing from the skin of the fetlock. 3. In birds, the spur. 4. The hippocampus minor. [B, 5, 18, 19 (*a*. 24); I, 39; L, 13, 321.]—**Breuvage utérin à l'e.** (Fr.). A veterinary preparation containing 3 parts of e. of rye, 100 of red wine, and 25 of honey. [L, 49 (*a*, 14).]—**Clyster of e.** Ger., *Mutterkornklystier.* An enema made of 1 part of extract of ergot and 50 parts of water. [L, 57 (*a*, 21).]—**Corn-e.** See *E. of maize.*—**E. d'avoine** (Fr.). See *E. of oats.*—**E. de blé** (Fr.). See *E. of wheat.*—**E. de coq** (Fr.). The *Panicum crusgalli.* [B, 121 (*a*, 24).]—**E. de Morand** (Fr.). See Hippocampus *minor.*—**E. de seigle** [Fr. Cod.] (Fr.). See *E. of rye.*—**E. flava.** The *Gentiana amarella.*—**E. of diss.** Fr., *e. de diss.* Ger., *Dissmutterkorn.* A variety of the *Ampelodesmos tenax.* According to Lallemand, it is twice as active as e. of rye and is recommended as a substitute for it. [B, 5, 18 (*a*, 24); E. M. Holmes, "Pharm. Jour. and Trans.," Feb. 13, 1886, p. 684; "Am. Jour. of Pharm.," Apr., 1886, p. 203.]—**E. of maize.** Fr., *e. de maïs.* Ger., *Maisbrand, Beulenbrand.* Sp., *cuernecillo de maís.* The sclerotium of *Ustilago maidis*, growing on and replacing the grain of *Zea maiz*; corn-smut. It excites uterine contraction of shorter duration than that caused by e. of rye. It is said to produce abortion in cows. [B, 5 (*a*, 24).]—**E. of Morand.** See Hippocampus *major.*—**E. of oats.** Fr., *e. d'avoine.* A variety, slenderer than e. of rye, occurring in commerce either by itself or mixed with e. of rye. Said to act on the uterus as energetically as e. of rye, and to have the advantage of being a restorative in cases of exhaustion from hæmorrhage. [Bousquet, "Marseille méd."; "Union méd.," Feb. 19, 1888; "N. Y. Med. Jour.," Apr. 14, 1888, p. 420.]—**E. of rice.** E. produced on the grains of rice by a fungus identical with *Claviceps purpurea*; used in the East Indies as a substitute for e. of rye. [L, 87 (*a*, 14).]—**E. of rye.** Lat., *ergota* [U. S. Ph., Br. Ph.], *secale cornutum* [Ger. Ph.]. Fr., *e. de seigle* [Fr. Cod.]. Ger., *Roggenmutterkorn, Laffenkorn.* It., *segala cornuta.* Sp., *centeno cornudo.* Spurred, ergoted, or barbed rye; the sclerotium of *Claviceps purpurea*, growing and replacing the grain of *Secale cereale.* It occurs in commerce in fusiform grains from ¼ to 1¼ inch in length and ¼ to 4 lines in diameter, of a nearly cylindrical or obtusely prismatic form, tapering toward each end, marked with one or two longitudinal furrows, and often having at the apex a small, whitish appendage, while the opposite extremity is somewhat rounded. It has a peculiar heavy, disagreeable odor, and a mawkish, oily, rancid taste. It contains about 30 per cent. of an oil (see *Oil of e.*), and, according to Wenzell, two peculiar alkaloids, ecboline and ergotine. From it have also been obtained ergotinine, sclerotic acid, scleromucin, sclerythrin, sclerojodin, fuscosclerotinic acid, picrosclerotine, scleroxanthin, sclerocrystallin, mycose, and lactic and formic acids. E. of rye produces tonic contraction of unstriped muscular fibre. It is used chiefly to promote contraction of the uterus after delivery, to check uterine hæmorrhage from fibroid tumors and to restrict their growth by limiting their supply of blood, to restrain pulmonary hæmorrhage, and to diminish the amount of blood in the brain by its action on the muscular fibres of the blood-vessels. In excessive or long-continued doses it produces ergotism (*q. v.*). [B, 5, 18, 19 (*a*, 24).]—**E. of wheat.** Fr., *e. de blé.* A variety attacking *Triticum vulgare.* It appears in commerce in shorter and thicker grains than those of e. of rye, but resembles the latter in color, odor, and medicinal properties. According to Leperdriel, it is less liable to change, and is not poisonous. [B, 5, 18 (*a*, 24).]—**Extract of e.** See *Extractum* ergotæ.—**Faux e.** (Fr.). See Rhabditis *tritici.*—**Fluid extract of e.** See *Extractum* ergotæ *fluidum.*—**Infusion of e.** See *Infusum* ergotæ.—**Liquid extract of e.** See *Extractum* ergotæ *fluidum.*—**Oil of e.** A fixed reddish or yellowish oil of a disagreeable and acrid taste, consisting of olein, palmitin, and small proportions of volatile fatty acids (especially acetic and butyric acids) combined with glycerin, and, according to Proctor, of secalin. [B, 5 (*a*, 24).]—**Sugar of e.** See Mycose.—**Tincture of e.** See *Tinctura* ergotæ.—**Wine of e.** See *Vinum* ergotæ.

THE ERGOT OF RYE.
1, ear of rye with ergot (spurred rye); 2, the ergot; 3, diseased grains of rye.

ERGOTA (Lat.), n. f. U^{5}r(e^{2}r)-got'a^3. See Ergot; of the pharmacopœias, see Ergot *of rye.*—**Extractum ergotæ** [U. S. Ph.]. Fr., *extrait de seigle ergoté* [Fr. Cod.], *ergotine.* Ger., *Ergotin, Mutterkornextract.* It., *ergotina.* Sp., *ergotina* [Sp. Ph.], *extracto de cornezuelo de centeno* [Sp. Ph.]. Syn.: *ergotinum* [Br. Ph., Gr. Ph.], *extractum secalis cornuti* [Ger. Ph. and other European Ph's]. An extract made by evaporating over a water-bath, at a temperature not exceeding 50° C., 5 parts of fluid extract of ergot till it is reduced to 1 part [U. S. Ph., Br. Ph.]; or by macerating for 12 hours 1 part of ergot with double its weight of water, exhausting the residue with 3 parts of water, evaporating the colature over a water-bath to a syrup, adding 90-per-cent. alcohol till the liquid becomes cloudy, and finally evaporating to a soft extract [Fr. Cod.]; or by macerating 2 parts of ergot for 6 hours in 4 of water, adding 1 part of dilute alcohol, evaporating after 3 days to a thick extract, triturating twice again with an equal weight of alcohol, and evaporating to a thick extract [Ger. Ph.]. [B, 91, 95, 113, 205 (*a*, 14).]—**Extractum ergotæ fluidum** [U. S. Ph.] (seu **liquidum** [Br. Ph.]). Fr., *extrait liquide d'ergot de seigle.* Ger., *flüssiges Mutterkornextract.* It., *estratto acquoso di segale cornuta.* Sp., *extracto fluido de cornezuelo de centeno.* A fluid extract made by moistening 100 grammes of freshly ground ergot with 30 grammes of 40-per-cent. alcohol, packing firmly in a cylindrical percolator, adding sufficient 40-per-cent. alcohol to cover the menstruum, and, after macerating for 48 hours, enough more to exhaust the ergot and give 24 fl. oz., reserving the first 20½ fl. oz. of the percolate, adding 6 grammes of dilute hydrochloric acid to the remainder, evaporating to a soft extract, dissolving this in the reserved portion, and adding enough of the menstruum to make 24 fl. oz. [U. S. Ph.]; or by freeing 1 lb. of coarsely powdered ergot from its oil by passing through it 1 pint of ether, washing with ½ pint of water, digesting the marc for 12 hours in 3 pints of water at 160° F., expressing, straining, and evaporating the liquor over a water-bath to 9 fl. oz., adding, when cold, 8 fl. oz. of rectified spirit, allowing to stand for an hour, and filtering [Br. Ph.]. [B, 81 (*a*, 14).]—**Infusum ergotæ** [Br. Ph.]. Fr., *tisane de seigle ergoté.* Ger., *Mutterkornaufguss.* A preparation made by infusing for 30 minutes in a covered vessel 1 oz. of coarsely powdered ergot wi h 40 fl. oz. of boiling water, and straining. [B, 8 (*a*, 14).]—**Tinctura ergotæ** [Br. Ph.]. A tincture made by macerating 5 oz. of coarsely powdered ergot in 1 pint (imp.) of proof spirit, and percolating. [B, 81 (*a*, 14).]—**Vinum ergotæ** [U. S. Ph.]. Fr., *vin de seigle ergoté.* Ger., *Mutterkornwein.* A preparation made by moistening 15 parts of freshly powdered ergot with 4 of white wine containing one eighth of alcohol, packing in a cylindrical percolator, and gradually pouring a sufficient quantity of the mixture of wine and alcohol on it to make 100 parts of percolate. [B, 81 (*a*, 14).]

ERGOTÆTIA (Lat.), n. f. U^{5}r(e^{2}r)-go^{2}t(got)-e'(a^3'e^2)-shi^2(ti^2)-a^3. From *ergota*, ergot, and αἰτία, a cause. See Claviceps.—**E. abortifaciens.** Of E. J. Quekett, the *Claviceps purpurea.* [B, 5 (*a*, 24).]

ERGOTOLE, n. U^{5}rg'o^{2}t-ol. The trade name of a liquid preparation of ergot of rye made by Sharp and Dohme, of Baltimore; said to be unirritating when used hypodermically.

ERGOTATE, n. U^{5}r'go^{2}t-at. A salt of ergotic acid.

ERGOTÉ (Fr.), adj. E^{2}r-go-ta. 1. Pertaining to or containing ergot. [A, 385 (*a*, 21).] 2. See Ergoted.

ERGOTED, adj. U^{5}r'go^{2}t-e^{2}d. Affected with the ergot fungus (said of grain).

ERGOTIC ACID, n. U^{5}r-go^{2}t'i^{2}k. A volatile acid obtained by distilling ergot with sulphuric acid. It is supposed by Wenzell to be combined naturally with ecboline, ergotine, and potassium. ["Am. Jour. of Pharm.," May, 1864; B, 5 (*a*, 14).]

ERGOTIN, n. U^{5}r'go^{2}t-i^{2}n. Fr., *ergotine.* Ger., *E.* 1. A term for different extracts representing more or less of the active principle of ergot; also for watery extracts of ergot. They are complex, ill-defined, amorphous products, varying in their properties according to the mode of preparation. 2. Of the Br. Ph., Ger. Ph., and Sp. Ph., extractum ergotæ. [B, 81 (*a*, 14), 244 (*a*, 27).]—**Bonjean's e.** Fr., *ergotine de Bonjean.* Sp., *ergotina de Bonjean* [Mex. Ph.]. An aqueous extract of ergot prepared by evaporating 4 fl. oz. of extractum ergotæ fluidum to a syrupy consistence, adding 4 fl. oz. of rectified spirit, filtering, and evaporating to a soft extract. It is used hypodermically. [B, 8 (*a*, 27).]—**Wenzell's e.** See Ergotine (3d def.).—**Wiggers's e.** Fr., *ergotine de Wiggers.* Sp., *ergotina de Wiggers* [Mex. Ph.]. Resin of ergot,

ergotinine in combination with a resinous acid; a reddish-brown, acrid powder, $C_{100}H_{52}NO_6$, obtained by exhausting ergot with ether, extracting the e. with boiling alcohol, evaporating, and washing the product in water. It is slightly soluble in cold alcohol, insoluble in water and in ether. It is said to be a cardiac depressant and poison. [B, 81 (a, 14); L, 49 (a, 14); Tanret, "Bull. gén. de thérap.," March 30, 1882.]

ERGOTINE, n. U^{5}r'go^{2}t-en. 1. Of Farr, the zymotic principle of ergotism. [a, 18.] 2. See ERGOTIN. 3. An alkaloid, $C_{50}H_{52}N_2O_5$, found by Wenzell in ergot, combined with ergotic acid; an amorphous, brown, slightly bitter powder, soluble in water and in alcohol, insoluble in ether and in chloroform. It is probably identical with ecboline. [L, 49 (a, 14).]—**Dragées d'e** (Fr.). Sugar-coated pills containing Bonjean's ergotin. [L, 87 (a, 14).]—**Lavement d'e** (Fr.). A solution of 4 grammes of ergotin in 250 to 300 of water; used by Bonjean for rectal hæmorrhages. [B, 92 (a, 14).]

ERGOTINIA (Lat.), n. f. U^{5}r(e^{2}r)-go^{2}t(got)-i^{2}n'i^2-a^3. See ERGOTININE.

ERGOTINIC ACID, n. U^{5}r-go-ti^{2}n'i^{2}k. Fr., *acide ergotinique*. Ger., *Ergotinsäure*. An acid found in ergot; said to be hypnotic in large doses, but not to act like ergot. [R. Kobert, "Practitioner," Dec., 1885, p. 414.]

ERGOTININE, n. U^{5}r-go^{2}t'i^{2}n-en. Fr., *e.* Ger., *Ergotinin.* It., *ergotinina*. An alkaloid, $C_{35}H_{40}N_4O_6$, obtained by Tanret from ergot. It crystallizes in colorless, silky needles, that gradually become amorphous on exposure to light. [B, 244 (a, 27).]

ERGOTINUM (Lat.), n. n. U^{5}r(e^{2}r)-go-tin(ten)'u^{3}m(u^{4}m). 1. A preparation made by dissolving 38 grains of extract of ergot in 114 minims each of water and dilute alcohol; used hypodermically. 2. Of the Br., Ger., and Gr. Ph's., extractum ergotæ. 3. See ERGOTINE. [B, 95; "Proc. of the Am. Pharm. Assoc.," xxvii (a, 14).]—**E. citricum solutum.** Of Gehe, a preparation containing 1 part in 1,000 of Tanret's ergotinine. It has an odor of bitter almonds, an astringent, acidulous taste, and is used hypodermically. [Eulenburg, "Dtsch. med. Wchnschr.," 1883, 44 (B).]

ERGOTISM, n. U^{5}r'go^{2}t-i^{2}z'm. Lat., *ergotismus, morbus cerealis, rhaphania.* Fr., *ergotisme.* Ger., *Mutterkornkrankheit, Ergotismus, Kriebelkrankheit.* It., Sp., *ergotismo.* Poisoning with ergot. [D, 1.]—**Acute e.** Fr., *ergotisme aigu.* Ger., *acuter Ergotismus.* Poisoning by overdoses of ergot; characterized by eructations, nausea, vomiting, colic, diarrhœa, vertigo, headache, and muscular prostration. [A, 518; L, 20 (a, 14).]—**Chronic e.** Fr., *ergotisme chronique.* Ger., *chronischer Ergotismus.* E. due to the long-continued use of ergot as a drug or of bread made from ergoted grain. [L, 20 (a, 14).] See *Gangrenous e.* and *Spasmodic e.*—**Convulsive e.** Lat., *ergotismus convulsivus.* Fr., *ergotisme convulsif.* See *Spasmodic e.*—**E'brand** (Ger.). See *Gangrenous* ERGOTISM.—**Gangrenous e., Necrotic e.** Lat., *ergotismus gangrænosus.* Fr., *ergotisme gangréneux.* Ger., *Ergotinbrand.* Chronic e. characterized by gangrene of the extremities due to persistent constriction of the arteries, preceded by itching and cutaneous anæsthesia. [A, 518; L, 20 (a, 14).]—**Spasmodic e.** Lat., *ergotismus spasmodicus.* Fr., *ergotisme spasmodique.* Ger., *Kriebelkrankheit.* A form of chronic e. in which either there are general convulsions followed by death, or there are itching sensations, especially in the hands, which may occasionally go on to the gangrenous form, with occasional general convulsions, vomiting, colic, and diarrhœa. [A, 326 (a, 21); D, 20; L, 20, 41 (a, 14).]

ERGOTTED, adj. U^{5}r'go^{2}t-e^{2}d. See ERGOTED.

ERGRAUEN (Ger.), n. E^{2}r-gra^3'u^4-e^{2}n. See CANITIES.

ERGUSS (Ger.), n. E^{2}r-gus'. See ERGIESSUNG.

ERHABENHEIT (Ger.), n. E^{2}r-ha^{3}b'e^{2}n-hit. A prominence or protuberance. [L, 31.]—**Brustförmige E.** See CORPUS *albicans* (2d def.).—**Cerebrale'en des Hirnschädels.** The juga cerebralia. [L, 80.]—**Ringförmige E.** The protuberantia annularis. [L.]—**Seitliche E.** See EMINENTIA *collateralis.*—**Strickförmige E.** See *Restiform* BODY.

ERHALTEN (Ger.), **ERHALTUNG** (Ger.), n's. E^{2}r-ha^{3}lt'e^{2}n, -un^2. Reception, preservation, maintenance. [L, 80 (a, 14).]—**E. des Mittelfleisches.** The process of supporting the perinæum during labor.—**E'sbrille.** An eye-preserver; spectacles of colored glass. [L, 46 (a, 14).]—**E'skunst.** Preservative or preventive treatment. [L, 80 (a, 14).]—**E'smittel.** A preventive medicine. [a, 14.]

ERHÄNGEN (Ger.), n. E^{2}r-he^{2}n^2'e^{2}n. Suspension, asphyxia by hanging. [L, 80, 135 (a, 14).]

ERHÄRTUNG (Ger.), n. E^{2}r-he^{2}rt'un^2. Induration. [L, 80 (a, 14).]

ERHEBER (Ger.), n. E^{2}r-hab'e^{2}r. See ELEVATOR and LEVATOR.

ERHEBUNG (Ger.), n. E^{2}r-hab'un^2. Elevation. [L, 31.]—**E'swinkel.** See ANGLE *of elevation.*

ERHITZUNG (Ger.), n. E^{2}r-hi^{2}ts'un^2. See CALEFACTION.

ERHÖHUNG (Ger.), n. E^{2}r-hu^5'un^2. 1. An elevation, a prominence. [L, 43.] 2. A bringing up, rearing. [A. 523.]—**Hahnenkammähnliche E.** See CRISTA *galli.*—**Knopfförmige E.** See CONDYLE.

ERIANTHUS (Lat.), adj. E^{2}r-i^2-a^{2}n(a^{3}n)'thu^{3}s(thu^{4}s). From ἔριον, wool, and ἄνθος, a flower. Fr., *érianthe.* Ger., *federblumig, haariggeblümt.* Having the flowers covered with hairs; as a n. (Ger., *Federgras*), plume- (or beard-) grass; a genus of the *Andropogoneæ.* [B, 34, 42 (a, 24); L, 180.]

ERICA (Lat.), n. f. E^{2}r-i(e)'ka^3. Gr., ἐρείκη. Fr., *érica, bruyère.* Ger., *Heide, Heidekraut.* Heath, heather; a genus of ericaceous plants of the *Ericeæ.* The species are confined to the Old World, abounding especially in southern Africa. They are generally bitter and astringent, sometimes resinous and aromatic, but are little employed in medicine. In the pl., *ericæ*, ericaceous plants. The *Ericaceæ* (Fr., *éricacées;* Ger., *Ericaceen*) are a natural order of corollifloral dicotyledons; of De Candolle, a family of the *Dicotyledones monopetalæ* (*Crateriforæ* [Reichenbach], *Ericarieæ* [Dumortier]); of Don, an order of the *Calycifloræ;* of Bentham and Hooker, an order of the *Ericales.*—**E. arborea.** Ger., *Baumheide, weissblühende Heide.* A species found in southwestern Europe, northern Africa, and the Canary Islands; formerly famous as a lithontriptic. [B, 46, 48, 49 (a, 14).]—**E. carnea.** Fr., *bruyère précoce.* A European species; a diuretic and diaphoretic. [B, 173 (a, 24).]—**E. cinerea.** Fr., *bruyère cendree, bregeotte bucane.* Ger., *aschgraue Heide.* Scotch heath, cat-heather; a species having the same properties as *E. carnea.* [B, 173 (a, 24).]—**E. herbacea.** See *E. carnea.*—**E. humilis, E. mutabilis.** See *E. cinerea.*—**E. vulgaris.** See CALLUNA *atlantica.*

ERICACEOUS, adj. E^{2}r-i^2-ka'shu^{3}s. Lat., *ericaceus* (from ἐρείκη, heath). Fr., *éricacé.* Ger., *heideartig.* Sp., *ericáceo.* Resembling the genus *Erica*, belonging to the *Ericaceæ.*

ERICALES (Lat.), n. E^{2}r-i-kal(ka^{3}l)'ez(as). The *Ericales*, or erical alliance (Lat., *nixus ericalis*), of Lindley are: 1. An alliance of the *Polycarpæ*, subsequently an alliance of hypogynous exogens (*nixus exogenarum hypogynarum*). 2. Of Bentham and Hooker, a cohort of the series *Heteromeræ* of the *Gamopetalæ.* The *Ericarieæ* are an order of the *Torocoronæ.* The *Ericeæ* (Fr., *éricées*) are: Of R. Brown and of Sprengel, a family of ericaceous plants; of Agardh, an order of the *Aridifoliæ;* of Reichenbach, a family of the *Crateriforæ*, or subsequently a division of the *Ericaceæ;* of Link, an order of the *Hypanthæ;* of Lindley, an order of the *Monopetalæ*, or subsequently of the *Ericales;* of Bartling, an order of the *Ericineæ;* and of Bentham and Hooker and others, a tribe of the *Ericaceæ.* The *Ericidæ* of Lindley are a tribe of the *Ericeæ.* The *Ericinæ* (Fr., *éricinées*) are: Of Gray, a family of the *Calycifloræ;* of Endlicher, a suborder of the *Ericaceæ.* The *Ericineæ* are: Of Jussieu, a family of the *Pericorolleæ;* of De Candolle, an order of the *Calycifloræ;* of Dumortier, a family of the *Calicitubiæ;* of Wood, a suborder of the *Ericaceæ.* [B, 19, 34, 42, 121, 170 (a, 24).]

ERICANTHIN, n. E^{2}r-i^{2}k-a^{2}nth'i^{2}n. Fr., *éricanthine.* A product of the action of sulphuric acid on eritannic acid. [A, 385 (a, 21).]

ERICERON (Lat.), **ERICERUM** (Lat.), n's n. E^{2}r-i^2-se(ka)'-ro^{2}n, -ru^{3}m(ru^{4}m). Gr., ἐρικηρόν. Of Aetius, a kind of collyrium; probably made from a species of *Erica.* [L, 50, 94.]

ERICETINUS (Lat.), adj. E^{2}r-i(e)-se^{2}t(ke^{2}t)-i(e)'nu^{3}s(nu^{4}s). From ἐρείκη, heath. Fr., *éricétin.* Of plants, parasitic on heath. [L, 180.]

ERICIATUS (Lat.), adj. E^{2}r-i(e)-si^2(ki^2)-a(a^3)'tu^{3}s(tu^{4}s). From ἐρείκη, heath. Fr., *hérissoné.* Ger., *rauhhaarig.* In botany, covered with many slender flexible spines or prickles. [B, 1 (a, 24).]

ERICIN, n. E^{2}r'i^2-si^{2}n. Fr., *éricine.* A dye obtained by treating the stems of the common heath and the wood of different varieties of poplar with a hot solution of alum. ["Chem. News," Mar., 1880; "Proc. of the Am. Pharm. Assoc.," xxviii (a, 14).]

ERICINOL, n. E^{2}r-i^{2}s'i^{2}n-o^{2}l. Fr., *éricinol.* Ger., *E.* A substance, $C_{10}H_{16}O$, obtained by heating ericolin with dilute sulphuric acid. [A, 385 (a, 21); L, 30, 41, 49 (a, 14).]

ERICINONE, n. E^{2}r-i^{2}s'i^{2}n-on. Fr., *éricinone.* Ger., *Ericinon.* Of Uloth, a crystalline substance, $C_6H_8O_2$, obtained by dry distillation of the aqueous extracts of various species of the *Ericineæ.* [B, 244 (a, 27); "Proc. of the Am. Pharm. Assoc.," ix (a, 14).]

ERICOLIN, n. E^{2}r-i^{2}k'o-li^{2}n. Fr., *éricoline.* Ger., *Ericolin.* It., Sp., *ericolina.* Of Rochleder and Schwartz, a resinous powder, $C_{34}H_{56}O_{21}$, obtained from various plants of the *Ericaceæ.* [A, 518; L, 30, 41, 44, 49 (a, 14).]

ERICOPHILUS (Lat.), adj. E^{2}r-i(e)-ko^{2}f'i^{2}l-u^{3}s(u^{4}s). From ἐρείκη, heath, and φιλεῖν, to love. Fr., *éricophile.* Of plants, parasitic on heather. [L, 41, 180.]

ERICU [Malay], n. The *Calotropis gigantea.* [B, 172 (a, 24).]

ERIGENS (Lat.), adj. E^{2}r'i^2-je^{2}nz(gans). Causing erection. [L, 44, 107.] See NERVI *erigentes.*

ERIGERON [U. S. Ph.] (Lat.), n. m. E^{2}r(ar)-i^{2}j(i^{2}g)'e^{2}r-o^{2}n(on). Gen., *erigeront'os (-is)*, also erroneously given as *erig'eri.* Gr., ἠριγέρων (from ἦρ, the spring, and γέρων, an old man, because it soon becomes hoary). Fr., *érigéron, vergerette.* Ger., *Berufkraut, Flöhkraut.* Sp., *olivardilla.* 1. Of Linnæus, a widely distributed genus of the *Compositæ*, tribe *Asteroideæ.* 2. Of the U. S. Ph., flea-bane; the herb of *E. heterophyllum* and *E. philadelphicum*, used in dropsical and nephritic diseases. The *Erigereæ* (Fr., *érigérées*) are: Of Cassini, a subdivision of the *Baccharideæ;* of Reichenbach, a section of the *Astereæ genuinæ;* of De Candolle and others, a subdivision of the *Astereæ;* of Lindley, a subtribe of the *Asteroideæ;* of Schultz, a subdivision of the *Astereæ.* The *Erigerineæ* are a tribe of the *Corymbiferæ.* The *Erigeroneæ* are a subdivision of the *Asteraceæ.* [B, 5, 34, 42, 121, 170, 173, 180 (a, 24).]—**E. acris.** Fr., *érigéron âcre.* Ger., *scharfes Berufkraut, blaue Dürrwurz.* A species formerly in use under the name of *herba conyzæ cæruleæ* (seu *minoris*, seu *asteris conyzoidis*, seu *erigeri*, seu *senecionis cærulei*), and still employed in domestic practice in Germany, in pectoral complaints, suppressed menstruation, dysuria, etc. [B, 173, 180 (a, 24).]—**E. affinis.** Sp., *peritre del pais* [Mex. Ph.], *chilcuam.* A species growing in the valley of Mexico, where the root is used as a sialagogue. [B, 224 (a, 14); "Proc. of the Am. Pharm. Assoc.," xxiv (a, 14).]—**E. ambiguus.** See *E. strigosus.*—**E. annuus.** A species found in North America and in Europe; one of the sources of the e. of the U. S. Ph., 1870. [B, 5, 42, 215 (a, 24).]—**E. bellidifolius.** Robin's plantain; a species found in the United States. [B, 215; L, 107 (a, 14).]—**E. canadense.** Canadian flea-bane, horse- (or squaw-) weed; a species common throughout the northern and middle United States, and formerly one of the sources of the e. of the U. S. Ph. It is a tonic, diuretic, and astringent. The oil is used as an

internal hæmostatic and in gonorrhœa, and is popularly reputed to control uterine hæmorrhage and quicken uterine contraction. [B, 5, 180 (*a*, 24); "Proc. of the Am. Pharm. Assoc.," xiv (*a*, 14).]—**E. cochin-chinensis.** A species used in Cochin-China as an emmenagogue. [B, 180 (*a*, 24).]—**E. graveolens.** The *Inula graveolens.* [B, 180 (*a*, 24).]—**E. heterophyllus.** See *E. annuus.*—**E. integrifolius.** See *E. strigosus.*—**E. linosyris.** See ASTER *linosyris.* [B, 42, 214.]—**E. paniculatus.** See *E. canadensis.*—**E. philadelphicus, E. purpureus.** 1. Of Linnæus and Aiton, one of the sources of the e. of the U. S. Ph., 1870; abundant in the middle United States. Its oil is more viscid than the oil of *E. canadensis,* has a higher sp. gr., and contains more oxygen. 2. Of Loureiro, the *E. cochin-chinense.* [B, 5, 180 (*a*, 24).]—**E. pusillus.** A variety of *E. canadensis;* of Nuttall, a distinct species. [B, 5 (*a*, 24).]—**E. strigosus.** A North American species resembling *E. annuus.*—**E. tricuneatus.** A species perhaps identical with *Baccharis cuneata* (*conferta*). [B, 214.]—**E. viscosus.** See INULA *viscosa.*—**E. vulgaris.** See *E. acris.*—**Extractum erigerontis canadensis fluidum** [U. S. Ph., 1870], **Extractum erigerontis fluidum.** An alcoholic extract of the herb of *E. canadensis.* [B, 81 (*a*, 14).]—**Herba erigeri.** The herb of *E. acris.*—**Oil of e.** Lat., *oleum erigerontis* [U. S. Ph.] (*canadense* [U. S. Ph., 1870]). Fr., *huile d'érigéron.* Ger., *Flöhkrautöl.* Oil of (Canada) flea-bane, obtained by distillation of the fresh herb of *E. canadense* (*q. v.*). [B, 5.]

ERIGMA (Lat.), **ERIGME** (Lat.), n's n. and f. E^{2}r-i^{2}g'ma^3, -me(ma). Gen., *erig'matos* (*-is*), *-ig'mes.* Gr., ἔριγμα, ἐρίγμη. Any leguminous fruit, decorticated and broken into pieces; of Hippocrates and Foesius, bruised beans. [A, 325 (*a*, 21); B, 144, 200.]

ÉRIGNE (Fr.), n. A-ren-y'. Lat., *uncus, uncinus.* A hook used in operations and dissections to keep certain parts separated. [L, 41, 87, 95 (*a*, 14).]—**E. à branches divergentes.** A hook with divergent branches to take hold of hæmorrhoids, etc. [L, 87 (*a*, 14).]—**E. à chaine.** See *Chain*-HOOK. [L, 49, 87 (*a*, 14).]—**E. à coulisse.** A hook with sliding protecting blades, used to hold a fold of mucous membrane which is to be caught by the galvano-cautery loop. [L, 87 (*a*, 14).]

ERIMOÏDES, n. Fr., *érimoïdes.* Of Paracelsus, a sandy urinary deposit. [L, 41, 94 (*a*, 14).]

ÉRINACE (Fr.), n. A-re-na^{3}s. The *Hydnum repandum.* [B, 121 (*a*, 24).]

ERINACEUS (Lat.), adj. E^{2}r-i^2-na(na^3)'se^2(ke^2)-u^{3}s(u^{4}s). 1. Of Dillenius, a genus of *Fungi,* comprising the *Odontia* and in part the *Sistotrema* of Persoon. 2. The hedgehog. [B, 121 (*a*. 24); L, 94, 105 (*a*, 14).]—**E. combustus** [Sp. Ph., 1798, Palat. Disp., 1764, Würt. Ph., 1798]. Ashes of the hedgehog; formerly used as a specific for incontinence of urine and for dropsy. [B, 119, 180 (*a*, 14).]

ERINEOS (Lat.), n. m. E^2-rin(ren)'e^2-o^{2}s. Gr., ἐρινεός. The wild fig-tree (*Caprificus*); according to others the *Campanula rapunculus.* [L, 84, 94, 119 (*a*, 14).]

ERINEUM (Lat.), n. n. E^{2}r-i^{2}n'e^2-u^{3}m(u^{4}m). Fr., *érinéon.* Of Persoon, a genus of parasitic *Fungi* supposed to be concerned in the production of a sort of mildew in plants, now known to be due to an abnormal development of the cells of the epidermis, as in the *Amentaceæ, Aceraceæ, Rosaceæ,* etc. [B, 19; Griffith and Henfrey (*a*, 24).]

ERINNERUNG (Ger.), n. E^2-ri^{2}n'e^{2}r-un^2. Remembrance. [*a*, 14.]—**E'saphasie.** See *Amnestic* APHASIA.—**E'svermögen.** Memory. [L, 80.]

ERIOBOTRYA (Lat.), n. f. E^{2}r-i^2-o(o^3)-bo^{2}t'ri^2(ru^6)-a^3. From ἔριον, wool, and βότρυς, a bunch of grapes. Fr., *ériobotrye.* Ger., *Wollmispel.* A genus of the *Rosaceæ,* tribe *Pomeæ.* [B, 42 (*a*, 24).]—**E. japonica.** Fr., *ériobotrye du Japon, bibacier, bibassier, neflier du Japon.* Ger., *japanische Wollmispel.* A species, the fruit of which is as large as a cherry and of a very pleasant taste, from which a wine is made. The leaves are used in China as an astringent and tonic in atonic dyspepsia, etc. [B, 173, 180 (*a*, 24); J. M. Maisch, "Am. Jour. of Pharm.," May, 1886, p. 250.]

ERIOCALYX (Lat.), adj. E^{2}r-i^2-o^{2}k'a^3-li^{2}x(lu^{6}x). Gen., *eriocal'ycos* (*-is*). From ἔριον, wool, and κάλυξ, a calyx. Fr., *ériocalicé.* Having a hairy calyx; as a n. (Fr., *ériocalyx*), the genus *Aspalathus.* [B, 121 (*a*, 24).]

ERIOCARPUS (Lat.), adj. E^{2}r-i^2-o(o^3)-ka^{3}rp'u^{3}s(u^{4}s). From ἔριον, wool, and καρπός, a fruit. Fr., *ériocarpé.* Ger., *wollfruchtig.* Having hairy fruit; as a n., the genus *Sarcolæna.* [B, 121 (*a*, 24).]

ERIOCAULIS (Lat.), adj. E^{2}r-i^2-o(o^3)-ka^{4}l'(ka^{3}u^{4}l)-i^{2}s. From ἔριον, wool, and καυλός, a stem. Fr., *ériocaule.* Ger., *wollstämmig.* Having a hairy stem. [L, 180.]

ERIOCAULON (Lat.), n. n. E^{2}r-i^2-o(o^3)-ka^{4}l'(ka^{3}u^{4}l)-o^{2}n. Pipewort; a genus of the *Eriocauleæ.* The *Eriocaulaceæ* (Fr., *ériocaulacées*) are an order of the *Glumales.* The *Eriocauleæ* (Fr., *ériocaulées*), *Eriocaulonaceæ,* or *Eriocauloneæ* are: of Richard, a family of hypogynous monocotyledons separated from the *Restiaceæ.* [B, 42, 121, 170 (*a*, 24).]—**E. odoratum.** An East Indian species having an odor like that of *Anthemis nobilis.* [B, 245.]—**E. officinale.** An Asiatic species used in domestic medicine in China. [B, 245.]—**E. robustum.** An East Indian species believed to be used in domestic medicine. [B, 245.]—**E. setaceum.** An East Indian species employed as a remedy for scabies. [B, 245.]—**E. wallichianum.** An East Indian species said to be used medicinally. [B, 245.]

ERIOCEPHALUS (Lat.), adj. E^{2}r-i^2-o(o^3)-se^{2}f(ke^{2}f)'a^{2}l(a^{3}l)-u^{3}s(u^{4}s). From ἔριον, wool, and κεφαλή, the head. Fr., *ériocéphalé.* Ger., *wollköpfig.* Having a hairy top; as a n., a genus of the *Compositæ,* tribe *Anthemideæ* (of Baillon, a section of the genus *Athanasia*). The *Eriocephaleæ* are a division of the *Senecionideæ.* [B, 42, 46, 121 (*a*, 24).]—**E. africanus.** Fr., *ériocéphalé d'Afrique.* A species employed at the Cape of Good Hope in dropsy. [B, 173 (*a*, 24).]—**E. umbellulatus.** A species growing in southern Africa, said to be diuretic. [L, 107.]

ERIOCLADUS (Lat.), adj. E^{2}r-i^2-o^{2}k'la^{2}d(la^{3}d)-u^{3}s(u^{4}s). From ἔριον, wool, and κλάδος, a branch. Fr., *érioclade.* Ger., *wollästig.* Having hairy branches. [L, 180.]

ERIOCOMOUS, adj. E^{2}r-i^2-o^{2}k'om-u^{3}s. From ἔριον, wool, and κόμη, hair. Fr., *ériocome.* Ger., *vliesshaarig.* Abounding in or covered with fine hair; villous. [*a*, 27.]

ERIODENDRON (Lat.), n. n. E^{2}r-i^2-o(o^3)-de^{2}n'dro^{2}n. From ἔριον, wool, and δένδρον, a tree. Fr., *ériodendron.* Ger., *Wollbaum.* The silk cotton-tree; a genus of the *Malvaceæ.* [B, 42, 121, 275 (*a*, 24).]—**E. anfractuosum.** Fr., *cotonnier mapou.* A species having two varieties, *E. anfractuosum indicum* (see *E. orientale*) and *E. anfractuosum caribæum* (see *E. occidentale*). [B, 46 (*a*, 14); B, 172 (*a*, 24).]—**E. leiantherum.** Sp., *ceiba espinosa.* A species used like *E. occidentale.* [J. M. Maisch, "Am. Jour. of Pharm.," Feb., 1886, p. 72.]—**E. occidentale.** Fr., *ériodendron occidentale.* Ger., *vestindischer Wollbaum.* Sp., *ceiba, pechote* [Mex. Ph.]. The West Indian silk cotton-tree; a species from 50 to 100 feet high, the root of which is purgative, emetic, and diuretic. The bark, in infusion, is used in skin diseases, the leaves, fruit, and seed are used externally as emollients, the ash from the cotton around the seed is employed as a styptic, and the gum from the stem is used in enteritis. [B, 173, 180, 224, 275 (*a*, 24); J. M. Maisch, *l. c.*]—**E. orientale.** Fr., *ériodendron orientale.* Ger., *ostindischer Wollbaum.* Malay, *pania, paniala.* Hindoo, *huttian.* The God-tree, East Indian silk cotton-tree; a species from 50 to 60 feet high, with seeds imbedded in silky cotton. Its gum, with the addition of spices, is used in intestinal diseases, and an oil is obtained from the seeds. The young leaves are substituted by the natives for okra. The root-bark is used as an emetic and antispasmodic. [B, 172, 180, 275 (*a*, 24).]

ERIODICTYON (Lat.), n. n. E^{2}r-i^2-o(o^3)-di^{2}k'ti^2(tu^6)-o^{2}n. From ἔριον, wool, and δίκτυον, a net. A genus of the *Hydrophyllaceæ.* [*a*, 24.]—**E. californicum, E. glutinosum.** California tarbush, mountain-balm, bear's weed; consumptive's weed; a species found in California, containing resins, a bitter extract, tannic acid, and a volatile oil; much used in a syrup for disguising the taste of quinine. It has been used in tincture with benefit in the treatment of asthma, chronic bronchitis, etc., and is considered by the Mexicans and Indians a cure for consumption. [B, 5, 275 (*a*, 24); "Proc. of the Am. Pharm. Assoc.," xxiv (*a*, 14).]—**E. tomentosum.** A species found in California; used by the Spaniards, under the name of *yerba santa,* as a pectoral. [B, 5, 66 (*a*, 24).]

ERIOGLOSSUM (Lat.), n. n. E^{2}r-i^2-o(o^3)-glo^{2}s(glos)'u^{3}m(u^{4}m). From ἔριον, wool, and γλῶσσα, the tongue. Fr., *érioglosse.* 1. Of Richard, a genus of the *Sapindaceæ,* tribe *Sapindeæ.* 2. The seeds of *Sterculia scaphigera* (called by the Chinese *ta-haitszl* and by the Malays *boa-tam-paijang*), formerly used in diarrhœa and dysentery. [B, 38, 48 (*a*, 14); "Proc. of the Am. Pharm. Assoc.," xxvi (*a*, 14).]

ERIOLEPIS (Lat.), n. f. E^{2}r-i^2-o^{2}l'e^{2}p-i^{2}s. Gen., *eriolep'idos* (*-is*). From ἔριον, wool, and λεπίς, a scale. See CNICUS.—**E. lanigera.** The *Cnicus eriophorus.* [B, 180 (*a*, 24).]

ERIOLOMUS (Lat.), adj. E^{2}r-i^2-o(o^3)-lom'u^{3}s(u^{4}s). From ἔριον, wool, and λῶμα, a fringe. Fr., *ériolome.* Ger., *wollrandig.* Having a hairy border. [L, 180.]

ERIOMETER, n, E^{2}r-i^2-o^{2}m'e^{2}t-u^{5}r. Lat., *eriometrum* (from ἔριον, wool, and μέτρον, a measure). Fr., *ériomètre.* Of Young, an instrument for measuring the diameter of fibres or minute objects by that of the colored rings produced by their diffraction of light. [L, 41, 56, 180.]

ERIOPETALUS (Lat.), adj. E^{2}r-i^2-o(o^3)-pe^{2}t'a^{2}l(a^{3}l)-u^{3}s(u^{4}s). From ἔριον, wool, and πέταλον, a petal. Fr., *ériopétale.* Ger., *wollblumenblättrig.* Sp., *eriopétalo.* Having hairy petals. [L, 180.]

ERIOPHORUM (Lat.), n. n. E^{2}r-i^2-o^{2}f'o^{2}r-u^{3}m(u^{4}m). From ἔριον, wool, and φορεῖν, to bear. Fr., *ériophoron, linaigrette.* Ger., *Wollgras.* It., *erioforo.* Sp., *erióforo.* Cotton-grass, cotton-rush, wild cotton, etc.; a genus of *Cyperaceæ* of the tribe *Scirpeæ.* [B, 42, 275 (*a*, 24).]—**E. alpinum.** Fr., *ériophoron des Alpes.* A species the cotton of the seed of which is used as an application to burns. [B, 173 (*a*, 24).]—**E. angustifolium, E. latifolium.** Varieties of *E. polystachyum.* [B, 128 (*a*, 24).]—**E. polystachyum.** Fr., *chenvelle chevelu des pauvres, linaigrette, lindes marais.* A European species, used as a laxative. [B. 88, 173, 180, 275 (*a*, 24).]

ERIOPHORUS (Lat.), adj. E^{2}r-i^2-o^{2}f'o^{2}r-u^{3}s. Gr., ἐριοφόρος (from ἔριον, wool, and φορεῖν, to bear). Fr., *ériophore.* Ger., *wolltragend.* It., *erioforo.* Sp., *erióforo.* Having cottony hairs; as a n., the genus *Andryala.* [B, 121 (*a*, 24); L, 50, 180 (*a*, 14).]—**E. javanna.** The *Eriodendron orientale.* [B, 173.]

ERIOPHYLLUS (Lat.), adj. E^{2}r-i^2-o(o^3)-fi^{2}l(fu^{6}l)'u^{3}s. From ἔριον, wool, and φύλλον, a leaf. Fr., *ériophyllé.* Ger., *wollblättrig.* Having hairy leaves. [L, 41, 180 (*a*, 14).]

ERIOPILUS (Lat.), adj. E^{2}r-i^2-o^{2}p'i^{2}l-u^{3}s(u^{4}s). From ἔριον, wool, and *pilus,* a hair. Fr., *ériopile.* Ger., *wollbalgig.* Having hairy glumes. [L, 180.]

ERIOPODUS (Lat.), adj. E^{2}r-i^2-o^{2}p'o^{2}d-u^{3}s(u^{4}s). From ἔριον, wool, and πούς, a foot. Fr., *ériopode.* Ger., *wollfüssig.* Having hairy paws. [L, 41, 180 (*a*, 14).]

ERIOSPERMUM (Lat.), n. n. E^{2}r-i^2-o(o^3)-spu^{5}rm(spe^{2}rm)'u^{3}m(u^{4}m). The typical genus of the *Eriospermeæ* or *Eriosperminæ* (a group or series of the *Liliaceæ*). [B, 121 (*a*, 24).]

ERIOSPERMUS (Lat.), adj. E^{2}r-i^2-o(o^3)-spu^{5}rm(spe^{2}rm)'u^{3}s(u^{4}s). From ἔριον, wool, and σπέρμα, a seed. Fr., *ériosperme.* Ger., *wollsamig.* Having hairy seeds. [L, 41. 180 (*a*, 14).]

ERIOSTACHYUS (Lat.), adj. E^{2}r-i^2-o(o^3)-sta^{3}k(sta^{3}ch^2)'i^2(u^6)-u^{3}s(u^{4}s). From ἔριον, wool, and στάχυς, a spike. Fr., *ériostachyé.* Ger., *wollährig.* Having wooly spikes. [L, 180.]

ERIOSTEMONIS (Lat.). **ERIOSTEMUS** (Lat.), adj's. E^{2}r-i^2-o(o^3)-ste(sta)-mon'i^{2}s, -ste(sta)'mu^{3}s(mu^{4}s). From ἔριον, wool, and στήμων or στῆμα, a filament. Fr., *ériostémone*. Ger., *wollstaubfadig*. Having hairy stamens. [L, 41, 180 (α, 14).]

ERIOSTOME, adj. E^{2}r'i^2-o-stom. From ἔριον, wool, and στόμα, the mouth. Fr., *ériostome*. Ger., *wollmaulig*. Having a hairy mouth or opening. [L, 41 (α, 14).]

ERIOXYLUM (Lat.), n. n. E^{2}r-i^2-o^{2}x'i^{2}l(u^{6}l)-u^{3}m(u^{4}m). From ἔριον, wool, and ξύλον, wood. In the older pharmacopœias, cotton-wool. [B, 97, 119 (α, 14).]

ERIRIBA (Port.), n. A-re-re'ba^3. In Brazil, the *Centralobium robustum*. [B, 121 (α, 24).]

ERISMA (Lat.), n. n. E^{2}r-i^{2}z(i^{2}s)'ma^3. Gen., *eris'matos (-is)*. Fr., *érisme* (2d def.). 1. Of Rudge, a genus of tropical American trees, of the *Vochysiaceæ*. 2. The rhachis or axis of grasses. The *Erismaceæ* of Dumortier (the *Erismeæ* of Jussieu) are a tribe of the *Vochysiaceæ*, consisting of the genus *E*. [B, 19, 170 (α, 24).]—**E. japura.** Of Spruce, the *japura* of Brazil; a tall species growing on the upper Rio Negro and the Uaupes. The kernels are eaten, and also furnish a sort of butter of disagreeable odor but pleasant taste. [B, 19 (α, 24).]

ERISTALIS (Lat.), n. f. E^{2}r-i^{2}s-tal(ta^{3}l)'i^{2}s. Fr., *éristale*. A genus of insects of the *Syrphidæ*. The larvæ of two species (*E. tenax* and *E. pendulum*) have been found in human urine. [A, 385 (α, 21); L, 16, 196.)

ERITANNIC ACID, n. E^{2}r-i^2-ta^{2}n'i^{2}k. Fr., *acide éritannique*. A variety of tannic acid, $C_{14}H_{16}O_7$, derived from *Erica herbacea*. [B, 244 (α, 27).]

ERITHACE (Lat.), **ERITHALE** (Lat.), n's f. E^{2}r-i^{2}th'a^{2}s(a^{3}k)-e(a), -a(a^3)-le(la). Gen., *eri'thaces, -ales*. Gr., ἐριθάκη. See *Bee-*BREAD.

ERITHALES (Lat.), n. n. E^{2}r-i^{2}th'a^{2}l(a^{3}l)-ez(e^{2}s). Gen., *erith'alis*. Gr., ἐριθαλές. Fr., *érithale*. 1. A genus of the *Rubiaceæ*, tribe *Chiococceæ*. 2. The genus *Timonius*. [B, 42, 121 (α, 24).]—**E. fruticosum.** Fr., *épanille, bois-chandelle* (ou *-citron*, ou *-jasmin*, ou *-jaune*). A species found in the West Indies. The resin is employed in nephritic complaints; the wood is used by the natives for torches, in powder as a perfume, and in decoction for ophthalmia and cholera morbus. [B, 88, 173 (α, 24).]

ERITRICHIUM (Lat.), n. n. E^{2}r-i^2-tri^{2}k(tri^{2}ch^2)'i^2-u^{3}m(u^{4}m). A genus of the *Boragineæ*, tribe *Borageæ*. [B, 42, 121 (α, 24).]—**E. gnaphalioides.** Sp., *té de burro*. A species growing in Chili; used in infusion as a stomachic. ["Proc. of the Am. Pharm. Assoc.," xxiv (α, 14).]

ERKÄLTUNG (Ger.), n. E^{2}r-kalt'un^2. Refrigeration, chilling, a taking cold (see COLD). [D.]—**E'sapparat.** A refrigerating apparatus.

ERK-EL-AGRAB, n. In Egypt, a shrub found in Kordofan. The wood, pulverized and moistened, is applied to scorpion-bites. [L, 41 (α, 14).]

ERKELKRAUT (Ger.), n. E^{2}rk'e^{2}l-kra^3-u^{4}t. The *Lathyrus tuberosus*. [L, 43.]

ERKENNUNG (Ger.), n. E^{2}r-ke^{2}n'un^2. See DIAGNOSIS.—**E's-zeichen.** A diagnostic sign. [A, 521, 523.]

ERKRANKUNG (Ger.), n. E^{2}r-kra^{3}n^{2}k'un^2. The state of being sick, a disease. [B.]—**Allgemeine'.** A general disease. [B.]—**E'sdisposition.** A tendency to a certain form of disease. [L.]—**E'sherd.** The seat or focus of a disease. [A, 521, 523.]

ERLACHBAD (Ger.), n. E^{2}r'la^{3}ch^2-ba^{3}d. A place in Austria where there are thermal baths. [A, 385 (α, 21).]

ERLACHE (Fr.), n. E^{2}r-la^{3}sh. The *Eryngium campestre*. [B, 173 (α, 24).]

ERLAU (Magyar), n. E^{2}r'la^4-u^4. A place in Hungary where there is a warm saline spring. [A, 319 (α, 21); L, 49.]

ERLE (Ger.), n. E^{2}rl'e^2. The ALNUS.—**E'nbaum.** See ALNUS *glutinosa*.—**E'nblätter.** See *Folia* ALNI.—**E'nrinde.** See *Cortex* ALNI.—**Gemeine E.** See ALNUS *glutinosa*.

ERLENBAD (Ger.), n. E^{2}rl'e^{2}n-ba^{3}d. A place in the grand duchy of Baden, Germany, where there is a cold gaseous and saline spring. [L, 49, 87 (α, 14).]

ERMATTUNG (Ger.), n. E^{2}r-ma^{3}t'tun^2. Lassitude. [A, 521.]

ERMESIA (Lat.), n. f. U^{5}r(e^{2}r)-mes(me^{2}s)'i^2-a^3. Gr., ἑρμεσία. A mixture of honey, myrrh, saffron, and palm-oil, beaten together and mixed with milk; formerly supposed to be conducive to the begetting of strong and handsome children. [L, 94.]

ERMETSCHWYL (Ger.), n. E^{2}r'me^{2}t-shvu^{6}l. A place in the canton of Saint-Gallen, Switzerland, where there is a sulphurous spring, with bathing establishments. [L, 135 (α, 14).]

ERMINE-CHOP, n. U^{5}rm'i^{2}n-cho^{2}p. The *Mesembryanthemum ermininum*. [B, 275 (α, 24).]

ERMION, n. U^{5}r'mi^2-o^{2}n. The *Eryngium campestre*. [B, 88 (α, 14).]

ERMÜDUNG (Ger.), n. E^{2}r-mu^{6}d'un^2. Fatigue, exhaustion. ["Arch. f. Anat. u. Physiol.," 1877, p. 365 (L).]—**E'sgefühl, E's-sinn.** A sense of fatigue. [Mendel (A, 319).]—**E'sstoff.** The catabolic substance formed in a muscle during its activity which is supposed to give rise to the feeling of fatigue. [J, 57.]

ERNABRUNNEN (Ger.), n. E^{2}rn'a^3-brun-ne^{2}n. A place in the duchy of Arnhalt-Bernburg, Germany, where there is a spring containing sodium chloride and potassium, magnesium, and calcium carbonates and phosphates. [L, 105 (α, 14).]

ERNÄHREND (Ger.), adj. E^{2}r-nar'e^{2}nd. Nutritive. [L, 80.]

ERNÄHRUNG (Ger.), n. E^{2}r-nar'un^2. See NUTRITION.—**E'sarterie.** A nutrient artery. [α, 29.]—**E'sbahn.** A nutritive tract. [A, 521.]—**E'scentrum.** Lit., a nutrient centre; a nerve centre considered as the generator of nervous force. [Gruenhagen (K).]—**E'sfluidum, E'sflüssigkeit.** A nutritive fluid or juice. ["Arch. f. Anat. u. Physiol.," 1846, 1853 (L).]—**E'sgefäss.** A nutrient vessel. [A, 521, 523.]—**E'sgeschäft.** See NUTRITION.—**E'sinstinct.** The appetite for food. [A, 523.]—**E'skanal.** A nutrient canal. [L, 115.]—**E'skraft.** Nutritive power. [L, 80.]—**E'skrankheit.** A disease due to malnutrition. [A, 521.]—**E'skunde, E'slehre.** See DIETETICS.—**E'sloch.** A nutrient foramen. [L, 31.]—**E'splasma.** A layer of protoplasm between the ectoplasm and the endoplasm; described by Brass and supposed to be specially concerned with the nutrition of the cell. [J, 61.]—**E'squelle.** A source of nutriment. [A, 521.]—**E'ssaft.** See *E'sflüssigkeit*.—**E's-schlagader.** A nutrient artery. [L, 115.]—**E'sschlauch.** A feeding-tube. [A, 521.]—**E'ssinn.** See *Nutritive* SENSE.—**E'sstoff.** Nutritive material.—**E'sstörung.** A disturbance of nutrition. [A, 521, 523.]—**E'sthätigkeit.** Nutritive power. [L, 80.]—**E'strieb.** See *E'sinstinct*.—**E'sverhältniss.** Nutritive value. [A, 521.]—**E'svorgang.** The nutritive process. [K.]—**E'szustand.** The nutritive condition of an organism. [α, 18.]

ERNÄHRZELLE (Ger.), n. E^{2}r-nar'tse^{2}l-le^2. See *Yolk-*CELL (2d def.).

ERNEUTE (Fr.), n. E^{2}r-nu^{5}t. The *Carum bulbocastanum*. [L, 41, 42.]

ERNFERN, n. U^{5}rn'fu^{5}rn. The *Pteris aquilina*. [A, 505 (α, 21).]

ERNIEDRIGER (Ger.), n. E^{2}r-ned'ri^{2}g-e^{2}r. A depressor muscle. [L, 80.]

ERNIEDRIGUNG (Ger.), n. E^{2}r-ned'ri^{2}g-un^2. Depression, prostration. [L, 43.]

ERNOTE (Fr.), **ERNOTTE** (Fr.), n's. E^{2}r-not. The *Carum bulbocastanum*. [B, 121, 173 (α, 24).]

ERNSDORF (Ger.), n. E^{2}rns'do^{2}rf. A place in Silesia where there are bathing and whey-cure establishments. [A, 319 (α, 21).]

ERNTE-GRASMILBE (Ger.), **ERNTEMILBE** (Ger.), n's. E^{2}rn'te^2-gra^{3}s"mi^{2}lb-e^2, e^{2}rn'te^2-mi^{2}lb-e^2. The *Leptus autumnalis*. [L, 57.]

ERNUT, n. U^{5}r'nu^{3}t. The *Carum flexuosum*. [A, 505 (α, 21).]

ERODE, n. E-rod'. The *Atriplex hortensis*. [α, 24.]

ERODED, adj. E-rod'e^{2}d. Lat., *erosus*. Fr., *érodé*. Ger., *ausgebissen, genagt*. Gnawed, eaten, or worn away; of leaves, irregularly toothed. [B, 1, 123, 291 (α, 24).]

ERODENT, adj. E-rod'e^{2}nt. Gr., ἀποβρύσκων, ἀποτρώγων. Lat., *erodens*. Fr., *érodent*. Ger., *wegfressend, ätzend*. Wearing away, eating up, gnawing off; as a n., a caustic. [A, 322 (α, 21); L, 56.]

ERODERS, n. pl. E-rod'u^{5}rz. See RODENTIA.

ÉRODION (Fr.), n. A-ro-de-o^{3}n^2. See ERODIUM.—**E. à feuilles de ciguë.** See ERODIUM *cicutarium*.—**E. musqué.** See ERODIUM *moschatum*.—**E. velu.** See ERODIUM *hirsutum*.

ERODIUM (Lat.), n. n. E^{2}r-od'i^2-u^{3}m(u^{4}m). From ἐρωδιός, the heron. Fr., *érodion, érodium*. Ger., *Reiherschnabel*. Heron's bill; a genus of the *Erodieæ* (a section of the *Geranieæ*). [B, 42, 170, 180, 275 (α, 24).]—**E. ciconium.** Fr., *cou de cigogne*. A species found in southern Europe and in Germany. The fruits are used as weather-gauges, the tails of the carpels, that coil up spirally, untwisting at the approach of humid weather. [B, 180 (α, 24).]—**E. cicutarium.** Fr., *érodion à feuilles de ciguë*. Ger., *Ackerschnabelkraut, Ackerstorchschnabelkraut, schierlingsblättriger Reiherschnabel*. Pine grass of California, wild mush; a species found in Europe, northern Africa, and the United States; used as a vulnerary and in dropsy. [B, 34, 173, 180 (α, 24); "Proc. of the Am. Pharm. Assoc.," xxvii (α, 14).]—**E. gruinum.** Fr., *bec de grue*. A species found in southern Europe, Crete, and north Africa. It was once official. The tails of the carpels are used as hygrometers. [B, 173, 180 (α, 24).]—**E. hirsutum.** Fr., *érodion velu*. A species found in Egypt, where the tubers are eaten. [B, 173 (α, 24).]—**E. moschatum.** Fr., *érodion musqué*. Ger., *moschusduftende Reiherschnabel*. Covey; sweet covey, crowe-pil; a species found in Europe, the East, Africa, the Cape of Good Hope, and Peru. Its herb (*herba moschatæ* [seu *geranii moschati*, seu *acris moschatæ*]) was once official, and was used in nervous disorders and as a sudorific. [A, 505; B, 173, 180 (α, 24).]

ERODIUM CICUTARIUM. [A, 327.]

ERÖFFNEND (Ger.), adj. E^{2}r-u^{5}f'ne^{2}nd. See APERIENT.

ERÖFFNER (Ger.), n. E^{2}r-u^{5}f'ne^{2}r. See DILATATOR.

ERÖFFNUNG (Ger.), n. E²r-u⁶f'nun². 1. An opening, foramen. [L, 43.] 2. See INCISION.—**E. des Centralcanals.** See FORAMEN *cæcum*.—**E'mittel.** An aperient. [L, 46 (a, 14).]—**E'speriode, E'szeit.** The stage of dilatation of the uterus in labor. [A, 521.]

EROMANES (Lat.), adj. E²-ro'ma²n(ma³n)-ez(as). Gr., ἐρωμανής. See EROTOMANES.

EROMANIA (Lat.), n. f. E²ro-ma²n(ma³n)'i²-a³. Gr., ἐρωμανία. See EROTOMANIA.

ERONOSUS (Lat.), n. f. E²r(ar)-o²n'o²s-u³s(u⁴s). From ἦρ, spring, and νόσος, disease. Ger., *Frühlingskrankheit.* A disease that appears in spring. [A, 322 (a, 21).]

EROOVALOO (Tamil), n. The *Inga xylocarpa.* [B, 172 (a, 24).]

EROPHILA (Lat.), n. f. E²r(ar)-o²f'i²l-a³. From ἦρ, spring, and φιλεῖν, to love. Fr., *érophile.* The genus *Draba.* [B, 121 (a, 24).]—**E. verna, E. vulgaris.** See DRABA *verna.*

ÉRORATEUR (Fr.), n. A-ro-ra³-tu⁵r. Of Kessler and Pontier, an apparatus for distilling and evaporating. [L, 77 (a, 21).]

EROSE, adj. E-ros'. In botany, see ERODED.

EROSION, n. E-ro'zhu³n. Lat., *erosio* (from *erodere,* to gnaw off). Fr., *érosion.* Ger., *E., Aufressen, Arrosion.* 1. An eating away ; the action and the effect of a corrosive substance. 2. A circumscribed superficial loss of substance. 3. Of Unna, loss of the corneous layer of the epidermis, as distinguished from *exfoliation,* in which more or less of the prickle-cell layer is removed. ["Vrtljsschr. f. Derm. u. Syph.," 1880, p. 25 (G).]—**Aphthous e.** The formation of flat ulcers on a mucous membrane, as from aphthæ. [D, 1.]—**Catarrhal e.** Fr., *érosion catarrhale.* A loss of epithelium from catarrh. [L, 20 (a, 14).]—**Chancrous e.** Fr., *érosion chancreuse.* The destruction by mortification and slow liquefaction of the normal elements around a chancre. [A, 385 (a, 21).]—**E. of the teeth.** Ger., *E. der Zähne.* A congenital defect of the teeth, consisting of fine points or lines of superficial loss of enamel surrounding the tooth in the form of a ring, of complete absence of the enamel with brittleness of the tooth, of semilunar notches on the cutting edge of the incisors (as in "Hutchinson's teeth"), or of a combination of all these defects. [Albrecht (A, 319).]—**E'sfurche** (Ger.). A furrow due to e. (as in the teeth). [Albrecht (A, 319).]—**E'sgeschwür** (Ger.). An eroding ulcer. [A, 521.]—**E'sring** (Ger.). An annular furrow of a tooth due to e. [Albrecht (A, 319).]—**Granular e.** See *Papillary e.*—**Hæmorrhagic e.** Fr., *érosion hémorrhagique.* Ger., *hämorrhagische E.* An e. of a mucous membrane (*e. g.,* of the stomach) produced by hæmorrhagic infiltration, softening, and death of little circumscribed areas. [A, 326 (a, 21).] Cf. EXCORIATION.—**Herpetic e.** Fr., *érosion herpétique.* An e. like that produced by herpes. The term has been applied to a condition seen on the vaginal portion of the cervix uteri in cases of catarrh. [Grenlich (A, 319).]—**Papillary e.** Fr., *érosion papillaire.* Ger., *papilläre E.* A condition in which, after a simple epithelial e., the papillary layer undergoes proliferation, forming a red, granular, or fungous surface that bleeds easily. [A, 326 (a, 21).]

ÉROSION (Fr.), n. A-ro-ze-o³n². 1. See EROSION. 2. Dubroca's term for a procedure for breaking up an incarcerated placenta with one finger inserted into the compartment of the uterus that contains the organ. [A, 96.]

EROSIVE, adj. E-ro'si²v. Fr., *érosif.* Ger., *erosiv.* Pertaining to, caused by, or causing erosion.

EROSODENTATE, adj. E-ro''so-de²nt'at. From *erodere,* to erode, and *dens,* a tooth. Of leaves, raggedly dentate. [B, 19 (a, 24).]

EROSTRATE, adj. E-ro²s'trat. Lat., *erostratus* (from *e* priv., and *rostrum,* the beak). Fr., *érostré.* Ger., *ungeschnäbelt.* Having no beak. [B, 1, 123 (a, 24).]

EROSUS (Lat.), adj. E(a)-ros'u³s(u⁴s). See ERODED.

EROTEUM (Lat.), n. n. E²r-ot'e²-u³m(u⁴m). Fr., *érotéum.* A genus of dicotyledons, of the *Ternstrœmiaceæ.* [L, 49.]—**E. thæoides.** A variety used in Japan as a substitute for tea. [L, 49.]

EROTIC, adj. E²r-o²t'i²k. Gr., ἐρωτικός (from ἔρως, lust). Lat., *eroticus.* Fr., *érotique.* Ger., *erotisch.* It., *erotico.* Sp., *erótico.* Pertaining to, caused by, pervaded with, or manifesting sexual desire.

EROTOMANIA (Lat.), n. f. E²r-o-to(to³)-ma²n(ma³n)'i²-a³. From ἔρως, lust, and μανία, madness. Fr., *érotomanie.* Ger., *Liebeswuth, Erotomanie.* A form of monomania characterized by loss of control over the sexual appetite. See SATYRIASIS and NYMPHOMANIA.

EROTOMANES (Lat.), adj. E²r-ot-o²m'a²n(a³n)-ez(as). Gr., ἐρωτομανής. Affected with erotomania. [A, 325 (a, 21).]

EROUDDA (Sanscr.), n. The *Ricinus communis.* [B, 92 (a, 14).]

ERPES (Lat.), n. m. E²rp'ez(as). Gen., *erpet'os* (*-is*). See HERPES.

ERPETOLOGY, n. U⁶r-pe²t-o²l'o-ji². See HERPETOLOGY.

ERQ ANGIBAR (Ar.), n. The *Statice limonium.* [B, 88 (a, 14).]

ERQUICKEND (Ger.), adj. E²r-kwi²k'e²nd. See ANALEPTIC and ANAPSYCTIC.

ERQUICKUNG (Ger.), n. E²r-kwi²k'un². Refreshment, invigoration.—**E'smittel.** See ANALEPTIC.

ERR (Fr.), n. E²r. A place in the department of the Pyrénées-Orientales, France, where there are cold chalybeate springs. [L, 49, 87, 105 (a, 14).]

ERRABUNDUS (Lat.), adj. E²r-ra³-bu³nd(bu⁴nd)'u³s(u⁴s). See ERRATIC.

ERRAMASSUMUL (Cing.), n. The root of *Periploca indica.* [B, 88 (a, 14).]

ERRANT, adj. E²r'a²nt. Lat., *errans.* Fr., *e.* Wandering ; in zoology, unattached (said of free-swimming *Hydrozoa,* etc.). The *Errantia* are a suborder of the *Polychæta* or an order of the *Annelida.* [L, 147, 353.]

ERRATIC, adj. E²r-a²t'i²k. Lat., *erraticus* (from *errare,* to wander). Fr., *erratique.* Ger., *erratisch, herumirrend, wandernd.* Of birds, without local habitation, going often from country to country ; of diseases, pain, etc., shifting from one part of the body to another or occurring in irregular paroxysms. [D ; L, 41.]

ERRÉ (Fr.), n. E²r-ra. In Provence, the *Ervum ervilia.* [B, 121 (a, 24).]

ERREGBARKEIT (Ger.), n. E²r-rag'ba³r-kit. Excitability. [L, 80.]

ERREGEND (Ger.), adj. E²r-rag'e²nd. Stimulating. [L, 80.]

ERREGER (Ger.), n. E²r-rag'e²r. A stimulant, an excitant. [K.]

ERREGTSEIN (Ger.), n. E²r-ragt'zin. See ERETHISM.

ERREGUNG (Ger.), n. E²r-rag'un². See STIMULATION.—**E'sfähigkeit.** Excitability. [A, 521.]—**E'sflüssigkeit.** The exciting liquid of a galvanic battery. [A, 521.]—**E'szustand.** A state of irritation. [K.]—**Gefühls-E.** Stimulation of the sensory nerves of a part, as opposed to reflex or automatic action. [K, 16.]—**Geruchs-E.** Stimulation of the olfactory nerve. [Gruenhagen (K).]

ERRES (Fr.), n. In Provence, the *Ervum ervilia.* [B, 121, 173.]

ERREUR (Fr.), n. E²r-ru⁵r. See ERROR.

ERRHIN (Fr.), adj. and n. E²r-ra²n². See ERRHINE.—**E. hémostatique.** See POUDRE *errhine hémostatique.*

ERRHINE, adj. E²r'i²n. Lat., *errhinus* (from ἐν, in, and ῥίς, the nose). Fr., *errhin.* Promoting sneezing and the discharge of nasal mucus ; as a n. (Lat., *errhinum ;* Fr., *errhin ;* Ger., *Niesemittel*), a substance so acting. [L, 56, 105.] Cf. STERNUTATORY.

ERRHIPSIS (Lat.), n. f. E²r-ri²p(rep)'si²s. Gen., *errhip'seos* (*-is*). Gr., ἔῤῥιψις (from ῥίπτειν, to throw). Fr., *errhipsie.* Prostration. [L, 41, 94.]

ERRHYSIS (Lat.), n. f. E²r'ri²s(ru⁶s)-i²s. Gen., *errhys'eos* (*er'rhysis*). From ἐῤῥεῖν, to go slowly. Fr., *errhyse.* Ger., *langsame Blutung.* Slow bleeding. [A, 322 (a, 21).]

ERRICK, n. E²r'i²k. The *Arctium lappa.* [A, 505 (a, 21).]

ERRIF, n. E²r'i²f. The *Galium aparine.* [A, 505 (a, 21).]

ERROACANAY (Tamil), n. The *Euonymus dichatomus.* [B, 172 (a, 24).]

ERROOPOOTOO (Tamil), n. The *Dalbergia latifolia.* [B, 172 (a, 24).]

ERROR (Lat.), n. m. E²r'ro²r(ror). Gen., *erro'ris.* Gr., ἀποτυχία. Fr., *erreur.* Ger., *Verirrung.* A failure, a mischance, a going astray. [A, 325 (a, 21).]—**E. loci.** Fr., *erreur de lieu.* Ger., *Ortsverirrung.* Lit., an e. of place. 1. Of Boerhaave, a supposed aberration of the larger blood-corpuscles by which they were forced into and became impacted in vessels (*e. g.,* lymph-canals) of too small a calibre to admit of their passage. [L, 84.] 2. See ECTOPIA.—**E. of dispersion.** The indistinctness produced in the outlines of an image by chromatic aberration. [B, 51 (a, 27).]

ERRÖTHEN (Ger.), n. E²r-ru⁶t'e²n. A reddening, blushing. [L, 80.]

ER ROUIZA (Ar.), n. See CORIARIA *myrtifolia.*

ERS (Fr.), n. E²r. The *Ervum ervilia.* [B, 121, 173, 275, 284 (a, 24).]

ERSATZ (Ger.), n. E²r-sa³tz'. Compensation, substitution.—**E'dentin.** Supplementary dentin formed to take the place of material lost from a tooth. [Albrecht (A, 319).]—**E'haar.** A hair that replaces one that has fallen or is torn out. [J, 57.]—**E'zahn.** A permanent tooth. [A, 521, 523.]—**E'zellen.** See *Dentinal* CELLS.

ERSCHEINUNG (Ger.), n. E²r-shin'un². See PHENOMENON.

ERSCHLAFFEN (Ger.), n. E²r-shla²f'e²n. See DIASTOLE.

ERSCHLAFFEND (Ger.), adj. E²r-shla³f'e²nd. Relaxing. [L, 43.]

ERSCHLAFFER (Ger.), n. E²r-shla³f'e²r. See LAXATOR.—**E. des Paukenfells** (oder **des Trommelfells**). See LAXATOR *tympani.*—**Grosserer E. des Trommelfells.** See LAXATOR *tympani major.*

ERSCHLAFFT (Ger.), adj. E²r-shla³ft'. Abnormally relaxed (said of recently contracted muscles). [K.]

ERSCHLAFFTHEIT (Ger.), n. E²r-shla³ft'hit. See LAXITY.

ERSCHLAFFUNG (Ger.), n. E²r-shla³f'un². See CHALASIS, RELAXATION, and DIASTOLE.

ERSCHÖPFUNG (Ger.), n. E²r-shu⁶pf'un². Exhaustion. [K, 16.]

ERSCHÜTTERUNG (Ger.), n. E²r-shu⁶t'e²r-un². See CONCUSSION.—**E'sschall.** A percussion sound. [A, 521.]—**Gehirne'.** See CONCUSSION *of the brain.*—**Rückenmarke'.** See CONCUSSION *of the spinal cord.*

ERSCHWEREN (Ger.), n. E²r-shvar'e²n. See AGGRAVATION.

ERSETZEND (Ger.), adj. E²r-ze²tz'e²nd. Replacing, acting as a substitute. [A, 523.]

ERSETZUNG (Ger.), n. E^{2}r-ze^{2}tz'un^2. Substitution. [A, 523.]

ERSMERT, n. The *Polygonum hydropiper.* [A, 505 (*a*, 21).]

ERSTARRUNG (Ger.), n. E^{2}r-sta^{3}r'un^2. Rigidity. [K.]—**Todtene'.** See Rigor *mortis.*

ERSTGEBÄRENDE (Ger.), n. E^{2}rst'ge^2-bar-e^{2}nd-e^2. A primipara.

ERSTGESCHWÄNGERTE (Ger.), n. E^{2}rst'ge^2-shwan^2-e^{2}rt-e^2. A female pregnant for the first time. [A, 521.]

ERSTICKEND (Ger.), adj. E^{2}r-sti^{2}k'e^{2}nd. Suffocative. [A, 521.]

ERSTICKUNG (Ger.), n. E^{2}r-sti^{2}k'un^2. See Suffocation.—**E'sblut.** Blood surcharged with carbonic-acid gas; the blood of an asphyxiated subject. [K.]—**E'skrämpfe.** General convulsions due to slow asphyxiation. [L. Landois (A, 319).]—**E'stod.** Death by asphyxia. [A, 521, 523.]

ERTHEILEN (Ger.), v. tr. E^{2}r-til'e^{2}n. See Administer (1st def.).

ERTHESMOK, n. The *Fumaria officinalis.* [A, 505 (*a*, 21).]

ERTRÄNKUNG (Ger.), n. E^{2}r-tran^{2}k'un^2. Suicidal or homicidal drowning. [A, 521.]

ERTRINKUNG (Ger.), n. E^{2}r-tri^{2}n^{2}k'un^2. Accidental drowning. [A, 521.]—**E'stod.** Death by drowning. [L, 57.]

ERTRUNKENER (Ger.), n. E^{2}r-trun^{2}k'e^{2}n-e^{2}r. A drowned person. [L, 43.]

ERUAYE (Sp.), n. A-ru-a^3'ya. The genus *Medicago.* [B, 121 (*a*, 24).]

ERUBESCENCE, n. E-ru^2-be^{2}s'e^{2}ns. From *erubescere,* to blush. Blushing, reddening of the skin. [L, 80.]

ERUCA (Lat.), n. f. E(a)-ru^2(ru)'ka^3. 1. Of Tournefort, a genus of the *Cruciferæ,* tribe *Brassiceæ.* [B, 42 (*a*, 24).] 2. Of the pharmacopœias, the *Sinapis alba.* 3. A larval insect. [B, 45.]—**Conserva erucæ** [Sard. Ph., 1773]. Fr., *conserve de roquette.* A mixture of equal parts of boiled and washed leaves of *Brassica e.* and thick syrup. [B, 119 (*a*, 14).]—**E. alba.** The *Sinapis alba.* [B, 180.]—**E. arvensis.** See Sinapis *arvensis.*—**E. austriaca.** See Brassica *e.*—**E. barbarea.** The *Barbarea vulgaris.* [B, 173 (*a*, 24).]—**E. erucastrum.** See Brassica *erucastrum.*—**E. fœtida.** See Brassica *e.*—**E. maritima.** The *Cakile maritima.* [B, 180 (*a*, 24).]—**E. muralis.** The *Diplotaxis muralis.* [B, 173.]—**E. nigra.** See Sinapis *nigra.*—**E. palustris.** The *Nasturtium silvestre.* [B, 180 (*a*, 24).]—**E. sativa.** See Brassica *e.*—**E'säure** (Ger.). See Erucic acid.—**E. silvestris.** See *Diplotaxis tennifolia.*

ERUCASTRUM (Lat.), n. n. E(a)-ru^2(ru)-ka^{2}st(ka^{3}st)'ru^{3}m-(ru^{4}m). A section of the genus *Brassica.* [B, 121, 173 (*a*, 24).]—**E. fœtida.** See Brassica *eruca.*

ERUCIC ACID, n. E^{2}r-u^{2}s'i^{2}k. Fr., *acide érucique.* Ger., *Erucasäure.* A monobasic acid, occurring under the form of acicular crystals of the composition $C_{22}H_{42}O_2$, found in mustard-oil, rape-seed oil and grape-seeds. It is isomeric with brassic acid. [B, 4; "Proc. of the Am. Pharm. Assoc.," xii (*a*, 14).]

ERUCIDIC ACID, n. E-ru^2-si^{2}d'i^{2}k. Fr., *acide érucidique.* See Brassic acid.

ERUCIFORM, adj. E-ru^2'si^2-fo^{2}rm. Lat., *eruciformis* (from *eruca,* a caterpillar, and *forma,* form). Fr., *éruciforme.* Resembling a caterpillar. [L, 41, 180.]

ERUCIN, n. E-ru^2'si^{2}n. Fr., *érucine.* A yellow powder obtained from the bitter extract of white mustard. [A, 518; L, 41, 49.]

ERUCIVORES (Lat.), n. f. pl. E^{2}r(ar)-u^2(u)-si^2(ki^2)'vo(wo^2)-rez(ras). From *eruca,* a caterpillar, and *vorare,* to devour. See Scansores.

ERUCTATION, n. E-ru^{3}k-ta'shu^{3}n. Lat., *eructatio* (from *eructare,* to belch forth). Fr., *éructation.* Ger., *Aufstossen.* It., *eruttazione.* Sp., *eructación.* A belching up of gas from the stomach. [D.]

ERUGINOUS, adj. E-ru^2'ji^2-nu^{3}s. See Æruginous.

ERUKKU ERUKKAM (Tamil), n. The root-bark of *Calotropis gigantea* and *Calotropis procera;* used in India to promote the secretions, and as an alterative, stimulant, and deobstruent. ["Proc. of the Am. Pharm. Assoc.," xxviii (*a*, 14).]

ERUMBELIE (Tamil), n. The *Maba buxifolia.* [B, 172 (*a*, 24).]

ERUMPENT, adj. E-ru^{3}mp'e^{2}nt. Lat., *erumpens* (from *erumpere,* to burst forth). Ger., *hervorbrechend.* Breaking forth; of a fruit, rupturing its capsule at maturity. [B, 123 (*a*, 24).]

ERUPTION, n. E-ru^{3}p'shu^{3}n. Lat., *eruptio.* Fr., *éruption.* Ger., *E., Ausfahren.* It., *eruzione.* Sp., *erupción.* 1. A breaking forth, as of a pent-up gas or liquid. 2. An emergence, as of a tooth through the gum. 3. The breaking out of a rash, also the rash itself.—**Drug e.** See *Medicinal e.*—**Hæmatogenetic e's.** Ger., *hämatogenetische Eruptionen.* Of Behrend, a group of cutaneous diseases that includes medicinal and menstrual rashes, together with certain e's due to vaccination, variola, septicæmia, and pyæmia, and also those observed after surgical operations, injuries, parturition, etc. [G.]—**Heat e.** A term formerly applied to eczema or to a form of that disease, regarded as typical, produced by the application of heat to the skin. [G.]—**Medicinal e.** An e. (3d def.) due to the action of a medicament taken internally.

ERUPTIVE, adj. E-ru^{2}p'ti^{2}v. Lat., *eruptivus* (from *erumpere,* to burst forth). Fr., *éruptif.* It., *eruttivo.* Pertaining to or attended with an eruption. [G.]

ERVA (Port.), n. E^{2}r'va^3. An herb or plant. [*a*, 14.]—**E. cipo de cobra.** See *E. de Nossa Senhora.*—**E. contra.** See Dorstenia *faria,* Dorstenia *vitella,* and Dorstenia *Houstoni.*—**E. de cobra.** The *Mikania opifera.* [B, 46, 81 (*a*, 21).]—**E. da contra.** See *E. contra.*—**E. de andourinha.** The *Euphorbia linearis.* [B, 46, 88 (*a*, 14).]—**E. de Nossa Senhora.** In Brazil, the *Cissampelos pareira.* [B, 121 (*a*, 24).]—**E. de passarinho.** In Brazil, the *Loranthus uniflorus.* [B. 121 (*a*, 24).]—**E. do bicho.** The *Polygonum antæmorrhoidale.* [B, 46 (*a*, 14).]—**E. do sapo.** The *Begonia comestibil.* [B, 46 (*a*, 14).]—**E. da cobras.** 1. The *Euphorbia pilulifera.* 2. The *Eupatorium opiferum.* [B, 46, 121, 180 (*a*, 24).]—**E. moira.** In Brazil, the *Solanum nigrum.* [B, 46, 88 (*a*, 14).]—**E. mular.** In Brazil, the *Croton antisyphiliticus.* [B, 46, 88 (*a*, 14).]—**E. pombirha.** In Brazil, the *Phyllantus niruri.* [B, 46, 88 (*a*, 14).]—**E. Santa Lucia.** In Brazil, the *Euphorbia hypericifolia.* [B, 46 (*a*, 14).]—**E. toustaõ.** In Brazil, the *Boerhaavia hirsuta.* [B, 46, 88, 121 (*a*, 24).]

ERVAGIA (Lat.), n. f. E^{2}r-va(va^3)'ji^2(gi^2)-a^3. Of some ancient authors, the *Convolvulus arvensis.* [B, 33 (*a*, 14).]

ERVALENTA, n. U^{5}r-va^{2}l-e^{2}nt'a^3. A food preparation, invented by Wharton, who kept the composition secret, and sold it at high prices as a remedy against consumption and tumors. Chemical analysis shows it to consist of meal made from leguminous grains, probably a mixture of peas and lentils, and identical with the *Revalenta arabica.* [L, 30 (*a*, 14).]

ERVE (Ger.), n. E^{2}rf'e^2. See Ervum.—**E'nlinse.** See Ervum.—**E'nsamen.** The seed of *Vicia ervilia.* [B, 180 (*a*, 24).]

ERVILIA (Lat.), n. f. E^{2}r-vi^{2}l'i^2-a^3. Of Link, a genus composed of species taken from *Vicia* and *Ervum;* of others, a section of *Vicia.* [B, 121 (*a*, 24).]—**E. sativa.** See Vicia *e.*

ERVILIEN (Fr.), adj. E^{2}r-ve-le-a^{3}n^2. Formed like a lentil; as a n., in the pl., *e's,* a group of ciliated *Infusoria.* [A, 385 (*a*. 21).]

ERVUM (Lat.), n. n. E^{2}r'vu^{3}m(wu^{4}m). Fr., *lentille.* Ger., *Erve, Linse, Wicke.* The vetch; of Linnæus, a genus of leguminous, papilionaceous herbs of the *Vicieæ* (by some made a section of that tribe), indigenous to Europe and eastern Asia. They are largely cultivated for forage, and the flour is used in cataplasms. [B, 42, 121 (*a*, 24).]—**E. ervilia.** See Vicia *ervilia.*—**E. hirsutum.** Fr., *lentille velue, gerceau luisset, luzeau, luzette.* A species found in the United States and France, where the seeds, called *cincelles,* are eaten and the stems used as forage. [B, 173 (*a*, 24).]—**E. lens.** Fr., *lentille cultivée, arousse arroufle.* Ger., *gemeine Linse.* The lentil, the φάκος of Dioscorides; a species found in southern Europe and the East. The seeds furnish a meal which serves as food, and, boiled, is used for cataplasms. [B, 173, 180 (*a*, 24).]—**E. minor.** Fr., *lentille petite.* A variety of *E. lens.* [B, 173 (*a*, 24).]—**E. plicatum, E. verum.** See Vicia *ervilia.*—**Semen ervi (veri).** The seed of *Vicia ervilia.* [B, 180 (*a*, 24).]

ERVUM LENS. [A, 327.]

ERWACHSEN (Ger.), adj. E^{2}r-va^{3}ch^{2}s'e^{2}n. See Adult.

ERWÄRMEND (Ger.), adj. E^{2}r-varm'e^{2}nd. See Calorific.

ERWÄRMUNG (Ger.), n. E^{2}r-varm'un^2. See Calefaction.

ERWECKEND (Ger.), adj. E^{2}r-ve^{2}k'e^{2}nd. Lit., awakening; exciting, enlivening, animating. [L, 43.]—**E'e Mittel.** An excitant. [L, 43.]

ERWEICHEND (Ger.), n. E^{2}r-vich^2'e^{2}nd. See Emollient.—**E'e Mittel.** Emollient remedies. [L, 43.]

ERWEICHUNG (Ger.), n. E^{2}r-vich^2'un^2. Softening. [D, 4.]—**Braune E.** Softening (as in the mucous membrane of the stomach), with a brownish tinge, due to extravasated blood. [Marchand (A, 319).]—**Breiige E.** Pultaceous softening. [Marchand (A, 319).]—**Drüsene'.** See Adenomalacia.—**E'sbrand.** Gangrenous softening. [Samuel (A, 319).]—**E'scyste.** See under Cyste.—**E'sgeschwür.** An abscess caused by atheromatous or amyloid degeneration of the arteries or by amyloid degeneration of the tissues. It occurs in old people, and is to be distinguished in degree only from senile gangrene. [L, 57 (*a*, 21).]—**E'sherd.** A focus of softening. [A, 321.]—**E'smittel.** An emollient. [A, 321.]—**Gehirne'.** See Encephalomalacia.—**Gelatinöse E.** Gelatinous softening. [Marchand (A, 319).]—**Geruchlose E.** Gangrenous softening without putrefaction. [Samuel (A, 319).]—**Hämorrhagische E.** Softening with hæmorrhagic infiltration. [Marchand (A, 319).]—**Hirne'.** See Encephalomalacia.—**Knochene'.** See Osteomalacia.—**Knorpele'.** See Chondromalacia.—**Weisse E.** White softening (of the brain, spinal cord, etc.). [D, 4.]

ERWEITERER (Ger.), n. E^{2}r-vit'e^{2}r-e^{2}r. See Dilatator and Dilator.

ERWEITERN (Ger.), n. E^{2}r-vit′e^{2}rn. See DILATATION.

ERWEITERND (Ger.), adj. E^{2}r-vit′e^{2}rnd. See DILATING.

ERWEITERT (Ger.), adj. E^{2}r-vit′e^{2}rt. See DILATED.

ERWEITERUNG (Ger.), n. E^{2}r-vit′e^{2}r-un^2. See DILATATION and AMPLIATION.—**E. der Schamspalte.** See DILATATION *préfœtale de la vulve.*—**E. des Herzens.** See *Cardiac* DIASTOLE.—**E's-fähig.** Susceptible of dilatation. [α, 14.]—**E'sinstrument.** See DILATOR.—**E'sscheere.** A dilating forceps; also a pair of scissors that cut outward when the blades are separated. [L, 80.]—**Sack-förmige E.** See *Sacciform* DILATATION.

ERWENWICKE (Ger.), n. E^{2}rv′e^{2}n-vi^{2}k-e^2. See VICIA *ervilia.*

ERWORBEN (Ger.), adj. E^{2}r-vorb′e^{2}n. Acquired, as distinguished from congenital. [A, 521.]

ERWÜRGEN (Ger.), **ERWÜRGUNG** (Ger.), n's. E^{2}r-vu^{6}rg′-e^{2}n, -un^2. See STRANGULATION.

ERYGE (Lat.), **ERYGMA** (Lat.), n's f. and n. E^{2}r′i^2(u^6)-je(ga), -i^{2}g(u^{6}g)′ma^3. Gen., *er′yges, eryg′matos (-is).* Gr., ἐρυγή, ἔρυγμα. See ERUCTATION.

ERYGMATODES (Lat.), adj. E^{2}r-i^{2}g(u^{6}g)-ma(ma^3)-to′dez-(das). Gr., ἐρυγματώδης (from ἔρυγμα, a belching, and εἶδος, resemblance). Of Hippocrates, causing eructations. [A, 311 (α, 17).]

ERYNGIUM (Lat.), n. n. E^{2}r(ar)-i^{2}n(u^{6}n^2)′ji^2(gi^2)-u^{3}m(u^{4}m). Gr., ἠρύγγιον. Fr., *panicault.* Ger., *Mannstreu.* A genus of the *Saniculeæ*, widely distributed throughout warm and temperate regions, except in Africa. The *Eryngeæ* are: Of Reichenbach, a section of the *Panaceæ;* of Dumortier, a tribe of the *Œnospermæ;* of Tausch, a subtribe of the *Apleurospermæ*, comprising (for the last two authors) *Eryngium, Alepida, Sanicula*, etc. Others make them a tribe of the *Umbelliferæ*, consisting of *Eryngium* and *Sanicula*, in which case they correspond in part to the *Saniculeæ* of Bentham and Hooker. The *Eryngieæ* (Fr., *éryngiées*) of Sprengel are a tribe of the *Umbelliferæ.* The *Eryngineæ* of Dumortier are a family of the *Fructungaliæ.* [B, 42, 113, 170, 180 (α, 24); L, 180.]—**Conserva eryngii.** Fr., *conserve de panicault.* The candied root of *E. campestre*, official in various old Ph's. [B, 119 (α, 14).]—**E. amethystinum.** Sp., *yerba del sapo* [Mex. Ph.]. A species the roots of which are reputed diaphoretic and emmenagogue. [J. M. Maisch, "Am. Jour. of Pharm.," Apr., 1886, p. 168.]—**E. aquaticum.** Fr., *panicault aquatique.* Ger., *wasserliebende Mannstreu.* Button snake-root, rattlesnake-master, water-eryngo; a species found on the prairies and barrens of the western and southern United States. The pungent, aromatic root is considered expectorant, diuretic, and sudorific, and is also employed in snake-bites. [B, 5, 34, 173, 180 (α, 24); "Proc. of the Am. Pharm. Assoc.," xxix (α, 14).]—**E. Bocconi.** Fr., *panicault tricuspide.* A species found in Spain; considered diuretic and emmenagogue. [B, 173, 180 (α, 24).]—**E. bromeliæfolium.** A species growing in Mexico; employed in amenorrhœa, dyspepsia, dropsy, and flatulence, and for snake-bites. [B, 180 (α, 24).]—**E. campestre.** Fr., *panicault des champs, chardon à cent têtes* (ou *d'âne*, ou *Roland*, ou *roulant*), *erlache fouasse à l'âne, poinchau relâche.* Ger., *Feldmannstreu, gemeine Brachdistel* (oder *Roll-distel*), *Elend, Unruhe.* A species found in southern and middle Europe. Its root, *radix eryngii* (seu *lyringii*), *acus Veneris, capitula Martis*, once official, was one of the *quinque radices aperientes minores*, and was considered emmenagogue and aphrodisiac. It was also employed in catarrhal affections. [B, 173, 180 (α, 24).]—**E. Cervantesii, E. comosum.** Sp., *yerba del sapo* [Mex. Ph.]. A species used in Mexico for the same purposes as *E. amethystinum.* [J. M. Maisch, *l. c.*]—**E. creticum, E. cyaneum.** A species growing in Crete, having the properties of *E. Bocconi.* [B, 180 (α, 24).]—**E. dichotomum.** A species found in southern Europe (probably a variety of *E. amethystinum*), having the properties of *E. Bocconi.* [B, 180 (α, 24).]—**E. dilatatum.** A species found in southern Europe. The roots have similar properties to those of *E. campestre.* [B, 180 (α, 24).]—**E. fœtidum.** Fr., *panicault fétide.* Ger., *Schlangengras.* A species used in snake-bites in the West Indies and Florida, and as a febrifuge in Guiana, Brazil, and elsewhere. [B, 173, 180 (α, 24).]—**E. marinum, E. maritimum.** Fr., *panicault maritime.* Ger., *Meerstrandsmannstreu, Meerwurzel, Meerbrachdistel.* Sea-eryngo (or -holly); a species found on the sandy shores of Great Britain and Europe. The root (*radix eryngii marini*) was once made into a sweetmeat and used in pectoral diseases, dropsy, and colic, and as an aphrodisiac. The young sprouts are eaten. [B, 173, 180, 275 (α, 24).]—**E. multifidum.** A European species having the properties of *E. amethystinum*, of which it is perhaps a variety. [B, 180 (α, 24).]—**E. planum.** Fr., *panicault à feuilles planes, herbe des serpens.* A European species, employed as a sudorific. [B, 173, 180 (α, 24).]—**E. subacaule.** Sp.: *yerba del sapo* [Mex. Ph.]. A species used in Mexico for the same purposes as *E. amethystinum.* [J. M. Maisch, *l. c.*]—**E. ternatum.** A European species having the properties of *E. amethystinum.* [B, 180 (α, 24).]—**E. tricuspidatum.** See *E. Bocconi.*—**E. virginianum, E. virginicum.** A species found in marshes from New Jersey to Louisiana, used like *E. aquaticum.* [B, 34, 180 (α, 24).]—**E. vulgare.** See *E. campestre.*—**E. yuccæfolium.** See *E. aquaticum.*—**E. Zannoni.** See *E. Bocconi.*—**Radix eryngii.** The rhizome of *E. campestre.* [B, 180 (α, 24).]

ERYNGO, n. E-ri^{2}n^2′go. The genus *Eryngium.* [A, 505 (α, 21).]—**Common e.** See ERYNGIUM *campestre.*—**Conserve of e.** See *Conserva* ERYNGII.—**E.-root.** The rhizome of *Eryngium maritimum*, and various other species of *Eryngium.* [B, 180 (α, 24).]—**Field e.** See ERYNGIUM *campestre.*—**Flat-leaved e.** See ERYNGIUM *planum.*—**Sea E.** See ERYNGIUM *maritimum.*—**Three-leaved e.** See ERYNGIUM *Bocconi.*—**Water-E.** See ERYNGIUM *aquaticum.*

ERYSIBE (Lat.), n. f. E^{2}r-i^2(u^6)-sib(seb)′e(a). Gen., *erysib′es.* Gr., ἐρυσίβη. Mildew in plants. [A, 387.]

ERYSIMUM (Lat.), n. n. E^{2}r-i^{2}s(u^{6}s)′i^2-mu^{3}m(mu^{4}m). Gr., ἐρύσιμον (from ἐρύειν, to draw). Fr., *érysimon, érysimum, vélar.* Ger., *Hederich.* 1. Of the Fr. Cod., the *Sisymbrium officinale.* 2. A genus of the *Cruciferæ*, tribe *Sisymbrieæ.* The *Erysimeæ* (Fr., *érysimées*) are: Of Dumortier, a tribe of the *Siliquosæ;* of Reichenbach (1837), a section of the *Sisymbreæ.* [B, 42, 121, 170, 173 (α, 24).]—**Conserva erysimi** [Disp. fuld., 1791]. Fr., *conserve de vélar.* Conserve of wild mustard; made by beating together 1 part of the fresh herb of e. and 2 parts of white sugar. [L, 162 (α, 21).]—**E. alliaria.** See SISYMBRIUM *alliaria.*—**E. arcuatum.** See BARBAREA *taurica.*—**E. barbarea.** See BARBAREA *vulgaris.*—**E. cheiranthoides.** Treacle-mustard, a species found in Kansas. ["Proc. of the Am. Pharm. Assoc.," xxix (α, 14).]—**E. cordifolium.** See SISYMBRIUM *alliaria.*—**E. glastifolium.** The *Turitis glabra.* [B, 173 (α, 24).]—**E. lyratum.** See BARBAREA *vulgaris.*—**E. officinale.** See SISYMBRIUM *officinale.*—**E. præcox.** Fr., *érysimon printanier.* See BARBAREA *præcox.*—**Herba erysimi.** The herb of *Sisymbrium officinale.* [B, 180 (α, 24).]—**Semen erysimi.** The seed of *Sisymbrium officinale.* [B, 180 (α, 24).]—**Syrupus de erysimo compositus** [Fr. Cod.]. See *Sirop d'*ÉRYSIMUM *composé.*—**Syrupus de erysimo Lobelii.** See *Sirop d'*ÉRYSIMUM *composé.*—**Syrupus erysimi** [Brunsw. Ph., 1777; Fr. Cod., 1818; Ferr. Ph., 1825; Fuld. Disp., 1791; Lipp. Disp., 1794]. Syrup of wild mustard; made of equal parts of the juice of *E. alliaria*, recently expressed and depurated, and despumated honey [Brunsw. Ph., 1777]; or 3 parts of juice and 1 part of honey [Fuld. Disp., 1791; Lipp. Disp., 1794]; or by making a syrup by infusing 1 part of the fresh leaves of *E. alliaria* for 12 hours in 6 parts of boiling water, filtering, and adding a double quantity of white sugar [Fr. Cod., 1818]; or from 4 parts of the leaves of *E. alliaria* and 24 of water, distilling off 6 parts, and dissolving in the product 12 of sugar, expressing the residue, and dissolving in the liquor 24 parts of sugar, evaporating to the consistence of a syrup, and mixing with the distillate [Ferr. Ph., 1825]. [B, 97 (α, 21).]

ÉRYSIMUM (Fr.), n. A-re-ze-mu^{4}m. See ERYSIMUM.—**E. à feuilles en lyre** (Fr.). See BARBAREA *vulgaris.*—**Sirop d'é.** (Fr.). See *Syrupus* ERYSIMI and *Sirop d'é. composé.*—**Sirop d'é. composé** [Fr. Cod.]. Lat., *syrupus de erysimo composilus.* Syn.: *sirop des chantres.* A syrup made by boiling 15 parts of husked barley in 1.200 parts of distilled water until it is soft, adding 15 parts of dried Malaga grapes, and 20 parts each of the chopped leaves of *Cichorium intybus* and *borago*, and, after boiling for a few minutes, straining with expression, replacing the liquor on the fire, and, when boiling, pouring it into a tin water-bath which contains 300 parts of fresh e. previously pounded in a marble mortar, and 15 of licorice, 20 parts of the dried root of *Inula helenium*, 5 of *Adiantum pedatum*, 4 each of the dried tops of rosemary and of stœchas, and 5 parts of green anise, all properly cut, infusing for 24 hours, and distilling in order to extract 50 parts of aromatic liquor; then straining with expression, clarifying with the white of an egg, adding 400 parts of white sugar and 100 of white honey, boiling, and clarifying. [B, 113 (α, 21).]

ERYSIPEL (Ger.), n. E^{2}r-u^6-si^2-pe^{2}l′. See ERYSIPELAS.—**Gesichtse'.** See ERYSIPELAS *faciei.*—**Impfe'.** See *Vaccinal* ERYSIPELAS.—**Rückfalle'.** See ERYSIPELAS *recurrens.*—**Wandere'.** See *Erratic* ERYSIPELAS.—**Wunde'.** See *Traumatic* ERYSIPELAS.

ERYSIPELACEUS (Lat.), adj. E^{2}r-i^2(u^6)-si^{2}p-e^{2}l-a(a^3)′se^2-(ke^2)-u^{3}s(u^{4}s). Erysipelatous; as a n., in the f. pl., *Erysipelaceæ*, a generic term including the various forms of erysipelas. [α, 29.]

ERYSIPELAS (Lat.), n. n. E^{2}r-i^2(u^6)-si^{2}p′e^{2}l-a^{2}s(a^{3}s). Gen., *erysipel′atos (-is).* Gr., ἐρυσίπελας) from ἐρυσός (= ἐρυθρός), red, and πέλας (= πέλλα), a hide or skin. Fr., *érysipèle, érésipèle, la rose, feu sacre* (ou *St. Antoine*). Ger., *Erysipel, Rothlauf, Rose, Hautrose, Wundrose.* It., *erisipela, risipola.* Sp., *erisepela.* St. Anthony's fire, wild-fire, rose: 1. A peculiar form of inflammation affecting the skin or the adjacent mucous membranes, attended with redness and swelling, together often with more or less serous or purulent exudation in the form of œdema, vesicles, bullæ, pustules, or diffuse suppuration, sometimes with gangrene, and chiefly characterized by a tendency to spread at the periphery and by fever. [G.] 2. In Young's classification of diseases, a genus of the *Pyrexiæ.* [L, 270.]—**Ambulant e.** See *Erratic e.*—**Bilious e.** Fr., *érysipèle bilieux.* A variety attended by bilious eructation and vomiting, bitterness of the mouth, yellow tongue, epigastric uneasiness and tenderness, great thirst, constipation or bilious diarrhœa, yellow urine, and yellowness of the skin and conjunctivæ. [E, 4.]—**Bronzed e.** Fr., *érysipèle bronzé* [Velpeau]. See GANGRÈNE *gazeuse foudroyante.*—**Carbuncular e.** It., *erisipela carbonchiosa.* A form of carbuncle peculiar to sheep and swine. In sheep it is less severe than in swine, and is characterized by a tumor of the inner aspect of the thigh and leg, which extends rapidly to the abdomen, back, and breast, and becomes of a violet or bluish color, with coldness of the surface. Some have considered the disease in swine as carbuncular; others as a form of typhus. Together with constitutional symptoms, the disease is marked by erysipelatous tumefaction of the region of the abdomen, the neck, the inner aspect of the thigh, etc. [G, 71.]—**Cellular e.** Fr., *érysipèle du tissu cellulaire.* See PSEUDO-E.—**Cellulo-cutaneous e.** See *Phlegmonous e.*—**Cutaneous e.** See *E. simplex.*—**Dartrous e.** Fr., *érysipèle dartreux.* E. accompanied by tetter or ringworm. [L, 41 (α, 14).]—**Erratic e.** Lat., *e. erraticum.* Fr., *érysipèle erratique.* Ger., *Wanderrose.* 1. E. that tends to spread from portion to portion of the body. [G.] 2. See *E. metastaticum.*—**E. ambulans.** See *Erratic e.*—**E. bullosum.** Fr., *érysipèle bulleux.* E. attended with a marked development of bullæ. [G, 10.]—**E. chronicum.** 1. See *E. recurrens.* 2. See ERYSIPELOID. **E. consensuale.** See *Symptomatic e.*—**E. crustosum.** Fr., *érysipèle crouteux.* E. attended with exudation from the surface drying into crusts. [G.]—**E. diffusum.** E. with the borders of the affected skin not sharply defined, the redness merging gradually into the color of the surrounding skin. [G.]—**E. erraticum.** See *Erratic e.*—**E. erythematosum.** E. affecting the skin super-

ficially and resembling erythema. [G.]—**E. exanthematicum.** See ERYTHEMA.—**E. faciei.** Fr., *érysipèle de la face.* Ger., *Gesichtserysipel.* E. of the face, beginning usually in the region of the nose, spreading thence over the face, and sometimes to or over the hairy scalp, or down upon the neck. [G.]—**E. faciei perstans.** See *E. perstans faciei.*—**E. fixum.** Fr., *érysipèle fixe.* E. that remains confined to the region first attacked ; generally due to a local inflammation, as of the ear. [G.] Cf. *E. otalgicum* and *E. odontalgicum.*—**E. gangrænosum.** Fr., *érysipèle gangréneux.* Syn. : *ignis Sancti Antonii.* E. attended with gangrene. [G.] Cf. *Phlegmonous e.* and *E. pestilens.*—**E. glabrum.** E. characterized by a smooth, shining surface. [G].—**E. habituale.** E. that has a tendency to recur repeatedly in the same individual. [G.]—**E. idiopathicum.** Fr., *érysipèle idiopathique.* See ERYTHEMA *essentiale.*—**E. infantile.** E. occurring in infants ; more especially an erysipelatous inflammation beginning in new-born infants. [G.]—**E. internum** [Cullen]. See GASTRITIS *erythematica.*—**E. læve** [Duncan], **E. lævigatum.** See *E. glabrum.*—**E. legitimum.** See *E. simplex.*—**E. malignum puerperale internum.** See *Malignant internal puerperal e.*—**E. marginatum.** E. in which the affected skin is bounded by a well-defined margin. [G.]—**E. medicamentosum.** A medicinal rash resembling e., but differing from it chiefly in its rapid development and in the absence of sharply defined borders and tenderness on pressure. [G, 27.]—**E. menstruale.** Fr., *érysipèle cataménial.* Ger., *menstrueller Rothlauf.* An eruption resembling e., which usually occurs on the face in women at the time of menstruation. [G.]—**E. mercuriale.** A form of e. said to be due to hydrargyrism. [G, 42.]—**E. metastaticum.** Fr., *érysipèle métastatique.* Metastatic e. ; characterized by outbreaks in different parts of the body, supposed to be due to metastasis. [G.]—**E. migrans, E. migratorium.** See *Erratic e.*—**E. miliare.** E. attended with small vesicles. [G.] See *E. vesiculosum.*—**E. neonatorum.** Fr., *érysipèle des nouveau-nés.* See *E. umbilici neonatorum.*—**E. nosocomiale, E. nothum.** See *Traumatic e.*—**E. odontalgicum.** E. (or inflammation with swelling and œdema) of the cheek due to an alveolar abscess. [G, 10.]—**E. œdematodes, E. œdematosum.** Fr., *érysipèle œdémateux.* E. specially characterized by œdema ; or, more properly, a peculiar form of e. attended with œdematous swelling without marked redness of the surface, occurring especially in old people. [G, 7, 10.] Cf. *White e.*—**E. otalgicum.** E. in the region of the ear, due to suppurative otitis or mastoiditis. [G.]—**E. periodicum nervosum chronicum.** See PELLAGRA.—**E. perstans faciei.** A form of e. or an erysipelatoid eruption occasionally occurring upon the face and scalp in connection with the disseminated form of lupus erythematosus, and lasting sometimes for several weeks, accompanied with severe general symptoms. [G, 47.] See LUPUS *erythematosus disseminatus* (seu *aggregatus*).—**E. pestilens.** Of Sauvages, a disease that prevailed as an epidemic in the Dark Ages, as a sequel of war and famine, and was variously known as *ignis sacer* (seu *Sancti Antonii*), *mal des Ardens* (*q. v.*), etc., and was characterized by erysipelatous inflammation of the skin, followed by gangrene which often destroyed the limbs joint by joint. It was regarded by Sauvages as a form of ergotism. [G, 17.]—**E. phlegmonodes, E. phlegmonosum.** See *Phlegmonous e.*—**E. phlyctænodes.** Zoster. [G, 59.]—**E.-plant.** See HELIOTROPIUM *indicum.*—**E. puerperale.** Fr., *érysipèle puerpéral.* A form of e. attacking lying-in women, generally beginning about the genitals and spreading to other parts. [A, 326 (α, 21).]—**E. pulmonis (Lommii).** See PERIPNEUMONIA *notha.*—**E. pulmonum** [Waumann]. An old name for pneumonia limited to the surface of the lung. [L.]—**E. pustulosum.** 1. Zoster. 2. E. attended with pustules. [G.]—**E. recurrens.** Fr., *érysipèle de retour* (ou *à répétitions*). Ger., *Rückfallerysipel.* E. characterized by a tendency to recur at the same point, and usually followed by hyperplastic growth or by elephantiasis. [G.]—**E. senile.** E., especially of the legs, occurring in aged people. [G, 10.]—**E. serpens.** See *Erratic e.*—**E. simplex.** Fr., *érysipèle simple.* Cutaneous e. ; the most common form of the disease, occurring usually on the face, sometimes on the limbs, less frequently on the trunk, and not affecting the tissues to any great depth. [G.]—**E. spontaneum.** See ERYTHEMA *essentiale.*—**E. spurium.** See *E. traumaticum.*—**E. suffusum.** See ERYTHEMA.—**E. superficiale.** Fr., *érysipèle superficiel.* See *E. simplex.*—**E. traumaticum.** See *Traumatic e.*—**E. typhodes.** E. attended with typhoid symptoms. [G.]—**E. umbilici neonatorum.** Fr., *érysipèle de l'ombilic.* E. in new-born children, beginning in the region of the navel before cicatrization is complete, and usually spreading extensively over the body. [G.]—**E. universale.** E. that spreads very extensively over the surface of the body. [G.]—**E. urticatum.** See URTICARIA.—**E. vaccinæ, E. vaccinale.** See *Vaccinal e.*—**E. variegatum.** E. characterized by stripes. [A, 326 (α, 21).]—**E. verrucosum.** E. in which the skin appears warty or blotched. [A, 326 (α, 21).]—**E. verum.** See *E. simplex.*—**E. vesiculosum.** Fr., *érysipèle vesiculeux.* 1. Pemphigus. 2. E. attended with the production of vesicles. [G.]—**E. zona, E. zoster.** Zoster. [G, 17.]—**External e.** E. affecting the integument. [G.] Cf. *Internal e.*—**Facial e.** See *E. faciei.*—**False e.** A term sometimes applied to exanthems resembling e., such as certain forms of erythematous eczema or of erythema. [G.]—**Gangrenous e.** See *E. gangrænosum.*—**Hepatic e.** A form of e. connected with disease of the liver. [L. Boucher, "France méd." ; "Brit. Med. Jour." ; "N. Y. Med. Jour.," June 18, 1887, p. 690.] Cf. *Bilious e.*—**Idiopathic e.** Fr., *érysipèle idiopathique.* An e. due to causes acting on the system from without. [E.]—**Internal e.** E. affecting the interior of the body, more particularly the mucous membranes.—**Lymphatic e.** An e. in which the implication of the lymphatics predominates, and which is characterized by a rose, rather than a red, color, that disappears entirely on pressure, and is always marked by red lines along the course of the lymphatics. [A, 329 (G).]—**Malignant internal puerperal e.** Lat., *e. malignum puerperale internum.* Fr., *érysipèle puerpéral malin interne.* Of Virchow, a form of puerperal fever supposed to depend on an inward extension (after the manner of e.) of an ulcerative inflammation of the genitals. [A, 24.]—**Medical e.** Fr., *érysipèle medical.* E. originating or apparently originating spontaneously and commonly belonging to the domain of the physician ; in contradistinction to surgical or traumatic e., originating from wounds or injuries, and commonly belonging to the domain of the surgeon. [A, 329 (G).]—**Metastatic e.** See *E. metastaticum.*—**Œdematous e.** Lat., *E. œdematodes.* A mild variety of phlegmonous e. accompanied by more œdema of the cellular tissue than seems to be due to the inflammation of the skin. [E.]—**Phlegmonous e.** Lat., *e. phlegmonosum* (seu *phlegmonodes*). Fr., *érysipèle phlegmoneux.* It., *erisipela flemmonosa.* E. involving the skin and the subcutaneous tissue, often attended with suppuration and gangrene. [G.]—**Puerperal e.** Fr., *érysipèle puerpéral.* Traumatic e. in lying-in women ; also, of some authors, e. of the umbilicus in the new-born as the result of infection from the mother. Cf. *Malignant internal puerperal e.*—**Pustular e.** See *E. pustulosum.*—**Secondary e.** E. which appears during the course of a pre-existing disease. [L, 88 (α, 29).]—**Serpiginous e.** A form of e. which extends in various directions by the involvement of adjacent portions of the skin. [L, 88 (α, 29).]—**Simple e.** See *E. simplex.*—**Spontaneous e.** Fr., *érysipèle spontané.* E. not known to be due to an external cause. [L, 43.]—**Surgical e.** See *Traumatic e.*—**Symptomatic e.** E. due to some constitutional disturbance. [E.]—**Traumatic e.** Lat., *e. traumaticum.* Fr., *érysipèle traumatique.* Ger., *Wunderysipel.* E. attacking the parts about a wound, probably as the result of infection ; often erratic and generally more dangerous than simple e. [A, 326 (α, 21) ; A, 518.]—**True e.** See *E. simplex.*—**Vaccinal e.** Lat., *e. vaccinale.* Fr., *érysipèle vaccinal.* Ger., *Impferysipel.* E. proceeding from the site of a recent vaccination ; usually due to secondary infection.—**Venous e.** Fr., *érysipèle veineuse.* E. attended with decided venous congestion, and characterized by a dark-red or vinous color which does not entirely disappear on pressure. The term was used by L. J. Sanson in contradistinction to lymphatic e. [A, 329 (G).]—**Vesicular e.** E. attended with the formations of vesicles. [G.]—**Wandering e.** See *Erratic e.*—**White e.** Fr., *érysipèle lymphatique.* "A form of erysipelatous œdema in which there is no visible distension of blood-vessels." [J. Hutchinson, "Med. Times and Gaz.," Jan. 6, 1883, p. 4.] Cf. *E. œdematosum.*

ERYSIPELATOID, adj. E^{2}r-i^2-si^{2}p-e^{2}l′a^{2}t-oid. Gr., **ἐρυσιπελατώδης** (from **ἐρυσίπελας**, erysipelas, and **εἶδος**, resemblance). Lat., *erysipelatodes.* Fr., *érysipélatoïde.* Ger., *rosenartig, rosenähnlich.* Resembling erysipelas. [G.]

ERYSIPELATOPNEUMONIA (Lat.), n. f. E^{2}r-i^2(u^6)-si^{2}p-el″-a^{2}t(a^{3}t)-o(o^{2}p)-nu^2-mon(mo^{2}n)′i^2-a^3. Fr., *érysipélatopneumonie.* Ger., *erysipelatöse Pneumonie.* Erysipelatous pneumonia. [A, 322 (α, 21).]

ERYSIPELATOUS, adj. E^{2}r-i^2-si^{2}p-e^{2}l′a^{2}t-u^{3}s. Lat., *erysipelatosus, erysipelatodes.* Fr., *érysipélateux.* Ger., *erysipelatös.* It., Sp., *erisipelatoso.* Pertaining to or of the nature of erysipelas. [G.]

ÉRYSIPÈLE (Fr.), n. A-re-ze-pe^{2}l. See ERYSIPELAS.—**E. ambulant.** See *Erratic* ERYSIPELAS.—**E. à répétitions.** See ERYSIPELAS *recurrens.*—**E. bronzé.** See GANGRÈNE *gazeuse foudroyante.*—**E. cataménial.** See ERYSIPELAS *menstruale.*—**E. crouteux.** See ERYSIPELAS *crustosum.*—**E. de l'ombilic.** See ERYSIPELAS *umbilici neonatorum.*—**E. de retour.** See ERYSIPELAS *recurrens.*—**E. des nouveau-nés.** See ERYSIPELAS *umbilici neonatorum.*—**E. lymphatique.** See *White* ERYSIPELAS.—**E. périodiques.** Attacks of erysipelas or exanthem occurring periodically, sometimes associated with intermittent fever, sometimes with menstruation. ["Nouv. dict. de méd. et de chir.," 1871, xiv, p. 61, 63 (G).]—**E. veineuse.** See *Venous* ERYSIPELAS.

ERYSIPELINE, n. E^{2}r-i^2-si^{2}p′e^{2}l-en. Of Farr, the zymotic poison of erysipelas. [α, 18.]

ERYSIPELOGONORRHŒA (Lat.), n. f. E^{2}r-i^2(u^6)-si^{2}p″e^{2}l-o(o^3)-go^{2}n-o^{2}r-re′(ro^2′e^2)-a^3. See ERYSIPELURETHRITIS.

ERYSIPELOID, adj. E^{2}r-i^2-si^{2}p′e^{2}l-oid. See ERYSIPELATOID ; as a n., of Rosenbach, an erysipelatoid inflammation originating in a wound from infection with putrid animal matter, but not directly transmissible from one person to another. The inflammation spreads slowly in the form of a dark-red, often livid swelling with a sharp border. ["Arch. f. klin. Chir." ; "N. Y. Med. Jour.," Dec. 24, 1887, p. 724.]

ERYSIPELOPAROTITIS (Lat.), n. E^{2}r-i^2(u^6)-si^{2}p″e^{2}l-o(o^3)-pa^{2}r-o-tit(tet)′i^{2}s. Gen., *erysipeloparotit′idos* (*-is*). For deriv., see ERYSIPELAS and PAROTIDITIS. Ger., *Ohrdrüsenentzündung mit Rose.* Erysipelatous parotiditis. [A, 322 (α, 21).]

ERYSIPELORCHITIS (Lat.), n. f. E^{2}r-i^2(u^6)-si^{2}p-e^{2}l-o^{2}r-ki-(ch^{2}e)′ti^{2}s. Gen., *erysipelorchit′idos* (*-is*). Fr., *érysipélorchite.* Ger., *erysipelatöse Hodenentzündung, Hodenentzündung mit Rose.* Erysipelatous orchitis. [A, 322 (α, 21).]

ERYSIPELURETHRITIS (Lat.), n. f. E^{2}r-i^2(u^6)-si^{2}p-e^{2}l-u^2-(u)-re^2(ra)-thrit(thret)′i^{2}s. Gen., *erysipelurethrit′idos* (*-is*). Fr., *érysipeluréthrite.* Ger., *erysipelatöse* (oder *rosenartige*) *Harnröhrenentzündung.* Erysipelatous urethritis. [A, 322 (α, 21).]

ERYSIPELOUS, adj. E^{2}r-i^2-si^{2}p′e^{2}l-u^{3}s. See ERYSIPELATOUS.

ERYSIPHE (Lat.), n. f. E^{2}r-i^2(u^6)-sif(sef)′e(a). Gen., *erysiph′es.* Fr., *érysiphe.* 1. A genus of the *Ascomycetes.* 2. See ERYSIBE. The *Erysipheæ* of Léveillé are one of the principal divisions of the *Ascomycetes*, including the common mildew (*Penicilium*), E., etc., in most of which the fructification consists of a few asci inclosed in a false parenchyma tissue. [B, 170, 291 (α, 24).]—**E. cichoracearum.** A species which attacks the leaves of certain herbaceous plants. [L, 49.]—**E. Martii.** Of Léveillé, a species developed on the pea plant. [B, 61, 77, 206, 246 (α, 24).]—**E. Tuckeri.** Of Berkley, vine-mildew, oidium ; a species that has proved most destructive to the grape. [B. 77, 291 (α, 24).]

ERYSOS (Lat.), adj E^{2}r′i^2(u^6)-so^{2}s. Gr., **ἐρυσός**. See ERYTHOS.

ERYTHACOS (Lat.), n. m. E^{2}r-i^{2}th(u^{6}th)'a^{2}k(a^{3}k)-o^{2}s. Gr., ἐρυθακός. Redness. [L, 94.]

ERYTHANTHEMA (Lat.), n. n. E^{2}r-i^2(u^6)-tha^{2}n(tha^{3}n)'the^{2}m-a^3. Gen., *erythanthem'atos (-is)*. From ἐρυθρός, red, and ἄνθος, a blossom, an efflorescence. Ger., *Erythanthem*. A red cutaneous rash. The *Erythanthemata* of Auspitz are a class of cutaneous efflorescences which, though differing in their mode of development, have a basis of erythema in common. [G, 4.]—**E. essentiale.** Of Auspitz, an essential angeioneurosis of the skin characterized by e., and including erythema multiforme, erythema nodosum, herpes circinatus, herpes iris, herpes phlyctænodes, eczematous and pemphigoid eruptions of an angeioneurotic nature, and purpura rheumatica. [G, 4.]—**E. neuriticum.** 1. A subdivision of Auspitz's "neuritic dermatoses," characterized by e. and by an acyclic course. It includes neuritic forms of erythema, herpes, pemphigus, eczema, furunculus, ecthyma, and purpura. [G, 4.] 2. Of Bronson, a term employed to designate certain exanthems of an erythematous character occurring coincidently with syphilis and to which they are believed to be due, though not corresponding to typical syphilodermata. Ulteriorly, it is said, they may become the site of syphilitic infiltration. ["Med. Record," Sept. 4, 1886, p. 253 (G).] Cf. ERYTHEMA *neuriticum*, etc.

ERYTHEM (Ger.), n. E^{2}r-u^6-te^{2}m'. See ERYTHEMA.—**Heu-E.** See ERYTHEMA *æstivum*.—**Knotene'.** See ERYTHEMA *nodosum*.

ERYTHEMA (Lat.), n. n. E^{2}r-i^2(u^6)-the(tha)'ma^3. Gen., *erythem'atos (-is)*. Gr., ἐρύθημα (from ἐρυθαίνειν, to redden). Fr., *érythème, dartre érythémoïde*. Ger., *Erythem*. It., *eritema*. Syn.: *dermatitis erythematosa, erysipelas suffusum*. Inflammatory hyperæmia of the skin attended with redness of the surface, but usually only slight or imperceptible exudation, and with little or no disturbance of the epidermis. [G.]—**Amorphous e.** Fr., *érythème amorphe*. E. with efflorescences of an irregular shape and arrangement. [G, 7.]—**Annular e.** Lat., *e. annulare*. Fr., *érythème annulaire* (ou *circiné*). A form of e. exudativum multiforme in which the efflorescences are ring-shaped, subsiding at the centre while they spread at the periphery. [G.] Cf. ÉRYTHÈME *excentrique*.—**Belladonna e.** Fr., *érythème belladonné, scarlatine belladonnée*. A toxic e. resembling the eruption of scarlatina (but not followed by desquamation), produced by large doses of belladonna. [G, 26.]—**Centrifugal e.** Lat., *e. centrifugum*. Fr., *érythème centrifuge*. 1. Of Biett, a variety of lupus erythematosus in which cicatricial tissue occupies the centre of the patch, surrounded by an erythematous border. [G, 44.] 2. See *Annular e.*—**Choleraic e.** Fr., *roséole cholérique*. An e., commonly e. papulatum, sometimes observed in cholera patients. Most observers describe it as occurring during the declining stage of the disease, though Hebra [Hebra and Kaposi, "Lehrbuch der Hautkrankheiten," ii, Auflage, 1872, p. 251] found it generally at the beginning of the cholera attack and continuing after the symptoms of the latter had disappeared, lasting often for a fortnight. According to Hebra, it chiefly affected the extremities. The color of the e. papules was bluish-red or livid. [G.]—**Desquamative scarlatiniform e.** A form of exfoliative dermatitis described by Féréol, characterized by a general e. resembling the eruption of scarlet fever and followed by copious desquamation. ["Bull. gén. de thérap.," Feb. 15, 1876.]—**E. ab (applicatis) acribus.** See *E. venenatum*.—**E. ab attritu.** See INTERTRIGO.—**E. ab igne.** E. caloricum (*q. v.*) due to exposure to the heat of fire. [G, 11.]—**E. acrodynia.** See ACRODYNIA.—**E. a decubitu.** E. traumaticum (*q. v.*) due to continued pressure upon the skin from decubitus. [G, 77.]—**E. æstivum.** Fr., *érythème de foin* (ou *é. d'été*). Ger., *Heu-Erythem*. An affection of the skin of the backs of the feet and the lower part of the legs, observed in those who work barefooted in hay-fields; characterized by redness, œdematous swelling, intense itching and burning, followed by the formation of bullæ which, breaking, leave a loss of substance. There is moderate fever, with slight intestinal disturbance. The affection either disappears spontaneously or ends in chronic deep-seated thickening of the skin and torpid ulcers. It is attributed to the irritant action of the *Ranunculus acris*. [Baruch, "Berlin. klin. Woch.," 1881, No. 50; "Ann. de dermat. et de syph.," June, 1882, p. 382.]—**E. a frigore, E. a gelu.** Fr., *érythème engelure*. See CHILBLAIN.—**E. ambustio.** See BURN.—**E. angelectaticum.** A term proposed by Auspitz for rosacea, to express the fact that the disease depends upon dilatation of the cutaneous blood-vessels. [G, 4.]—**E. annulare, E. annulatum.** See *Annular e.*—**E. anthrax.** See ANTHRAX.—**E. balsamicum.** E. due to the internal use of balsamics (*e. g.*, copaiba). [G.]—**E. bullosum.** E. exudativum multiforme (*q. v.*) attended with the development of bullæ. [G.]—**E. caloricum.** E. simplex (*q. v.*) due to the local action of heat or cold. [G.]—**E. centrifugum, E. circinatum.** See *Annular e.*—**E. complicatum cum alio morbo.** E. simplex (*q. v.*) due to any local inflammation adjacent to or involving the skin. [G, 11.]—**E. congestivum.** E. characterized by hyperæmia without appreciable exudation. [G, 3.] Cf. *E. exsudativum*.—**E. congestivum idiopathicum.** See *E. simplex*.—**E. congestivum papulatum.** See *E. papulatum*.—**E. congestivum traumaticum.** See *E. traumaticum*.—**E. contusiforme.** See *E. nodosum*.—**E. cyanoticum.** E. attended with bluish discoloration due to venous engorgement. [G.]—**E. endemicum.** Fr., *érythème endémique*. See PELLAGRA.—**E. epidemicum.** Fr., *érythème épidémique*. See ACRODYNIA and PELLAGRA.—**E. essentiale.** Fr., *érythème spontané*. E. occurring as a spontaneous and independent form of disease. [G, 7.]—**E. ex profluviis.** See INTERTRIGO.—**E. exsudativum.** E. occurring as an essential disease and attended with inflammatory exudation, as distinguished from such forms as are produced by transitory hyperæmia (e. congestivum), from such as are due to local irritations of the skin, and from those that are secondary to other inflammatory diseases. According to Hebra, it includes *e. exsudativum multiforme* and *e. nodosum* (*q. v.*). [G, 3.]—**E. exsudativum multiforme.** Fr., *érythème papulo-tuberculeux*. A cutaneous affection characterized by sharply defined, more or less elevated erythematous efflorescences, which vary in form and arrangement, affecting most commonly the backs of the hands and feet, the forearms and legs, and sometimes also the face or other parts; and having the character of an essential disease. Its chief varieties are *e. annulare, e. figuratum, e. gyratum, e. iris, e. marginatum, e. papulatum*, and *e. vesiculosum*. [G, 3.]—**E. figuratum.** That variety of e. exsudativum in which the eruption has a figured arrangement. [G.]—**E. febrile.** Of Plenck, "a dusky, pustular e. of the nose in malignant fevers, which is a sign of approaching death." [G, 11.]—**E. fugax.** Fr., *érythème fugace*. A transitory rash, consisting of spots or patches of hyperæmia, occurring usually in young children or in females with a delicate skin; due to angeioneurotic disturbance. [G.]—**E. gangrænosum.** A disease of uncertain character, in which patches of e. occur on various parts of the body, accompanied sometimes with bullæ or excoriations, and sometimes with gangrene. It has usually been seen in hysterical women, and, according to some, is always produced artificially for purposes of deception. [G.] 2. See ANTHRAX and CARBUNCLE.—**E. granatristrum.** See ANTHRAX.—**E. gutta rosa.** E. accompanying rosacea. [G, 18.]—**E. gyratum.** That variety of e. exsudativum multiforme in which the efflorescences appear in the form of gyrate lines. [G.]—**E. hæmorrhagicum.** Hæmorrhagic e. associated with bloody extravasations. [G.]—**E. hyperæmicum.** See *E. congestivum*.—**E. infantile.** See ROSEOLA *infantilis*.—**E. intertriginosum, E. intertrigo.** See INTERTRIGO.—**E. iracundiæ.** See RUBOR *iracundiæ*.—**E. iris.** Fr., *érythème mamelonné*. It., *eritema irideo*. A modified form of annular e. (*q. v.*), produced by the development of an erythematous papule in the centre of the annular efflorescence, giving rise to various shades of color between the centre and the periphery of the spot, whence the term *iris*. [G, 15.]—**E. læve.** Fr., *érythème lisse*. It., *eritema liscio*. A transitory form of e. occurring on swollen, œdematous parts. [G, 9.]—**E. lupinosum** [Veiel]. See LUPUS *erythematosus*.—**E. mamillatum.** See *E. iris* and ÉRYTHÈME *mamelonné*.—**E. marginatum.** Fr., *érythème marginé*. E. exsudativum multiforme with a distinct margin. [G.]—**E. medicamentosum.** E. due to the toxic action of a drug. [G.]—**E. mercuriale.** Fr., *érythème mercuriel*. E. due to the local application of a mercurial. [A, 385 (a, 21).]—**E. multiforme** [Hebra]. See *E. exsudativum multiforme*.—**E. multiforme universale.** E. that tends to spread over the larger part of the body. [G.]—**E. nævus.** See NÆVUS *vascularis*.—**E. neonatorum.** See RUBOR *neonatorum*.—**E. neuriticum.** E. due to disease of the nerves or of the nervous supply of a part. [G, 4.]—**E. nodosum.** Fr., *érythème noueux*. Ger., *Knotenerythem*. It., *eritema nodoso*. An exudative form of e. characterized by round or oval elevated tubercles or nodules of the skin, of a bright-red color at first, afterward becoming blue or livid, especially toward the centre, tender on pressure, and most commonly situated on the legs, but sometimes on the thighs and arms. [G.]—**E. nodosum malignum.** Of Uffelmann, a chronic grave disease of children, resembling e. nodosum, but thought to be connected with tuberculosis. [A. Schmitz, "St. Petersb. med. Woch.," Jan. 31 (Feb. 12), 1887, p. 37; "Ctrlbl. f. Kinderh.," Apr. 2, 1887, p. 67.]—**E. œdematodes, E. œdematosum.** See *E. læve*.—**E. palmare et plantare syphiliticum.** See *Squamous* SYPHILODERM *of the palms and soles*.—**E. papulatum.** Fr., *érythème papulo-tuberculeux*. It., *eritema papuloso-tubercoloso*. Syn.: *e. tuberculatum*. That variety of e. exsudativum multiforme in which the efflorescences appear in the form of papules or tubercles. [G.]—**E. papulatum syphiliticum.** See *Papular syphilitic* ROSEOLA.—**E. paratrimma.** See PARATRIMMA.—**E. pellagrum.** Fr., *érythème pellagreux*. The e. of pellagra. [A, 385 (a, 21).]—**E. pernio.** See CHILBLAIN.—**E. polymorphum.** Fr., *érythème polymorphe*. See *E. exsudativum multiforme*.—**E. pudoris.** See RUBOR *pudoris*.—**E. puerperarum.** Ger., *Puerperalscharlach*. Syn.: *scarlatina puerperarum, pseudo-scarlatina*. A rash resembling that of scarlet fever, occurring in puerperal women, probably as the effect of septic poisoning. It begins on the abdomen and thence spreads over the body. It consists of more or less distinct red spots, rather than the "punctate redness" of scarlatina. [G.]—**E. puriffluens.** A form of intertrigo, occurring especially in the fold of the buttock in young children, attended with an abundant muco-purulent discharge. [G, 50.]—**E. pyæmicum.** A form of symptomatic e. due to pyæmia or septicæmia. [G.]—**E. rosaceum.** See ROSACEA *erythematosa*.—**E. scarlatiniforme.** Fr., *érythème scarlatiniforme*. E. in which the efflorescences are minute in size and closely aggregated together, so as to resemble the exanthem of scarlet fever. [G, 51.]—**E. septicæmicum.** See *E. pyæmicum*.—**E. serpens, E. serpiginosum.** E. exsudativum multiforme that spreads in a serpiginous manner. [G.]—**E. simplex.** See *E. congestivum*.—**E. solare.** Fr., *érythème solaire*. See PELLAGRA.—**E. spontaneum.** Fr., *érythème spontané*. See *E. essentiale*.—**E. syphiliticum.** See ROSEOLA *syphilitica*.—**E. traumaticum.** E. due to traumatic causes, such as friction, pressure, and the like. [G.]—**E. tuberculatum, E. tuberosum.** See *E. papulatum*.—**E. urticans.** An erythematous eruption of the skin characterized by urticarial wheals with e. of the intervening spaces. [G, 12.]—**E. urticatum, E. urticosum.** A form of e. papulatum which, on account of a considerable serous effusion into the papules and the presence of itching, resembles urticaria. [G.]—**E. vaccinicum.** See ROSEOLA *vaccina*.—**E. vaccinicum exsudativum.** A form of e. following vaccination and having the appearance of e. exsudativum multiforme. [G, 27.]—**E. variolosum.** See ROSEOLA *variolosa*.—**E. venenatum.** E. due to the direct action of acrid or poisonous substances on the skin. [G.]—**E. vesiculare, E. vesiculosum.** E. multiforme attended with vesiculation. [G.] Cf. HERPES *iris*.—**E. volans.** E. fugax, particularly in hysterical subjects. [G, 17.]—**E. volaticum.** See *E. fugax*.—**E. volaticum genarum.** "A sudden and transitory rubor of the cheeks and face observed either in connection with verminous or hysterical affections or with approaching menstruation, from shame, or, in sucking infants, in consequence of anger of the nurse." [G, 11.]—**Idiopathic e.** Fr., *érythème idiopathique*. See *E. es-*

sentiale.—**Infectious e.** Fr., *érythème infectieux.* A term employed for e. multiforme, implying a theory that the disease is of an infectious nature. ["Am. de demat. et de syphil.," Nov., 1888, p. 697 (G).]—**Menstrual e.** An erythematous exanthem that is sometimes associated with menstruation. [G.]—**Papular e.** Fr., *érythème papuleux.* See *E. papulatum.*—**Papulo-tubercular e.** See *E. papulatum.*—**Polymorphous e.** See *E. multiforme.*—**Recurrent exfoliative e.** Of G. H. Fox, a form of skin disease characterized by recurrent attacks of general hyperæmia of the surface, attended with desquamation of the cuticle. ["Arch. of Dermat.," v, 1879, p. 264.]—**Relapsing desquamative scarlatiniform e.** A form of recurrent e. in which the efflorescence resembles that of scarlet fever and is followed by desquamation. [G. T. Elliot, "N. Y. Med. Jour.," Jan. 11, 1890, p. 29.]—**Syphilitic e.** Fr., *érythème syphilitique.* See *Erythematous* SYPHILODERM.—**Syphilitic e. nodosum.** Fr., *érythème noueux syphilitique.* Of Mauriac, a form of e. closely resembling e. nodosum in appearance and location, and occurring at about the fourth month in the course of syphilis. [G, 93.]—**Tubercular e.** Fr., *érythème tuberculeux.* See *E. papulatum.*

ERYTHEMATIC, ERYTHEMATOUS, adj's. E²r-i²-the²m-a²t'i²k, -the²m'a²t-u³s. Lat., *erythematicus, erythematosus, erythematodes.* Fr., *érythémateux, érythématique.* Ger., *erythematös.* Pertaining to or characterized by erythema. [G.]

ÉRYTHÈME (Fr.), n. A-re-te²m. See ERYTHEMA.—**E. centrifuge, E. circiné.** See *Annular* ERYTHEMA.—**E. copahique.** Erythema balsamicum, due to the internal use of copaiba. [G, 51.]—**E. de foin, E. d'été.** See ERYTHEMA *æstivum.*—**E. engelure.** See CHILBLAIN.—**E. épidémique.** See ACRODYNIA and PELLAGRA.—**E. excentrique.** A variety of annular erythema, most commonly observed upon the cheeks and chin, in which a small erythematous patch extends at the periphery while in the centre it presents the appearance of a superficial cicatrix. A similar form, described by Devergie, affects the tip of the nose and the ends of the fingers, following severe fevers. [G, 7, 44, 50.]—**E. induré.** A scrofulous disease of the skin described by Bazin as consisting of ill-defined red or violet spots, hard and not sensitive to the touch, occurring most commonly on the outer or posterior aspect of the legs and sometimes on the face. [G, 26.] Cf. ERYTHEMA *nodosum.*—**E. lisse.** See ERYTHEMA *læve.*—**E. mamellé.** 1. See ERYTHEMA *mamillatum.* 2. Of Alibert, erythema occurring in oval patches of about the size of the hand, elevated above the surface, and bearing a fancied resemblance to the mamma. [G, 7.]—**E. mamelonné.** Syn.: *reséole miliaire* [Bazin]. Of Hardy, an erythematous eruption characterized by red papules or tubercles occurring on the buttocks, back, breast, thighs, and face, observed during severe acute diseases or during convalescence from them. [G, 51.]—**E. noueux.** See ERYTHEMA *nodosum.*—**E. noueux syphilitique.** See *Syphilitic* ERYTHEMA *nodosum.*—**E'spapuleux fessiers post-érosifs.** A papular e. attended with erosion and occurring on the nates in infants. ["Ann. de dermat. et de syph.," Aug., 1886, p. 444 (G).]—**E. papulo-tuberculeux.** See ERYTHEMA *papulatum.*—**E. trichophytique.** A form of trichophytosis in which the gross appearances are simply erythematous, while the trichophyton is found luxuriant and of great size. [Ducrohet, "Thèse de Paris," 1883; "Rev. des sci. méd.," Jan., 1885, p. 259.]—**E. vésiculo-pustuleux.** A form of dermatitis due to local irritation and characterized by erythema associated with vesicles or pustules, which break, giving rise to a sero-purulent discharge. According to Hardy, the disease is not eczema. [G, 51.]

ERYTHEMOID, adj. E²r-i²-them'oid. More correctly written *erythematoid.* Lat., *erythemodes* (from ἐρύθημα, erythema, and εἶδος, resemblance). Fr., *érythémoïde.* Resembling erythema.

ERYTHRÆA (Lat.), n. f. E²r-i²(u⁶)-thre'(thra³-a')-a³. From ἐρυθραῖος, red. Fr., *érythrée.* Ger., *Erythräe.* Blushwort; a genus of the *Gentianeæ.* [B, 42, 275 (a, 24).]—**E. angustifolia.** See *E. linarifolia.*—**E. cachanlahuen.** See *E. chilensis.*—**E. centaurium.** Fr., *petite centaurée, fiel de terre, herbe à la fièvre, plante fébrifuge.* Ger., *gemeine Erythräe, grosses Tausendgüldenkraut, Erdgalle, Fieberkraut, rother Aurin.* Common European centaury; a species still official in the Edinb. Ph. The flowering tops are odorless, but have a strong, bitter taste, and constitute the official part. The herb contains a peculiar principle called by Méhu *erythrocentaurin,* and a wax-like substance, also saline matter. It is used as a tonic and in dyspepsia, and was once thought a febrifuge. It resembles gentian in its properties, and was one of the ingredients of the Portland powder; it also furnishes a dye. [B, 5, 173, 180 (a, 24).]—**E. chilensis.** Fr., *chironia du Chili.* Ger., *chilesische Erythräe.* A species indigenous to Chili, having the properties of *E. centaurium.* It is used there as a mild tonic and febrifuge, and is called *cachanlahuen* or *canchalagua.* [B, 5, 173, 180 (a, 24).]—**E. compressa, E. conferta.** See *E. linarifolia.*—**E. jorullensis.** See *E. chilensis.*—**E. linarifolia, E. linifolia, E. littoralis.** A species often found in commerce with *E. centaurium* and having similar properties. [B, 180 (a, 24).]—**E. Plumieri.** The *Gentiana connata.* [B, 173 (a, 24).]—**E. pulchella, E. ramosissima.** A species often found in the shops with *E. centaurium* and having similar bitter properties. [B, 180 (a, 24).]—**E. Roxburghii.** Of Don, a species found in the East Indies, very bitter and considered an excellent tonic. [B, 172 (a, 24).]—**E. stricta.** A species constituting one of the sources of the canchalagua of the Mex. Ph. [A, 447.]—**E. uliginosa.** See *E. linarifolia.*—**E. venusta.** A variety found in California, said to be identical with *E. chilensis.* ["Proc. of the Am. Pharm. Assoc.," xxvii (a, 14).]

ERYTHRÆMIA (Lat.), n. f. E²r-i²(u⁶)-threm'(thra³'e²m)-i²-a³. From ἐρυθρός, red, and αἷμα, blood. Fr., *érythrémie.* The aeration of the blood in the lungs. [A, 322 (a, 21).]

ERYTHRAMYLUM (Lat.), n. n. E²r-i²th(u⁶th)-ra²m(ra³m)'-i²l(u⁶l)-u³m(u⁴m). From ἐρυθραῖος, red, and *amylum,* starch. The "red" modification of starch produced by treating with iodine the intermediate residue of granulose which has been submitted to the action of acids. [B, 3 (a, 27).]

ERYTHRANCHE (Lat.), n. f. E²r-i²(u⁶)-thra²n²(thra³n²)'ke-(ch²a). Gen., *erythranch'es.* From ἐρυθρός, red, and ἄγχειν, to strangle. See *Erysipelatous* ANGINA and *Erythematous* ANGINA.

ERYTHRARSIN, n. E²r-i²-thra³r'si²n. From ἐρυθρός, red, and ἀρσενικόν (see ARSENIC). Fr., *érythrarsine.* Of Bunsen, an uncrystallizable, inodorous red substance, apparently containing $C_4H_{12}As_6O_3$, produced by the incomplete combustion of cacodyl. It is insoluble in water, in alcohol, and in ether. [B, 2, 146 (a, 14).]

ERYTHRASMA (Lat.), n. n. E²r-i²(u⁶)-thra²z(thra³s)'ma³. Gen., *erythras'matos (-is).* A contagious parasitic disease of the skin occurring especially in the groins and axillæ, in the form of sharply defined, brownish-red, desquamating patches, bordered by a fringe of broken and partly detached epidermis. According to Bärensprung, it is due to the presence of the *Microsporon minutissimum* of Burchardt. Others regard the affection as identical with eczema marginatum. [A, 326 (a, 21); "Med. Zeit. d. Vereins f. Heilk. f. Preussen.," 1859, No. 29; "Ann. d. charité," 1862, x (G, 82); "Arch. de neurol.," Jan., 1889, p. 8.]

ERYTHRATE, n. E²r'i²th-rat. A salt of erythric acid. [B, 2.]

ERYTHREMA (Lat.), n. n. E²r-i²(u⁶)-thre(thra)'ma³. Gen., *erythrem'atos (-is).* See ERYTHEMA.

ERYTHREMELALGIA (Lat.), n. f. E²r-i²(u⁶)-threm(thram)-e²l-a²l(a³l)'ji²(gi²)-a³. From ἐρυθρός, red, and ἄλγος, pain. Ger., *Erythremelalgie.* Of Woodnut, the appearance of red, painful spots on the back and limbs in alcoholism, hysteria, and certain spinal affections. [A, 319 (a, 21).]

ERYTHRENTERIA (Lat.), n. f. E²r-i²(u⁶)-thre²n-te(te²)'ri²-a³. From ἐρυθρός, red, and ἔντερον, an intestine. Intestinal hyperæmia. [A, 322.]

ERYTHRIC ACID, n. E-ri²th'ri²k. Fr., *acide érythrique.* Of Brugnatelli, alloxan. [B, 2.]

ERYTHRIN, n. E²r'i²th-ri²n. Fr., *érythrine.* Ger., *E.* A compound, $C_{20}H_{22}O_{10}$, derived from *Rocella tinctoria;* considered also as erythric acid. [A, 385 (a, 21); B, 244 (a, 27).]—**E.-bitter.** Fr., *amer d'érythrine.* See PICROERYTHRIN.

ERYTHRINA (Lat.), n. f. E²r-i²(u⁶)-thrin(thren)'a³. From ἐρυθρός, red, from the color of the flower. Fr., *érythrine.* Ger., *Korallenbaum.* The coral-tree; of Linnæus, a genus of leguminous trees or shrubs, often prickly. The *Erythrineæ* (Fr., *érythrinées*) are a subtribe of the *Phaseoleæ,* suborder *Papilionaceæ.* [B, 34, 42, 173, 180 (a, 24).]—**E. corallodendron.** Fr., *érythrine, arbre de corail.* Ger., *ächter Korallenbaum.* The coral bean-tree or West Indian coral-tree. Its root is sudorific, the whole plant is sedative and vermifuge, the flowers are pectoral, and the leaves are applied to buboes. [B, 173, 180, 275 (a, 24); "Nouv. rem.," Sept. 15, 1886, p. 418 (a, 24); "Lancet," July 4. 1888, p. 36 (a, 24).]—**E. fusca** [Loureiro]. Fr., *érythrine brune.* Ger., *brauner Korallenbaum.* A species found in Cochin-China and the Moluccas, where the bark and leaves are used as discutients to wounds, the root in rheumatism, and the wood in kidney and bladder diseases. The flowers are boiled in milk and eaten. [B, 173, 180 (a, 24).]—**E. indica.** Fr., *arbre immortel, érythrine des Indes.* Ger., *indischer Korallenbaum.* Coral-tree; an East Indian species. The leaves and bark are considered febrifuge. and are used as an emmenagogue and in syphilis. [B, 172, 173, 180 (a, 24); "Glasgow Med. Jour.," Jan., 1889, p. 1 (a, 24).]—**E. monosperma.** Fr., *érythrine monosperme.* See BUTEA *frondosa.*—**E. Mulungu.** A Brazilian species. The bark, *casca de Mulungu,* is used as a febrifuge and emmenagogue. ["Proc. of the Am. Pharm. Assoc.," xxxiii (a, 14).]—**E. orientalis.** See *E. indica.*—**E. spinosa.** See *E. corallodendron.*—**E. stricta.** A species used in Malabar like *E. indica.* [B, 180 (a, 24).]—**E. velutina.** Fr., *érythrine veloutée.* A species found in Caracas, where an infusion of the flowers is given as a febrifuge. [B, 173 (a, 24).]

ERYTHRINE, adj. E²r'i²-thri²n. From ἐρυθρός, red. Lat., *erythrinus.* Fr., *érythrin.* Red or partially red. [L, 94, 180.]

ÉRYTHRINE (Fr.), n. A-ret-ren. See ERYTHRINA and ERYTHRIN.—**Amer d'é.** See PICROERYTHRIN.—**E. brune.** See ERYTHRINA *fusca.*—**E. des Indes.** See ERYTHRINA *indica.*

ERYTHRION (Lat.), n. n. E²r-i²th(u⁶th)'ri²-o²n. Gr., ἐρύθριον. Of Paulus Ægineta, a malagma. [A, 325 (a, 21).]

ERYTHRISM, n. E²r'i²-thri²z'm. Fr., *érythrisme.* A predominance of red pigment in the plumage. [L, 343.]

ERYTHRITE, n. E²r'i²th-rit. Fr., *érythrite.* Ger., *Erythrit.* A tetrahydric alcohol, $C_4H_6(OH)_4 = CH_2(OH) - CH(OH) - CH(OH) - CH_2OH$, obtained from *Protococcus vulgaris* and by decomposing erythrin obtained from several species of *Roccella,* etc. It occurs in colorless, prismatic crystals, soluble in water. [H, 301 (a, 21); B, 4.]—**Monorsellic e.** Fr., *érythrite monorsellique.* See PICROERYTHRIN.

ERYTHRITIC ACID, n. E²r-i²-thri²t'i²k. A monobasic crystalline acid, $C_3H_4(OH)_3 - CO.OH = C_4H_8O_5$, obtained by the oxidation of erythrite. [B, 3.]

ERYTHROBENZENE, n. E²r-i²-thro-be²n'zen. Fr., *érythrobenzine.* Ger., *Erythrobenzol.* A red coloring matter obtained by treating nitrobenzene with iron filings and hydrochloric acid. [B, 244 (a, 27).]

ERYTHROBLAST, n. E²r'i²-thro-bla²st. From ἐρυθρός, red, and βλαστός, a germ. Fr., *érythroblaste.* The rudimentary red corpuscle of the blood. [J. Denys, "La cellule," iv, 1, 1887; "Rev. des sci. méd.," Oct. 15, 1888, p. 412.]

ERYTHROCARPUS (Lat.), adj. E²r-i²(u⁶)-thro(thro³)-ka³rp'-u³s(u⁴s). From ἐρυθρός, red, and καρπός, a fruit. Fr., *érythrocarpe.* Ger., *rothfruchtig.* Having red fruit. [L, 41.]

ERYTHROCENTAURIN, n. E^{2}r''i^2-thro-se^{2}n-ta^{4}r'i^{2}n. Fr., *érythrocentaurine.* A neutral, tasteless, crystalline substance, $C_{27}H_{24}O_8$, analogous to santonin, found in *Erythræa centaurium.* [B, 244 (*a*, 27).]

ERYTHROCEPHAËLIN (Ger.), n. A-ru^{6}t-ro-tsa-fa^3-al-en'. For deriv., see ERYTHRINE and CEPHAELIS. Of Podwyssotzki, the coloring principle of ipecacuanha; so called because it acquires a deep purple-red color with alkalies. [B, 81 (*a*, 21).]

ERYTHROCERUS (Lat.), adj. E^{2}r-i^2(u^6)-thro^{2}s(thro^{2}k)'e^{2}r-u^{3}s(u^{4}s). From ἐρυθρός, red, and κέρας, a horn. Fr., *érythrocère.* Ger., *rothhornig.* Having red antennæ. [L, 41.]

ERYTHROCHLOROPIA (Lat.), n. f. E^{2}r-i^2(u^6)-thro(thro^3)-klor(ch^{2}lor)-op(o^{2}p)'i^2-a^3. From ἐρυθρός, red, χλωρός, greenish-yellow, and ὤψ, the eye. Ger., *Erythrochloropie, Blaugelbblindheit.* A variety of color-blindness in which there is inability to distinguish other colors than red and green. [A, 326 (*a*, 21).] Cf. ACYANOBLEPSIA and ACHROMATOPSIA.

ERYTHROCNEMIS (Lat.), adj. E^{2}r-i^2(u^6)-thro^{2}k-nem(nam)'i^{2}s. From ἐρυθρός, red, and κνήμη, the leg. Fr., *érythrocnème.* Ger., *rothschenkelig.* Having red feet. [L, 41, 180.]

ERYTHROCONIA (Lat.), n. f. E^{2}r-i^2(u^6)-thro(thro^3)-kon(ko^{2}n)'-i^2-a^3. See SARCINA.

ERYTHROCRUORIN, n. E^{2}r-i^2-thro-kru^2'o^{2}r-i^{2}n. From ἐρυθρός, red, and *cruor*, blood. Fr., *érythrocruorine.* Ger., *E.* See HÆMOGLOBIN.

ERYTHROCYTE, n. E^{2}r-i^2-thro'sit. From ἐρυθρός, red, and κύτος, a cell. See *Red* BLOOD-CORPUSCLE.

ERYTHRODACTYLUS (Lat.), adj. E^{2}r-i^2(u^6)-thro(thro^3)-da^{2}k-(da^{3}k)'ti^{2}l(tu^{6}l)-u^{3}s(u^{4}s). From ἐρυθρός, red, and δάκτυλος, a digit. Fr., *érythrodactyle.* Ger., *rothfingerig.* Having red fingers or toes. [L, 41.]

ERYTHRODANUM (Lat.), n. n. E^{2}r-i^2(u^6)-thro^{2}d'a^{2}n(a^{3}n)-u^{3}m(u^{4}m). Gr., ἐρυθρόδανον. Fr., *érythrodane.* Ger., *Erythrodanin.* 1. Of Döbereiner, the coloring principle of madder. [L, 41, 94. 105 (*a*, 14).] 2. The genus *Netera.* [B, 121 (*a*, 24).]—**E. raji.** The *Rubia tinctorum.* [B, 180 (*a*, 24).]

ERYTHRODERMIA (Lat.), n. f. E^{2}r-i^2(u^6)-thro(thro^3)-du^{3}rm-(de^{2}rm)'i^2-a^3. From ἐρυθρός, red, and δέρμα, the skin. Ger., *Röthung der Haut.* Of Besnier, morbid reddening of the skin. [P. G. Unna, "Mntsh. f. prakt. Dermat.," 1888, 12, p. 559.]—**E. chronica scarlatiniformis.** Of Hallopeau, lichen ruber. [P. G. Unna, *l. c.*]

ERYTHRODES (Lat.), adj. E^{2}r-i^2(u^6)-throd'ez(as). See ERYTHROID.

ERYTHRODEXTRIN, n. E^{2}r-i^2-thro-de^{2}x'tri^{2}n. From ἐρυθρός, red, and *dextrin* (*q. v.*). Ger., *E.* Of Brücke, a variety of dextrin (probably a mixture of achroodextrin and soluble starch) which gives a red coloration with iodine and is readily converted into glucose. [B, 12; "Proc. of the Am. Pharm. Assoc.," xxx (*a*, 14).]

ERYTHROGASTER (Lat.), adj. E^{2}r-i^2(u^6)-thro(thro^3)-ga^{2}st-(ga^{3}st)'e^{2}r(ar). From ἐρυθρός, red, and γαστήρ, the belly. Fr., *érythrogastre.* Ger., *rothbauchig.* Having a red belly. [L, 41.]

ERYTHROGEN, n. E-ri^{2}th'ro-je^{2}n. Lat., *erythrogenium* (from ἐρυθρός, red, and γεννᾶν, to produce). Fr., *érythrogène.* Ger., *E.* 1. Of Bizio, an undetermined green compound obtained by treating with alcohol a fatty substance extracted from putrid blood; also a crystalline fatty substance found in diseased bile. 2. The red coloring principle of certain flowers. [A, 301, 322 (*a*, 21); L, 41, 87 (*a*, 14).]

ERYTHROGLUCIC ACID, n. E^{2}r-i^2-thro-glu^2'si^{2}k. Fr., *acide érythroglycique.* See ERYTHRITIC ACID.

ERYTHROGLUCIN, n. E^{2}r-i^2-thro-glu^2'si^{2}n. From ρεύθρός, red, and γλυκός, sweet. Fr., *érythroglycine.* Ger., *E.* See ERYTHRITE.

ERYTHROGLYCOL, n. E^{2}r-i^2-thro-gli^{2}k'o^{2}l. Ger., *E.* A thick liquid, $C_4H_6(OH)_2$, derived from erythrite. [B, 4.]

ERYTHROGRAMMUS (Lat.), adj. E^{2}r-i^2(u^6)-thro(thro^3)-gra^{2}m(gra^{3}m)'u^{3}s(u^{4}s). From ἐρυθρός, red, and γράφειν, to write. Fr., *érythrogramme.* Ger., *rothstrahlig.* Marked with red streaks. [L, 41.]

ERYTHROGRANULOSE, adj. E^{2}r-i^2-thro-gra^{2}n'u^2-los. Ger., *E.* Of Brücke, a body occurring in starch along with ordinary granulose, distinguished from the latter by the red color which it gives with iodine. [B, 12.]

ERYTHROID, adj. E^{2}r'i^2-throid. Gr., ἐρυθροειδής (from ἐρυθρός, red, and εἶδος, resemblance). Fr., *érythroïde.* Ger., *röthlich.* Reddish, ruddy. [L, 107.]

ERYTHROIDES (Lat.), adj. E^{2}r-i^2(u^6)-thro(thro^2)-i(e)'dez-(das). 1. See ERYTHROID. 2. As a n., in the f. (*tunica* understood), the red coat of the testicle, consisting chiefly of fibres of the cremaster muscle. [A, 311 (*a*, 17); A, 322, 518.]

ERYTHROÏS (Lat.), n. f. E^{2}r-i^{2}th(u^{6}th)'ro(ro^2)-i^{2}s. See ERYTHROIDES (2d def.).

ERYTHROL, n. E^{2}r'i^{2}th-ro^{2}l. Ger., *E.* See ERYTHRITE.

ERYTHROLEIC ACID, n. E^{2}r-i^2-thro-le'i^{2}k. From ἐρυθρός, red, and *oleum*, oil. A red, oily acid obtained from archil. [L, 56.]

ERYTHROLEIN, n. E^{2}r-i^2-throl'e^2-i^{2}n. Fr., *érythroléine.* Of Kane (1841), a purplish-red, fatty liquid, $C_{26}H_{22}O_4$, obtained from barley, *Corona solis*, and litmus; soluble in ether, fusible at 100° F. (38° C.), and yielding with ammonia a purple solution. [A, 301 (*a*, 21); B, 81 (*a*, 21).]

ERYTHROLEUCUS (Lat.), adj. E^{2}r-i^2-thro-lu^{2}k'u^{3}s(u^{4}s). From ἐρυθρός, red, and λευκός, white. Fr., *érythroleuque.* Ger., *röthlichweiss.* Red and white or reddish-white. [L, 41.]

ERYTHROLITMIN, n. E^{2}r-i^2-thro-li^{2}t'mi^{2}n. For deriv., see ERYTHRINE and LITMUS. Fr., *érythrolitmine.* Of Kane (1841), a red crystalline coloring matter, $C_{26}H_{23}O_{13}$, obtained from *Corona solis.* It is insoluble in ether and soluble in alcohol, and is changed to blue by alkalies. [A, 301 (*a*, 21); B, 81 (*a*, 21).]

ERYTHROLOPHUS (Lat.), adj. E^{2}r-i^2(u^6)-thro^{2}l'o^{2}f-u^{3}s(u^{4}s). From ἐρυθρός, red, and λόφος, a top-knot. Fr., *érythrolophe.* Ger., *rothkammig.* Having a red top-knot. [L, 41.]

ERYTHROMANNITE, n. E^{2}r-i^2-thro-ma^{2}n'it. See ERYTHRITE.

ERYTHROMELALGIA (Lat.), n. f. E^{2}r''i^2(u^6)-thro(thro^3)-me^{2}l-a^{2}l(a^{3}l)'ji^2(gi^2)-a^3. From ἐρυθρός, red, μέλος, a limb, and ἄλγος, pain. Fr., *érythromélalgie.* Ger., *Erythromelalgie.* Erythromelalgy; of S. W. Mitchell ("Am. Jour. of the Med. Sci.," July, 1878), a nervous disease (thought by him to be a disease of the spinal cord, but by J. E. Morgan ["Lancet," Jan. 5, 1889, cited in "Ctrlbl. f. Chir.," June 8, 1889, p. 405, and in "Am. Jour. of the Med. Sci.," Mar., 1889, p. 290] to be a perineuritis) characterized by the appearance of a persistent patch of congestion (often on the sole of the foot), with swelling and pain. P. and H. Berbez ("France méd.," 1887, No. 11, cited in "Dtsch. Med.-Ztg.," Mar. 21, 1887) attribute the name to Straus.

ERYTHROMELAS (Lat.), adj. E^{2}r-i^2(u^6)-thro^{2}m'e^{2}l-a^{2}s(a^{3}s). From ἐρυθρός, red, and μέλας, black. Fr., *érythromelas.* Ger., *rothschwarz.* Marked with red and black. [L, 180.]

ERYTHRON (Lat.), n. n. E^{2}r-i^{2}th(u^{6}th)'ro^{2}n. Gr., ἐρυθρός. Of Dioscorides, the *Rhus coriaria.* [B, 46, 88 (*a*, 14).]

ÉRYTHRONE (Fr.), n. A-re-tron. See ERYTHRONIUM.—**E. à fleurs jaunes, E. d'Amérique.** See ERYTHRONIUM *americanum.*

ERYTHRONIUM (Lat.), n. n. E^{2}r-i^2(u^6)-thron(thro^{2}n)'i^2-u^{3}m-(u^{4}m). Gr., ἐρυθρόνιον. Fr., *érythrone, érythronium.* Ger., *Zahnlilie.* Of Linnæus, a genus of the *Liliaceæ*, tribe *Tulipeæ.* [B. 34, 42, 121 (*a*, 24).]—**E. americanum.** Fr., *érythrone d'Amérique.* Ger., *amerikanische Zahnlilie.* Adder's-tongue; a species found in the northern and middle United States. The bulb is emetic; a decoction of the leaves is considered antiscorbutic. [B. 5, 34, 173, 180 (*a*, 24).]—**E. dens canis.** Fr., *dent de chien, violette, vioulte.* Ger., *gemeine Zahnlilie, Hundszahn.* Dog-tooth violet; of Linnæus, a species found in Europe, Tartary, and Siberia. The bulb (*radix dentis canis*, the σατύριον ἐρυθρόνιον of Dioscorides) was formerly considered aphrodisiac, and was official. It is now used as an emetic and vermifuge, and in Tartary as a food. [B, 173, 180 (*a*, 24).]—**E. flavescens, E. flavum.** See *E. americanum.*—**E. grandiflorum.** A species growing in California. ["Proc. of the Am. Pharm. Assoc.," xix (*a*, 14).]—**E. indicum.** The *Ledebouria hyacintheria.* [*a*, 24.]—**E. lanceolatum, E. longifolium.** See *E. americanum.*—**E. maculatum.** See *E. dens canis.*

ÉRYTHRONIUM (Fr.), n. A-re-tro-ne-u^{4}m. See ERYTHRONIUM and VANADIUM.

ERYTHRONOTUS (Lat.), adj. E^{2}r-i^2(u^6)-thro(thro^3)-not'u^{3}s-(u^{4}s). From ἐρυθρός, red, and νῶτον, the back. Fr., *érythronote.* Ger., *rothrückig.* In zoology, having a red back. [L, 41.]

ERYTHROPHILOUS, adj. E^{2}r-i^2-thro^{2}f'i^{2}l-u^{3}s. From ἐρυθρός, red, and φιλεῖν, to love. Ger., *erythrophil.* Lit., fond of red; in microscopy, combining with red in preference to other coloring matters. [Zahli, "Ztschr. f. wiss. Mikr.," 1885 (J).]

ERYTHROPHLŒINE, n. E^{2}r-i^2-thro-fle'en. An alkaloid said to have been extracted from *haya*, or *hayab* (an ordeal poison of Guinea, prepared from the bark of *Erythrophlœum guineense*); proposed as a local anæsthetic in place of cocaine. It is said to cause vomiting, convulsions, and paralysis of the heart in large doses. [W. A. Hammond and S. W. Mitchell (A, 247); L. Lewin, "Allg. med. Ctrl.-Ztg.," 1888, No. 3; "N. Y. Med. Jour.," Feb. 18, 1888, p. 188.]

ERYTHROPHLŒUM (Lat.), n. n. E^{2}r-i^2(u^6)-thro(thro^3)-fle'-(flo^2-a)'u^{3}m(u^{4}m). From ἐρυθρός, red, and φλοιός, bark. A genus of leguminous trees of *Cæsalpineæ.* [B, 42 (*a*, 24).]—**E. couminga.** A species having the same poisonous properties as *E. guineense.* [*a*, 24.]—**E. guineense, E. judiciale.** The gree-gree, sassy-tree of Sierra Leone, ordeal-bark tree; a large tree found in western Africa. The bark (mancona or sassy-bark) is used by the natives as an ordeal poison; it occurs in curved pieces, and contains tannic and gallic acids, gum, resin, various salts, and erythrophlœine. It is emetic, narcotic, and astringent, and in a strong infusion causes coma and death. It has been given with benefit in intermittent fever, dysentery, and diarrhœa. [B, 5, 275 (*a*, 24).]—**E. koumanga.** See *E. couminga.*

ERYTHROPHLOGOSIS (Lat.), n. f. E^{2}r-i^2(u^6)-thro(thro^3)-flo(flo^2)-go'si^{2}s. Gen., *erythrophlogos'eos* (*-is*). From ἐρυθρός, red, and φλόγωσις, a burning. Fr., *érythrophlogose.* Of C. H. Schultz, inflammation with decided redness. [A, 322 (*a*, 21).]

ERYTHROPHOBIA (Lat.), n. f. E^{2}r-i^2(u^6)-thro(thro^3)-fob-(fo^{2}b)'i^2-a^3. From ἐρυθρός, red, and φόβος, fear. Intolerance of the red color in the spectrum; an occasional symptom occurring after extraction of cataract. [F.]

ERYTHROPHTHALMIA (Lat.), n. f. E^{2}r-i^2(u^6)-thro^{2}f-tha^{2}l-(tha^{3}l)'mi^2-a^3. From ἐρυθρός, red, and ὀφθαλμία, ophthalmia. Ger., *rothe Augenentzündung, Augenröthe.* Inflammation of the eye with decided redness. [A, 322 (*a*, 21).]

ERYTHROPHTHALMUS (Lat.), adj. E^{2}r-i^2(u^6)-thro^{2}f-tha^{2}l-(tha^{3}l)'mu^{3}s(mu^{4}s). From ἐρυθρός, red, and ὀφθαλμός, the eye. Fr., *érythrophthalme.* Ger., *rothaugig.* In zoology, having red eyes. [L, 41.]

ERYTHROPHYLL, ERYTHROPHYLLIN, n's. E^{2}r'i^2-thro-fi^{2}l, e^{2}r-i^2-thro-fi^{2}l'i^{2}n. See PHYLLERYTHRIN.

ERYTHROPHYLLUS (Lat.), adj. E^{2}r-i^2(u^6)-thro(thro^3)-fi^{2}l-(fu^{6}l)'u^{3}s(u^{4}s). From ἐρυθρός, red, and φύλλον, a leaf. Fr., *érythrophylle.* Ger., *rothblättrig.* Having red leaves. [L, 41.]

ERYTHROPHYTOSCOPE, n. E^{2}r-i^2-thro-fit'o-skop. From ἐρυθρός, red, φυτόν, a plant, and σκοπεῖν, to examine. A sort of eye-glass consisting of a blue glass superimposed upon one slightly tinted with copper oxide. It has the effect of converting the green of leaves into a red. [Lommel (B).]

ERYTHROPIA (Lat.), n. f. E^{2}r-i^2(u^6)-throp(thro^{2}p)'i^2-a^3. See ERYTHROPSIA.

ERYTHROPITYRIASIS (Lat.), n. f. E^{2}r-i^2(u^6)-thro(thro^3)-pi^{2}t-i^2(u^6)-ri^2-a(a^3)'si^{2}s. Gen., *erythropityrias'eos* (*-is*). From ἐρυθρός, red, and πιτυρίασις, pityriasis. Fr., *érythropityriase*. Ger., *rother Kleienausschlag*. See PITYRIASIS *rubra*.

ERYTHROPLAST, n. E^{2}r'i^2-thro-pla^{2}st. From ἐρυθρός, red, and πλάσσειν, to form. See ERYTHROBLAST.

ERYTHROPROTID, n. E^{2}r-i^2-thro-pro'ti^{2}d. For deriv., see ERYTHRINE and PROTEIN. Fr., *érythroprotide*. Ger., *E.* A reddish-brown product, $C_{13}H_8NO_5$, of the action of a boiling concentrated solution of potash on protein. It is easily soluble in water and in boiling alcohol, and forms a pink precipitate with the salts of lead, silver, and mercury. [A, 301 (*a*, 21).]

ERYTHROPS (Lat.), adj. E^{2}r'i^2(u^6)-thro^{2}ps(throps). From ἐρυθρός, red, and ὤψ, the eye. Fr., *érythrops*. In zoology, having red eyes. [L, 41.]

ERYTHROPSIA (Lat.), n. f. E^{2}r-i^2(u^6)-thro^{2}p'si^2-a^3. From ἐρυθρός, red, and ὄψις, vision. Fr., *érythropsie*, *vue rouge*. Ger., *Erythropsie*. A visual disorder, either uniocular or binocular, which causes all objects to appear red. It often follows after dazzling by light reflected from snow; it also occurs in aphakia. [A, 326 (*a*, 21); "Rev. des sci. méd.," Oct. 15, 1888, p. 632 (*a*, 18).]

ERYTHROPSIN, n. E^{2}r-i^2-thro^{2}p'si^{2}n. See *Visual* PURPLE.

ERYTHROPTERUS (Lat.), adj. E^{2}r-i^2(u^6)-thro^{2}p'te^{2}r-u^{3}s(u^{4}s). From ἐρυθρός, red, and πτερόν, a wing. Fr., *érythroptère*. Ger., *rothflügelig*. Having red wings or fins. [L, 41, 42, 180.]

ERYTHROPUS (Lat.), adj. E^{2}r-i^{2}th(u^{6}th)'ro(ro^3)-pu^{3}s(pu^{4}s). Gr., ἐρυθρόπους (from ἐρυθρός, red, and πούς, a foot). Fr., *érythrope*. Ger., *rothfüssig*. Having red feet. [L, 42, 180.]

ERYTHROPYGIUS (Lat.), adj. E^{2}r-i^2(u^6)-thro(thro^3)-pi^{2}j-(pu^{6}g)'i^2-u^{3}s(u^{4}s). From ἐρυθρός, red, and πυγή, the rump. Fr., *érythropyge*. Ger., *rothrumpfig*. In zoology, having a red back or rump. [L, 41.]

ERYTHROPYRA (Lat.), n. f. E^{2}r-i^2(u^6)-thro^{2}p'i^2(u^6)-ra^3. From ἐρυθρός, red, and πῦρ, fire. Fr., *érythropyre*. An old term for erysipelas; also for any fever with great redness of the surface. [A, 322 (*a*, 21).]—**E. aphthosa.** See APHTHA *febrilis*.

ERYTHRORRHAMPHUS (Lat.), adj. E^{2}r-i^2(u^6)-thro^{2}r-ra^{2}m-(ra^{3}m)'fu^{3}s(fu^{4}s). From ἐρυθρός, red, and ῥάμφος, a beak. Fr., *érythrorrhamphe*. Ger., *rothschnabelig*. Having a red beak. [L, 41.]

ERYTHRORRHETIN, n. E^{2}r-i^2-thro-ret'i^{2}n. From ἐρυθρός, red, and ῥητίνη, resin. Fr., *érythrorrhétine*. A yellow, tasteless powder, $C_{38}H_{36}O_{14}$, found in rhubarb (together with chrysophanin), dissolving in alkalies with a purple color, fusible at 100° C., and nearly insoluble in water and in ether. [B, 5, 46, 81 (*a*, 27); L, 41.]

ERYTHRORRHYNCHUS (Lat.), adj. E^{2}r-i^2(u^6)-thro(thro^3)-ri^{2}n^2'ku^{3}s(ch^{2}u^{4}s). From ἐρυθρός, red, and ῥύγχος, a snout. Fr., *érythrorrhynque*. Ger., *rothschnabelig*. Having a red beak. [A, 322 (*a*, 21); L, 41.]

ERYTHROSCLEROTIN, n. E^{2}r-i^2-thro-skle^{2}r'o-ti^{2}n. See SCLERERYTHRIN.

ERYTHROSE, n. E^{2}r'i^2-thros. Fr., *érythrose*. Ger., *E.* A red coloring matter extracted from rhubarb by the action of nitric acid. [L, 41.]

ERYTHROSINE, n. E^{2}r-i^2-thros'en. Fr., *érythrosine*. A compound, $C_{30}H_{18}N_2O_6$, obtained by the action of nitric acid on tyrosine. [A, 385 (*a*, 21).]

ERYTHROSIS (Lat.), n. f. E^{2}r-i^2(u^6)-thro'si^{2}s. Gen., *erythros'eos* (*-is*). Fr., *érythrose*. Ger., *Rothsucht*, *arterielle Vollblutigkeit*. Arterial hyperæmia. [A, 322 (*a*, 21); L, 107.]

ERYTHROSOMUS (Lat.), adj. E^{2}r-i^2(u^6)-thro(thro^3)-som'u^{3}s-(u^{4}s). From ἐρυθρός, red, and σῶμα, a body. Fr., *érythrosome*. Ger., *rothkörperig*. Having a red body. [L, 41, 180.]

ERYTHROSPERMUM (Lat.), n. n. E^{2}r-i^2(u^6)-thro(thro^3)-spu^{6}rm(spe^{2}rm)'u^{3}m(u^{4}m). From ἐρυθρός, red, and σπέρμα, a seed. A genus of bixads found in the Mauritius and Ceylon. The *Erythrospermeæ* (Fr., *érythrospermées*) are: Of De Candolle and others, a tribe or division of the *Flacourtianeæ*; of Reichenbach and others, a tribe or division of the *Bixaceæ*. [B, 19, 121, 170 (*a*, 24).]

ERYTHROSPORUS (Lat.), adj. E^{2}r-i^2(u^6)-thro^{2}s'po^{2}r-u^{3}s(u^{4}s). From ἐρυθρός, red, and σπορά, a seed. Fr., *érythrospore*. Having red spores. See BACILLUS *e.*

ERYTHROSTOMUM (Lat.), n. E^{2}r-i^2(u^6)-thro^{2}s'to(to^2)-mu^{3}m-(mu^{4}m). From ἐρυθρός, red, and στόμα, the mouth. Fr., *érythrostome*. Of Desvaux, a heterocarpous fruit whose conical placenta supports a large number of distinct and berry-shaped ovaries. [B, 1 (*a*, 24).]

ERYTHROSTOMUS (Lat.), adj. E^{2}r-i^2(u^6)-thro^{2}s'to(to^2)-mu^{3}s-(mu^{4}s). Fr., *érythrostome*. Ger., *rothmundig*. Having a red mouth. [A, 322 (*a*, 21); L, 41.]

ERYTHROTANNIN, n. E^{2}r-i^2-thro-ta^{2}n'i^{2}n. Kino-tannic acid. [*a*, 27.]

ERYTHROXYANTHRAQUINONE, n. E^{2}r-i^2-thro^{2}x-i^2-a^{2}n-thra^3-kwi^{2}n'on. One of the isomeric varieties, $C_{14}H_8O_3$, of monoxyanthraquinone; a crystalline body which begins to sublime at 150° C. and melts at about 175° C. After sublimation it condenses into reddish-yellow needles. [B, 2.]

ÉRYTHROXYLÉ (Fr.), adj. A-re-trox-e-la. From ἐρυθρός, red, and ξύλον, wood. Having red wood. [A, 385 (*a*, 21).]

ERYTHROXYLINE, n. E^{2}r-i^2-thro^{2}x'i^2-len. An alkaloid extracted by S. R. Percy (1887) from the leaves of *Erythroxylon coca*; now known as cocaine. [B; "Proc. of the Am. Pharm. Assoc.," xxvi (*a*, 14).]

ERYTHROXYLON (Lat.), **ERYTHROXYLUM** (Lat.), n's n. E^{2}r-i^2(u^6)-thro^{2}x'i^2(u^6)-lo^{2}n, -lu^{3}m(lu^{4}m). From ἐρυθρός, red, and ξύλον, wood. Fr., *érythroxylon*. Ger., *Rothholz*. Of Linnæus, a genus of the *Erythroxyleæ*, order *Linaceæ*, indigenous to Africa, the East Indies, Australia, and tropical and subtropical America. The *Erythroxylaceæ* (Fr., *érythroxylées*) are: Of A. Richard, a division of lilaceous plants; of Lindley, an order of the *Sapindales*; of Endlicher, an order of the *Acera*. The *Erythroxyleæ* (Fr., *érythroxylées*; Ger., *Erythroxyleen*), are: Of Humboldt, Bonpland, and Kunth, an order of tropical dicotyledons formed from the *Malpighiaceæ*; of De Candolle and Lindley, an order of the *Thalamifloræ*; of Agardh, an order of the *Trihilatæ*; of Reichenbach, a subdivision of the *Sauvageseæ*; of Bartling and Meissner, an order of the *Malpighinæ*; of Dumortier, an order of the *Sapindarieæ*; of Link, an order of the *Allostemones*; of Lindley (1833), an order allied to the *Malpighiaceæ*; of Spach, a family of the *Malpighineæ*; of Bentham and Hooker, a tribe of the *Lineæ* (the *Erythroxyleæ* of Endlicher). [B, 5, 42, 121, 170, 180 (*a*, 24).]—**E. anguifugum.** A species substituted in Brazil for cainca. [B, 121 (*a*, 24).]—**E. areolatum.** Fr., *érythroxylon de Carthagène*, *bois marbré bâtard*. Ger., *vielblüthiges Rothholz*. A species found in Colombia. The young sprouts, mixed with oil, are used as a liniment, the berries as a hydragogue; the fruit is considered diuretic, and, made into a salve, is used in cutaneous diseases; and the bark has tonic properties. [B, 173, 180 (*a*, 24).]—**E. campestre.** A species found in Brazil, where it is used as an evacuant. [B, 121 (*a*, 24).]—**E. carthagenense, E. carthaginense.** See *E. areolatum*.—**E. coca.** Fr., *érythroxylon du Pérou*, *coca*. Ger., *peruanisches Rothholz*,

ERYTHROXYLON COCA. (AFTER A. MARIANI.)

1. 2.

LEAVES OF ERYTHROXYLON COCA. (AFTER A. MARIANI.)
1, lower surface; 2, upper surface.

Cocastrauch. A species indigenous to Peru, furnishing the official coca-leaves (Lat., *coca* [U. S. Ph.]; Fr., *feuilles de coca;* Ger., *Cocablätter*). The plant resembles a buckthorn-bush, from 6 to 8 feet in height, with straight branches, bright-green, oval, entire, coriaceous leaves, resembling tea-leaves, on each side of the midrib of which is a longitudinal vein. When chewed, they produce a sense of warmth, and have a pleasant pungent taste. The flowers are yellowish-white, and in little clusters on short stalks. They are succeeded by red berries. In Peru the Indians carry a pouch (*chuspa*) for the leaves, and a supply of unslaked lime, or the ashes of the quinoa plant (*Chenopodium quinoa*), called *llipta* or *llucla*. The leaves are chewed into a ball (*acullicor*), and a small quantity of the lime is then added, 2 or 3 oz. being used daily as a masticatory, which they assert enables them to labor and climb heights without fatigue or sense of hunger. It has been thus used from ancient times by the Peruvian Indians and is now used by the natives of South America to the number of 8,000,000. The leaves are considered useful in dyspepsia, constipation, colic, hypochondriasis, asthma, and diarrhœa. [B, 5, 77, 173, 180 (*a*, 24).] Cf. COCA and COCAINE.—**E. havanense.** A Cuban species thought to furnish *bois de cheval* (*q. v.* under BOIS). [*a*, 24.]—**E. hondense.** Fr., *érythroxylon de la Nouvelle Grenade.* A species found in Colombia, with tonic properties; used like *E. coca.* [B, 121, 173, 180 (*a*, 24).]—**E. hypericifolium.** Fr., *érythroxylon à feuilles de millepertuis, bois à balais* (ou *d'huile*). A species found in the Isle of Bourbon. The wood is used as a red dye. [B, 173 (*a*, 24); "Proc. of the Am. Pharm. Assoc.," xxvi (*a*, 14).]—**E. indicum.** See *E. monogynum.*—**E. monogynum.** Tamil, *tevadarum.* Teloogoo, *adevigerenta.* Red cedar. A small species found in the East Indies. The young shoots are considered refrigerant, and are applied, with oil, to the head. The bark is a tonic, and the wood furnishes a fragrant oil used instead of sandal-wood oil. [B, 172 (*a*, 24); Naddell, "Indian Med. Gaz.," Sept., 1885, p. 281.]—**E. novagranatense.** Of Morris, a variety of *E. coca* growing in Colombia. ["Proc. of the Am. Pharm. Assoc.," xxxvii (*a*, 14).]—**E. peruvianum.** See *E. coca.*—**E. pulchrum.** A species growing in abundance near Rio de Janeiro, containing a very small percentage of cocaine. ["Proc. of the Am. Pharm. Assoc.," xxxv (*a*, 14).]—**E. suberosum.** Fr., *érythroxylon à écorce subéreuse.* A species found in Brazil. The bark is astringent. [B, 121, 173 (*a*, 24).]—**E. tortuosum.** A variety found in Brazil, having an astringent bark. [L, 49.]—**E. utile.** The *arco de pipa* of Brazil; perhaps a variety of *E. coca.*—**Extractum erythroxyli fluidum** [U. S. Ph.]. Fr., *extrait liquide de coca.* Ger., *flüssiges Cocaextrakt.* Syn.: *extractum cocæ liquidum* [Br. Ph.]. Fluid extract of e., made by moistening 25 oz. (av.) of the leaves of *E. coca*, in No. 30 powder, with 11¼ oz. (av.), or 11¾ fl. oz., of diluted alcohol, packing firmly in a cylindrical percolator, adding enough diluted alcohol to leave a stratum above it, closing the percolator when the liquid begins to drop, macerating for 48 hours, allowing the percolation to proceed, gradually adding diluted alcohol until the e. is exhausted, reserving the first 19¼ fl. oz. of the percolate, evaporating the remainder to a soft extract, dissolving this in the reserved portion, and adding enough diluted alcohol to make the fluid extract measure 24 fl. oz. [B, 81 (*a*, 21).]

ÉRYTHROXYLON (Fr.), n. A-re-trox-e-lo[2]n[2]. See ERYTHROXYLON.—**E. à écorce subéreuse** (Fr.). See ERYTHROXYLON *suberosum.*—**E. à feuilles de millepertuis.** See ERYTHROXYLON *hypericifolium.*—**E. de Carthagène.** See ERYTHROXYLON *areolatum.*—**E. de la Nouvelle-Grenade.** See ERYTHROXYLON *hondense.*—**E. du Pérou.** See ERYTHROXYLON *coca.*

ERYTHROZYME, n. E[2]r'i[2]th-ro-zim. From ἐρυθρός, red, and ζυμοῦν, to ferment. Fr., *érythrozyme.* A peculiar nitrogenous ferment obtained from the root of *Rubia tinctorum.* It induces vinous fermentation in solutions of sugar. [A, 385 (*a*, 21).]

ERYTHRURIA (Lat.), n. f. E[2]r-i[2](u[6])-thru[2](thru)'ri[2]-a[3]. From ἐρυθρός, red, and οὖρον, urine. Fr., *érythrurie.* The condition in which the urine is red. [A, 385 (*a*, 21).]

ERZ (Ger.), n. E[2]rtz. An ore. [L, 80.]

ERZENGELWURZEL (Ger.), n. E[2]rts'e[2]n[2]-e[2]l-vurts-e[2]l. The root of *Archangelica officinalis.* [B, 180 (*a*, 24).]

ERZEUGNISS (Ger.), n. E[2]r-tsoig'ni[2]s. A product or production. [*a*, 30.]

ERZEUGUNG (Ger.), n. E[2]r-tsoig'un[2]. See GENERATION.—**E'skraft.** Generative power. [L, 80.]

ERZITTERN (Ger.), n. E[2]r-tsi[2]t'e[2]rn. See TREMOR.

ERZMUTTER (Ger.), n. E[2]rts'mut-te[2]r. See MATRIX.

ESAPHE (Lat.), n. f. E[2]s'a[2]f(a[3]f)-e(a). Gen., *es'aphes.* Gr., ἐσαφή (from εἰσαφάσσειν, to handle). Ger., *Hineinfühlen.* Of Hippocrates, a digital examination of the os uteri. [A, 325 (*a*, 21).]

ESBANACH (Ar.), n. The *Basella rubra.* [B, 121 (*a*, 24).]

ESCA (Lat.), n. f. E[2]s'ka[3]. Food. [A, 325 (*a*, 21).]

ESCA, ESCO, n's. The *Polyporus igniarius.* [B, 121 (*a*, 24).]

ESCABINSO, n. In Provence, the *Scabiosa arvensis.* [B, 121 (*a*, 24).]

ESCABIOSA [Mex. Ph.] (Sp.), n. E[2]s-ka[3]-bi[2]-o'sa[3]. The *Scabiosa atropurpurea.* [A, 447 (*a*, 21).]

ESCAFIGNON (Fr.), n. E[2]s-ka[3]-fen-yo[2]n[2]. A disagreeable odor of the feet. [L, 41.]

ESCALDAS (Sp.), **ESCALDES** (Fr.), n's. E[2]s-ka[3]l'da[3]s, e[2]s-ka[3]ld. A place in the department of the Pyrénées-Orientales, France, where there are warm, feebly alkaline and sulphurous springs. [A, 319 (*a*, 21); L, 49, 87 (*a*, 14).]

ESCALLONIA (Lat.), n. f. E[2]s-ka[2]l(ka[3]l)-lon'i[2]-a[3]. Fr., *escalloine.* Ger., *Eskallonie.* Of Linnæus, a genus of the *Escallonieæ.* The escalloniads (*Escalloniaceæ*) are: Of Dumortier, a family of the *Saxifragarieæ;* of Lindley, an order of his grossal alliance of epigynous exogens (*Grossales*). The *Escallonieæ* (Fr., *escalloniées*) are: Of Agardh, an order of the *Calycanthemæ;* of Reichenbach, a division of the *Ribesiaceæ;* of Lindley, an order of the *Calyciforæ syncarpæ,* subsequently of the *Grossales;* of De Candolle and others, a tribe of the *Saxifragaceæ;* of Bentham and Hooker, a tribe of the *Saxifrageæ.* The *Escalloneæ* (Fr., *escallonées*) are: Of R. Brown, an order of plants consisting of *Escallonia* and *Anopterus;* of Don, an order of the *Calycifloræ,* consisting of the *Escallonieæ* of De Candolle. [B, 19, 42, 121, 124, 170, 270 (*a*, 24).]—**E. myrtilloides.** Fr., *escallonie à feuilles de myrte.* A species found in the Andes, New Granada, and Peru. The leaves have an aromatic bitter taste, and are used in cataplasms on wounds and as a tonic. [B, 173, 180 (*a*, 24).]—**E. resinosa.** Fr., *escallonie résineux.* A species found in Colombia and Peru; used as a tonic. [B, 173, 180 (*a*, 24).]—**E. rubra.** A species found in Chili; used as a tonic. [B, 180 (*a*, 24).]

ESCALOTTE (Fr.), n. E[2]s-ka[3]-lo[2]t. See ALLIUM *ascalonicum.*

ESCAMBROCIRA (Port.), n. E[2]s-ka[3]m-bro-se'ra[3]. The *Rhamnus cathartica.* [B, 92 (*a*, 14).]

ESCAMOUNEO, n. In Provence, the *Cynanchum monspeliacum.* [B, 121 (*a*, 24).]

ESCARA (Lat.), n. f. E[2]s'ka[3]-ra[3]. See ESCHAR.

ESCARAMUJO [Mex. Ph.] (Sp.), n. E[2]s-ka[3]-ra[3]-mu'ho. The *Rosa canina.* [A, 447 (*a*, 21).]

ESCARGOT (Fr.), n. E[2]s-ka[3]r-go. The genus *Helix.* [A, 518.]—**E. des vignes** [Fr. Cod.]. The *Helix pomatia* and other species. [B, 113 (*a*, 21).]

ESCARGOULE (Fr.), n. E[2]s-ka[3]r-gul. The *Agaricus colubrinus,* the *Boletus edulis,* and the *Cantharellus cibarius.* [B, 173, 188 (*a*, 24).]

ESCARJOULE (Fr.), n. E[2]s-ka[3]r-zhul. The *Agaricus procerus* and the *Agaricus colubrinus.* [B, 121 (*a*, 24).]

ESCAROLA (Sp.), **ESCAROLE** (Fr.), n's. E[2]s-ka[3]-ro'la, es-ka-rol. The *Cichorium endivia.* [B, 127 (*a*, 14), 173 (*a*, 24).]

ESCARPOULETO, n. In Provence, the *Urospermum picroides.* [B, 121 (*a*, 24).]

ESCARRE (Fr.), n. E[2]s-ka[3]r. See ESCHAR.

ESCARVILLE (Fr.), n. E[2]s-ka[3]r-vel. The *Cantharellus cibarius.* [B, 121, 173 (*a*, 24).]

ESCAU (Fr.), n. E[2]s-ko. The *Cantharellus cibarius.* [B, 173 (*a*, 24).]

ESCAVIHO, n. In Provence, the *Jasminum officinale.* [B, 121 (*a*, 24).]

ESCAYOL, n. In Provence, the grain of *Phalaris canariensis.* [B, 121, 173 (*a*, 24).]

ESCHALOT, n. E[2]-sha[3]-lo, e[2]sh'a[2]l-o[2]t. Fr., *escalotte.* Sp., *escalona.* See ALLIUM *ascalonicum.*

ESCHAR, n. E[2]s'ka[3]r. Gr., ἐσχάρα. Lat., *eschara.* Fr., *eschare, escarre.* Ger., *Schorf, Brandschorf.* It., Sp., *escara.* A slough; the disorganized matter arising from mortification or cauterization of a part. [G.]

ESCHARA (Lat.), n. f. E[2]s'ka[3]r(ch[2]a[3]r)-a[3]. 1. See ESCHAR. 2. Of Aristophanes, the vulva. [A, 387.]

ESCHARIFICATION, n. E[2]s-ka[2]r-i[2]-fi[2]-ka'shu[3]n. Fr., *e.* See ESCHAROSIS.

ESCHARODERMITIS (Lat.), n. f. E[2]s-ka[3]r(ch[2]a[3]r)-o(o[3])-du[3]rm(de[2]rm)-i(e)'ti[2]s. Gen., *escharodermit'idos* (*-is*). From ἐσχάρα, eschar, and δέρμα, the skin. Fr., *escharodermite.* Ger., *brandschorfartige Hautentzündung.* Inflammation of the skin with the formation of an eschar. [A, 322 (*a*, 21).]

ESCHAROPÆDOPHLYSIS (Lat.), n. f. E[2]s-ka[3]r(ch[2]a[3]r)-o-(o[3])-ped(pa[3]-e[2]d)-o[2]f'li[2](lu[6])-si[2]s. Gen., *escharopædophlys'eos* (*-oph'lysis*). From ἐσχάρα, eschar, παῖς, a child, and φλύσις, an eruption. Fr., *escharopédophlyse.* Ger., *brandschorfartigen Blattern.* Escharodermitis in children. [A, 322 (*a*, 21).]

ESCHAROSIS (Lat.), n. f. E[2]s-ka[2]r(ch[2]a[3]r)-o'si[2]s. Gen., *escharos'eos* (*-is*). Gr., ἐσχάρωσις. The formation of an eschar. [A, 387.]

ESCHAROTIC, adj. E[2]s-ka[3]r-o[2]t'i[2]k. Gr., ἐσχαρωτικός. Lat., *escharoticus.* Fr., *escharotique.* Ger., *ätzend.* Having active caustic properties; producing an eschar; as a n. (Lat., *escharoticum*), an e. substance or application. [B, 113 (*a*, 21).]

ESCHATIÆ (Lat.), n. f. pl. E[2]s-ka(ch[2]a[3])'shi[2](ti[2])-e(a[3]-e[2]). Gr., ἐσχατίαι (from ἔσχατος, last). Of Hippocrates, the extremities of the limbs. [A, 325 (*a*, 21).]

ESCHE (Ger.), n. E[2]sh'e[2]. See ASH (2d def.).—**Bittere'.** The *Simaruba excelsa.* [B, 180 (*a*, 24).]—**E'baum.** The *Fraxinus excelsior.* [B, 180 (*a*, 24).]—**E'manna.** The manna of *Fraxinus ornus.* [B, 180 (*a*, 24).]—**E'nwurzel.** The root of *Dictamnus albus.* [B, 180 (*a*, 24).]—**Gemeine E., Hohe E.** The *Fraxinus excelsior.* [B, 180 (*a*, 24).]—**Nussbaumblättrige E.** The *Fraxinus juglandifolia.* [L, 80.]—**Rothe'.** The *Fraxinus pennsylvanica.* [B, 49.]—**Schwarze'.** The *Fraxinus nigra.* [B, 49.]—**Trauere'.** The *Fraxinus excelsior pendula.* [B, 49.]—**Weisse'.** The *Fraxinus americana.* [B, 49.]

ESCHELLOHE (Ger.), n. E[2]sh'e[2]l-lo-he[2]. A place in Bavaria where there is a cold gaseous spring. [L, 105.]

ESCHLAUCH (Ger.), n. E[2]sh'la[3]-u[4]ch[2]. The *Allium ascalonicum.* [B, 180 (*a*, 24).]

ESCHOMELIA (Lat.), n. f. E[2]s-ko(ch[2]o[2])-me(me[2])'li[2]-a[3]. A form of monstrosity in which a limb is defective. [G. J. Fisher (*a*, 29).]

ESCHROLALIE (Fr.), n. Es-kro-la^3-le. From αἰσχρός, indecent, and λαλεῖν, to speak. Indecency of speech as a symptom of disease. [De la Tourette, "Arch. de neurol.," Jan., 1885, p. 19.]

ESCHSCHOLTZIA (Lat.), n. f. E^{2}sh-sholts'i^2-a^3. From *Eschscholtz*, a German zoologist. Fr., *eschscholtzie*. A genus of the *Papaveraceæ*, tribe *Hunnemannieæ*. The *Eschscholtzieæ* (Fr., *eschscholtziées*) are: Of Reichenbach, a section of the *Chelidonieæ*; of Jussieu and others, a tribe of the *Papaveraceæ*. [B, 42, 170, 245 (*a*, 24).]—**E. californica.** California poppy; a species found in California. A hypnotic extract has been made from it. [B, 34, 121 (*a*, 24); "N. Y. Med. Jour.," Dec. 22, 1888.]—**E. ocymoides.** A species employed at Pondichery as a febrifuge. [B, 42, 173 (*a*, 24).]

ESCILA [Mex. Ph.] (Sp.), n. E^{2}s-the'la^3. The *Scilla maritima*. [A, 447 (*a*, 21).]—**E. del país** [Mex. Ph.]. The *Pancratium illyricum*. [A, 447 (*a*, 21).]

ESCLAREA, n. In Provence, the *Smilax aspera*. [B, 121 (*a*, 24).]

ESCLAREA (Sp.), n. E^{2}s-kla^3're^2-a^3. The *Salvia sclarea*. [B, 92 (*a*, 14).]

ESCLÈRE (Fr.), n. E^{2}s-kle^{2}r. The genus *Chelidonium*. [B, 121 (*a*, 24).]

ESCLO DE VÉNUS, n. In Provence, the *Cypripedium calceolus*. [B, 121 (*a*, 24).]

ESCOMELLE (Fr.), n. E^{2}s-ko-me^{2}l. See AGARICUS *colubrinus*.

ESCORDIO [Mex. Ph.] (Sp.), n. E^{2}s-ko^{2}r'di^2-o. The *Teucrium scordium*. [A, 447 (*a*, 21).]—**Electuario de e. opiado** [Mex. Ph.]. See *Electuaire* DIASCORDIU.

ESCORZONERA (Sp.), n. E^{2}s-ko^{2}r-tho-na'ra^3. The *Scorzonera humilis*. [B, 92 (*a*, 14).]—**E. de México** [Mex. Ph.]. The *Pinaropappus roseus*. [A, 447 (*a*, 21).]—**E. del país** [Mex. Ph.]. The name of various species of the genus *Eryngium*. [A, 447 (*a*, 21).]

ESCOULOUBRE (Fr.), n. E^{2}s-ku-lubr'. A place in the department of the Aude, France, where there are hot sulphurous springs. [L, 41, 49, 87 (*a*, 14).]

ESCOURBO D'IERO, n. In Provence, the *Verbascum blattaria*. [B, 121 (*a*, 24).]

ESCOURGEON (Fr.), n. E^{2}s-kur-zho^{2}n^2. The *Hordeum hexastichum*. [B, 121 (*a*, 24).]

ESCRA DE LA LUNO, n. In Provence, the *Nostoc commune*. [B, 121 (*a*, 24).]

ESCREVILLE (Fr.), n. E^{2}s-kre^2-vel. The *Cantharellus cibarius*. [B, 121 (*a*, 24).]

ESCROBILO, n. The *Merulus cantharellus*. [B, 121 (*a*, 24).]

ESCU (Fr.), n. E^{2}s-ku^6. Of the old pharmacists, a drachm. [L, 105 (*a*, 14).]

ESCUARDE (Fr.), n. E^{2}s-ku^6-a^{3}rd. The *Polyporus pes capræ*, var. *Asprellus*. [B, 105.]

ESCUDELO D'AIGO, n. In Provence, the *Hydrocotyle vulgaris*. [B, 121 (*a*, 24).]

ESCULAPIA SPRINGS, n. E^{2}s-ku^2-lap'i^2-a^3. A place in Lewis County, Kentucky, where there are mineral springs. [A, 363 (*a*, 21).]

ESCULENT, adj. E^{2}s'ku^2-le^{2}nt. Lat., *esculentus*. Fr., *comestible*. Ger., *essbar*. See EDIBLE.

ÉSCULO (Sp.), n. E^{2}s'ku-lo. The *Æsculus hippocastanum*. [B, 88 (*a*, 14).]

ESCULUS (Lat.), n. f. E^{2}s'ku^2(ku)-lu^{3}s(lu^{4}s). See ÆSCULUS.

ESCUMELLE (Fr.), n. E^{2}s-ku^6-me^{2}l. The *Boletus edulis*, *Agaricus colubrina*, and *Agaricus procerus*. [B, 121, 173 (*a*, 24).]

ESCUTCHEON, n. E^{2}s-ku^{3}ch'u^{3}n. Fr., *écusson*. In quadrupeds, a surface of variable form whose base is the mamillary line, and which extends more or less into the perineal region. It is particularly distinguished by the direction of its hair. [B, 52 (*a*, 27).]

ESDRAGON (Fr.), n. E^{2}s-dra^3-go^{2}n^2. The *Artemisia dracunculus*. [A, 301 (*a*, 21).]

ESEBON, n. Sodium chloride. [L, 84.]

ESEL (Ger.), n. A'ze^{2}l. See ASINUS.—**E'innenmilch.** Ass's milk. [L, 57.]—**E'sbalsamapfel.** The *Momordica elaterium*. [B, 180 (*a*, 24).]—**E'sbohne.** The *Vicia faba*. [L, 43.]—**E'sdistel.** The *Onopordon acanthium*. [B, 180 (*a*, 24).]—**E'sfenchel.** The fruit of *Fœniculum piperitum*. [B, 180 (*a*, 24).]—**E'sgurke.** The *Ecbalium elaterium*. [B, 180 (*a*, 24).]—**E'sgurkensaft.** See ELATERIUM.—**E'shuf.** The *Tussilago farfara*. [B, 180 (*a*, 24).]—**E'shusten.** Whooping-cough. [L, 80.]—**E'skerbel.** The *Chærophyllum silvestre*. [B, 88 (*a*, 14).]—**E'skürbiss.** The *Ecballium elaterium*. [B, 180 (*a*, 24).]—**E'slattig.** The *Tussilago farfara*. [B, 180 (*a*, 24).]—**E'sleber.** Donkey's liver; anciently employed in the treatment of epilepsy. [B, 180 (*a*, 14).]—**E'smilch.** The *Euphorbia esula*. [B, 180 (*a*, 24).]—**E'sohren.** See ARUM *maculatum*.—**E'speterlein.** See ANTHRISCUS *procerus*.

ESENBECKIA (Lat.), n. f. A-ze^{2}n-be^{2}k'i^2-a^3. Fr., *e*. Ger., *Esenbeckie*. 1. A genus of the *Malvaceæ*. 2. Of Bridel, the genus *Garoraglia*. 3. Of Kunth, a genus of the *Rutaceæ*, tribe *Xanthoxyleæ*. [B, 42, 121 (*a*, 24).]—**E. altissima.** Fr., *e. très élevée*. A species found in Java; employed as a diuretic. [B, 173 (*a*, 24).]—**E. febrifuga.** Ger., *fieberwidrige Esenbeckie*. A species found in Brazil, which furnishes the *Brazilian angostura-bark*, called in Brazil *tres folhas vermellas*, or *laranjerio do mato*. It is highly esteemed as a febrifuge and stimulant tonic, and is used in bilious diarrhœa, dysentery, and intermittent fever. [B, 5, 173, 180 (*a*, 24).]

ESENBECKIC ACID, n. A-ze^{2}n-be^{2}k'i^{2}k. Fr., *acide ésenbeckique*. An acid analogous to quinovic acid, and found, together with esenbeckine and other vegetable principles, in the bark of *Esenbeckia febrifuga*. [B, 81, 244 (*a*, 27).]

ESENBECKINE, n. A-ze^{2}n-be^{2}k'en. Fr., *ésenbeckine*. Syn.: *evodine*. Of Oberlin and Schlagdenhauffen, an alkaloid, $C_6H_{18}NO_6$, obtained from *Exostema souzanum*; it is colored yellowish-green by sulphuric acid. [A, 301 (*a*, 21); B, 81 (*a*, 21).]

ÉSÉRÉ (Fr.), n. A-za-ra. The *Physostigma venenosum*. [B, 18, 121 (*a*, 24).]

ESERIA (Lat.), n. f. E^{2}s-e(e^2)'ri^2-a^3. See ESERINE.

ESERIDINE, n. E^2-se^{2}r'i^{2}d-en. An alkaloid, $C_{15}H_{23}N_3O_3$, or eserine plus a molecule of water, occurring in the calabar bean, and of one sixth the medicinal strength of eserine. [Attfield (*a*, 27); "N. Y. Med. Jour.," Apr. 6, 1889, p. 392.]

ESERINE, n. E^{2}s'e^{2}r-en. Lat., *eserina* [Fr. Cod.], *eserinum*. Fr., *ésérine*. Ger., *Eserin*. It., Sp., *eserina*. Of Vée, the physostigmine of some authors; a highly poisonous alkaloid, $C_{15}H_{21}N_3O_2$, obtained from *Physostigma venenosum*. A small quantity powerfully contracts the pupil, and is employed to relieve blepharospasm, produce miosis after undue mydriasis, and in incipient glaucoma. [Attfield (*a*, 27); B; "Proc. of the Am. Pharm. Assoc.," xv (*a*, 14).]—**E. hydrobromide.** Lat., *bromhydras eserinus* [Fr. Cod.]. Fr., *bromhydrate d'ésérine* [Fr. Cod.]. A substance occurring under the form of fibrous masses, usually of a reddish-yellow tinge, prepared by the action of hydrobromic acid on e. It is very soluble in water. [B.]—**E. salicylate.** Lat., *physostigminæ salicylus* [U. S. P.], *eserinum salicylicum*. Fr., *salicylate d'ésérine*. Ger., *salicylsaures Eserin*, *Eserinsalicylat*. A compound, $C_{15}H_{21}N_3O_2.C_7H_6O_3$, called also physostigmine salicylate.—**E. sulphate.** Lat., *sulfas eserinus* [Fr. Cod.]. Fr., *sulfate d'ésérine* [Fr. Cod.]. A deliquescent substance prepared by the action of sulphuric acid on an ethereal solution of e. [B.]

ESERINUM (Lat.), n. n. E^{2}s-e^2-rin(ren)'u^{3}m(u^{4}m). See ESERINE.—**E. hydrobromicum.** See ESERINE *hydrobromide*.—**E. salicylicum** [Ger. Ph.]. See ESERINE *salicylate*.

ESEXUALIS (Lat.), adj. E(a)-se^{2}x-u^2(u)-al(a^{3}l)'i^{2}s. From *e* priv., and *sexualis*, sexual. Fr., *ésexuel*. Having no sex (see also ASEXUAL); as a n., in the pl., *Esexuales*, of Lindley, an alliance of the *Filicales*, *Lycopodales*, *Muscales*, *Charales*, and *Fungales*. [B, 170 (*a*, 24); L, 41.]

ESFONDILIA (Sp.), n. E^{2}s-fo^{2}n-del'i^2-a^3. The *Heracleum sphondylium*. [B, 92 (*a*, 21).]

ESH, n. E^{2}sh. The *Fraxinus excelsior*. [A, 505 (*a*, 21).]

ESHOPAGHOLA (Beng.), n. The *Plantago ispaghula*. [A, 479 (*a*, 21).]

ESKI-CHERER, n. A place in Turkey in Asia where there are sulphurous thermal springs. [A, 385 (*a*, 21).]

ESKI-SAGRA, n. A place in European Turkey where there are thermal baths. [L, 41.]

ESKNA BAHARIA (Ar.), n. Corsican moss. [L, 77 (*a*, 21).]

ESMYRNISMENOS (Lat.), adj. E^{2}s-mi^{2}r(mu^{6}r)-ni^{2}s'me^{2}n-o^{2}s. Gr., ἐσμυρνισμένος (from σμυρνίζειν, to flavor with myrrh). Containing myrrh. [A, 325 (*a*, 21).]

ESOBH (Heb.), n. The *Hyssopus officinalis*. [B, 88, 92 (*a*, 14).]

ESOCHAS (Lat.), **ESOCHE** (Lat.), n's f. E^{2}s(as)'o(o^2)-ka^{2}s-(ch^{2}a^{3}s), -ke(ch^{2}a). Gen., *esoch'ados* (*-is*), *es'oches*. Gr., εἰσοχή. Fr., *ésoche*. Ger., *innerer Afterknoten*. It., Sp., *esoco*. Lit., a recess; a tumor within the anus; internal piles. [E.]

ESOCIDÆ (Lat.), **ESOCINÆ** (Lat.), n's f. pl. E^{2}s-o(o^2)-sid(ked)'e(a^3-e^2), -sin(ken)'e(a^3-e^2). From *esox*, the pike. Fr., *ésocidés*. The pikes, a family of the *Malacopterygia*. [L, 303.]

ESOCOLITIS (Lat.), n. f. E^{2}s(as)-o-kol-i(e)'ti^{2}s. Gen., *esocolit'idos* (*-is*). From εἴσω, within, and κῶλον, the colon. See DYSENTERY.

ÉSODERME (Fr.), n. A-so-de^{2}rm. The internal cutaneous membrane of the *Articulata*. [A, 385 (*a*, 21).]

ESODIC, adj. E^{2}s-o^{2}d'i^{2}k. From εἴσω, within, and ὁδός, a way. See AFFERENT (2d def.).

ESOENTERITIS (Lat.), n. f. E^{2}s(as)-o(o^3)-e^{2}n-te^{2}r-i(e)'ti^{2}s. Gen., *esoenterit'idos* (*-is*). From εἴσω, within, and ἔντερον, the intestine (see also *-itis* *). Inflammation of the mucous membrane of the intestines. [L, 107.]

ESOETHMOIDITIS (Lat.), n. f. E^{2}s(as)-o-e^{2}th(ath)-moi^{2}d-i-(e)'ti^{2}s. Gen., *esoethmoidit'idos* (*-is*). Endosteitis of the ethmoid bone. [*a*, 29.]

ESOGASTRITIS (Lat.), n. f. E^{2}s(as)-o-ga^{2}st(ga^{3}st)-ri(re)'-ti^{2}s. Gen., *esogastrit'idos* (*-is*). From εἴσω, within, and γαστήρ, the stomach (see also *-itis* *). Inflammation of the mucous membrane of the stomach. [L, 107.]

ESOPHORIA (Lat.), n. f. E^{2}s-o-for(fo^{2}r)'i^2-a^3. From ἔσω, inward, and φορεῖν, to bear. Of G. T. Stevens, that condition of the eyes in which the visual axes tend to converge and are maintained parallel only by constant muscular effort. [B.]—**E. in accommodation** [G. T. Stevens]. A tendency of the eyes to deviate inward during accommodative action; *i. e.*, a tendency to convergence in excess of the amount required for binocular single vision at near points. [B.]

ESOPTROCNAPHALLON (Lat.), n. n. E^{2}s(as)-o^{2}p-tro^{2}k-na^3-fa^{2}l(fa^{3}l)'lo^{2}n. From εἴσοπτρον, a mirror, and κνάφαλλον, wool. Ger., *Speculum-Kissen*. The plug of a vaginal speculum. [A, 322 (*a*, 21).]

ESOPTRON (Lat.), n. n. E^{2}s(as)-o^{2}p'tro^{2}n. Gr., εἴσοπτρον. Lit., a mirror; a speculum. [A, 322 (*a*, 21).]

ESORHINUS (Lat.), adj. E²s(as)-o-rin(ren)′u³s(u⁴s). From εἴσω, within, and ῥίς, the nose. Ger., *esorhin*. Having an angle of between −20° and 0°, formed by the intersection, at the punctum naso-frontale, of two lines, the one drawn from the punctum præmaxillare and the other from the punctum foraminis incisivi to the first-named point. [Lissauer (L).]

ESOSIS (Lat.), n. f. E²s(as)-o′si²s. Gen., *esos′eos (-is)*. Gr., εἴσωσις (from εἰς, into, and ὠθεῖν, to push). Ger., *Einbiegung*. A curvature. [A, 322 (*a*, 21).]

ESOSMOMETRUM (Lat.), n. n. E²s(as)-o²s(os)-mo(mo³)-me²t′ru³m(ru⁴m). From εἰς, into, ὠσμός, a thrusting, and μέτρον, a measure. An instrument for measuring endosmosis. [A, 322 (*a*, 21).]

ESOSMOSIS (Lat.), **ESOSMUS** (Lat.), n's f. and m. E²s(as)-o²s(os)-mo′si²s, e²s(as)-o²s(os)′mu³s(mu⁴s). Gen., *esosmos′eos (-is)*, *esos′mi*. From εἰσωθεῖν, to thrust into. See Endosmosis.

ESOSPHENOIDITIS (Lat.), n. f. E²s(as)-o-sfen(sfan)-oid-i(e)′-ti²s. Gen., *esosphenoidit′idos (-is)*. Endoosteitis of the sphenoid bone. [*a*, 29.]

ESOTERIC, adj. E²s-o-te²r′i²k. Gr., ἐσωτερικός. Lat., *esotericus* Ger., *esoterisch*. Originating within the organism; the opposite of *exoteric*. [L, 107.]

ESOTHESIS (Lat.), n. f. E²s(as)-o²th′e²s-i²s. Gen., *esothes′eos (-oth′esis)*. See Esosis.

ESOTROPIA (Lat.), n. f. E²s-o-trop(tro²p)′i²-a³. From ἔσω, inward, and τρέπειν, to turn. Convergent strabismus; the condition in which the visual axes are habitually or periodically crossed for vision at all distances. [G. T. Stevens (B).]

ESOX (Lat.), n. m. Es(e²s)′ox. Gen., *es′ocis*. Fr., *ésoce*. Ger., *Hecht*. 1. Of Pliny, the pike. 2. A genus of the *Esocidæ abdominales*. [L, 87, 105, 180 (*a*, 14).]—**E. lucius.** The common pike. The liver yields an oil (*oleum lucii piscis*) which was formerly employed to disperse opacities of the cornea. [L, 84.]

ESPACE (Fr.), n. E²-spa³s. See Space.—**E. cendré perforé postérieur.** See *Posterior perforated* space.—**E. claire.** See *Isotropous* disc.—**E. delto-pectoral.** The cellulo-adipose space between the deltoid and pectoral muscles on the anterior wall of the axilla. [Tillaux (*a*, 29).]—**E's haversiens.** See *Haversian* spaces.—**E. inter-aryténoïdien.** The space between the arytænoid cartilages behind the processus vocales. [*a*, 29.]—**E's intercellulaires.** Spaces between cells or intercellular bridges. [L, 49.]—**E's intercostaux.** See *Intercostal* spaces.—**E. interglobulaire.** See *Interglobular* space.—**E. intermenstruel.** See *Intermenstrual* period.—**E's interorganiques.** Imaginary spaces between anatomical elements. [A, 385 (*a*, 21).]—**E. inter-pédonculaire.** See *Interpeduncular* space.—**E's lacunaires.** See *E's interorganiques*.—**E's lymphatiques de J. Müller.** The large subcutaneous lymph spaces in the frog. ["Am. des sci. nat.," 1833, p. 340 (J); J, 28.]—**E. lymphatique épicérébral.** Of Huguenin, a space between the pia mater and the external surface of the brain. [I, 28 (K).]—**E. lymphatique péricellulaire.** See *Circumcellular* space.—**E. maxillo-pharyngien.** The space between the middle constrictor of the pharynx and the upper part of the inferior maxilla, occupied by the carotid artery, the internal jugular vein, and the tenth, eleventh, and twelfth pairs of cranial nerves. [A, 385 (*a*, 21).]—**E. pecto-pectoralis.** The space between the pectoralis major and the pectoralis minor. [*a*, 29.]—**E. pelvi-rectal.** See *Ischio-rectal* fossa.—**E. perforé antérieur.** See *Anterior perforated* space.—**E. perforé de Vicq d'Azyr.** See *Anterior perforated* space.—**E. perforé latéral.** A lamina of white substance perforated with numerous apertures for blood-vessels; seen at the bottom of the fissure of Sylvius on separating its edges. [I, 42 (K).]—**E. perforé moyen, E. perforé postérieur.** See *Posterior perforated* space.—**E. péricellulaire.** See *Circumcellular* space.—**E. plasmatique.**—**E.** See Mer *plasmatique*.—**E. semilunaire de Traube.** See *Traube's* space.—**E. sous-arachnoïdien antérieur.** The anterior subarachnoid space. [I, 44 (K).]—**E. sous-arachnoïdien postérieur.** The posterior subarachnoid space. [I, 42 (K).]

ESPADON (Fr.), n. E²s-pa³-do²n². The *Xiphias gladius*. [A, 301 (*a*, 21).]

ESPANTA-LOBOS [Mex. Ph.] (Sp.), n. E²s-pa³n-ta³-lo′bos. The *Colutea arborescens*. [A, 447 (*a*, 21).]

ESPANTAVAQUERO (Sp.), n. E²s-pa³n-ta³-va³-ka′ro. A Mexican plant used as a preventive of rabies and as a remedy for venomous bites. [Méd. clentéf.," Aug. 15, 1888; "Dtsch. Med.-Ztg.," Feb. 11, 1889; "N. Y. Med. Jour.," Mar. 16, 1889, p. 308.]

ESPARAGON (Fr.), n. E²s-pa³-ra³-go²n². See Asparagus.—**E. sauvage.** The *Asparagus acutifolius*. [B, 173 (*a*, 24).]

ESPARCETTE (Fr.), n. E²s-pa³r-se²t. The *Onobrychis sativa*. [B, 121, 173 (*a*, 24).]

ESPARGANEU, n. In Provence, the *Butomus umbellatus*. [B, 121 (*a*, 24).]

ESPARGANIO (Sp.), n. E²s-pa³r-ga³n′i²-o. See Carex *arenaria*.

ESPARGE (Fr.), n. E²-spa³rzh. The *Asparagus officinalis*. [B, 121 (*a*, 24).]

ESPARGO, n. In Provence, the *Parietaria officinalis*. [B, 121 (*a*, 24).]

ESPARGON (Fr.), n. E²s-pa³r-go²n². See Esparagon.

ESPARGOULE (Fr.), n. E²s-pa³r-gul. The *Parietaria officinalis* and the *Spergula arvensis*. [B, 121, 173 (*a*, 24).]

ESPARGOUTE (Fr.), n. E²s-pa³r-gut. The *Spergula arvensis*. [B, 121 (*a*, 24).]

ESPARGOUTTE (Fr.), n. E²s-pa³r-gut. The *Matricaria parthenium*. [B, 121 (*a*, 24).]—**E. des champs.** The *Spergula arvensis*. [B, 173 (*a*. 24).]—**E. géniculée.** The *Spergula arvensis*, var. *geniculata*. [B, 173 (*a*, 24).]

ESPARPAI, n. In Provence, the *Papaver argemone*. [B, 121 (*a*, 24).]

ESPÁRRAGO [Mex. Ph.] (Sp.), n. E²s-pa³r′ra³-go. See Asparagus *officinalis*. [A, 447 (*a*, 21).]

ESPARRAGUERA (Sp.), n. E²s-pa³r-ra³-gwa′ra³. A place in the province of Barcelona, Spain, where there are thermal and sulphurous springs. [A, 319 (*a*, 21).]

ESPARSETTE (Fr.), n. E²s-par-se²t. See Esparcette. [B, 180 (*a*, 24).]

ESPARTO, n. In Algeria, the *Macrochloa tenacissima*; in Spain, the *Lygeum spartum*. [B, 121 (*a*, 24); L, 77.]

ESPATHATE, adj. E-spath²′at. From *e* priv., and σπάθη (see Spathe). Fr., *exspathé*. Ger., *unblüthenscheidig*. Destitute of a spathe. [B, 19 (*a*, 24).]

ESPATULE (Fr.), n. E²s-pa³-tu⁶l. The *Iris fœtidissima*. [B, 121, 173 (*a*, 24).]

ESPAVE, n. In Panama, the *Anacardium rhinocarpus*. [B, 19.]

ESPE (Ger.), n. E²sp′e². The *Populus tremula*. [B, 180 (*a*, 24).]—**Schwarze E.** The *Populus nigra*. [L, 80.]

ESPÈCE (Fr.), n. E²-spe²s. See Species.—**E's amères.** See Species *amaræ*.—**E's anthelminthique.** See Species *anthelminthicæ*.—**E's anti-arthritiques** [Würt. Ph., 1798]. A preparation made by boiling down to one fourth 3 parts of guaiacum, 2 each of polypodium, sarsaparilla, the root of *Smilax china*, and colchicum, in 192 of water and 48 of wine. [B, 119 (*a*, 21).]—**E's antinéphrétiques.** See Species *nephro-cathartici Foresti*.—**E's antipleurétiques** [Palat. Disp., 1764]. A preparation containing 2 oz. each of poppy-heads and marsh-mallow, 1 oz. each of linseed, the seeds of fenugreek, cumin, and laurel-berries, three handfuls each of common mallow and matricaria, and two handfuls of chamomile; used as a fomentation. [B, 119 (*a*, 21).]—**E's antiscorbutiques.** See Species *contra scorbutum*.—**E's antispasmodiques.** See *Antispasmodic* species.—**E's apéritives.** See Species *aperientes*.—**E's apéritives majeures.** See Species *aperiente majores*.—**E's apéritives mineures.** See Species *aperitivæ minores*.—**E's aromatiques** [Fr. Cod.]. See Species *aromaticæ*.—**E's aromatiques cinnamomées.** See Species *aromaticæ caryophyllatæ*.—**E's aromatiques rosées.** See Species *aromaticæ rosatæ*.—**E's astringentes.** See Species *adstringentes*.—**E's béchiques.** See Species *pectorales*.—**E's carminatives** [Fr. Cod.]. See Species *carminativæ*.—**E's caryocostines.** See Pulvis *caryocostinus*.—**E's céphaliques.** See Species *cephalicæ*.—**E's cinnamomées.** See *Species* diacinnamomu (in Supplement).—**E's contre la gangrène.** See Species *pro fotu ad gangrænam*.—**E's cordiales.** See Species *cordiales temperatæ*.—**E's cordiales impériales.** See Pulvis *vitæ imperatoris*.—**E. dépuratives.** See Species *mundificantes*.—**E's diatragacanthes froides.** See *Pulvis* tragacanthæ *compositus*.—**E's diaturbithes.** See *Species diaturbith cum* rheo.—**E's diurétiques** [Fr. Cod.]. See Species *diureticæ*.—**E's emménagogues.** See Species *pro fotu emmenagogo*.—**E's émollientes** [Fr. Cod.]. See Species *emollientes*.—**E's froides.** See Species *frigidæ*.—**E's fumigatoires.** 1. See Solutio *alexitera*. 2. See Species *ad suffiendum*. 3. See Species *fumales*.—**E's impériales.** See Species *imperatoris*.—**E. létifiantes de Rhazès.** See Species *lætificantes*.—**E's narcotiques.** See Species *narcoticæ*.—**E's odoriférantes.** See Potpourri.—**E's pectorales.** See Species *pectorales*.—**E's pectorales (avec les fleurs)** [Fr. Cod.]. See *Species* florum *pectoralium*.—**E's pectorales (avec les fruits)** [Fr. Cod.]. See *Species pectorales cum* fructibus.—**E. pectorales d'Augustin.** A preparation consisting of equal parts of rasped stag's horn, pearl barley, and sugar of milk. [L, 77 (*a*, 21).]—**E's pectorales et sudorifiques.** A preparation made by chopping very fine and mixing 8 parts of marsh-mallow-root, 4 each of licorice, *Iris versicolor*, *Nepeta glechoma*, and *Tussilago farfara*, 2 each of flowers of *Papaver somniferum* and flowers of *Verbascum thapsus*, and 1 part of *Illicium anisatum*. [L, 77 (*a*, 21).]—**E's pharmaceutiques.** See Species (2d def.).—**E's pour épithème.** See Species *pro epithemate cordis et pulsuum*.—**E's pour la décoction d'avoine.** See Species *avenaceæ*.—**E's pour tisane.** See Species *for ptisan*.—**E's pulvérulentes.** See Poudres *composées*.—**E's purgatives** [Fr. Cod.]. See Species *laxantes*.—**E's purgatives de Saint-Germain.** See Species *laxantes Sancti Germani*.—**E's résolutives.** See Species *vulnerariæ*.—**E's sudorifiques** [Fr. Ccd.]. See Species *sudorificæ*.—**E's sudorifiques de Taddei.** A preparation composed of 7 parts each of *Solanum dulcamara*, the bark of *Ulmus fulva*, and guaiacum, and 14 of *Lappa officinalis*. [L, 77 (*a*, 21).]—**E's vermifuges.** See Species *anthelminthicæ*.—**E's viscérales** [Disp. fuld., 1791]. A preparation made by mixing 4 parts each of taraxacum and saponaria, 2 each of *Erythræa centaurium* and *Marrubium vulgare*, and 3 each of *Matricaria chamomilla* and *Tanacetum vulgare*. [B, 119 (*a*, 21).]—**E's viscérales de Kaempf** [Hess. Ph., 1806, Sard. Ph., 1773]. A preparation made by mixing 4 parts each of taraxacum, saponaria, and *Valeriana officinalis*, 2 each of *Erythræa centaurium* and *Marrubium vulgare*, 1 part of *Anthemis nobilis*, 4 parts of *Matricaria chamomilla* and 8 of linseed. [B, 119 (*a*, 21).]—**E's vulnéraires** [Fr. Cod.]. See Species *vulnerariæ*.—**Sirop d'e's pectorales** [Fr. Cod.]. See Syrupus *pectoralis*.

ESPEL (Ger.), n. E²s′pe²l. The *Mespilus germanica*. [B, 180 (*a*, 24).]

ESPENZUELAS (Sp.), n. E²s-pe²n-th²wal′a³s. The fruit of a certain species of the *Cucurbitaceæ*; used, in infusion in water, as a purgative. [B, 121 (*a*, 24).]

ESPERBIERO, n. In Provence, the *Sorbus aucuparia*. [B, 121 (*a*. 24).]

ESPERMA (Sp.), n. E^{2}s-pe^{2}r'ma^3. 1. Of the Mex. Ph., spermaceti. 2. Semen. [A, 447 (α, 21); L, 77 (α, 14).]—**E. ceti, E. de ballena.** Spermaceti. [L, 77 (α, 14).]

ESPEULTO, n. In Provence, the *Hordeum vulgare.* [B, 121 (α, 24).]

ESPHLASIS (Lat.), n. f. E^{2}s'fla^{2}s(fla^{3}s)-i^{2}s. Gen., *esphlas'eos (es'phlasis).* Gr., ἔσφλασις. Fr., *esphlase.* Ger., *Schädeleindruck.* A crushing in (said of the skull). [Hippocrates (A, 325).]

ESPI, n. In Provence, the *Lavandula spica.* [B, 121 (α, 24).]

ESPIBAWN, n. E^{2}s'pi^2-ba^{4}n. The *Chrysanthemum leucanthemum.* [B, 275 (α, 24).]

ESPIC (Fr.), n. E^{2}s-pek. The *Lavandula spica (officinalis).* [B, 121, 173 (α, 24).]

ESPICANARDO (Sp.), n. E^{2}s-pe-ka^3-na^{3}r'do. The *Valeriana indica* (seu *jatamansi*). [B, 88 (α, 14).]—**E. céltico.** The *Valeriana celtica.* [B, 88 (α, 14).]

ESPIDET (Fr.), n. E^{2}s-pe-da. See Espic.

ESPIGA DO SANGUE (Port.), n. E^{2}s-pe'ga^3-do-sa^{3}n^2'gwa. In Brazil, the *Helosis brasiliensis.* [B, 121 (α, 24).]

ESPIGELIA (Sp.), n. E^{2}s-pe-ha'le-a^3. The *Spigelia anthelminthica.* [B, 88, 92 (α, 14).]

ESPIGNETO, n. In Provence, the *Briza maxima.* [B, 121 (α, 24).]

ESPIGNETTE (Fr.), n. E^{2}s-pen-ye^{2}t. The *Clavaria coralloides* and the *Clavaria amethystina.* [B, 105, 121, 173 (α, 24).]

ESPIN, n. E^{2}sp'i^{2}n. The *Populus tremula.* [A, 505 (α, 21).]

ESPINACA (Sp.), n. E^{2}s-pe-na^3'ka^3. The *Spinacia oleracea.* [B, 127 (α, 14).]

ESPINHA CERVINA (Port.), n. E^{2}s-pen'ya^3 se^{2}r-ve'na^3. The *Rhamnus cathartica.* [B, 88, 92 (α, 14).]

ESPINILLO (Sp.), n. E^{2}s-pe-nel'yo. In the Argentine Republic, the *Prosopis astringens,* also other spring *Mimosæ.* [B, 121 (α, 24).]

ESPINO (Sp.), n. E^{2}s-pe'no. A thorn; a spiny tree. [B.]—**E. blanco.** The *Echinops ritro.* [B, 121 (α, 24).]—**E. cerval.** The *Rhamnus cathartica.* [B, 92 (α, 14).]—**E. jauno.** In Provence, the *Cyanara cardunculus,* var. *spinosa.* [B, 121 (α, 24).]—**E. majuelo.** The *Mespilus oxyacanthus.* [B, 88, 127 (α, 14).]—**E. vineto.** The genus *Berberis.* [B, 121 (α, 24).]

ESPINOCHES (Fr.), n. E^{2}s-pe-nosh. The *Spinacia oleracea.* [B, 88 (α, 14).]

ESPINOSILLA (Sp.), n. E^{2}s-pe-no-sel'ya^3. In Mexico, the *Hoitzia coccinea.* [α, 14.]

ESPÍREA (Sp.), n. E^{2}s-pe're^2-a^3. The *Spiræa ulmaria.* [B, 127 (α, 14).]

ESPÍRITU [Mex. Ph.] (Sp.), n. E^{2}s-pe're-tu. A generic term for alcoholates, spirits, and essences. [A, 447 (α, 14).]—**E. carminante de Silvio** [Mex. Ph.]. See Alcoolat *aromatique de Sylvius.*—**E. de Venus** [Mex. Ph.]. Syn.: *e. de vinagre, vinagre de Venus.* A colorless liquid, of the sp. gr. of 1·075 to 1·083, obtained by distilling copper acetate in an earthen retort. [A, 447 (α, 14).]

ESPLIEGO [Mex. Ph.] (Sp.), n. E^{2}s-ple-a'go. Lavender; the *Lavandula spica* and the *Lavandula vera.* [A, 447 (α, 21); B, 88, 92 (α, 14).]

ESPNOIC, adj. E^{2}sp'no-i^{2}k. From ἐσπνοή, inhalation. 1. Inspiratory. 2. As said to have been sometimes used, iatraliptic (*q. v.*). [A, 517.]

ESPONJA [Mex. Ph.] (Sp.), n. E^{2}s-pon'ha^3. The *Spongia officinalis.* [A, 447 (α, 21).]

ESPONJILLA [Mex. Ph.] (Sp.), n. E^{2}s-pon-hel'ya^3. The *Luffa purgans.* [A, 447 (α, 21).]

ESPRAT (Fr.), n. E^{2}s-pra^3. The *Clupea halburyius.* [A, 385 (α, 21).]

ESPRINSONS (Fr.), n. E^{2}s-pra^{2}n^2-zo^{2}n^2. An epidemic disease which prevailed at Metz in 1473–1474, apparently a kind of dysentery. [A, 301 (α, 21).]

ESPRIT (Fr.), n. E^{2}s-pre. See Spirit. In pharmacy, the term is now superseded officially by *teinture d'essence.* [B.]—**E. adiaphorétique.** Of Boyle, see *E. de* bois.—**E. alcalin.** Ammonia-water. [L, 41 (α, 14).]—**E. alcalin volatil.** Ammonia. [L, 49 (α, 14).]—**E. ammoniacal aromatique.** See *Spiritus* ammoniæ *aromaticus.*—**E. ammoniacal cantharidé.** See Alcool *ammoniacal cantharidé.*—**E. ammoniacal fétide.** See *Spiritus* ammoniæ *fœtidus.* [L, 41.]—**E. ammoniacal succiné.** See *Spiritus* ammoniæ *cum succino.*—**E. ammoniacal térébenthiné.** See Alcool *ammoniacal térébenthiné.*—**E's animaux.** See *Animal* spirits.—**E. antiarthritique de Pott.** See Spiritus *arthriticus Pottii.* A preparation composed of 1 part of hydrochloric acid and 2 parts of oil of turpentine. [L, 77 (α, 21).]—**E. antihystérique.** See Spiritus *anthystericus.*—**E. anti-ictérique.** See Spiritus *antictericus.*—**E. antiscorbutique** [Palat. Disp., 1764]. A preparation made by macerating 3 parts each of absinthium, becabunga, borago, anchusa, cochlearia, fumaria, and cress, 2 of the root of *Inula helenium,* 4 of the root of aspidium, 2 of orange-peel, 6 of tamarisk-rind, and a sufficient quantity of spirit of cochlearia, straining and filtering. [B, 119 (α, 21).]—**E. apéritif** [Würt. Ph., 1798]. Impure pyrotartaric acid. [L, 105 (α, 14).]—**E. ardent.** Rectified alcohol. [A, 385 (α, 21).]—**E. aromatique.** 1. See *Spiritus* rosmarini. 2. See Spiritus *aromaticus.*—**E. aromatique ammoniacal.** See *Spiritus* ammoniæ *aromaticus.*—**E. arthritique.** See Spiritus *arthriticus Pottii.*—**E. bézoardique de Bussius.** See *Bussii* spiritus *bezoardicus.*—**E. bleu.** See Spiritus *cœruleus.*—**E. carminatif.** See Spiritus *carminativus.*—**E. carminatif de Sylvius.** See Alcoolat *aromatique de Sylvius.*—**E. carminatif de tribus.** See Spiritus *carminativus de tribus.*—**E. de Béguin.** See Ammonia *hydrosulphate* and Liquor *fumans Boylii.*—**E. de Bussius.** See *Bussii* spiritus *bezoardicus.*—**E. de Garus.** See Alcoolat *de Garus.*—**E. de Minderer** [Fr. Cod.], **E. de Mindérérus** [Fr. Cod.]. See *Liquor* ammonii *acetatis.*—**E. de Montpellier.** See Alcohol.—**E. déphlogistiqué.** An old name for chlorine. [L, 49 (α, 14).]—**E. de Sylvius.** See *Spiritus* ammoniæ *aromaticus.*—**E. de Vénus.** See *Radical* vinegar.—**E. de vie de Matthiole.** See Elixir *vitæ Matthioli.*—**E. de vin.** See Spirit *of wine.*—**E. d'iva.** A spirituous liquor made from *Achillea moschata.* [B, 173 (α, 24).]—**E. hydroprussique.** Alcoholic hydrocyanic acid. [B, 119 (α, 21).]—**E. igno-aérien.** The vital fermentative, universal, and igneous principle (*spiritus vitalis igneus*) which, according to Mayow (1645), impregnates the air, and from its resemblance to nitre is called nitro-aerian. [Hoefer (α, 27).]—**E. masyrique.** See Anemone-*water.*—**E. nervin.** A preparation made by mixing 20 parts each of volatile oil of lavender and volatile oil of rosemary, 75 of caustic ammonia, 300 each of camphorated alcohol and tincture of soap, 900 of alcohol, and 5 of laudanum. [L, 77 (α, 21).]—**E. nitro-aérien.** See *E. igno-aérien.*—**E. odoriférant.** See Spiritus *suaveolens.*—**E. ophthalmique de Himley** [Dutch Ph., 1805, Niemann's Notes]. A solution in ½ oz. of alcohol, of 6 drops each of balsam of Peru, oil of lavender, oil of cloves, and oil of amber; used as an embrocation. [B, 119 (α, 21).]—**E. preuve.** Proof spirit. [L, 77 (α, 21).]—**E. pyro-acétique.** See Acetone.—**E. pyroligneux, E. pyroxylique.** See Methyl *alcohol.*—**E. recteur.** See Alcoolat.—**E's spiritueuses.** Alcoholic spirits, in contradistinction to oily or other spirits obtained by distillation. [L, 41 (α, 14).]—**E. thériacal.** See Essentia *theriacalis.*—**E. thériacal safrané** [Palat. Disp., 1764]. A carminative and stomachic preparation made by digesting for 8 days 10 parts of treacle, 5 of myrrh, 3 of *Crocus sativus,* and 20 of concentrated alcohol, and distilling on the water-bath. [B, 119 (α, 21).]—**E. vineux.** Rectified alcohol. [B, 173.]—**E. volatil.** An old name for an empyreumatic oil. [L, 41 (α, 14).]—**E. volatil ammoniacal huileux de Sylvius** [Fr. Cod.]. See *Spiritus* ammoniæ *aromaticus.*—**E. volatil spermatique.** See Aura *seminalis.*

ESQUAMATUS (Lat.), adj. E(a)-skwam(skwa^{3}m)-at(a^{3}t)'u^{3}s-(u^{4}s). From *e* priv., and *squama,* a scale. Fr., *ésquamé.* Without scales. [L, 180.]

ESQUILLE (Fr.), n. E^{2}s-kel-y'. 1. The *Smilax china.* 2. A bony splinter. [A, 301 (α, 21); B, 121 (α, 24); L, 43.]

ESQUILLEUX (Fr.), adj. E^{2}s-kel-yu^5. Reduced to splinters. [L, 41 (α, 14).]

ESQUINA (Sp.), n. E^{2}s-ke'na^3. The *Smilax china.* [B, 88, 92 (α, 14).]

ESQUINANCIE (Fr.), n. E^{2}s-ke-na^{3}n^2-se. See Cynanche.

ESQUINE (Fr.), n. E^{2}s-ken. The *Andropogon schœnanthus* and the *Smilax china.* [A, 385 (α, 21); B, 173 (α, 24).]

ESSAI (Fr.), n. E^{2}s-sa. See Assay.

ESSAIMAGE (Fr.), n. E^{2}s-sa-ma^{3}zh. A swarming, as of bees. [L, 321.]

ESSALON (Fr.), n. E^{2}s-sa^3-lo^{2}n^2. See Boletus *edulis.* [B, 121 (α, 24).]

ESSATUM (Lat.), n. n. E^{2}s-sat(sa^{3}t)'u^{3}m(u^{4}m). The essential constituent of a medicinal substance. [A, 325.]—**E. vinum.** See Tincture.

ESSAYE (Fr.), n. E^{2}s sa-y'. The *Oldenlandia umbellata.* [B, 88 (α, 14).]

ESSBAR (Ger.), n. E^{2}s'ba^{3}r. See Edible.

ESSE (Fr.), n. E^{2}s. The seed of *Ervum lens.* [B, 121, 173 (α, 24).]

ESSEN (Ger.), v. tr. and intr. E^{2}s'e^{2}n. To eat; as a n., eating, food.—**Heuschreckene'.** See Acridophagy (1st def.).—**Unersättliches E.** See Adephagia.

ESSENBAUM (Ger.), n. E^{2}s'e^{2}n-ba^3-u^{4}m. The genus Ulmus. [L, 43.]

ESSENCE, n. E^{2}s'e^{2}ns. Lat., *essentia* (from *esse,* to be). Fr., *e.* [Fr. Cod.]. Ger., *Essenz.* It., *essenza, essenze.* Sp., *esencia* [Mex. Ph., Sp. Ph.]. Of the Br. Ph., a solution of a volatile oil in four parts of rectified spirit; of the Fr. Cod., a volatile vegetable oil; of other pharmacopœias, a strong tincture or a strong solution of a volatile oil (or a mixture of the two). [B, 81, 95, 113 (α, 14).]—**Anodyne e.** See Essentia *anodyna officinalis.*—**Antiarthritic e.** See Essentia *arthritica Hoffmanni sine opio.*—**Anti-hydropic e.** See Essentia *antihydropica Hoffmanni.*—**Anti-hysteric e.** See Essentia *antysterica* and Essentia *hysterica.*—**Balsamic e.** [Würt. Ph., 1798]. A preparation made by distilling 1,200 parts from a mixture of 16 parts each of orange-peel and lemon-peel, 5 each of cinnamon and nutmegs, 2 of cloves, 120 each of ammonium chloride and potassium subcarbonate, and 1,344 of proof spirit, infusing in the distillate 24 parts each of lemon-peel and orange-peel, digesting for eight days, pouring off the clear liquor, expressing and filtering, and mixing the residue with the filtrate. [B, 97 (α, 21).]—**Bitter e.** See Essentia *amara.*—**Cephalic e.** See Essentia *cephalica.*—**E. alexipharmaque de Stahl** (Fr.). See Essentia *alexipharmaca Stahlii.*—**E. alexipharmaque de Stahl tempérée** (Fr.). See Essentia *alexipharmaca temperata Stahlii.*—**E. amère** (Fr.). See Essentia *amara.*—**E. anodine de Langelot** (Fr.). A preparation made by dissolving 1 part of cydoniated extract of opium in 4 parts of spirits of *Juniperus communis.* [L, 77 (α, 21).]—**E. anodine de Ludwig** (Fr.). See Essentia *anodyna Ludovici.*—**E. anti-hydropique** (Fr.). See Essentia *antydropica Hoffmanni.*—**E. anti-hystérique** (Fr.). 1. See Essentia *antysterica.* 2. See Essentia *hysterica.* 3. See *Tinctura* castorei *thebaica.*—**E. aromatique** (Fr.). See Tinctura *aromatica.*—**E. aromatique laxative** (Fr.). A prepa-

ration composed of 10 parts each of *Helleborus niger* and jalap, 5 of scammony, 2 of cinnamon, 2 each of cloves and acorus, and 125 of rectified alcohol; or, according to a formula popular at Strasburg, 25 parts of resin of jalap, 225 of alcohol, and 5 each of the essences of lemon and bergamot. [L, 77 (a, 21).]—**E. balsamique** (Fr.). See *Tinctura* BENZOINI *composita.*—**E. balsamique canadienne** (Fr.). See TEINTURE *antivénérienne.*—**E. balsamique de Dippel** (Fr.). See ESSENTIA *stomachica polychresta Gundelsheimeri.*—**E. vermifuge** (Fr.). See ESSENTIA *contra vermes.*—**E. vulnéraire** (Fr.). See *Vulnerary* ESSENCE.—**E. vulnéraire de Stahl** (Fr.). See BALSAMUM *vulnerarium Stahlii.*—**Ludwig's anodyne e.** See ESSENTIA *anodyna Ludovici.*—**Stahl's alexipharmac e.** See ESSENTIA *alexipharmaca Stahlii.*—**Stahl's splenetic e.** See ESSENTIA *splenetica Stahlii.*—**Stahl's temperate alexipharmac e.** See ESSENTIA *alexipharmaca temperata Stahlii.*—**Theriacal e.** See ESSENTIA *theriacalis.*—**Traumatic e.** See ESSENTIA *traumatica.*—**Vermifuge e.** See ESSENTIA *contra vermes.*—**Vulnerary e.** [Würt. Ph., 1798]. Fr., *e. vulnéraire.* A preparation made by macerating for several days 1 part of poplar sprouts in 3 parts of alcohol, expressing, and adding to the colature 1 part of the e. of *Hypericum perforatum.* [B, 119 (a, 21).]

ESSEND (Ger.), adj. E²s'e²nd. Eating, corroding. [L, 80.]

ESSENTIA (Lat.), n. f. E²s-se²n'shi²(ti²)-a³. 1. Of the Br., Belg., and Swiss Ph's, see ESSENCE. 2. Of Paracelsus, the nourishing part of food (as distinguished from *venenum*, the poisonous part). [H.]—**E. alexipharmaca Huxhami.** See *Tinctura* CINCHONÆ *compositæ.*—**E. alexipharmaca Stahlii** [Brusw. Disp., 1777, Lipp. Disp., 1794, Palat. Disp., 1764, Würt. Ph., 1798]. A preparation made by digesting 3 parts each of the roots of *Pimpinella saxifraga*, *Asclepias vincetoxicum*, and *Carlina vulgaris*, 2 each of *Angelica Archangelica*, *Imperatoria ostruthium*, and *Inula helenium*, 6 of the herb of *Teucrium scordium*, and 36 of alcohol, expressing and filtering. [B, 97 (a, 21).]—**E. alexipharmaca temperata Stahlii** [Würt. Ph., 1798]. A preparation made by digesting 3 parts each of the roots of *Pimpinella saxifraga* and *Asclepias vincetoxicum*, and 2 of the herb of *Teucrium scordium* in 36 of alcohol, filtering, and distilling off one third of the spirit over a water-bath and preserving the remainder. [B, 97 (a, 21).]—**E. amara** [Würt. Ph., 1798]. Fr., *essence amère.* A preparation made by digesting 8 parts of the herb of *Tanacetum vulgare*, 3 each of the herbs of *Scolopendrium officinale*, *Erythræa centaurium*, *Cnicus benedicta*, *Gentiana lutea*, and *Rumex crispus*, 4 of the fresh peel of unripe oranges, and 96 of alcohol, expressing and filtering; used as a tonic, stomachic, carminative, and anthelminthic. [B, 97 (a, 21).]—**E. anodyna Ludovici** [Würt. Ph., 1798]. Fr., *essence anodine de Ludwig.* A preparation made by mixing 1 part of aqueous extract of opium and 8 parts of apoplectic liquor. [B, 97 (a, 21).]—**E. anodyna officinalis** [Palat. Disp., 1764, Würt. Ph., 1798]. A preparation made by digesting 1 part of aqueous extract of opium in 9 parts of alcoholatum cinnamomi aquosum. [B, 97 (a, 21).]—**E. antiscorbutica** [Brunsw. Disp., 1777, Würt. Ph., 1798]. Ger., *Essenz wider den Scorbut.* A preparation made by digesting 16 parts of Winter's bark, 12 of potassium subcarbonate, 8 each of the roots of *Arum* and *Rumex*, the leaves of *Menyanthes trifoliata*, the barks of *Fraxinus excelsior* and *Laurus sassafras*, and myrrh, and 6 each of herb of *Sedum acre*, tops of *Erythræa centaurium*, and seeds of rumex, in 288 of spirit of *Cochlearia officinalis*, expressing, and adding 24 of essence of amber and 12 of spirit of sulphuric ether, digesting and filtering; used as an excitant, attenuant, resolvent, diuretic, and stomachic, and reputed to be antiscorbutic. [B, 97 (a, 21).]—**E. anthydropica Hoffmanni** [Würt. Ph.]. Fr., *essence antihydropique.* A preparation made by digesting for several days 12 parts each of Socotrine aloes, the root of *Asclepias vincetoxicum*, and *Bryonia alba*, 1 part each of the herb of *Absinthium vulgare* and flowers of *Sambucus*, 6 of gum ammoniac, 4 each of mace, cloves, ammonium chloride, and potassium subcarbonate, 3 each of wood-lice and earth-worms, 2 of myrrh, and 64 of elder-flower-water, adding 288 of alcohol, and digesting with a gentle heat. [B. 97 (a, 21).]—**E. anthysterica** [Sp. Ph., 1798]. Fr., *essence antihystérique.* A preparation made by digesting 3 parts each of asafœtida, myrrh, saffron, and castoreum, 2 of camphor, 4 of ammonium subcarbonate, and 1 part of oil of amber, in 128 parts of alcohol. [B, 97 (a, 21).]—**E. antiseptica Huxhami.** See *Tinctura* CINCHONÆ *composita.*—**E. aromatica.** See TINCTURA *aromatica.*—**E. balsamica.** See *Tinctura* BENZOINI *composita.*—**E. balsamica Dippelii** [Dutch Ph., 1805, Niemann's Notes; Würt. Ph., 1798]. Fr., *essence balsamique de Dippel.* A preparation made by digesting 2 parts each of ambergris and balsam of Peru and 6 of potassium subcarbonate in 7 of alcohol while heating gradually until the liquid comes to a boil, allowing it to cool and settle, then decanting and filtering. [B, 119 (a, 21).]—**E. carminativa** [Disp. fuld., 1791]. Fr., *essence carminative.* A preparation made by digesting for three days 8 parts of *Canella alba*, 6 each of zedoary and *Galanga minor*, and 3 of lesser cardamoms, in 96 of alcohol, and filtering. [B, 119 (a, 21).]—**Essentia carminativa Wedelii.** See *Tinctura* ZEDOARIÆ *composita.*—**E. catholica purgans Rothii.** See *Tinctura* JALAPÆ *composita.*—**E. cephalica** [Würt. Ph., 1798]. Fr., *essence céphalique.* A preparation made by extracting 3 parts each of the root of *Acorus calamus*, aloes-wood, the wood of *Santalum citrinum*, and culilawan-bark, and 2 each of the herbs of *Betonica officinalis*, *Teucrium malum*, and *Salvia officinalis*, flowers of *Lavandula spica*, cinnamon, nutmeg, cubebs, cloves, and the capsules of *Elettaria cardamomum*, in 64 parts each of spirituous apoplectic water and Matthiole's incomplete elixir of life; used as a stimulant, stomachic, cordial, and carminative. [B, 97 (a, 21).]—**E. contra vermes** [Brunsw. Disp., 1798]. Fr., *essence vermifuge.* A preparation made by digesting 4 parts each of the herbs of *Tanacetum vulgare*, *Absinthium vulgare*, and *Erythræa centaurinum*, and the root of *Gentiana lutea*, 2 each of the flowers of *Tanacetum vulgare*, semen contra, and myrrh, and 96 of spirit of mint, expressing and filtering. [B, 97 (a, 21).]—**E. de Portugallo.** See ESSENCE *de Portugal* (2d def.).—**E. dulcis** [Swiss Ph.]. Fr., *essence douce de Hales.* A preparation made by boiling, with constant stirring, 1 part of potassium acetate, 10 parts of sugar, and 5 of water, until the mass becomes dark-brown, dissolving in 5 parts of hot water, and, when cool, adding 30 of alcohol, and, after several days, filtering. A similar preparation was official in the Würt. Ph., 1798. [B, 95, 97 (a, 21).]—**E. emetica.** An antimonial preparation made with the acid of vinegar. [B, 59.]—**E. hæmatocathartica et alexipharmaca Clauderi.** See *Tinctura* FULIGINIS *alcalina.*—**E. hysterica** [Ferr. Ph., 1825]. Fr., *essence antihystérique.* A preparation made by digesting 48 parts of essence of castoreum, 3 each of ammonium subcarbonate and opium, and 4 of asafœtida, and filtering. [B, 97 (a, 21).]—**E. martiata aperitiva** [Würt. Ph., 1798]. Fr., *essence de mars apéritive.* A preparation made by digesting for several days at a gentle heat 4 parts each of iron filings and sulphuric acid, 48 of alcohol, 2 each of galanga, zedoary, cinnamon, and *Arundo phragmites*, and 1 part each of *Hypericum perforatum*, expressing and filtering. [B, 119 (a, 21).]—**E. regia** [Dutch Ph., 1805, Niemann's Notes]. Fr., *alcoolé d'ambre et de musc composé*, *essence royale.* A preparation made by digesting for several days on the stove 2 scruples of amber, 1 scruple of musk, 10 grains of civet, 6 drops of essential oil of cinnamon, 4 drops of essential oil of rosewood, 36 grains of salts of tartar, and 1¼ oz. each of essence of orange-flowers and essence of roses, and filtering. [B, 119 (a, 21).]—**E. splenetica Stahlii** [Würt. Ph., 1798]. Fr., *essence splénétique de Stahl.* A preparation made by infusing 8 parts of flowers of *Hypericum perforatum*, 4 each of the herbs of *Verbena officinalis*, *Ruta graveolens*, *Ruta muraria*, *Salvia officinalis*, and *plantago*, in 96 of alcohol, expressing and filtering; used as an excitant, resolvent, and diuretic, and recommended in hypochondriasis. [B, 97 (a, 21).]—**E. stomachica.** See ELIXIR *viscerale Hoffmanni* and *Elixir* AURANTIORUM *compositum.*—**E. stomachica polychresta Gundelsheimeri** [Würt. Ph., 1798]. Fr., *essence stomachique de Gundelsheimer.* A preparation made by digesting 8 parts of capsicum, 10 of cardamom, 2 each of *Piper album*, *Piper longum*, and *Piper nigrum*, and 48 each of a solution of potassium acetate and spirit of ammonia. [B, 97 (a, 21).]—**E. theriacalis** [Brunsw. Disp., 1777, Würt. Ph., 1798, Sard. Ph., 1773]. Fr., *esprit thériacal.* A preparation made by infusing for several days without heat 6 parts each of the herbs of *Teucrium scordium* and *Origanum dictamnus*, the root of *Angelica archangelica*, *Acorus calamus*, *Aristolochia serpentaria*, and spikenard, 3 each of cinnamon, lesser cardamoms, and cloves, and 2 each of opium and saffron in 192 of proof spirit, and filtering [Brunsw. Disp., 1777, Würt. Ph., 1798]; or by infusing 1 part of theriac in 6 parts of proof spirit. [B. 97 (a, 21).] See *Aqua* SCORDII *composita.*—**E. traumatica** [Würt. Ph., 1798]. A preparation made by digesting for three days at a moderate heat 4 parts each of the root of *Tormentilla erecta* and the herb of *Sanicula europæa*, 2 each of the herb of *Drosera*, flowers of *Hypericum perforatum*, and rosæ gallicæ, 3 each of dragon's-blood, mummy, catechu, and myrrh, 2 of *Santalum rubrum*, and 1 part of nutmeg, in 128 parts of alcohol, expressing and filtering. [B, 97 (a, 21).]—**E. vulneraria Stahlii.** See BALSAMUM *vulnerarium Stahlii.*

ESSENTIAL, adj. E²s-se²n'sha²l. Lat., *essentialis.* Fr., *essentiel.* Ger., *wesentlich.* It., *essenziale.* Sp., *esencial.* 1. Of or pertaining to an essence (see *E. oil*). [A, 322 (a, 21).] 2. Necessary, indispensable. [B, 77 (a, 24).] 3. Of diseases, specific in nature, not dependent on a local morbid process. [A, 15.]

ESSENTIALIZATION, n. E²s-se²n-sha²l-i²z-a'shu³n. Fr., *essentialisation.* The personification of the vital properties, which are considered to be endowed with an individual essence and specific independence. [A, 301 (a, 21).]

ESSENTIALISM, n. E²s-se²n'sha²l-i²z'm. Fr., *essentialisme.* The doctrine that diseases are specific entities, and not the results of a local morbid process, and are to be cured only with specifics. [A, 15, 301.]

ESSENTIALISTE (Fr.), adj. E²s sa³n²-se-a-lest. Pertaining to essentialism; as a n., a believer in essentialism (the opposite of *localisateur*). [A, 15.]

ESSENTIALITY, n. E²s-se²n'shi²-a²l-i²t-i². Fr., *essentialité.* Ger., *Wesentlichkeit*, *Essentialität.* The essential (specific) nature of a disease, as opposed to its dependence upon a local morbid process. [A, 15.]

ESSENTUK (Russ.), n. A place in the government of Stavropol, Russia, where there are cold alkaline and saline springs. [A, 319 (a, 21).]

ESSENZ (Ger.), n. E^{2}s-sents′. See ESSENCE.—**Schmerzstillende E.** See ESSENTIA *anodyna*.—**Stahl's schweisstreibende E.** See ESSENTIA *alexipharmaca Stahlii*.—**Wedel's windtreibende E.** See *Tinctura* ZEDOARIÆ *composita*.—**E. wider den Scorbut.** See ESSENTIA *antiscorbutica*. [L, 80.]

ESSERA (Lat.), n. f. E^{2}s′se^2-ra^3. Fr., *essère*. Ger., *Porcellanfieber. Porcellankrankheit.* It., *e.* A term originally used by the Arabian physicians for urticaria or some one of its varieties. Sauvages and Plenck distinguish e. from urticaria. According to Plenck, e. consists of discrete, smooth, shining, hot, itching spots, of a red color, not elevated, most commonly affecting the hands and face. [G, 11, 17.]—**E. nocturna.** See EPINYCTIS.—**E. Vogelii.** Of Borsieri, roseola. [D, 72.]

ESSIEU (Fr.), n. E^{2}s-se-u^5. See AXIS (8th def.).

ESSIG (Ger.), n. E^{2}s′si^{2}g. See ACETUM and VINEGAR.—**Apfele′.** Cider vinegar.—**Aromatischer E.** See ACETUM *aromaticum*.—**Arzneie′.** See ACETUM *medicatum*.—**Concentrirter E.** See ACETUM *concentratum*.—**Destillirter E.** See ACETUM *destillatum*.—**E′älchen.** See RHABDITIS *aceti*.—**E′alkohol.** See ALCOHOL *aceti*.—**E′artig.** See ACETOUS.—**E′äther.** Acetic ether. [B, 81 (*a*, 21).]—**E′äthergeist.** A mixture of 1 part of acetic ether and 3 parts of rectified alcohol. [L. 135 (*a*, 14).]—**E′aufguss.** See ACÉTOLAT.—**E. auflösung.** See ACÉTOLÉ.—**E′auszug.** See ACÉTOLATURE.—**E′baum.** The *Rhus coriaria*. [B, 180 (*a*, 24).]—**E′beerstrauch.** See BERBERIS.—**E′bildung.** See ACETIFICATION.—**E′dämpfe.** Vapors of vinegar. [L, 80.]—**E′dorn.** See BERBERIS *vulgaris*.—**E′dünste.** See *E′dämpfe*.—**E′erzeugung.** See ACETIFICATION.—**E′ester.** See *Acetic* ETHER.—**E′estersalicylsäure.** See ACETOSALICYLIC ACID.—**E′ether.** See ACETIC ETHER.—**E′extrakt.** An acetic extract. [B.]—**E′ferment.** See *Acetic* FERMENTATION.—**E′fläschchen.** See ACETABULUM (1st def.).—**E′fliege.** The *Drosophila*. [L, 87 (*a*, 27).]—**E′gährung.** See *Acetous* FERMENTATION.—**E′geist.** Acetone. [B.]—**E′häutchen.** See MYCODERMA *vini*.—**E′honig.** See OXYMEL.—**E′kahm.** See MYCODERMA *vini*.—**E. klystier.** A revulsive enema prepared by mixing 1 to 2 parts of vinegar with 100 of water (or of an infusion of chamomile). [Bernatzik (A, 319 [*a*, 14]).]—**E′kolben.** The *Rhus typhina*. [B, 180 (*a*, 24).]—**E′limonade.** A sweetened mixture of vinegar and water. [Bernatzik (A, 319).]—**E′lösung.** See ACETUM (2d def.).—**E′messer.** See ACETOMETER.—**E′molken.**—See LAC *acetosum*.—**E′mutter.** See MYCODERMA *vini*.—**E′naphtha.** See ACETIC ETHER.—**E′pilz.** The *Bacterium aceti*. [A, 396 (*a*, 21).]—**E′räucherung.** Fumigation with vinegar. [A, 521.]—**E′rose.** The *Rosa gallica*. [B, 180 (*a*, 24).]—**E′sauer.** Acetic, containing acetic acid; with the name of a base, the acetate of that base. [A, 521.]—**E′säure.** See the major list.—**E′syrup.** See *Syrupus* ACIDI ACETICI.—**E′weinstein.** Normal potassium acetate. [B.]—**E′zucker.** See OXYSACCHARUM.—**Flüssiges E′rosenextrakt.** See *Extractum* ROSÆ *fluidum*.—**Gewürzhafter E.** See ACETUM *aromaticum*.—**Gifte′.** See ACETUM *antisepticum*.—**Holze′.** Pyroligneous acid.—**Kamphere′.** See ACETUM *camphoratum*.—**Kräutere′, Medicinischer E.** See ACETUM *medicatum*.—**Muttere′.** See ACETUM *antihystericum*.—**Peste′.** See ACETUM *antimephiticum maravillianum* and ACETUM *aromaticum*.—**Radikale′.** See *Radicle* VINEGAR.—**Räubere′.** See ACETUM *aromaticum*.—**Rectificirter Holze′.** See ACETUM *pyrolignosum rectificatum*.—**Reiner E.** See ACETUM *purum*.—**Roher Holze′.** See ACETUM *pyrolignosum crudum*.—**Rosene′.** See ACETUM *rosatum*.—**Stahle′.** See ACETUM *chalybeatum* and *Tinctura* FERRI *acetatis*.—**Verstärkter E.** See ACETUM *concentratum*.—**Vierräuber E.** See ACETUM *aromaticum*.

ESSIGSÄURE (Ger.), n. E^{2}s′si^{2}g-zoir-e^2. See ACETIC ACID.—**Allyle′.** See ALLYL *acetic acid*.—**Aromatische E.** See ACIDUM ACETICUM *aromaticum*.—**Campherhaltige E.** See ACIDUM ACETICUM *camphoratum*.—**Concentrirte E.** See ACIDUM ACETICUM *concentratum*.—**Concentrirteste E.** Glacial acetic acid. [*a*, 27.]—**E.-Allylester.** Allyl acetate. [B.]—**E.-Amylester.** Amyl acetate. [B.]—**E′anhydrid.** See ACETIC ANHYDRIDE.—**E.-Äthylester.** See ACETIC ETHER.—**E.-Benzylester.** Benzyl acetate. [B.]—**E.-Cholesterylester.** Cholesteryl acetate. [B.]—**E′cyänsäureanhydrid.** See ACETOCYANIC OXIDE.—**E′jodigsäureanhydrid.** See ACETOIODOUS ANHYDRIDE.—**E′unterbromigsäureanhydrid.** See ACETOHYPOBROMOUS ANHYDRIDE.—**E′unterchlorigsäureanhydrid.** See ACETOHYPOCHLOROUS ANHYDRIDE.—**E′unterjodigsäureanhydrid.** See ACETOHYPOIODOUS ANHYDRIDE.—**Gewürze′, Gewürzhafte E.** See ACIDUM ACETICUM *aromaticum*.—**Krystallinische E.** See ACIDUM ACETICUM *crystallisatum*.—**Reine E.** Glacial acetic acid. [L.]—**Verdünnte E., Versüsste E.** See ACIDUM ACETICUM *dilutum*.

ESSLÖFFEL (Ger.), n. E^{2}s′lu^{5}f-fe^{2}l. A tablespoon. [L, 80.]

ESSLUST (Ger.), n. E^{2}s′lust. The appetite for food.

ESSORILLÉ (Fr.), adj. E^{2}s-so-rel-ya. In zoology, having no perceptible ears; as a n., in the m. pl., e′s, a family of rodents thus characterized. [L, 41, 180.]

ESSOUFFLÉ (Fr.), adj. E^{2}s-suf-fla. Out of breath; dyspnœic. [L, 41.]

ESSOUFFLEMENT (Fr.), n. E^{2}s-sufl′ma^{3}n^2. See DYSPNŒA.

ESSUNLUST (Ger.), n. E^{2}s′un-lust. See ANOREXIA.

ESSWURZEL (Ger.), n. E^{2}s′vurts-e^{2}l. The *Lysimachia vulgaris*. [B, 180 (*a*, 24).]

ESTAFIATE [Mex. Ph.] (Sp.), n. E^{2}s-ta^2-fe-a^3′ta. The *Artemisia mexicana*. [A, 447 (*a*, 21).]

ESTAFISAGRA [Mex. Ph.] (Sp.), n. E^{2}s-ta^2-fe-sa^3′gra^3. The *Delphinium staphisagria*. [A, 447 (*a*, 21).]

ESTAGNON (Fr.), n. E^{2}s-ta^{3}n-yo^{2}n^2. A jar of tinned copper in which a distilled water, especially orange-flower water, is sent from the south of France. [A, 301 (*a*, 21).]

ESTELO D'AIGO, n. In Provence, the genus *Callitriche*. [B, 121 (*a*, 24).]

ESTER (Ger.), n. E^{2}st′e^{2}r. A compound ether (see under ETHER). [B.]—**Erstes E′anhydrid.** See *Ethereal* ANHYDRIDE.—**Carbonsäure E.** See CARBONIC *ether*.—**E′anhydrid.** See *Ethereal* ANHYDRIDE.

ESTHEOSTOMUS (Lat.), adj. E^{2}s-the^2(tha)-o^{2}s′to^{2}m-u^{3}s(u^{4}s). From ἐσθής, clothing, and στόμα, an aperture. Fr., *esthéostome*. Having a simple appendage at the orifice of the urn (said of mosses). [L, 116.]

ESTHÉSIE (Fr.), n. Es-ta-ze. See ÆSTHESIS, and for other words in *Esth-* not here given, see the corresponding words in *Æsth-*.

ESTHÉSIOMANIE (Fr.), n. E^{2}s-ta-ze-o-ma^3-ne. Of Berthier, a mental condition characterized by a perversion of the moral sense, and by the performance of eccentric deeds with no plausible motive. [L, 88 (*a*, 29).]

ESTHIOMÈNE (Fr.), adj. and n. E^{2}s-te-o-me^{2}n. See ESTHIOMENUS.—**E. de la vulve.** Of Huguier, a chronic affection of the ano-vulvar region "characterized by a leaden or violaceous hue of the parts and their simultaneous alteration of shape, induration, thickening, ulceration, destruction, hypertrophy, and infiltration, so that the orifices and canals of the vulvo-canal region may be at the same time ulcerated, enlarged, and constricted, and its grooves and cutaneous and mucous folds exaggerated, thickened, and the seat of more or less extensive and deep ulcerations and cicatrices; without pain, without directly threatening life, and for a long time without affecting the constitution." [Huguier, "Mém. de l'Acad. de méd.," 1869, p. 507; Deschamps, "Arch. de tocol.," Mar., 1885, p. 221]. Most writers use the term simply as a synonym of lupus of the vulva, while others make it include lupus, epithelioma, elephantiasis, and the lupus-like lesions of syphilis and scrofula. [G; R. W. Taylor, "N. Y. Med. Jour.," Jan. 4, 1890, p. 1.]—**E. éléphantiasique.** One of Huguier's varieties of e. hypertrophique characterized by chronic indurations and infiltrations of the tissues. [L, 88 (G).]—**E. érythémateux.** One of Huguier's two varieties of *e. superficiel*. The affected surface is of a deep red or violaceous color, smooth and glistening, with more or less thickening and a certain amount of desquamation, especially in places that are exposed to the air, with here and there little lenticular spots of a deeper color. [L, 88 (G).]—**E. hypertrophique.** Of Huguier, one of the three forms of e. in which hypertrophy is a prominent feature. It comprises the two varieties, *e. végétant* and *e. éléphantiasique*. [L, 88 (G).]—**E. perforant.** See ESTHIOMENOS *terebrans*.—**E. superficiel.** One of the three forms of e. as described by Huguier. It comprises the two varieties, *e. érythémateux* and *e. tuberculeux*. [L, 88 (G).]—**E. tuberculeux.** One of the varieties of *e. superficiel* of Huguier, characterized by the formation of tubercular elevations that are succeeded by ulceration. [L, 88 (G).]—**E. végétant.** Of Huguier, one of the varieties of *e. hypertrophique*, marked by the development of little mamillated tumors. It may be associated with the erythematous or tubercular varieties. [L, 88 (G).]

ESTHIOMENOS (Lat.), **ESTHIOMENUS** (Lat.), adj's. E^{2}s-thi^2-o^{2}m′e^{2}n-o^{2}s, -u^{3}s(u^{4}s). Gr., ἐσθιόμενος (from ἐσθίειν, to eat). Fr., *esthiomène*. Ger., *fressend*. Eating greedily, devouring, phagedenic; as a n., lupus exedens; also, of Fuchs, a disease said to be identical with the impetigo rodens of Willan, occurring mostly on the face in old people, and beginning with "a group of large, acuminate vesicles" upon which adherent crusts form, overlying an ulcerative process. [G.] See EPITHELIOMA and *Rodent* ULCER.—**E. ambulans.** Fr., *esthiomène ambulant*. Lupus serpiginosus attended with decided ulceration. [G, 7.]—**E. perforans.** Fr., *esthiomène perforant*. See *E. terebrans*.—**E. serpens, E. serpiginosus.** See *E. ambulans*.—**E. terebrans.** Fr., *esthiomène térébrant*. Lupus exedens attended with very deep ulceration. [G.]

ESTILL SPRINGS, n. E^{2}s′ti^{2}l. A place in Estill County, Kentucky, where there are springs containing magnesium sulphate. [A, 363 (*a*, 21).]

ESTIRANERVIOS (Sp.), n. E^{2}s-te-ra^3-ne^{2}r′ve-os. In Peru, the *Molina* (*Baccharis*) *latifolia*. [B, 88 (*a*, 14).]

ESTIVAL, adj. See ÆSTIVAL, and for other words in *Est-* not here given, see the corresponding words in *Æst-*.

ESTOHER (Fr.), n. E^{2}s-to-a. A place in the department of the Pyrénées-Orientales, France, where there is a ferruginous spring. [L, 49, 87, 105 (*a*, 14).]

ESTOMAC (Fr.), n. E^{2}s-to-ma^{3}k. See STOMACH.

ESTRAC (Sp.), n. E^{2}st′ra^{3}k. A place near Barcelona, Spain, where there are thermal springs. [A, 319 (*a*, 21); L, 57.]

ESTRAGON (Fr.), n. E^{2}s-tra^3-go^{2}n^2. The *Artemisia dracunculus*. [B, 121, 173, 180 (*a*, 24).]

ESTRAMONIO [Mex. Ph.] (Sp.), n. E^{2}s-tra^3-mo′ni^2-o. The *Datura stramonium*. [A, 447 (*a*, 21).]

ESTRANGLE-LIÉPARD (Fr.), n. E^{2}s-tra^{3}n^{2}g′l-le-a-pa^{3}r. The *Paris quadrifolia*. [B, 121 (*a*, 24).]

ESTRANGLO BESTI, n. In Provence, the *Hordeum murinum*. [B, 121 (*a*, 24).]

ESTRANGLO CHIVAU, n. The *Bromus arvensis*. [B, 121 (*a*, 24).]

ESTRELLA, n. In southern Africa, the *Rocella hypomecha*. [B, 121 (*a*, 24).]—**E. de San Nicolás** [Mex. Ph.] (Sp.). The *Pancratium illyricum*. [A, 447 (*a*, 21).]

ESTRELLÆ (Lat.), n. f. pl. E^{2}s-tre^{2}l′le(la^3-e^2). The *Echinodermata* (see under ECHINODERM). [L.]

ESTRELLAMAR (Sp.), n. E^{2}s-tre^{2}l-ya^3-ma^{3}r′. The *Plantago coronopus*. [B.]

ESTRELOQUE (Sp.), n. E^{2}s-tra-lo'ka. In the Spanish Antilles, the *Anguria plumeriana.* [B, 121 (*a*, 24).]

ESTROPIÉ (Fr.), n. E^{2}s-tro-pe-a. See CRIPPLE.

ESTURGEON (Fr.), n. E^{2}s-tu^{6}r-zhe^2-o^{2}n^2. The genus *Acipenser.* [A, 385 (*a*, 21).]—**E. commun.** The *Acipenser sturio.* [A, 385 (*a*, 21).]—**Grand e.** The *Acipenser huso.* [A, 385 (*a*, 21).]—**Petit e.** The *Acipenser ruthenus.* [A, 385 (*a*, 21).]

ESULA (Lat.), n. f. E^{2}s'u^2(u^4)-la^3. Fr., *ésule.* Of Haworth, the genus *Euphorbia.* [B, 42, 121 (*a*, 24).]—**Cortex radicis Esulæ.** The root-bark of *Euphorbia e.* [B, 180 (*a*, 24).]—**E. cyparissias.** The *Euphorbia cyparissias.* [B, 173 (*a*, 24).]—**E. major.** The *Euphorbia palustris.* [B, 180 (*a*, 24).]—**E. minima.** The *Euphorbia peploides.* [B, 173 (*a*, 24).]—**E. minor.** The *Euphorbia cyparissias.* [B, 180 (*a*, 24).]—**E. rara.** The *Apocynum venetum.* [B, 121 (*a*, 24).]—**E. rotunda.** The *Euphorbia helioscopia.* [L, 105.]—**E. rotundifolia.** The *Euphorbia peplus.* [B, 180 (*a*, 24).]—**E. silvatica.** The *Euphorbia silvatica.* [B, 173 (*a*, 24).]

ÉSULE (Fr.), n. A-zu^{6}l. See ESULA.—**Grande e.** The *Euphorbia esula.* [B, 73 (*a*, 24).]—**Petite e.** The *Euphorbia cyparissias.* [B, 173 (*a*, 24).]

ESURIES (Lat.), n. f. E(a)-su^2(su)'ri^2-ez(as). Gen., *esuri'ei.* From *esurire,* to be hungry. Hunger. [A, 325 (*a*, 21).]

ESURIGO (Lat.), n. f. E(a)-su^2(su)-ri(re)'go. Gen., *esurig'inis.* 1. See ESURIES. 2. Of Sauvages, especially morbid hunger. [A, 322 (*a*, 21).]

ESURINUS (Lat.), adj. E^{2}s-u^2(u^4)-ri(re)'nu^{3}s(nu^{4}s). From *esurire,* to be hungry. Causing hunger. [A, 325.]

ESURITIO (Lat.), n. f. E^{2}s-u^2(u^4)-ri^{2}sh(ri^{2}t)'i^2-o. Gen., *esuritio'nis.* See ESURIES.

ESURITIS (Lat.), n. f. E^{2}s-u^2(u^4)-ri(re)'ti^{2}s. Gen., *esurit'idos (-is).* From *esuries,* hunger. Fr., *ésurite.* Ulceration of the stomach due to inanition. [A, 301.]

ETABILLI, n. In Damara, the wood of the genus *Cynometra.* [B, 121 (*a*, 24).]

ETÆRION (Lat.), n. n. E^{2}t-e'(a^3'e^2)-ri^2-o^{2}n. From ἑταίριος, associated. Fr., *étairon, étairion, phyocarpe* [Desvaux], *syncarpe* [Richard]. Of Mirbel, a compound, aggregate fruit, having many cells disposed around a supposed axis. The *Etærionares* or *Etairionarii* (Fr., *étairionnaires*) of Mirbel are fruits formed by the union of many simple fruits; the multiple fruits of Richard. [B, 1, 19 (*a*, 24).]

ETÆRISTRIA (Lat.), n. f. E^{2}t-e^{2}r(a^3-e^{2}r)-i^{2}st'ri^2-a^3. Gr., ἑταιρίστρια. A lewd woman. [A, 387.]

ETÆRIUM (Lat.), n. n. E^{2}t-e'(a^3'e^2)-ri^2-u^{3}m(u^{4}m). See ETÆRION.

ÉTAGE (Fr.), n. A-ta^{3}zh. A step (as of a staircase); a degree. [A, 474.]—**E. frontal supérieur.** See *Superior frontal* CONVOLUTION.—**E. frontal supérieur interne.** See *Marginal* CONVOLUTION.—**E. inférieure du lobule frontal.** See *Inferior frontal* CONVOLUTION.—**E. inférieure du pédoncule cérébral.** See CRUST *of the peduncle.*—**E. moyen du lobule frontal.** See *Middle frontal* CONVOLUTION.—**E'nnaht** (Ger.). See SUTURE *à é's.*—**E. perforant du pédoncule.** Of Leuret and Gratiolet, a portion of the cerebral peduncle which is intersected by the prolongation of the anterior pyramids. [I, 35 (K).]—**E. perforé du pédoncule.** Of Leuret and Gratiolet, certain bundles of fibres from the anterior pyramids which intersect those of the crura cerebri. [I, 35 (K).]—**E. supérieur du pédoncule.** See TEGMENTUM.—**E. surcilier** [Gratiolet]. See *Inferior frontal* CONVOLUTION.

ÉTAGÉ (Fr.), adj. A-ta^3-zha. Of bracts, flowers, etc., ranged in series one above the other. [B, 1 (*a*, 24).]

ÉTAIN (Fr.), n. A-ta^{2}n^2. Tin. [B.]—**Beurre d'é.** Butter of tin (see *Tin tetrachloride*). [B.]—**Cendre d'é., Crasse d'é.** See CALX *Jovis.*—**E. de glace.** See BISMUTH.—**E. en grains** (ou **poudre** [Fr. Cod.]), **E. pulvérisé.** Grain tin; tin powdered with the aid of heat. [B.]—**E. pur en baguettes** [Fr. Cod.]. Lat., *stannum purissimum.* Pure metallic tin in the form of small rods. [B.]—**Limaille d'é.** See *E. en poudre.*—**Potée d'é.** See CALX *Jovis.*—**Poudre d'é.** See *E. en poudre.*

ETAIRION (Lat.), **ETAIRIUM** (Lat.), n's n. E^2-ta'(ta^3'e)-ri^2-o^{2}n, -u^{3}m(u^{4}m). See ETÆRION.

ÉTALÉ (Fr.), n. A-ta^3-la. See PATULOUS.

ÉTAMAGE (Fr.), n. A-ta^3-ma^{3}zh. The operation of coating a metal with tin. [L, 88.]

ÉTAMINE (Fr.), n. A-ta^3-men. 1. A stamen. 2. In pharmacy, a piece of woolen used for straining. [L, 41.]

ÉTAMINÉ (Fr.), adj. A-ta^3-me-na. Furnished with stamens. [L, 41.]

ÉTAT (Fr.), n. A-ta^3. See STATE and STATUS.—**E. actuel.** See STATUS *præsens.*—**E. antérieur des corps.** Of Chevreul, the state of a body in solution before it assumes the crystalline form. [A, 301.]—**E. criblé.** A sieve-like appearance of the cut surface of the brain found sometimes at autopsies. It is due to numberless openings, some as large as a pin's head, dependent on enlargement of small vessels or, more frequently, dilatation of the circumvascular lymph-sheaths. It is met with principally in the white substance, the corpora striata, and the optic thalami. [L, 20 (*a*, 29).]—**E. de mal (épileptique).** See STATUS *epilepticus.*—**E. d'imminence des contractures.** The state of muscular activity which always precedes and often follows contracture. [A, 385 (*a*, 21).]—**E. fœtal.** The condition of any part which remains the same as it was in the fœtus. [A, 385 (*a*, 21).]—**E. fœtal du poumon.** See ATELECTASIS *pulmonum.*—**E. mamelonné.** In the stomach, hypertrophy of the mucous membrane, with the formation of folds and warty or polypous excrescences. [D, 48.]—**E. piqueté.** An ecchymotic condition. [*a*, 29.]—**E. ponctueux.** Of Devergie, the punctate state of the skin produced by abrasion of the summits of the minute vesicles of eczema. [Kaposi (A, 319).]—**E. puerpéral.** The puerperal condition. [A, 301.]—**Grand é. puerpéral.** Of Raymond, the state of the system during the puerperal period strictly so called, as distinguished from the more comprehensive sense in which it is commonly used. [A, 15.]—**Petit é. de mal.** A form of the status epilepticus resembling idiocy. [A, 301.]—**Petit é. puerpéral.** Of Raymond, the lesser derangements due to pregnancy and lactation, as distinguished from the true puerperal state. [A, 15.] Cf. *Grand é. puerpéral.*

ÉTAU (Fr.), n. A-to. The superior half of the convolution of the great cerebral fissure. [A, 301 (*a*, 21).]

ÉTEINT (Fr.), adj. A-ta^{2}n^2. Extinguished (in the sense of having lost its characteristics); in chemistry, saturated, slaked. [A, 385.]

ÉTENDARD (Fr.), n. A-ta^{3}n^2-da^{3}r. See VEXILLUM.

ÉTENDU (Fr.), adj. A-ta^{3}n^2-du^6. 1. Of acids, etc., diluted. [B.] 2. Of Mirbel, spread out (said of the nectary). [B, 1 (*a*, 24).]

ÉTENDUE (Fr.), n. A-ta^{3}n^2-du^6. Extent.—**E. de mésolobe.** See CORPUS *callosum.*

ETERNAL FLOWER, n. E-tu^{5}rn'a^{2}l flu^5''u^4-u^{5}r. Fr., *éternelle.* The *Helichrysum orientale.* [B, 19, 121 (*a*, 24).]

ÉTERNUE (Fr.), n. A-te^{2}r-nu^6. The *Achillea ptarmica.* [B, 88 (*a*, 14).]—**E. drageonnée.** The *Agrostis stolonifera.* [B, 121, 173 (*a*, 24).]—**E. genouillée.** The *Trichodium caninum* (*Agrostis canina*). [B, 121, 173 (*a*, 24).]

ÉTERNUEMENT (Fr.), n. A-te^{2}r-nu^6-ma^{3}n^2. Sneezing. [A, 301 (*a*, 21).]

ETEROLADOS [Mex. Ph.] (Sp.), n. pl. A-te^{2}r-o-la^3'dos. Ethereal tinctures. [A, 447 (*a*, 21).]

ÉTERPÈNE (Fr.), n. A-te^{2}r-pe^{2}n. Ethyl terpene. [L, 49.]

ETESIUS (Lat.), adj. E^{2}t-ez(as)'i^2-u^{3}s(u^{4}s). Gr., ἐτήσιος. Annual; as a n., in the f. pl., *etesiæ* (Fr., *étésiens*; Ger., *Jahrwinde, Passatwinde*), winds (said to be purifying) that blow through the summer months in countries bordering on the Mediterranean. [A, 322 (*a*, 21); L, 89, 94.]

ETESTICULATION, n. E-te^{2}s-ti^{2}k-u^2-la'shu^{3}n. See CASTRATION.

ÉTEULE (Fr.), n. A-tu^{6}l. The base of the culm of *Triticum æstivum.* [B, 121, 173 (*a*, 24).]

ETHACETIC ACID, n. E^{2}th-a^{2}s-et'i^{2}k. Fr., *acide éthacétique.* Normal butyric acid. [B.]

ETHAL, n. E^{2}th'a^{2}l. Fr., *éthal.* Ger., *Aethal.* Of Chevreul, cetyl alcohol. [B.]

ÉTHALATE (Fr.), n. A-ta^3-la^{3}t. A salt of ethalic acid. [A, 301 (*a*, 21).]

ETHALDEHYDE, n. E^{2}th-a^{2}l'de-hid. Fr., *éthaldéhyde.* Cetyl aldehyde. [L, 41.]

ÉTHALÈNE (Fr.), n. A-ta^3-le^{2}n. The radicle, $C_{32}H_{32}$, of ethyl or cetyl. [*a*, 27.]

ETHALIC ACID, n. E^{2}th-a^{2}l'i^{2}k. Fr., *acide éthalique.* Palmitic acid. [B.]

ETHAMIDE, ETHAMINE, n. E^{2}th-a^{2}m'i^{2}d, -en. See ETHYLAMINE.

ETHANE, n. E^{2}th'an. Fr., *éthane.* Ger., *Ethan, Aethan.* 1. A paraffin, C_2H_6; a colorless, odorless gas. 2. Any saturated hydrocarbon. See PARAFFIN. [B.]

ETHANIUM (Lat.), n. n. E^{2}th-an(a^{3}n)'i^2-u^{3}m(u^{4}m). The genus *Alpinia.* [B, 121 (*a*, 24).]

ÉTHEL (Fr.), n. A-te^{2}l. A gigantic species of pine found in the Sahara Desert; said to furnish a useful resin. [B, 121 (*a*, 21).]

ETHEMOSYNE (Lat.), n. f. E^{2}th-e^{2}m(am)-o^{2}s'i^{2}n(u^{6}n)-e(a). Gen., *ethemos'ynes.* Gr., ἐθημοσύνη. Habit. [A, 387.]

ETHENE, n. E^{2}th'en. Fr., *éthène.* Ger., *Aethen.* See ETHYLENE.

ETHENYL, n. E^{2}th'e^{2}n-i^{2}l. Ger., *Aethenyl.* A trivalent radicle, $(C_2H_3)''' = CH_2-CH$:. [B, 4.]—**E. bromide diethylate.** Ger., *Aethenylbromürdiäthylat.* See BROMACETAL.—**E. chloride diethylate.** Ger., *Aethenylchlorürdiäthylat.* See CHLORACETAL.—**E. dichloride ethylate.** Ger., *Aethenyldichlorüräthylat.* See DICHLORETHER.—**E. hydrate diethylate.** Ger., *Aethenylhydratdiäthylat.* Oxyacetal, glycol acetal, $C_2H_3(OH)(OC_2H_5)_2 = C_6H_{14}O_3$, a liquid of a pleasant odor. [B, 4.]—**E. hydrate oxide.** Ger., *Aethenylhydratoxyd.* Oxyaldehyde, $C_2H_4O_2 = CH_2(OH)-CHO$, a body not yet completely isolated. [B, 4.]—**E. oxychloride.** Ger., *Aethenylchlorüroxyd.* Monochloraldehyde, $C_2H_3ClO = CH_2Cl.CHO$. [B, 4.]—**E. triacetate.** Ger., *Aethenyltriacetat.* A liquid, $C_2H_3(C_2H_3O_2)_3 = C_8H_{12}O_6$, boiling above 250° C. [B, 4.]—**E. tribromide.** Ger., *Aethenyltribromür.* Bromethylene dibromide, $C_2H_3Br.Br_2 = C_2H_3Br_3$, a liquid having an odor resembling that of chloroform. [B, 4.]—**E'tricarboxylic acid.** Fr., *acide éthényltricarboxylique.* Ger., *Aethenyltricarboxylsäure.* A tribasic crystalline acid, $C_2H_3(CO.OH)_3$. [B, 3.]—**E. trichloride.** Ger., *Aethenyltrichlorür.* Chlorethylene dichloride, $C_2H_3Cl.Cl_2 = C_2H_3Cl_3$, a colorless oily liquid. [B, 4.]—**E. triethylate.** Ger., *Aethenyltriäthylat.* An oily liquid, $C_2H_3(OC_2H_5)_3 = C_8H_{18}O_3$. [B, 4.]

ETHER, n. E'thu^{5}r. Fr., *éther.* Ger., *Æther, Ester* (2d and 3d def's). It., *etere.* Sp., *éter.* 1. Primarily, any medium of extreme tenuity. 2. In physics, a supposititious medium of extreme tenuity pervading all space, whose vibrations serve, according to the undulatory theory, for the transmission of luminous, thermal, and electrical impulses. 3. In chemistry (primarily), the substance

called variously ethylic or sulphuric e., $(C_2H_5)_2O$ (see Ethyle'), which was also, at the time of its discovery, called ethereal spirit of wine, vitriolic e., naphtha, etc. The term has since been extended to all bodies of similar constitution to ethyle', (*i. e.*, to all oxides of the monatomic hydrocarbons). E's in this sense consist of two univalent hydrocarbons united with one atom of oxygen. Their general formula, therefore, is $C_nH_{2n}+{}_1.C_mH_{2m}+{}_1.O$. If the two hydrocarbons are the same, the compound is called a *simple e.*; if they are dissimilar, the compound is a *mixed e.* A still further extension of the term is now made, so that it includes all compounds of the alcoholic radicles with an acid radicle, these being denominated *compound e's.* Compound e's formed by the union of the alcoholic radicles with one of the halogens are called *haloid e's.* The term e. is frequently restricted, especially when the word is coupled with an adjective, to the compound e's of ethyl. See *Acetic e.*, *Hydrobromic e.*, etc. The e. of the U. S. Ph. (Fr., *éther à*, 758) is ethyl e. [B.]—**Absolute e.** E. which does not contain water. It is a colorless, limpid, permanent liquid of a strong refractive power, having a specific gravity of 0·710 at 20° C., a peculiar penetrating odor, and a sweetish, pungent taste. It is explosive, easily ignited, and burns with a bright flame, yielding water and carbonic acid. [B, 81 (a, 27).]—**Acetic e.** See Æther aceticus.—**Alcoholic muriatic e.** See *Spiritus* ætheris chlorati.—**Alcoholic nitrous e.** See *Spiritus* ætheris nitrosi.—**Aldehyde e.** See Crotonic aldehyde.—**Allophanic e.** See Ethyl *allophanate.*—**Anæsthetic e., Aran's e.** See Æther *anæstheticus.*—**Bichloric e.** See Dichlorether.—**Compound anæsthetic e.** Of B. W. Richardson, a mixture of equal parts of rhigolene and anhydrous ethyl e., employed by him in the form of spray to produce local anæsthesia by freezing. ["Lancet," Jan. 17, 1885, p. 101.]—**Compound e.** Fr., *éther composé.* Ger., *zusammengesetzter Aether*, *Ester.* A salt of an alcohol radicle; a compound of the latter with an acid radicle. [B.]—**Compound spirit of (sulphuric) e.** See *Spiritus* ætheris *compositus.*—**Cyanic e.** See Ethyl *allophanate.*—**E.-effect.** Of F. H. Hooper, paralysis of the muscles that close the glottis, observed in animals profoundly narcotized with sulphuric e. ["N. Y. Med. Jour.," July 16, 1887, p. 63.]—**Halogen e., Halogenic e., Haloid e.** It., *etere alogenico.* A compound of an alcohol radicle (methyl, ethyl, etc.) with a halogen (iodine, bromine, etc.). [B.]—**Hylostyptic e.** See Collodium *stypticum.*—**Luminiferous e.** The medium supposed to pervade all space and serving to transmit the impulses of light. [B.]—**Methylated e.** See *Methylic-ethylic e.*—**Methylic e.** A colorless inflammable gas, $(CH_3)_2O$, heavier than air, of an ethereal odor and aromatic taste. It forms a colorless liquid at −36° C., which boils at −21° C. [B, 81 (a, 27).]—**Methylic-ethylic e.** Of Richardson, a saturated solution of methylic e. at 0° C. (32° F. in e). [B, 81 (a, 27).]—**Mixed e.** Ger., *gemischter Aether.* An e. consisting of 1 atom of oxygen united with two dissimilar hydrocarbons. [B.]—**Monochlorinated hydrochloric e.** Fr., *chlorure d'éthyle monochloré.* A colorless, transparent, limpid liquid. $C_2H_4Cl_2$, isomeric with bichloride of ethylene, which it resembles in odor, but differs from it in density.—**Officinal pure e.** See *Stronger e.*—**Oxye', Oxygen e.** An oxide of a hydrocarbon. [B.]—**Ozonic e., Ozonized e.** See *Ethereal solution of* hydrogen *peroxide.*—**Perchlorinated e.** Perchlorethyl e. [B, 3.]—**Petroleum e.** See Benzin (2d def.).—**Phosphorated e.** A preparation made by macerating for 5 or 6 days in 100 parts of e. from 2 to 3 parts of finely divided phosphorus, and straining through glass-wool. ["Proc. of the Am. Pharm. Assoc.," xxvii (a, 14).]—**Pure e.** Fr., *éther pur.* See under Ethyl ether.—**Rectified commercial e.** Fr., *éther rectifié du commerce* [Fr. Cod.]. E. purified by repeated distillation. [a, 27.]—**Simple e.** Ger., *einfacher Aether.* An e. consisting of 1 atom of oxygen united with 2 molecules of a single hydrocarbon. Their general formula is $(C_nH_{2n}+{}_1)_2O$. [B.] See *Mixed e.*—**Spirit of e.** See *Spiritus* ætheris.—**Spirit of nitrous e.** See *Spiritus* ætheris nitrosi.—**Spirit of sulphuric e.** See *Spiritus* ætheris.—**Stronger e.** Lat., *æther fortior.* Fr., *éther hydrique pur*, *éther officinal* [Fr. Cod.]. Ethyl e. containing no alcohol or water [Br. Ph.], or containing 6 per cent. of alcohol [U. S. Ph.]. [B.]—**Syrup of e.** Fr., *sirop d'éther* [Fr. Cod.]. A saccharine preparation, containing 5 per cent. each of e. and alcohol [Fr. Form.], or 1·5 per cent. of e. [Belg. Form.].—**Terebinthinated e.** See Æther *terebinthinatus.*—**Thio-e.** Fr., *thio-éther.* Ger., *Thioäther.* A sulphide of a hydrocarbon radicle; a simple ether in which sulphur replaces oxygen. [B, 4.] See Mercaptan.—**Three-carbon e.** Of Williamson, methylethyl e. [B.]—**Xylostyptic e.** See Collodium *stypticum.*

ÉTHER (Fr.), n. A-te²r. See Ether.—**E. à 0·758** [Fr. Cod.]. A preparation made by mixing 7 parts of the *é. rectifié du commerce* (corresponding to the *stronger ether* of the U. S. Ph.) with 3 parts of 90-per-cent. alcohol. It is of about the strength of the ether of the U. S. Ph. [B.]—**E. acéteux, E. acétique** [Fr. Cod.]. Ethyl acetate. [B.]—**E. acétique alcoolisé.** See *Spiritus* ætheris *acetici.*—**E. acétique cantharidé.** A solution of cantharidin in acetic ether. [L, 49.]—**E. acétique ferré (ou martial).** See *Tinctura* ferri *acetatis.*—**E. alcoolisé.** See *Spiritus* ætheris.—**E. ammoniacal** [Finn. Ph., 1819, Swed. Ph., 1817, Ferr. Ph., 1825]. A preparation made by dissolving 1 part of ammonium chloride in 1 part of distilled water, adding 1 part each of quicklime and sulphuric acid, and distilling in a receptacle surrounded with ice or cold water [Finn. Ph., 1819, Swed. Ph., 1817]; or by mixing equal parts of liquid ammonia and sulphuric ether [Ferr. Ph., 1825]. [B, 119 (a, 21).]—**E. amylnitreux** [Fr. Cod.]. See Amyl *nitrite.*—**E. arsénique.** Ethyl ether obtained by decomposing alcohol with arsenic acid. [B, 88.]—**E. azoteux.** See ethyl *nitrite.*—**E. azoteux alcoolisé.** See *Spiritus* ætheris *nitrosi.*—**E. azotique.** See Ethyl *nitrite.*—**E. camphré.** See *Solutio* camphoræ *ætherea.*—**E. chlorhydrique alcoolisé** [Ferr. Ph., 1825]. A preparation made by mixing 1 part of hydrochloric ether with 3 parts of alcohol. [B, 119 (a, 21).]—**E. chlorhydrique monochloruré.** Ethylidene dichloride. [B.]—**E. composé.** See *Compound* ether.—**E. dit sulfurique** [Fr. Cod.]. See Ethyl ether.—**E. hémostatique.** See Collodium *stypticum.*—**E. hydraté, E. hydratique.** Ethyl ether (including the so-called sulphuric, phosphoric, and other ethers). [B, 88.]—**E. hydrique alcoolisé.** See *Spiritus* ætheris.—**E. hydrique pur.** See *Stronger* ether.—**E. hydrochlorique alcoolisé.** Ethyl chloride mixed with an equal amount of alcohol. [B, 88.]—**E. hydrochlorique monochlorée.** Of Regnault, dichlorethane (ethylidene dichloride). [B, 3.]—**E. ioduré.** See *Tinctura* iodii *ætherea.*—**E. marin.** Hydrochloric ether. [B, 88.]—**E. martial.** An ethereal solution of an iron salt. [B, 88.]—**E. mercuriel.** See Æther *mercurialis.*—**E. muriatique.** See Hydrochloric *ether.*—**E. nitrique alcoolisé.** See *Spiritus* ætheris nitrosi.—**E. officinal** [Fr. Cod.]. See *Stronger* ether.—**E. officinal alcoolisé** [Fr. Cod.]. Syn.: *é. sulfurique alcoolisé*, *liqueur de Hoffmann.* A preparation corresponding to the spiritus ætheris of the U. S. Ph., but containing more than twice as much pure ether. It consists of a mixture of equal weights of chemically pure ether and 90-per-cent. alcohol. Its sp. gr. is 0·783. [B.]—**E. oléo-sulfureux.** See Oleum *æthereum.*—**E. ordinaire.** Common ether. [a, 27.]—**E. oxygéné pesant.** Heavy oxygen ether; acetic aldehyde. [B, 46.]—**E. phosphoré.** See Æther *phosphoratus.*—**E. pur.** See *Stronger* ether.—**E. rectifié du commerce** [Fr. Cod.]. See *Rectified commercial* ether.—**E. simple.** 1. Common ether. [A, 301 (a, 21).] 2. See *Simple* ether.—**E. sulfatique.** A compound ether, $CH_4O_5.SO_3$, obtained by collecting the vapors of anhydrous sulphuric acid in a balloon containing vinic ether freed from water. [A, 385 (a, 21).]—**E. sulfurique alcoolisé.** See *É. officinal alcoolisé.*—**E. sulfurique martial.** See *Tinctura* ferri chlorati *ætherea.*—**E. sulfurique neutre.** See Ethyl *sulphate.*—**E. térébinthiné.** See Æther *terebinthinatus.*—**E. zincé.** 1. Zincoethylum. [a, 27.] 2. See *Æther* zinci.—**Huile d'é.** See Oleum *æthereum.*—**Sirop d'é** [Fr. Cod.]. See *Syrup of* ether.

ÉTHÉRAT (Fr.), n. A-ta-ra³. See Éthérolat.

ETHEREAL, adj. E-the're-a²l. Lat., *æthereus.* Fr., *éthéré.* Ger., *ätherisch.* Pertaining to, resembling, or made with, ether.

ETHERENE, n. E'thu⁵r-en. E²th'e²r-en. Fr., *éthérène.* See Ethylene.

ETHEREOUS, adj. E-the're²-u³s. See Ethereal.

ETHERIC ACID, n. E²th-e²r'i²k. See Acetylous acid.

ETHERIDE, n. E²th'e²r-i²d(id). A generic name for any compound of formyl with a haloid. [Gabler (B).]

ETHERIFICATION, n. E²th-e²r-i²-fi²-ka'shu³n. From *æther*, ether, and *facere*, to make. Fr., *éthérification.* Ger., *Aetherification.* The formation of an ether from an alcohol. [A, 518.]

ETHERIN, n. E²th'e²r-i²n. Fr., *éthérine.* Ger., *Aetherin.* A solid crystalline body, C_nH_{2n}, probably $C_{16}H_{32}$ (and so isomeric with cetylene), melting at 110° C., formed from ethylene by distillation, and polymeric with ethylene; a constituent of light oil of wine. [B, 3, 4, 5, 8, 9.]

ETHERIOSCOPE, n. E-the'ri²-o-skop. From *æther*, ether, and σκοπεῖν, to examine. Ger., *Aetherprobircylinder.* An instrument for measuring the proportions of ether or of acetic acid to water in a given solution. It consists of a test-tube so graduated as to contain two equal parts, of which the superior is again subdivided into ten equal parts. The tube is filled with water up to the zero of the subdivisions and with the ethereal mixture up to the tenth line. The tube is then closed, repeatedly shaken, and left in repose. The ascent of the water line will indicate the proportion of water in the ether solution. [B, 270 (a, 27).]

ÉTHÉRIQUE (Fr.), adj. A-ta-rek. Produced by the combustion of alcohol (said of an acid). [L, 41.]

ÉTHÉRISATION (Fr.), n. A-ta-re-za³-se-o³n². See Etherization.

ETHERISM, n. E'thu⁵r-i²z'm. Lat., *ætherismus.* Fr., *éthérisme.* Ger., *Aetherismus.* 1. The state of being affected with ether. 2. The administration of ether. [B.]

ETHERIST, n. E'thu⁵r-i²st. One who administers ether.

ETHERIZATION, n. E-thu⁵r-i²z-a'shu³n. Lat., *ætherisatio.* Fr., *éthérisation.* Ger., *Aetherisation*, *Aetherisirung.* It., *eterizzazione.* Sp., *eterización.* The administration of ether for the purpose of producing anæsthesia. [E.]—**Local e.** Fr., *éthérisation locale.* An application of ether spray to produce local anæsthesia by freezing. [A, 301 (a, 21).]—**Rectal e.** Fr., *anesthésie rectale*, *éthérisation par la voie rectale.* Ger., *Aetherisation durch den Mastdarm.* Syn.: *rectal anæsthesia.* The induction of general anæsthesia by conveying ether vapor into the rectum; now generally abandoned as dangerous.

ETHERIZE, v. tr. E'thu⁵r-iz. Fr., *éthériser.* Ger., *ätherisiren.* It., *eterizzare.* Sp., *eterizar.* To put under the influence of ether. [E.]

ETHERIZED, adj. E'thu⁵r-izd. Lat., *ætherisatus.* Fr., *éthérisé.* Ger., *ätherisirt.* Anæsthetized with ether. [E.]

ÉTHÉRO-CHLOROFORME (Fr.), n. A-ta-ro-klo-ro-form. Of A. Robert, a mixture of ether and chloroform employed for long-continued anæsthesia. [B, 52 (a, 27).]

ÉTHÉRO-HYPOSULFURIQUE, adj. A-ta-ro-e-po-su⁶l-fu⁶-rek. See Isothionic.

ÉTHÉROÏDE (Fr.), adj. A-ta-ro-ed. Resembling ether. [A, 301 (a, 21).]

ETHEROL, n. E'thu⁵r-o²l. Fr., *éthérol.* Ger., *Aetheröl.* An oily liquid polymeride of ethylene, C_nH_{2n}, = probably $C_{16}H_{32}$, formed from ethylene, along with etherin, by distillation. It is a constituent of "light oil of wine," and so a product of the excessive action of sulphuric acid on alcohol. [B, 4, 5.]

ÉTHÉROLAT (Fr.), n. A-ta-ro-la³. Lat., *ætherolatum.* Of

Béral, a product obtained by distilling an aromatic substance with ether. [B, 52.]

ÉTHÉROLATURE (Fr.), n. A-ta-ro-la^3-tu^{6}r. Lat., *ætherolatura*. Of Béral, an ethereal tincture. [B.]

ÉTHÉROLÉ (Fr.), n. A-ta-ro-la. An ethereal tincture. [B, 113 (*a*, 21).]—**E. odontalgique.** A preparation made by mixing 20 parts of camphorated sulphuric ether and 1 part of ammonia-water. [L, 87 (*a*, 14).]

ÉTHÉROLIQUE (Fr.), adj. A-ta-ro-lek. Of Béral, having ether as the excipient; as a n., a preparation of that character. [A, 301.]

ÉTHÉROLOTIF (Fr.), n. A-ta-ro-lo-tef. Lat., *ætherolotivum*. Of Béral, an ethereal preparation for external use. [A, 301 (*a*, 21).]

ETHEROMANIA, n. f. E(a)-the^{2}r-o(o^3)-man(ma^{3}n)'i^2-a^3. From *æther*, ether, and μανία, madness. It., *eteromania*. Addiction to the habit of taking ether.

ETHERONE, n. E^{2}th'e^{2}r-on. Fr., *éthérone*. Ger., *Aetheron*. A limpid, light, very volatile liquid formed, together with "heavy oil of wine," in the dry distillation of the sulphovinates. [B, 52 (*a*, 27).]

ETHERO-PHOSPHORIC ACID, n. E"the^2-ro-fo^{2}s-fo^{2}r'i^{2}k. Fr., *acide éthéro-phosphorique* (ou *phosphovinique*). Ethylphosphoric acid. [B.] See under Ethyl *phosphate*.

ETHEROSULPHURIC ACID, n. E"the^{2}r-o-su^{3}lf-u^2'ri^{2}k. Fr., *acide éthéro-sulphurique*. Ethylsulphuric acid. [B.] See under Ethyl *sulphate*.

ETHEROXALIC ACID, n. E"the^{2}r-o^{2}x-a^{2}l'i^{2}k. Fr., *acide éthéroxalique*. Ethyloxalic acid. [B.] See Ethyl *oxalate*.

ETHERYL, n. E^{2}th'e^{2}r-i^{2}l. Fr., *éthéryle*. Ger., *Aetheryl*. Ethylene. [B, 52.]

ETHIDE, n. E^{2}th'i^{2}d(id). Fr., *éthylure*. A direct addition compound of ethyl with an element or radicle. [B, 3.]

ETHIDENE, n. E^{2}th'i^2-den. Ger., *Aethiden*. See Ethylidene.—**E'lactic acid.** Fr., *acide éthidène-lactique*. Ethylidene-lactic acid. [B.]—**E'sulphurous acid.** See Isethionic acid.

ETHIMOPEMPHIGUS (Lat.), n. m. E^{2}th i^2-mo(mo^3)-pe^{2}m-fi(fe)'gu^{3}s(gu^{4}s). From ἔθιμος, accustomed, and πέμφιξ, a pustule. Habitual pemphigus. [A, 322 (*a*, 21).]

ETHINE, n. E^{2}th'en. See Acetylene.

ETHINYL, n. E^{2}th'i^{2}n-i^{2}l. Ger., *Aethinyl*. A quinquivalent radicle, $C_2H : CH,C \equiv$. [B, 4.]—**E. bromide.** Ger., *Aethinylbromür*. Bromacetylene, a spontaneously inflammable liquid, $C_2HBr : CH \equiv CBr$. [B, 4.]—**E. pentabromide.** Ger., *Aethinylpentabromür*. Tribromethylene dibromide, a body, $C_2HBr_5 = CHBr_2 - CBr_3$, occurring in prismatic crystals. [B, 4.]—**E. pentachloride.** Ger., *Aethinylpentachlorür*. Trichlorethylene dichloride, a colorless, oily liquid, $C_2H.Cl_5 = CHCl_2 : CCl_3$. [B, 4.]—**E. tribromide.** Ger., *Aethinyltribromür*. Tribromethylene, a liquid, $C_2HBr : CHBr : CBr_2$. [B, 4.]—**E. trichloride.** Ger., *Aethinyltrichlorür*. Trichlorethylene, an oily liquid, $C_2HCl_3 : HCl : CCl_2$. [B, 4.]

ETHIONATE, n. E^{2}th'i^2-o^{2}n-at. Ger., *Aethionat*. A salt of ethionic acid. [B.]

ETHIONIC, adj. E^{2}th-i^2-o^{2}n'i^{2}k. From *ethylene* (*q. v.*), and θεῖον, sulphur. Fr., *éthionique*. Compounded of ethylene and a sulphur compound. [B.]—**E. acid.** Ger., *Aethionsäure*. A dibasic acid, $C_2H_4.S_2O_7H_2$. or $C_2H_4{<}{}^{O,SO_2,OH}_{SO_2,OH}$, known only in aqueous solution, obtained by the action of anhydrous sulphuric acid on alcohol. [B, 4.]—**E. anhydride.** Ger., *Aethionsäureanhydrid*. A body, C_2H_4,O_2,S_2O_4, or e. acid deprived of the elements of water; a colorless, crystalline substance. [B, 4.]

ETHIOPS (Lat.), n. m. E(a)'thi^2-o^{2}ps. See Æthiops.

ÉTHIOPS (Fr.), n. A-te-ops. See Æthiops.—**E. arsénical.** See Æthiops *auripigmentalis*.—**E. calcaire.** See Hydrargyrum *cum creta*.—**E. charbonneux.** See Æthiops *graphiticus*.—**E. de Malouin.** See Æthiops antimonialis.—**E. orpimental.** See Æthiops *auripigmentalis*.

ETHMETHACETIC ACID, n. E^{2}th-me^{2}th-a^{2}s-et'i^{2}k. Ger., *Methyläthylessigsäure*. An acid, $(C_2H_5)(CH_3) : CH,COOH$, or acetic acid in which 2 atoms of hydrogen are replaced by 1 molecule each of ethyl and methyl. [B.] See under Valeric *acid*.

ETHMETHOXALIC ACID, n. E^{2}th-me^{2}th-o^{2}x-a^{2}l'i^{2}k. Ger., *Aethomethoxalsäure*. An isomeric variety of hydroxyvaleric acid, ${}^{C_2H_5}_{C\,H_3}{>}C(OH).COOH = C_5H_{10}O_3$, or oxalic acid in which 2 atoms of oxygen are replaced by 1 molecule each of methyl and ethyl; a crystalline solid. [B, 4.]

ETHMOCARCINIE [Piorry] (Fr.), n. E^{2}t-mo-ka^{3}r-se-ne. From ἠθμός, a sieve, and καρκίνος, a cancer. Cancer of the connective tissue. [L, 82.]

ETHMOCARDITE [Piorry] (Fr.), n. E^{2}t-mo-ka^{3}r-det. From ἠθμός, a sieve, and καρδία, the heart (see also *-itis**). Inflammation of the connective tissue of the heart. [L, 82.]

ETHMOCEPHALIA (Lat.), n. f. E^{2}th(ath)-mo(mo^3)-se^{2}f-(ke^{2}f)-a^{2}l(a^{3}l)'i^2-a^3. From ἠθμός, a sieve, and κεφαλή, the head. Of G. St.-Hilaire, a form of acephalous monstrosity in which the eyes are distinct but very near together, and a rudimentary trumpet-shaped nose appears above the orbits. [A, 301, 326 (*a*, 21).]

ETHMOCEPHALUS (Lat.), n. m. E^{2}th(ath)-mo(mo^3)-se^{2}f-(ke^{2}f)'a^{2}l(a^{3}l)-u^{3}s(u^{4}s). From ἠθμοειδής, ethmoid, and κεφαλή, the head. Fr., *ethmocéphale*. A monster of the sort described under ethmocephalia. [L, 41.]

ETHMO-CRANIAL, adj. E^{2}th"mo-kran'i^2-a^{2}l. From ἠθμός, a sieve, and κρανίον, the skull. Pertaining to the ethmoid bone and the other portions of the cranium. [L, 148.] See *Olfactory* angle.

ETHMODERMITE [Piorry] (Fr.), n. E^{2}t-mo-de^{2}rm-et. From ἠθμός, a sieve, and δέρμα, the skin (see also *-itis**). Inflammation of the connective tissue of the skin. [L, 82.]

ETHMOID, adj. E^{2}th'moid. Gr., ἠθμώδης (from ἠθμός, a sieve, and εἶδος, resemblance). Lat., *ethmodes*. Fr., *ethmoïde*. Ger., *siebförmig*. Sieve-like (see *E.* bone). [A, 322 (*a*, 21).]

ETHMOIDAL, adj. E^{2}th-moid'a^{2}l. Lat., *ethmoidalis*. Fr., *ethmoïdal*, *ethmoïdien*. Pertaining to the ethmoid bone; as a n., the ethmoid bone (in comparative anatomy). [C.]

ETHMOIDES (Lat.), **ETHMOIDEUS** (Lat.), adj's. E^{2}th-(ath)-mo(mo^2)-i(e)'dez(das), -i^{2}d(ed)'e^2-u^{3}s(u^{4}s). See Ethmoid.

ETHMOIDITIS (Lat.), n. f. E^{2}th(ath)-mo^2-i^{2}d(ed)-i(e)'ti^{2}s. Gen., *ethmoidit'idos* (*-is*). From ἠθμός, a sieve, and εἶδος, resemblance (see also *-itis**). Inflammation of the ethmoid bone or of the soft parts immediately beneath it. [Knight, "N. Y. Med. Jour.," May 4, 1889, p. 498.]—**Anterior e.** Inflammation of the anterior portion of the ethmoid. [*a*, 29.]—**Necrosing e.** Of E. Woakes, a disease characterized by "inflammation of the nasal tributaries of the ethmoid bone, including its muco-periosteal lining," with enlargement of the lower turbinated process and the presence of scales or spiculæ of necrosed bone concealed in the depths of the tumor. ["Lancet," July 18, 1885, p. 108.]

ETHMOIDO-FRONTAL, adj. E^{2}th-moid"o-fru^{3}nt'a^{2}l. Pertaining to the ethmoid and the frontal bones (see *E.-f.* suture).

ETHMOIES [Piorry] (Fr.), n. pl. E^{2}th-mwa^3. Diseases of the connective tissue. [L, 82.]

ETHMOITE [Piorry] (Fr.), n. E^{2}t-mo-et. Inflammation of the connective tissue. [L, 82.]

ETHMO-LACRYMAL, adj. E^{2}th-mo-la^{2}k'ri^2-ma^{2}l. Pertaining to the junction of the ethmoid and lacrymal bones. [*a*, 29.]

ETHMOLIPOSIES [Piorry] (Fr.), n. pl. E^{2}t-mo-le-po-ze. Fatty tumors of the connective tissue. [L, 82.]

ETHMOPALATINE, adj. E^{2}th"mo-pa^{2}l'a-tin. From ἠθμός, a sieve, and *palatum*, the palate. Relating to or connected with the ethmoid and palatal bones, cartilages, or regions. ["Proc. of the Zool. Soc.," 1889 (L).]

ETHMOPHYMIES [Piorry] (Fr.), n. pl. E^{2}t-mo-fe-me. From ἠθμός, a sieve, and φῦμα, a growth. Tubercles of the connective tissue. [L, 82.]

ETHMORRHÉMIE [Piorry] (Fr.), n. E^{2}t-mo^{3}r-ra-me. From ἠθμός, a sieve, and ῥήγνυσθαι, to break forth. Hæmorrhage into the connective tissue. [L, 82.]

ETHMOS (Lat.), n. m. E^{2}th(ath)'mo^{2}s. Gr., ἠθμός. A sieve, a strainer. [A, 322 (*a*, 21).]

ETHMOSE [Piorry] (Fr.), n. E^{2}t-mos. Connective tissue. [L, 82.]

ETHMO-SPHENOIDAL, adj. E^{2}th-mo-sfe^{2}n-oid'a^{2}l. Pertaining to the junction of the ethmoid and sphenoid bones. [*a*, 29.]

ETHMO-TURBINALS, n. pl. E^{2}th"mo-tur'bi^{2}n-a^{2}lz. From ἠθμός, a sieve, and *turbo*, a top. See *Ethmo-turbinal* bones.

ETHMO-VOMERINE, adj. E^{2}th"mo-vo'mu^{5}r-i^{2}n. From ἠθμός, a sieve, and *vomer* (*q. v.*). Pertaining to or connected with the ethmoid bone and the vomer. [L, 294.]

ETHMYPHE (Lat.), n. f. E^{2}th'mi^2(mu^6)-fe(fa). Gen., *eth'myphes*. From ἠθμός, a sieve, and ὑφή, a web. Of Hippocrates, connective tissue. [A, 322 (*a*, 21).]

ETHMYPHITIS (Lat.), **ETHMYPHLOGOSIS** (Lat.), n's f. E^{2}th-mi^2(mu^6)-fi(fe)'ti^{2}s, -flog(flo^{2}g)-os'i^{2}s. Gen., *ethmyphit'idos* (*-is*), *-phlogos'eos* (*-is*). Inflammation of the connective tissue. [A, 322 (*a*, 21).] See Cellulitis.

ETHMYPHOTYLOSIS (Lat.), n. f. E^{2}th(ath)-mi^2(mu^6)-fo-(fo^3)-ti^{2}l(tu^{6}l)-o'si^{2}s. Gen., *ethmyphotylos'eos* (*-is*). From ἠθμός, a sieve, ὑφή, a web, and τύλωσις, a making callous. Ger., *Verhärtung des Zellgewebes*. Induration of the connective tissue; a term formerly used for sclerema neonatorum. [G.]

ETHMYPHYPERPHLOGOSIS (Lat.), n. f. E^{2}th(ath)-mi^{2}f-(mu^{6}f)-i(u^6)-pe^{2}r-flog(flo^{2}g)-o'si^{2}s. Gen., *ethmyphyperphlogos'eos* (*-is*). From ἠθμός, a sieve, ὑφή. a web, ὑπέρ, beyond measure, and φλόγωσις, inflammation. Excessive inflammation of the connective tissue. [A, 322 (*a*, 21).]

ETHNIC, adj. E^{2}th'ni^{2}k. From ἔθνος, a race. Fr., *ethnique*. Ger., *ethnisch*. Pertaining to race. [A, 385 (*a*, 21).]

ETHNOGRAPHY, ETHNOLOGY, n's. E^{2}th-no^{2}g'ra^{2}f-i^2, -no^{2}l'o-ji^2. From ἔθνος, a race, and γράφειν, to write, or λόγος, understanding. Fr., *ethnographie*, *ethnologie*. Ger., *Ethnographie*, *Ethnologie*. The science of the characteristics of different races of men.

ETHOCHLORIN, n. E^{2}th-o-klor'i^{2}n. A green coloring matter extracted from ox gall-stones by ether, giving a complicated spectrum of five absorption lines, of which three resemble those of muskoprasin. [B, 220 (*a*, 27).]

ETHOKIRRHIN, n. E^{2}th-o-ki^{2}r'ri^{2}n. See Æthokirrhin.

ÉTHOLOGIE (Fr.), n. A-to-lo-zhe'. From ἦθος, a habit, and λόγος, understanding. The science of the habits of man or of the lower animals. [A, 385 (*a*, 21).]

ETHOMETHOXALIC ACID, n. E^{2}th-o-me^{2}th-o^{2}x-a^{2}l'i^{2}k. Fr., *acide éthométhoxalique*. See Ethmethoxalic acid.

ETHOS (Lat.), n. n. Eth(ath)'o^{2}s. Gen., *eth'eos*, *eth'ous*. Gr., ἦθος. Habit. [A, 322, 325 (*a*, 21).]

ETHOXAL, n. E-tho^{2}x'a^{2}l. See Ethyloxal.

ETHOXIDE, n. E-tho[2]x'i[2]d(id). Ger., *Aethyloxyd.* A compound of ethyl, oxygen, and an element or radicle, $R'.O.C_2H_5$; an ethylate. [B.]

ETHOXYACETIC ACID, n. E[2]th-o[2]x-i[2]-a[2]s-et(e[2]t)'i[2]k. Ger., *Aethoxacetsäure.* Ethylglycollic acid, $CH_2-(O,C_2H_5)-CO.OH$, or acetic acid in which a molecule of ethyl and an atom of oxygen replace an atom of hydrogen. [B, 4.]

ETHOXYBUTYRIC ACID, n. E[2]th-o[2]x''i[2]-bu[2]-ti[2]r'i[2]k. Fr., *acide éthoxy-butyrique.* Ger., *Aethoxybuttersäure.* Hydroxyethylbutyric acid. [B.] See Hydroxycaproic acid.

ETHOXYCAFFEINE, n. E[2]th-o[2]x-i[2]-ka[2]f'e[2]-en. Fr., *éthoxy-caféine.* Ger., *Aethoxykaffeïn.* A crystalline body, $C_8H_9(O.C_2H_5)$-N_4O_2, obtained by boiling bromcaffeine with 2 parts of potassium hydrate and 10 parts of alcohol. It is said to be narcotic, and has been used in migraine. [A, 518 (*a*, 27) ; Dujardin-Beaumetz, "Prog. méd.," April 24, 1886, p. 363.]—**E. bromide.** A crystalline substance, $C_{11}H_{14}NOBr$ = probably $C_9H_6(O.C_2H_5)N.H_3Br$. [B, 79.]

ETHOXYL, n. E[2]th-o[2]x'i[2]l. Ger., *Aethoxyl.* A univalent radicle, $(C_2H_5).O'$. [B, 4.]

ETHOXYLACTIC ACID, n. E[2]th-o[2]x''i[2]-la[2]k'ti[2]k. Fr., *acide éthoxy-lactique.* Ger., *Aethoxymilchsäure.* See Ethyllactic acid.

ETHOXYLCINCHONINIC ACID, n. E[2]th-o[2]x''i[2]l-si[2]n-ko[2]n-i[2]n'i[2]k. Fr., *acide éthoxyl-cinchoninique.* Ger., *Aethoxylcinchoninsäure.* See under Ethoxylquinolinecarbonic acid.

ETHOXYLPIPERIDINE, n. E[2]th-o[2]x''i[2]l-pi[2]p-e[2]r'i[2]d-en. Fr., *éthoxyl-pipéridine.* Ger., *Aethoxylpiperidin.* Syn.: *piperethylalkine.* An artificial alkaloid ; a colorless oily liquid, C_7H_{15}-$NO = C_5H_5N.H_5(CH_2.CH_2OH)$. [B, 79.]

ETHOXYLQUINOLINECARBONIC ACID, n. E[2]th-o[2]x''-i[2]l-kwi[2]n-o-len-ka[3]r-bo[2]n'i[2]k. Fr., *acide éthoxyl-quinoléine-carbonique.* Ger., *Aethoxylchinolincarbonsäure.* A monobasic acid, $C_9H_5(O.C_2H_5)(CO.OH)N$. Two isomeric bodies of this formula are known : 1, a white crystalline solid, $C_6[H,H,H,H,CH-C(CO.OH)-C(O.C_2H_5)-N,-,]$; and 2, *ethoxylcinchoninic acid*, a crystalline solid, $C_6[H,H,H,H,C(CO.OH)-CH-C(O.C_2H_5)-N,-,]$. [B, 79.]

ETHOXYPROPIONIC ACID, n. E[2]th-o[2]x-i[2]-pro-pi[2]-o[2]n'i[2]k. Ger., *Aethoxypropionsäure.* See Ethyllactic acid.

ETHOXYQUINOLINE, n. E[2]th-o[2]x-i[2]-kwi[2]n'o-len. Fr., *éthoxy-quinoléine.* Ger., *Aethoxychinolin.* A substitution compound, $C_9H_6(O.C_2H_5)N$, of quinoline. Two isomeric bodies of this formula are known: 1. *a-e.*, $C_6[H,H.H,O.C_2H_5.CH-CH-CH-N,-.]$, forming laminar crystals, and 2, *Ethylcarbostyril*, $C_6[H,HH,H,CH-CH-C(O.C_2H_5)-N,-,]$, a colorless oily liquid. [B, 79.]

ETHULE, n. E'thu[2]l. From αἰθήρ, ether, and ὕλη, matter. Of Berzelius, ethyl. [L, 56 (*a*, 27).]

ETHUSE, n. E-thu[2]s'. Fr., *éthuse.* See Æthusa and Æthusa *cynapium.*

ETHYDENE, n. E[2]th'i[2]-den. Fr., *éthydène.* See Ethylidene.

ETHYL, n. E[2]th'i[2]l. Lat., *æthyl*, *æthylium* (from αἰθήρ, ether, and ὕλη, material). Fr., *éthyle.* Ger., *Aethyl.* It., *etile.* Sp., *etilo.* The hypothetical radicle, C_2H_5, of ordinary alcohol. See E'amyl *ether.*—**E'acetamide.** A syrup, $N(C_2H_5)(C_2H_3O)H$, boiling at 200° C., obtained by decomposing ethyl acetate with ethylamine. [B, 4 (*a*, 27).]—**E. acetate.** Lat., *æther aceticus* [U. S. Ph., Br. Ph., Fr. Cod., Ger. Ph.], *acetas æthylicus* [Netherl. Ph.]. Fr., *éther acétique* [Fr. Cod.], *acétate d'éthyle.* Ger., *Aethylacetat*, *Essigäther*, *Essigsäureäthylester* (oder *Ester*). It., *acetato di etile*, *etere acetico.* Sp., *eter acético* [Sp. Ph.], *acetato de etilo.* A colorless, limpid, volatile liquid. $C_2H_5,C_2H_3O_2 = C_4H_8O_2$, with an agreeable, refreshing, ethereal, and somewhat acetous odor and taste, boiling at about 73° C. [B, 4 ; B, 81 (*a*, 27).]—**E'acetoacetate.** Ger., *Acetäthylessigsäure.* A salt of acetoacetic acid in which a molecule of e. replaces an atom of hydrogen. [B.]—**E. acetocitrate.** Ger., *Acetatcitronensäure-Aethylester.* An oily liquid, $C_{14}H_{22}O_8 = C_2H_4.C(C_2H_3O_2).(COO.C_2H_5)_3$. [B, 3.]—**E. acetoglycollate.** Ger., *Acetoglycolsäureäthylester.* An oily liquid, of agreeable odor, $C_6H_{10}O_4 = CH_2.O.(C_2H_3O)CO.O.(C_2H_5)$, isomeric with ethylglycollic acid. [B, 4.]—**E. acetolactate.** Fr., *acetolactate d'ethyle.* Ger., *Acetatmilchsäure-Aethylester.* A substitution product of lactic acid ; a neutral, colorless, mobile, and aromatic liquid, $CH_3,CH(C_2H_3O_2)CO_2C_2H_5 = C_7H_{12}O_4$, insoluble in water, and decomposed by it into acetolactic acid and alcohol. [B, 4 : B. 244 (*a*, 27).]—**E'acetylene.** See Butine.—**E. acid phosphate.** See under *E. phosphate.*—**E. acid sulphate.** See under *E. sulphate.*—**E. aconitate.** Ger., *Aconitsäure-Aethylester.* An oily liquid of aromatic odor, $C_6H_3O_6,(C_2H_5)_3 = C_{12}H_{18}O_6$. [B, 3.]—**E. acrylate.** Ger., *Acrylsäure-Aethylester.* A liquid of pungent odor, $CH_2 = CH.COO(C_2H_5) = C_5H_8O_2$. [B, 4.]—**E. alcohol.** See the major list.—**E. allophanate.** Fr., *allophanate d'éthyle.* Ger., *Aethylallophanat*, *Allophansäure-Aethylester.* A substance, $C_4H_8N_2O_3 = NH_2-CO-NH-CO,O(C_2H_5)$, forming prismatic, acicular, lustrous crystals, devoid of odor and taste, soluble in acids, and melting at 190° C. [B.]—**E. allylacetoacetate.** Fr., *allyl-acétoacétate d'éthyle.* Ger., *Allylacetessigester*, *Allylacetessigsäure-Aethylester.* A substitution product, $C_9H_{14}O_3 = CH_3,CO,CH,(C_3H_5)CO_2.C_2H_5$, of acetoacetic acid, a liquid obtained by the action of allyl iodide upon ethysodacetacetate, boiling at 206°, and yielding a beautiful crimson-red color with ferric chloride. [B, 3 (*a*, 27).]—**E. amidoacetate.** Fr., *éthylglycocolle.* A substitution compound, $CH_2(NH_2)CO_2,C_2H_5$, prepared by treating the corresponding chloride with water and silver oxide. It forms small crystals, and in aqueous solutions readily decomposes into glycocoll and alcohol. [B, 3 (*a*, 27).]—**E. amidocyanurate.** Ger., *Amidocyanursäure-Aethylester*, *Ammelid-Aethylester.* A substitution compound of the e. cyanurate, in which the molecule NH_2 replaces the molecule OC_2H_5. Two are known : *diethyl amidocyanurate*, $C_3N_3(OC_2H_5)_2NH_2$, occurring in white prismatic crystals melting at 97° C. ; and *e. diamidocyanurate* (or ammelide), $C_3N_3(OC_2H_5)(NH_2)_2$, a crystalline body melting above 190° C. [B.]—**E. amines.** See Ethylamine, Diethylamine, and Triethylamine.—**E. ammelide.** Ger., *Aethylammelid.* See under *E. amidocyanurate.*—**E'amyl.** See the major list.—**E. and calcium sulphate.** A body, $(C_2H_5)_2,Ca,(SO_4)_2 + H_2O$. [B.]—**E. and hydrogen carbonate.** Fr., *acide carbonique* (ou *éthyl-carbonique*). A body, C_2H_5,H,CO_3, known only by its potassium salt. [B, 244 (*a*, 27).]—**E. and methyl silicate.** A salt resulting from the action of silicic acid on e. and methyl. Various silicates containing different proportions of e. and methyl are known, all of which are liquids, boiling at between 133° and 157° C. [B, 3.]—**E. and potassium oxalate.** Ger., *Kaliumäthyloxalat.* A salt, $K(C_2H_5),C_2O_4 = C_4H_5KO_4$. [B, 4.]—**E. and potassium sulphate.** A salt, $C_2H_5KSO_4$, occurring in colorless, tabular crystals. [B.]—**E. and sodium lactate.** See *E. sodiolactate.*—**E. angelate.** Ger., *Angelicasäure-Aethylester.* A salt of e. and angelic acid. [B.] See Angelic *ether.*—**E'aniline.** See the major list.—**E. anisate.** A salt of e. and anisic acid. [B.]—**E. antimonide.** A compound of e. and antimony. [B.] See also Antimony *radicle.*—**E. arachidate.** Ger., *Arachinsäure-Aethylester.* A waxy substance, $C_2H_5,O,C_{20}H_{39}O = C_{22}H_{44}O_2$, isomeric with behenic acid, and melting at 50° C. [B, 2, 4.]—**E'arsen.** See Arsenethyl. [B.]—**E. arsenate.** Ger., *Aethylarseniat.* A salt of e. and arsenic acid. Triethylic arsenate, $(C_2H_5)_3.AsO_4$, is a colorless liquid boiling at about 235° C. [B.]—**E. arsenite.** Ger., *Aethylarsenit.* A salt of e. and arsenious acid. Triethylic arsenite, $(C_2H_5)_3,AsO_3$, is a colorless liquid. [B.]—**E. azotate.** See *E. nitrate.*—**E. azotite.** See *E. nitrite.*—**E. benzoate.** Fr., *benzoate d'éthyle.* Ger., *Benzoësäure-Aethylester.* A colorless, aromatic liquid, $C_6H_5-CO.OC_2H_5$, heavier than water, boiling at 211° C.; obtained by heating together for 9 hours, at 360° to 400° C., ordinary ether and benzoic acid. [B, 4, 244 (*a*, 27).]—**E. benzylate.** A substitution product, $C_7H_7.O.C_2H_5$, of benzyl alcohol, boiling at 185° C. [B, 158 (*a*, 27).]—**E. bichloride.** See *Monochlorinated hydrochloric* ether.—**E. borate.** Ger., *Aethylborat.* A salt of boric acid and e. Three such compounds are known : *e. orthoborate* (triethylic borate), $(C_2H_5)_3.BO_3$, a colorless, aromatic, inflammable fluid of bitter taste ; *e. metaborate*, $(C_2H_5)_2,B_2O_4$, a thick, colorless liquid ; and *e. triborate*, C_2H_5,B_3O_5, a gummy substance. [B, 4.]—**E. bromanisate.** Ger., *Bromanissäure-Aethylester.* A crystalline salt of e. and bromanisic acid, C_8H_6-$(C_2H_5)BrO_3$. [B, 2.]—**E. bromide.** Fr., *bromure d'éthyle*, *éthyl-bromide*, *éther hydrobromique.* Ger., *Aethylbramür.* An inflammable, volatile liquid, C_2H_5Br, having an odor and taste like those of chloroform, and boiling at 38° C. It is anæsthetic. [B.]—**E. butyrate.** Ger., *Buttersäureäthylester*, *Aethylbutyrat.* A body, $C_2H_5,O,C_4H_7O = C_6H_{12}O_2$, isomeric with caproic acid ; an oily liquid having the odor of anise and boiling at 121° C. The isomeric e. isobutyrate boils at 113° C. [B, 4.] See *Oil of* ananas.—**E'cacodyl.** Ger., *Aethylkakodyt.* See Diethylarsine.—**E. caproate.** Ger., *Aethylcapronat.* A liquid, $C_2H_5,O,C_6H_{11}O = C_8$-$H_{16}O_2$. [B, 4.]—**E. caprylate.** Ger., *Caprylsäure.Aethylester.* A liquid, $C_2H_5.O,C_8H_{15}O = C_{10}H_{20}O_2$. [B, 4.]—**E. carbamate.** Ger., *Carbaminsäure-Aethylester.* Urethane, $C_3NH_7O_2 = CO\begin{cases}NH_2\\OC_2H_5\end{cases}$, occurring in fine crystals which, on fusing, become an amorphous, waxy mass. It is readily soluble in water and alcohol, and has lately been much employed as a hypnotic. [B.]—**E. carbamide.** See Ethylurea.—**E. carbanilate.** Phenylurethane, a crystalline substance, $C_9H_{11}NO_2 = C_6H_5.HN-CO,OC_2H_5$. [B, 2.]—**E. carbimide.** Ger., *Aethylcarbimid.* E. isocyanate (see under *E. cyanate*). [B.]—**E. carbonate.** Fr., *carbonate d'éthyle*, *éther carbonique.* Ger., *Aethylcarbonat.* A salt of carbonic acid and e. The e. carbonates include the *acid carbonate* (hydrogen e'carbonate, e'carbonic acid), $C_2H_5.H.CO_3$, a body known only in its metallic compounds ; the e'carbonates, $R',C_2H_5.CO_3$; the *normal carbonate* (die carbonate, carbethylic acid), $(C_2H_5)_2,CO_3$, a colorless, inflammable, aromatic liquid boiling at 126° C., insoluble in water, and forming with chlorine substitution compounds analogous to the chlorethers (chlore' carbonates) ; and the *ortho carbonate*, $(C_2H_5)_4,CO_4$, an aromatic liquid boiling at 160° C. [B.]—**E. cerotate.** Ger., *Cerotinsäure-Aethylester.* A waxy body, melting at about 60° C., $C_2H_5,O.C_{27}H_{53}O = C_{29}H_{58}O_2$. [B, 4.]—**E. chloracrylate.** A mobile liquid, C_3H_3ClO,C_2H_5, compounded of e. and chloracrylic acid. [B, 2.]—**E. chloride.** Fr., *chlorure d'éthyle.* Ger., *Aethylchlorür.* Monochlorethane, a very volatile, inflammable, colorless liquid, $C_2H_5,Cl = CH_3,CH_2Cl$, of aromatic, alliaceous odor and sweetish taste, prepared from alcohol by the action of hydrochloric-acid gas, soluble in 10 parts of water, and boiling at 12° C. It was known to the alchemists, who called its alcoholic solution *spiritus salis et vini.* [B, 2, 4.]—**E. chlorocarbonate.** A body, $C_2H_5.CO_2Cl$, a colorless, mobile fluid, giving off irritant suffocating vapors. [B.]—**E. cholate.** Fr., *cholate d'éthyle.* A crystallizable salt, $C_{24}H_{39}(C_2H_5)O_5$, of cholalic acid, from which it is prepared by the action of hydrochloric acid. It is insoluble in water, but soluble in alcohol and in ether. [B, 244 (*a*, 27).]—**E. cinnamate.** Fr., *cinnamate d'éthyle.* Ger., *Zimmtsäure-Aethylester.* An oil, C_9H_7O,O,C_2H_5, boiling at 267° C. [B, 4 (*a*, 27).]—**E. citrate.** Fr., *citrate d'éthyle.* Ger., *Citronsäure-Aethylester.* A compound of e. and citric acid. *Normal e. citrate*, trie' citrate (Ger., *neutraler Citronensäure-Aethylester*), is a thick liquid, $C_6H_5O_7.(C_2H_5)_3$, odorless, but of very bitter taste. The *acid e. citrates*, $C_6H_6O_7.(C_2H_5)_2$ (die' citric acid), and $C_6H_7O_7.C_2H_5$ (e' citric acid), have not been isolated in the pure state. *Tetrae' citrate*, $C_2H_4,C(OC_2H_5),(COO.C_2H_5)_3$, is a basic salt occurring as an oily, aromatic liquid of a bitterish taste. [B, 3.]—**E. cyanamide.** Ger., *Aethylcyanamid.* A syrupy liquid, $N(C_2H_5).CNH$. By repeated solution and evaporation it is converted into the polymeride, $N_3(C_2H_5)_3.C_3N_3H_3$, e. (or trie') tricyanamide, e. cyanuramide, e. melamine, a crystalline body of

strongly alkaline reaction and basic properties. The other e. cyanamides are e. dicyanamide (e. dicyan-diamide), a solid body, N_2, $C_2H_5.C_2N_2H_3$, and die' cyanamide, $N.(C_2H_5),CNH$, a liquid boiling between 180° and 190° C. [B.]—**E. cyanate.** Fr., *cyanate d'éthyle.* Ger., *Aethylcyanat.* A body, C_2H_5,CNO. *Truè e. cyanate*, or cyanetholin (Ger., *ächtes Aethylcyanat*, *Cyanätholin*), $N\equiv C-O$, C_2H_5, is an unstable, colorless, oily liquid, of aromatic and ethereal odor and bitter, pungent taste, insoluble in water, and obtained by the action of cyanogen chloride upon a solution of a metallic ethylate in a mixture of ether and alcohol, at a low temperature. It is the normal cyanic ether of Cloez. *E. isocyanate*, *e. pseudocyanate*, *e. carbimide*, *e'carboxylamine* (Ger., *Aethylpseudocyanat*), $O=C=N-C_2H_5$, is a mobile liquid boiling at 60° C., and emitting highly irritating and stifling vapors. It has a polymeric form, e. tri-isocyanate or isocyanurate. [B, 3, 4.]—**E. cyanide.** Ger., *Aethylcyanür.* Hydrocyanic ether, propionitrile; a colorless liquid, $C_2H_5,CN=(C_3H_5)'''N$, of aromatic ethereal odor like that of hydrocyanic acid, almost insoluble in water, and boiling at 97° C. It is much less poisonous than hydrocyanic acid. [B, 81 (α, 27).]—**E. cyanurämide.** See *E. cyanamide.*—**E. cyanuret.** See *E. cyanide.*—**E. diamidocyanurate.** Ger., *Aethyldiamidocyanurat.* See *E. amidocyanurate.*—**E. dibromacetate.** Ger., *Dibromessigsäure-Aethylester.* A liquid, $CHBr_2.CO.O.C_2H_5=C_4H_6Br_2O_2$. [B, 4.]—**E. dichloracetate.** Ger., *Dichloressigsäure-Aethylester.* A colorless oil, $CHCl_2.CO.O.C_2H_5$, obtained by saturating alcoholic dichloracetic acid with hydrochloric acid. [B, 4 (α, 27).]—**E. dicyanamide.** Ger., *Aethyldicyanamid*, *Monäthyldicyanamid.* See under *E. cyanamide.*—**E. dihydric phosphate.** Mone' phosphate, e'phosphoric acid, $H_2(C_2H_5)H_2PO_4$. [B.]—**E. diiodacetate.** Ger., *Dijodessigsäure-Aethylester.* An oily liquid, $CHI_2.CO.OC_2H_5=C_4H_6I_2O_2$. [B, 4.]—**E. dioxythiocarbonate.** Ger., *Aethyldioxythiocarbonat.* A body, $CS(OC_2H_5)_2$, or xanthic acid in which a molecule of hydrogen sulphide has been replaced by a molecule of ethoxyl: an aromatic, strongly refracting liquid converted by ammonia into alcohol and ammonium thiocyanate. [B, 3 (α, 27).]—**E. diselenide.** Ger., *Aethyldiselenid*, *Aethylsuperselenid.* See under *E. selenide.*—**E. disilicate.** See under *E. silicate.*—**E. disulphide.** Ger., *Aethyldisulfid*, *Aethylsupersulfid.* See under *E. sulphide.*—**E. ether.** See the major list.—**E. fluoride.** Ger., *Aethylfluorür.* A colorless, inflammable liquid, C_2H_5, having a peculiar taste and an odor like that of horseradish. It corrodes glass. [B.]—**E. ferrocyanide.** Fr., *ferrocyanur d'éthyle.* Ger., *Aethyleisencyanür.* A compound, $(C_2H_5)_8(C_3N_3)_4Fe_2+KH_2O$, forming pearly crystals. [B, 3.]—**E. formate.** Fr., *formiate d'éthyle.* Ger., *Aethylformiat*, *Ameisensäure-Aethylester.* A liquid, $C_2H_5,OCHO=C_3H_6O_2$, isomeric with propionic acid, boiling at 55° C. [B, 4.]—**E. fumarate.** Ger., *Fumarsäureäthylester.* An oily liquid, $C_8H_{12}O_4=C_2H_2\left\langle\begin{matrix}CO.O(C_2H_5)\\CO.O(C_2H_5)\end{matrix}\right.$. [B, 4.]—**E. green.** See under GREEN.—**E. glycollate.** Ger., *Glycolsäure-Aethylester.* A liquid, $C_4H_8O_3=CH_2(OH)=CO.O(C_2H_5)$, boiling at 150° C. [B, 4.]—**E. hydrate.** E. alcohol. [B, 52 (α, 27).]—**E. hydric sulphate.** See under *E. sulphate.*—**E. hydride.** See ETHANE.—**E. hydrin.** See ETHYLIN.—**E. hydrobromide.** See *E. bromide.*—**E. hydrochloride.** See under *E. chloride.*—**E. hydroselenide.** See *E. selenomercaptan.*—**E. hydrosulphide.** Ger., *Aethylschwefelwasserstoff.* See *E. mercaptan.*—**E. iodide.** Fr., *iodure d'éthyle.* Ger., *Aethyliodür.* A colorless liquid, C_2H_5I, of high refractive power and a peculiar sweetish and ethereal odor and taste, boiling at 72° C., not readily inflammable; prepared by the simultaneous action of iodine and phosphorus on alcohol. [B, 3 (α, 27).]—**E. isocyanate.** Fr., *isocyanate d'éthyle.* Ger., *Aethylisocyanat.* See under *E. cyanate.*—**E. isocyanide.** Ger., *Aethylisocyanür.* A colorless, oily, slightly alkaline liquid, $C_3H_5N=C\equiv N-C_2H_5$, having a disagreeable penetrating odor, and producing headache and vertigo on inhalation of its vapor. [B.]—**E. isocyanurate.** Ger., *Triäthylpseudocyanurat.* A polymeride of e. isocyanate, $O_3-C_3.(N.C_2H_5)_3$, forming rhombic prismatic crystals which melt at 85° C. into a thick oily liquid. [B.]—**E. isophthalate.** Fr., *isophthale d'éthyle.* Ger., *Isophtalsäure-Aethylester.* An oily, 2-molecule substitution compound of isophthalic acid, $C_6H_4(CO.O.C_2H_5)_2$, solidifying at 0° C., and melting at 285° C. [B, 4 (α, 27).]—**E. isosulphocyanate.** Ger., *Aethylsenföl*, *Aethyl Isoschwefelcyanat.* See *E. thioacetate.*—**E. isothiocyanate.** Ger., *Aethyl-Isothiocyanat.* See *E. thiocyanate.*—**E. isovalerate.** Ger., *Aethyl Isovalerat.* See *E. valerianate.*—**E. lactate.** Ger., *Milchsäure-Aethylester*, *Aethyl Lactat.* A colorless liquid, $C_2H_5(C_3H_5O_3)$. [B, 4.]—**E. laurate.** Ger., *Laurinsäure-Aethylester.* A body, $C_2H_5.O.C_{12}H_{23}O=C_{14}O_{26}O_2$, isomeric with myristic acid; crystalline at low temperatures. [B, 4.]—**E. meconate.** Ger., *Mekonsäure-Aethylester.* A compound of which three varieties are known: (1) acid e. meconate, $C_5HO_2(OH)\left\langle\begin{matrix}CO.OC_2H_5\\CO.OH\end{matrix}\right.=C_9H_8O_7$, a colorless, crystalline body isomeric with e'meconic acid; (2) normal e. meconate (Ger., *Diäthylmekonsäureester*), $C_5HO_2(OH)\left\langle\begin{matrix}COO,C_2H_5\\COO,C_2H_5\end{matrix}\right.=C_{11}H_{12}O_7$; and (3) basic e. meconate, trie' meconate, a yellow crystalline body, $C_5HO_2(OC_2H_5)\left\langle\begin{matrix}CO.OC_2H_5\\CO.OC_2H_5\end{matrix}\right.=C_{13}H_{16}O_7$. [B, 3.]—**E. melamine.** See *E. cyanamide.*—**E. mercaptan.** A colorless liquid, $C_2H_5,S.H$, having the odor of garlic and a disagreeable taste, and boiling at 36° C. [B.]—**E. mercaptide.** A compound of e. mercaptan and a metal. [B.]—**E. mustard-oil.** Ger., *Aethylsenföl.* See *E. thiocyanate.*—**E. myristate.** Ger., *Myristinsäureäthylester.* A colorless, crystalline body, $C_2H_5.O.C_{14}H_{25}O=C_{16}H_{32}O_2$, isomeric with palmitic acid. [B, 4.]—**E. neurostearate.** Of Thudichum, a product, $C_2H_5,C_{18}H_{35}O_2$, having the consistence and color of purified beeswax. It is best obtained by treating phrenosin with alcohol and sulphuric acid. [B, 220 (α, 27).]—**E. nitrate.** Ger., *Aethylnitrat*, *Salpetersäure-Aethylester.* A colorless, inflammable, and aromatic liquid, $C_2H_5ONO_2$, boiling at 85° C. Its vapor is explosive at high temperatures. [B.]—**E. nitrite.** Lat., *æther nitrosus.* Fr., *azotite d'éthyle*, *éther azoteux.* Ger., *Aethylnitrit.* Nitrous ether; a pale-yellow, inflammable, mobile liquid, $C_2H_5.O.NO$, of aromatic, penetrating, and ethereal odor, resembling that of apples, and a peculiar, pungent taste, of sp. gr. 0·900, boiling at 18° C. It is present in spirit of nitrous ether (sweet spirit of nitre), and is said to constitute the active ingredient of that preparation. It has been found useful in angina pectoris and cardiac dyspnœa. [D. J. Leech, "Med. Chron.," Dec., 1888, p. 177; B.]—**E. nonoate.** Ger., *Aethylnonoat.* A substitution product, $C_9H_{17}O_2(C_2H_5)$, of nonoic acid, boiling at 227° to 228° C., obtained by oxidation of the acid contained in oil of rue, and employed in making brandy and wines. It gives the quince its odor. [B, 3 (α, 27).]—**E. œnanthate.** Ger., *Oenanthylsäure-Aethylester.* Œnanthic ether; an oily liquid, $C_2H_5,O,C_7H_{13}O=C_9H_{18}O_2$, occurring in old wines and probably one of the sources of their aroma. [B, 4.]—**E. orthoacetate.** Ger., *Acetyltriäthylester.* Acetyltrie' ether, $(C_2H_5)_3.C_2H_3O_3=C_2H_3.(OC_2H_5)_3$, a liquid boiling at 142° C. [B.]—**E. orthoformate.** Ger., *Orthoameisensäure-Aethylester.* Formyltrie' ether, $CH.(OC_2H_5)_3=C_7H_{16}O_3$, a liquid boiling at 146° C. [B, 4.] See *E. formate.*—**E. orthophosphate.** See under *E. phosphate.*—**E. orthosilicate.** See under *E. silicate.*—**E. oxalate.** A salt of e. and oxalic acid. Acid e. oxalate, is a colorless liquid, $C_2O_4(C_2H_5)_2$, of slightly aromatic odor, boiling at 186° C., and obtained by heating together anhydrous oxalic acid and absolute alcohol. [B, 3 (α, 27).]—**E. oxalurate.** Ger., *Oxalursäure-Aethylester*, *Aethyl Oxalurat.* A body, $C_5O_4N_2H_8=NH_2-CO-NH.CO.COO(C_2H_5)$, forming acicular crystals. [B, 4.]—**E. oxamate.** Ger., *Oxaminsäure-Aethylester.* A crystalline substance, $CONH_2-COO.(C_2H_5)=C_4H_7NO_3$. [B, 4.]—**E. oxanilate.** A crystalline compound, $NH(C_6H_5)C_2O_2.OC_2H_5$, of e. and oxanilic acid. [B, 3.]—**E. oxide.** See E. ETHER.—**E. palmitate.** Ger., *Palmitinsäure-Aethylester*, *Aethyl Palmitat.* A waxy solid, $C_2H_5.O.C_{16}H_{13}.O=C_{18}H_{36}O_2$, isomeric with stearic acid and melting at 24° C. [B, 4.]—**E. pelargonate.** See *E. nonoate.*—**E. pentasulphide.** Ger., *Aethyl Pentasulfid.* See under *E. sulphide.*—**E. perchlorate.** Fr., *perchlorate d'éthyle.* Ger., *Aethylperchlorat*, *Perchlorsäure-Aethylester.* Perchloric ether, $C_2H_5ClO_4$; a colorless, aromatic, explosive liquid of sweetish taste, obtained by heating a mixture of e. sulphate and potassium perchlorate. [B.]—**E. persulphide.** Ger., *Aethylpersulfid.* See under *E. sulphide.*—**E. phosphate.** Fr., *phosphate d'éthyle.* Ger., *Phosphorsäure-Aethylester*, *Aethylphosphat.* A compound of e. and phosphoric acid. The e. phosphates include the three salts of orthophosphoric acid, and one of pyrophosphoric acid. The former are: *monethylic phosphate*, *e'phosphoric acid* (Ger., *Monäthylphosphat*), $C_2H_5.H_2.PO._4$, a dibasic, oily, strongly acid fluid forming metallic salts (e'phosphates); *diethylic phosphate*, *die'phosphoric acid* (Ger., *Diäthylphosphat*), $(C_2H_5)_2.H,PO_4$, a monobasic, strongly acid, syrupy liquid forming a series of crystalline salts (die'phosphates); and *normal e. phosphate*, triethylic phosphate (Ger., *Triäthylphosphat*), $(C_2H_5)_3.PO_4$, a colorless, aromatic liquid having a burning taste, and boiling at 200° C. E. pyrophosphate, tetrethylic phosphate (Ger., *Teträthylphosphat*), $(C_2H_5)_4P_2O_7$, is an oily liquid of peculiar odor. [B.]—**E. phosphite.** Ger., *Aethyl Phosphit.* A salt of e. and phosphorous acid. The e. phosphites are: *acid e. phosphite*, *e'phosphorous acid*, $C_2H_5.H_2PO_3$, a monobasic, acid, syrupy liquid, forming metallic salts (e'phosphites); *normal e. phosphite*, $(C_2H_5)_3.PO_3$, a colorless liquid, of unpleasant odor, boiling at 191° C.; and *acid e. pyrophosphite*, e'pyrophosphorous acid, $(C_2H_5)_2.H_2P_2O_5$, known through its salts (the *e'pyrophosphites*). [B.]—**E. platinocyanide.** Ger., *Aethyl Platincyanür.* An ethylic ether of hydroplatinocyanic acid, $(C_2H_5)_2.Pt(C_4N_4)+2H_2O$. It occurs in pinkish acicular crystals, readily decomposing into hydroplatinocyanic acid and e. alcohol. [B.]—**E. propionate.** Ger., *Aethyl Propionat*, *Propionsäureäthylester.* A liquid, $C_2H_5.O.C_3H_5O=C_5H_{10}O_2$, isomeric with valerianic acid, boiling at about 100° C. [B, 4.]—**E. pseudocyanate.** Ger., *Aethyl Pseudocyanat.* See under *E. cyanate.*—**E. pseudocyanurate.** Ger., *Aethyl Pseudocyanurat.* See *E. isocyanurate.*—**E. pyromucate.** Ger., *Brenzschleimsäure-Aethylester.* A crystalline compound, $C_5H_3(C_2H_5)O_3=C_7H_8O_3$. [B, 4.]—**E. pyrophosphate.** See under *E. phosphate.*—**E. pyrophosphite.** Ger., *Aethyl Pyrophosphit.* See under *E. phosphite.*—**E. pyrotartrate.** A compound, $C_5H_6O_4(C_2H_5)_2$, of e. and pyrotartaric acid; an oily liquid of bitter, burning taste, and an odor like that of sweet-flag. [B, 3.]—**E. quinate.** Fr., *quinate d'éthyle.* Ger., *Chinasäure-Aethylester.* A substance compounded of quinic acid and e.; probably contained in quinic ether. [B.]—**E. racemate.** A salt of e. and racemic acid, $C_2H_2(OH)_2(CO.OC_2H_5)_2$, isomeric with e. tartrate. [B, 3.]—**E. saccharate.** Ger., *Zuckersäure-Aethylester.* A salt of e. and dibasic saccharic acid; a bitter crystalline substance, $C_6H_8(C_2H_5)_2O_8=C_{10}H_{18}O_8$. [B, 3.]—**E. salicylate.** Fr., *salicylate d'éthyle.* Ger., *Salicylsäure-Aethylester*, *Aethylsalicylat.* A liquid, $C_6(H.H.H.H.OH.CO.OC_2H_5)$, boiling at 221° C. [B, 4.]—**E. selenide.** Ger., *Aethyl Selenid.* A salt of e. and selenic acid. The e. selenides are: 1. *diethylic selenide*, $(C_2H_5)_2Se$, a colorless, mobile, and heavy oil, of peculiar odor, boiling at 107° to 108° C., obtained by the distillation of potassic salenohydrate with potassic ethylic sulphate. It combines with bromine and iodine to form yellow, oily liquids, $(C_2H_5)_2.Se.Br_2$, and $(C_2H_5)_2.SeI_2$. 2. *E. diselenide* (or *perselenide*), $(C_2H_5)_2Se_2$, a heavy, brownish, oily liquid, boiling at 186° C., of exceedingly repulsive odor, and poisonous. [B; B, 4 (α, 27).]—**E. seleno-mercaptan.** A compound, $C_2H_5.SeH$; a colorless liquid of very disagreeable odor. [B, 3.]—**E. silicate.** Ger., *Aethylsilicat*, *Kieselsäure-Aethylester.* A salt of e. and silicic acid. There are known: *e. orthosilicate*, $(C_2H_5)_4SiO_4$, a mobile, inflammable, and aromatic liquid, tasting like peppermint, and forming substitution products with chlorine; *e. disilicate*, $(C_2H_5)_6Si_2O_7$, an oily, inflammable liquid with an odor of peppermint; and *e. metasilicate*, $(C_2H_5)_2SiO_3$, a liquid boiling at 350° C. [B.]—**E. sodiolactate.** Ger., *Natriummilchsäure-Aethylester.* A solid body, $(C_2H_5)Na.C_3H_4O_2=CH_3,-CH.ONa,-CO.O(C_2H_5)$. [B, 4.]—**E. sterate.** Ger., *Aethyl Stearat*, *Stearinsäure-Aethylester.* A waxy body, $C_2H_5,O,C_{18}H_{35}O=C_{20}H_{40}O_2$, isomeric with arachidic acid, and melting at 34° C. [B, 4.]—**E.**

suberate. Fr., *subérate d'éthyle.* Ger., *Korksäure-Aethylester.* A compound, $C_5H_{12}(CO.OC_2H_5)_2$, of e. and suberic acid ; a liquid of agreeable odor. [B, 3.]—**E. succinate.** Fr., *succinate d'-éthyle.* Ger., *Bernsteinsäure-Aethylester.* A salt of e. and succinic acid. *Normal e. succinate, die' succinate,* $C_2H_4(CO.OC_2H_5)_2$, is an oily mobile liquid of aromatic odor. *Acid e. succinate, mone' succidate, e'succinic acid,* $C_2H_4(CO.OC_2H_5)(CO.OH)$, is a syrupy liquid acting as a monobasic acid. [B, 3.]—**E. succino-lactate.** A compound, $C_2H_4(CO.OC_2H_5)(CO.O - CH[CH_2] - CO - OC_2H_5)$; an oily liquid. [B, 3.]—**E. succinyl-succinate.** A compound, $[CH_2.CO.CH.CO.OC_2H_5]_2$, forming light-green prismatic crystals which in solution exhibit a blue fluorescence. [B, 3.]—**E. sulphate.** Fr., *sulfate d'éthyle.* Ger., *Aethyl Sulfat.* A salt of e. and sulphuric acid. The e. sulphates are : *acid* (or *hydric*) *e. sulphate, e'sulphuric* (or *sulphovinic*) acid, C_2H_5,HSO_4, a clear, syrupy liquid, forming metallic salts, and itself formed in one of the stages of the manufacture of ether from alcohol ; and *normal e. sulphate*, die'sulphate, $(C_2H_5)_2SO_4$, a colorless, oily liquid, having an odor of peppermint, insoluble in water, and prepared by acting on absolute alcohol with sulphuric acid. Both the e. sulphates are found in the oils of wine, the acid sulphate being present in the light oil of wine, and the normal sulphate in conjunction with other bodies occurring in the heavy oil of wine. [B ; B, 3 (a. 27).] See OIL *of wine* and OLEUM *œthereum.*—**E. sulphide.** Fr., *sulfure d'éthyle.* Ger., *Aethyl Sulfid.* A compound of e. and sulphur. The e. sulphides are : *dimethyl sulphide* (or thioether), $(C_2H_5)_2.S$, a colorless liquid with a strong, garlicky odor. It forms a series of addition compounds with the metallic iodides and chlorides ; *e'methyl sulphide* (C_2H_5), (CH_3),S, a liquid of disagreeable odor, forming similar addition compounds ; the double sulphides of e. and other radicles (see DIE'SULPHINE, TRIE'SULPHINE, and DIE'METHYLSULPHINE) ; *e. disulphide,* or *persulphide,* $(C_2H_5)_2.S_2$, a colorless liquid having a garlicky odor ; *e. trisulphide,* $(C_2H_5)_2.S_3$; *e. tetrasulphide,* $(C_2H_5)_2.S_4$, a colorless oil ; and *e. pentasulphide,* $(C_2H_5)_2.S_5$. [B.]—**E'sulphinic acid.** A colorless, oily, very acid liquid, $C_2H_5SO_2H$, insoluble in ether. [B, 3 (a, 27).]—**E. sulphite.** Ger., *Aethylsulfit.* A mobile liquid, $(C_2H_5)_2SO_3$, having an odor of peppermint and a sulphurous taste. [B.]—**E. sulphocarbonate.** See *E. thiocarbonate.*—**E. sulphocyanate.** Ger., *Aethylsulfocyanat.* See *E. thiocyanate.*—**E. sulphydrate.** See *E. mercaptan.*—**E. tartrate.** Fr., *tartrate d'éthyle.* Ger., *Weinsäure-Aethylester, Aethyltartrat.* A salt of e. and tartaric acid. The e. tartrates are : *acid e. tartrate, monethylic tartrate,* $C_6H_{10}O_6 = C_2H_2 = (OH)_2 < {CO.OC_2H_5 \atop CO.OH}$; and *neutral e. tartrate,* diethylic tartrate, $C_8H_{14}O_6 = C_2H_2 : (OH)_2 < {CO.OC_2H_5 \atop CO.OC_2H_5}$, a liquid. [B, 2, 4.]—**E. telluride.** Ger., *Aethyl Tellurid.* A salt of e. and telluric acid. The e. tellurides are : (1) *diethyl telluride,* $(C_2H_5)_2Te$, a thick, reddish liquid, giving off yellowish, fœtid vapors whose odor is very persistent and which are reputed to be poisonous. It forms addition compounds with oxygen, the halogens, and the acid radicles ; and (2) e. ditelluride, $(C_2H_5)_2Te_2$, a dark, reddish liquid. [B.]—**E. tetrasulphide.** Fr., *tetrasulfure d'éthyle.* Ger., *Aethyltetrasulfid.* See under *E. sulphide.*—**E. thiacetate.** Ger., *Thiacetsäure-Aethylester.* An ethereal, oily liquid, $C_2H_5.C_2H_3OS$, of alliaceous odor, boiling at 114° to 116° C., and decomposing in contact with alkalies into mercaptan and acetic acid. [B, 3 (a, 27), 4.]—**E. thio-alcohol.** See *E. mercaptan.*—**E. thiocarbamide.** See *E'thiourea.*—**E. thiocarbimide.** Ger., *Aethylthiocarbimid.* E. mustard-oil, $CS.N.C_2H_5$, or e. isocyanate in which an atom of sulphur replaces one of oxygen ; a mobile liquid which produces irritation when inhaled and when applied to the skin. [B.]—**E. thiocarbonate.** Ger., *Aethylthiocarbonat, thiokohlensaures Aethyl.* A yellow, oily liquid, $(C_2H_5S)_2.CS$, of unpleasant odor. [B.]—**E. thiocyanate.** Ger., *Aethyl Thiocyanat.* A colorless, mobile liquid, $C_2H_5.S.C \equiv N$, of penetrating, alliaceous odor and sweetish taste, boiling at 141° C., prepared by heating an alcoholic solution of potassium thiocyanate with e. iodide. [B ; B, 3 (a, 27).]—**E. trisulphocarbonate.** See *E. thiocarbonate.*—**E. valerate, E. valerianate.** Ger., *Valeransäure-Aethylester, Baldriansäure-Aethylester.* A body, $C_2H_5.O,C_5H_9O = C_7H_{14}O_2$, isomeric with œnanthylic acid. *Normal e. valerate,* $C_2H_5.O.CO.-CH_2.CH_2.CH_2.CH_3$, is a liquid boiling at 145° C. *E. isovalerate.* e. valerianate, $C_2H_5.O.CO.CH_2.CH = (CH_3)_2 = C_2H_5.O.C_5H_9O$, is a colorless liquid boiling at 133° C., having a rennet-like and valerianic odor. [B, 4 ; B, 244 (a, 27).]

ETHYLAL, n. E^{2}th'i^{2}l-a^{2}l. Fr., *éthylal.* Ger., *E.* See ALDEHYDE.

ETHYL ALCOHOL, n. E^{2}th'i^{2}l-a^{2}l'ko-ho^{2}l. Lat., *alcohol, spiritus, spiritus vini, aqua ardens, aqua vitæ.* Fr., *alcool, alcool éthylique, esprit de vin.* Ger., *Alkohol, Aethylalkohol, Weingeist.* It., *alcool, alcool et ilico, alcole.* Sp., *alcohol, alcohol etílico.* Syn. : *alcohol, spirit, spirit of wine.* Hydrate or hydrated oxide of ethyl, $C_2H_6O = C_2H_5.OH$; a clear, colorless, mobile, very volatile and inflammable liquid of burning taste and peculiar pleasant ethereal odor, occurring in a dilute state in all beverages formed by the vinous fermentation of saccharine and starchy vegetable substances, and prepared in a pure state from these beverages by repeated distillation (rectification) and by dehydration with alkalies. It also occurs ready-formed in various vegetable substances, and occurs in coal-tar, bone-oil, and other products of organic distillation, as well as in bread. It has never been frozen, although at extremely low temperatures it becomes viscid. Boiling point, 78·3° C. Its sp. gr. varies greatly with the temperature, being 0·80625 at 0° C., 0·79367 at 15° C., 0·7809 at 30° C. It is very hygroscopic, and can not be freed by distillation alone from the moisture which it absorbs. It unites with various mineral salts, in the same manner that water does, to produce compounds, with one or more molecules of alcohol of crystallization. It is freely miscible with water, chloroform, ether, and benzene, and is a solvent for volatile oils, concrete oils (such as camphor), resins, phosphorus, iodine, bromine, and many other substances. On account of this solvent power it is largely employed in the arts and in pharmacy as a vehicle. Solutions of medicinal substances in e. a. are called *tinctures* and *spirits.* Locally, e. a., owing to its volatility, acts as a refrigerant, and when its evaporation is prevented, as an irritant and astringent, dehydrating moist surfaces, and coagulating albumin. Internally administered in moderate doses, it acts as a cardiac stimulant, particularly in cases of enfeebled cardiac action, but in excessive doses diminishes both the rapidity and force of the heart-beats. Small doses contract the arterioles (particularly in inflammatory conditions) and raise the blood-pressure and body temperature ; large doses dilate the arterioles, diminish the blood-pressure, and lower the body temperature. Small doses likewise act as a stimulant to the gastric mucous membrane, the liver, and the cerebrospinal centres, while large doses interfere with the functions of all of these organs. Applied in excessive or in continued doses, e. a. produces the condition called alcoholism (*q. v.*). E. a. is mostly eliminated unchanged by the lungs, kidney, and skin, but a small portion is oxidized in the body. E. a. is official in all of the pharmacopœias, the following table showing the various preparations extant, with their sp. gr. as given by the pharmacopœias. [B, 3, 10, 95, 97, 119.]

Specific gravity (at 15° C.).	Per cent. by weight of alcohol.	Per cent. by volume of alcohol.	Official titles.

* Probably erroneous.

ETHYLALIZARIN, n. E^{2}th-i^{2}l-a^{2}l-i^{2}z′a^{2}r-i^{2}n. Fr., *éthyl-alizarine.* Ger., *Aethylalizarin.* A yellow crystalline substance, insoluble in water, soluble in alcohol, $C_{24}H_{22}O_6 = C_{20}H_{12}(C_2H_5)_2O_6$. [B, 107.]

ETHYLALLYL, n. E^{2}th-i^{2}l-a^{2}l′i^{2}l. Ger., *Aethylallyl.* A bivalent radicle, $C_2H_5.C_3H_5$, which occurs in the free state as one of the isomeric varieties of amylene. [B, 4.]—**E'urea.** Ger., *Aethylallylharnstoff.* An artificial alkaloid, $C_6H_{12}N_2O$. [B.]

ETHYLALLYLAMINE, n. E^{2}th-i^{2}l-a^{2}l-i^{2}l′a^{2}m-en. A compound, $N(C_3H_5)(C_2H_5)H$, melting at 84° C., obtained by Rinne on heating allylamine with ethyl iodide. [B, 3 (*a*, 27).]

ETHYLAMIDE, n. E^{2}th-i^{2}l′a^{2}m-i^{2}d(ed). See ETHYLAMINE.

ETHYLAMIDOBENZOIC ACID, n. E^{2}th-i^{2}l-a^{2}m″i^{2}d-o-be^{2}n-zo′i^{2}k. Fr., *acide éthyl-amidobenzoïque.* Ger., *Aethylamidobenzoësäure.* A monobasic acid, $C_6H_3(C_2H_5)(NH_2)CO.OH$. [B.]

ETHYLAMINE, n's. E^{2}th-i^{2}l′a^{2}m-en. Fr., *éthylamine, éthylamide.* Ger., *Aethylamin.* A primary amine of ethyl, $NC_2H_7 = \left.\begin{matrix}C_2H_5\\ H\\ H\end{matrix}\right\}N$; a colorless, mobile liquid boiling at 180° C., isomeric with dimethylamine. [B.]—**E. alum.** See ALUMINIUM and *e. sulphate.* —**E. carbonate.** Fr., *carbonate d'éthylamine.* Ger., *Aethylamin Carbonat.* A deliquescent, crystalline mass, $[N.C_2H_5.H_2].HCO_3$, smelling strongly of ammonia. [B.]—**E. hydrochloride.** Ger., *Chlorwasserstoffäthylamin, Aethylammonium Chlorür.* A body, $N(C_2H_5)H.HCl$, occurring in fine, deliquescent, prismatic crystals. [B.]—**E. sulphate.** Ger., *Aethylammonium sulfat.* A deliquescent body, $(C_2H_5.H_2).H_2SO_4$. [B.]

ETHYLAMMONIUM (Lat.), n. n. E^{2}th(ath)-i^{2}l(u^{6}l)-a^{2}m(a^{3}m)-mon′i^{2}-u^{3}m(u^{4}m). Ger., *Aethylammonium.* See ETHYLAMINE.

ETHYLAMYL, n. E^{2}th″i^{2}l-a^{2}m′i^{2}l. A compound consisting of amyl and ethyl united with the same radicle. [B.]—**E. ether.** A liquid, $C_2H_5-O-C_5H_{11}$, of ethereal odor. [B, 3.]—**E'oxalic acid.** Fr., *acide éthyl-amyloxalique.* Ger., *Aethylamyloxalsäure.* A crystalline acid, $C(C_2H_5)(C_5H_{11})(OH)-CO.OH$. [B, 3.]—**E. sulphide.** A liquid, $C_2H_5-S-C_5H_{11}$. [B, 3.]

ETHYLANILINE, n. E^{2}th″i^{2}l-a^{2}n′i^{2}-len. A substitution compound, $C_6H_5.N(C_2H_5)H$, of ethyl and aniline; a liquid boiling at 204° C. [B, 3.]

ETHYLARSEN, n. E^{2}th″i^{2}l-a^{3}r′se^{2}n. See ARSENETHYL.

ETHYLARSENIC ACID, ETHYLARSINIC ACID, n's. E^{2}th-i^{2}l-a^{3}r-se^{2}n′i^{2}k, -i^{2}n′i^{2}k. A dibasic crystalline acid, $AsO(C_2H_5)(OH)_2$. [B, 3.]

ETHYLATE, n. E^{2}th′i^{2}l-at. Ger., *Aethylat.* A substitution compound of ethyl alcohol in which the hydrogen in the hydroxyl of the latter is replaced by a metal. The general formula of the e's is $(C_2H_5O)_nM_n$, where M_n is a metallic radicle whose atomicity is *n*. [B.]

ETHYLATION, n. E^{2}th-i^{2}l-a′shu^{3}n. Fr., *éthylation.* Ger., *Aethylirung.* The process of combining or causing to combine with ethyl. [B, 2.]

ETHYLBENZOIC ACID, n. E^{2}th-i^{2}l-be^{2}n-zo′i^{2}k. Fr., *acide éthyl-benzoïque.* Ger., *Aethylbenzoësäure.* A 1-molecule ethyl substitution product, $C_6H_4(C_2H_5)CO.OH$, of benzoic acid, forming laminar crystals, melting at 110° C. [B, 4 (*a*, 27).]

ETHYLBENZYL ETHER, n. E^{2}th″i^{2}l-be^{2}n′zi^{2}l. See BENZYL-*ethyl ether.*

ETHYLBRUCINE, n. E^{2}th-i^{2}l-bru^{2}′sen. A substitution product, $C_{23}H_{25}(C_2H_5)N_2O_4$, of brucine. [B, 2 (*a*, 27).]

ETHYLCACODYLIC ACID, n. E^{2}th″i^{2}l-ka^{2}k-o di^{2}l′i^{2}k. Diethylarsinic acid. [B.]

ETHYLCAFFEIDINE, n. E^{2}th″i^{2}l-ka^{2}f-e^{2}′i^{2}d-en. Fr., *éthylcaféidine.* Ger., *Aethylkoffeïdin.* A substitution compound, $C_7H_{11}(C_2H_5)N_4O$, of ethyl and caffeidine. [B, 3.]

ETHYLCAMPHORIC ACID, n. E^{2}th″i^{2}l-ka^{2}m-fo^{2}r′i^{2}k. Fr., *acide éthyl-camphorique.* Ger., *Aethylkamphersäure.* An acid, $C_{10}H_{15}(C_2H_5)O_4$. [B.]

ETHYLCARBAMINE, ETHYLCARBAMMONIUM, n's. E^{2}th″i^{2}l-kar′ba^{2}m-en, -ka^{3}r-ba^{2}m-o′ni^{2}-u^{3}m. Ethyl isocyanide. [B, 3.]

ETHYLCARBINOL, n. E^{2}th″i^{2}l-ka^{3}r′bi^{2}n-o^{2}l. Primary propyl alcohol. [B, 4.]

ETHYLCARBONATE, n. E^{2}th″i^{2}l-ka^{3}r′bo^{2}n-at. A salt of ethylcarbonic acid. [B.]

ETHYLCARBONIC ACID, n. E^{2}th-i^{2}l-ka^{3}rb-o^{2}n′i^{2}k. Ger., *Aethylcarbonsäure* (1st def.). 1. Propionic acid, a 1-molecule ethyl substitution compound of carbonic acid, $C_2H_5.CO.OH$. 2. Acid ethyl carbonate (2d def.). [B, 3, 4.]

ETHYLCINCHONINE, n. E^{2}th-i^{2}l-si^{2}n^{2}′kon-en. An addition product of cinchonine, $C_{19}H_{22}N_2O.C_2H_5$. [B, 270 (*a*, 27).]

ETHYLCITRIC ACID, n. E^{2}th″i^{2}l-si^{2}t′ri^{2}k. Fr., *acide éthylcitrique.* Ger., *Aethylcitronensäure.* An acid citrate of ethyl. [B.] See under ETHYL *citrate.*

ETHYLCODEINE, n. E^{2}th-i^{2}l-kod-e′en. See CODETHYLINE.

ETHYLCONIINE, n. E^{2}th-i^{2}l-kon-i′en. Fr., *éthylconine, éthylconicine.* Ger., *Aethylconiin.* An ethyl substitution product, $C_8H_{14}N(C_2H_5) = C_{10}H_{19}N$; an oily, nearly colorless liquid, lighter than water. [B, 244 (*a*, 27).]

ETHYLCROTONIC ACID, n. E^{2}th″i^{2}l-kro-to^{2}n′i^{2}k. Fr., *acide éthyl-crotonique.* Ger., *Aethylcrotonsäure.* A liquid, $CH_3.CH : C(C_2H_5).CO.OH$, of peppermint-like odor. [B, 3.]

ETHYLDIACETIC ACID, n. E^{2}th-i^{2}l-di-a^{2}s-et′i^{2}k. Fr., *acide éthyldiacétique.* See ETHYL *acetoacetate.*

ETHYLDICARBOPYRROLIC ACID, n. E^{2}th″i^{2}l-di-ka^{3}r-bo-pi^{2}r-o^{2}l′i^{2}k. A dibasic crystalline acid, $C_4H_2N(C_2H_5)(CO.OH)_2$. [B, 3.]

ETHYLDIMETHYLETHYLENE, n. E^{2}th-i^{2}l-di-me^{3}th-i^{2}l-e^{2}th′il-en. See HEXYLENE.

ETHYLDISULPHOCARBONIC ACID, n. E^{2}th-i^{2}l-di-su^{3}lf-o-ka^{3}rb-o^{2}n′i^{2}k. See XANTHIC ACID.

ETHYLENE, n. E^{2}th′i^{2}l-en. Lat., *æthylenum.* Fr., *éthylène.* Ger., *Aethylen.* Olefiant gas, $C_2H_4 = CH_2 + CH_2$, occurring as a colorless, inflammable gas of peculiar odor. In compounds it acts as a bivalent radicle, $-CH_2-CH_2-$, isomeric with ethylidene. [B, 4.]—**E. alcohol.** Ger., *Aethylenalkohol.* Syn.: *glycol, e. glycol, e. dihydrate.* A diatomic alcohol, $C_2H_6O_2 = C_2H_4(OH)_2$, formed by the substitution of a molecule of e. for half the hydrogen in 2 molecules of water, or by the substitution of 2 molecules of hydroxyl for 2 atoms of hydrogen in ethane; a colorless, sweetish, sirupy liquid boiling at 197° C. [B, 2.]—**E. bichloride.** Fr., *bichlorure d'éthène.* See *E. dichloride.*—**E. bromide.** Ger., *Bromäthylen.* A colorless liquid, $C_2H_4Br_2$, of agreeable odor and sweet taste discovered by Balard in 1826. It is isomeric with bromated ethyl bromide and with ethylidene bromide. [B, 244 (*a*, 27).]—**E. bromiodide.** Ger., *Aethylenbromjodür.* A solid body, $C_2H_4Br.I$, melting at 28° C. [B, 4.]—**E. chlorhydrin.** Fr., *glycol monochlorhydrique.* A colorless, sweet-tasting liquid, $C_2H_4Cl.OH$, first obtained by Wurtz by saturating e. alcohol with hydrochloric-acid gas. It may be considered as monochlorethyl alcohol. [B, 3, 244 (*a*, 27).]—**E. chloride.** See *E. dichloride.*—**E. chloriodide.** Ger., *Aethylenchlorjodür.* A liquid, $C_2H_4Cl.I$, of a sweetish odor. [B.]—**E. cyanide.** See *E. dicyanide.*—**E'diamine.** See the major list.—**E'diammonium.** See ETHYLENEDIAMINE.—**E. dibromide.** Ger., *Aethylendibromür.* A mobile, colorless liquid, $C_2H_4Br_2$, of sweetish odor and taste, boiling at 129° C.; crystallizing with cold; prepared by direct combination of e. and bromine. It is isomeric with ethylidene dibromide. [B, 4.]—**E. dicarbonitrile.** Ger., *Aethylendicarbonitril.* See *E. dicyanide.*—**E'dicarboxylic acid.** Ger., *Aethylendicarbonsäure.* Succinic acid. [B.]—**E. dichloride.** Lat., *æthylenum chloratum.* Ger., *Aethylendichlorür.* Dutch liquid; a colorless, oily, inflammable liquid, $C_2H_4Cl_2$, of sweetish, ethereal odor and taste, boiling at 85° C., and soluble in alcohol and in ether; prepared by the direct union of e. with chlorine; isomeric with ethylidene dichloride. It has been used as an anæsthetic (see ÆTHER *anæstheticus Aranii*). [A, 308; B, 4.]—**E. dicyanide.** Ger., *Aethylendicyanür.* E. dicarbonitrile, $C_4H_4N_2 = CN.CH_2-CH_2.CN$, a crystalline body. [B, 4.]—**E. diethylate.** Ger., *Aethylendiäthylat.* Diethylglycol ether, $C_2H_4(OC_2H_5)_2$, a liquid boiling at 124° C. [B, 4.]—**E. dihydrate.** Ger., *Aethylendihydrat.* See *E. alcohol.*—**E. diiodide.** Ger., *Aethylendijodür.* A body, $C_2H_4I_2$, occurring in colorless, prismatic crystals, which melt at 75° C.; produced by the direct combination of e. with iodine. [B.]—**E. dinitrate.** Ger., *Aethylendinitrat.* A heavy, colorless, oily liquid, $C_2H_4(ONO_2)_2$, of an unpleasant, sweetish taste, inflammable, decomposing on percussion, and poisonous. [B, 3 (*a*, 27).]—**E. dinitrite.** Ger., *Aethylendinitrit.* A colorless, crystalline body, $C_2H_4 : (NO_2)_2$, melting at 37·5° C. [B, 4.]—**E. disulphhydrate.** Ger., *Aethylendisulfhydrat.* A colorless, highly refracting, oily liquid, $C_2H_4 : (SH)_2$, of peculiar pungent odor, and boiling at 146° C.; formed by acting on alcoholic potassium hydrosulphide with e. bromide. [B, 3 (*a*, 27).]—**E. disulphocyanate, E. dithiocyanate.** A body, $C_2H_4 : (SCN)_2$, occurring in colorless, tabular crystals, melting at 90° C. [B, 4.]—**E'eugenol.** An ether, $(CH_3OC_9H_8O)_2C_2H_4$, crystallizing in prisms melting at 89° C. [B, 3 (*a*, 27).]—**E. glycol.** Ger., *Aethylenglycol.* See *E. alcohol.*—**E. hydride.** See ETHYL *hydride.*—**E. hydrocyanate.** A compound, $C_2H_3CN.OH$, formed by heating e. chlorhydrin with potassium cyanide. [B, 3 (*a*, 27).—**E'lactic acid.** Ger., *Aethylenmilchsäure.* A form of lactic acid, $CH_2(OH)-CH_2-CO.OH = C_3H_6O_3$, found in a watery extract of human muscle, and formed artificially by the union of e. with carbonic acid. [B; K.] See LACTIC ACID.—**E. mercaptan.** See *E. disulphhydrate.*—**E. muriate.** See *E. dichloride.*—**E'naphthalene.** See ACENAPHTHENE.—**E. nitrate, E. nitrite.** See *E. dinitrite.*—**E. oxide.** Ger., *Aethylenoxyd.* A colorless, aromatic liquid, C_2H_4O, isomeric with acetic aldehyde, boiling at 14° C. [B, 4.]—**E. perchloride.** See *E. dichloride.*—**E. sulphate.** A salt of e. and sulphuric acid. *Acid e. sulphate* (ethylenesulphuric acid), $C_2H_4(SO_4H)_2$, is a thick liquid, decomposing at 160° C., formed when glycol is allowed to fall drop by drop into chlorsulphonic acid cooled with ice. *Basic e. sulphate* (ethylenehydroxysulphuric acid), $C_2H_4(OH)SO_4H$, not known in a pure state, is formed when alcohol and sulphuric acid are heated together at 150° C. [B, 3 (*a*, 27).]—**E'sulphonic acid.** Ger., *Aethylensulfonsäure.* See ETHIONIC ACID.—**E'sulphuric acid.** See under *E. sulphate.*—**E. thiodichloride.** A liquid, $C_2H_4SCl_2$, having a taste and smell like mustard-oil, producing blis-

ters on the skin, and attacking the mucous membranes by its vapors; formed by passing e. into well-cooled sulphur dichloride subsequently heated to 100° C. It easily decomposes on heating. [B, 3 (a, 27).]—**Perchlorinated e. chloride.** Hexchlorethane. [B, 2.]

ETHYLENEDIAMINE, n. E^{2}th″i^{2}l-en-di′a^{2}m-en. Ger., *Aethylendiamin.* A strongly alkaline, diacid base, $C_2H_4,(NH_2)_2 = NH_2,-C_2H_4-NH_2$, a syrupy, colorless liquid of ammoniacal odor, very soluble in water, with which it forms a hydrate, and boiling at 117° C. It combines with acids to form neutral salts, $C_2H_4,(NH_2)_2$-R″, the e. diammonic salts, and with alcoholic radicles to form a series of alkalies; identified by Brieger as one of the poisonous ptomaines of fish. [B, 4; B, 32 (a, 27); L, 87 (a, 27).]—**E. hydrochloride.** Ger., *Chlorwasserstoffäthylendiamin.* An addition compound, $C_2H_4(NH_2Cl)_2$, occurring in silver-white acicular crystals, obtained by the action of alcoholic ammonia on ethylene chloride or ethidene chloride. [B, 3 (a, 27).]

ETHYL ETHER, n. E^{2}th′i^{2}l-eth′u^{5}r. Lat., *æther sulphuricus* (seu *vitriolicus*), *spiritus vini æthereus, naphtha vitrioli.* Fr., *éther éthilique* (ou *vinique*, ou *sulfurique*, ou *hydrique*). Ger., *Aethyläther, Aether, Diäthyläther, Aethyloxyd, Diäthyloxyd, Schwefeläther.* It., *etere etilico, etere, etere solforico, ossido di etile, etil-etere.* Sp., *éter.* A compound consisting of an atom of oxygen united with a double molecule of ethyl, $(C_2H_5)_2.O$; prepared by exposing ethyl alcohol to the action of sulphuric acid, subsequently purifying the product of the reaction by the addition of caustic potash or calcium chloride, and lastly rectifying by distillation. E. e. is a mobile, colorless liquid, of burning taste and peculiar odor; it is quite volatile, boiling at 35° C., and very inflammable. Sp. gr. at 0°, 0·736. Its vapor mixed with air forms an explosive compound. It is soluble in ethyl alcohol, and slightly soluble in water. It is a ready solvent of fats, oils and resins, and of many metallic chlorides. It forms substitution products with chlorine (*chlorethers*). The stronger ether of the U. S. Ph. is nearly pure e. e., containing about 6 per cent. of alcohol, while the *ordinary ether* contains 26 per cent. of alcohol. [B.]

ETHYLETHYLENE, n. E^{2}th-i^{2}l-e^{2}th′i^{2}l-en. See BUTYLENE.

ETHYLEUGENOL, n. E^{2}th-i^{2}l-u^2′je^{2}n-o^{2}l. An aromatic liquid, $C_3H_5.C_6H_3(OCH_3).OC_2H_5$, with a faint odor of cloves, strongly refractive, boiling at 2,540° C., prepared by heating eugenol with ethyl bromide and caustic-potash solution. [B, 3 (a, 27).]

ETHYLGLYCOLLIC ACID, n. E^{2}th-i^{2}l-gli^{2}k-o^{2}l′i^{2}k. Ger., *Aethylglycolsäure.* Ethoxyacetic acid; a liquid, $CH_2O(C_2H_5)-COOH$, isomeric with ethyl glycollate, having the properties of a monobasic acid, and regarded as a 1-molecule ethyl substitution compound of glycollic acid. [B, 4.]

ETHYLIA (Lat.), n. f. E^{2}th-i^{2}l(u^{6}l)′i^2-a^3. Fr., *éthyliaque.* See ETHYLamine.

ETHYLIC, adj. E^{2}th-i^{2}l′i^{2}k. Fr., *éthylique.* Of, pertaining to, containing, or derived from ethyl. [B.]—**E. alcohol.** See ETHYL ALCOHOL.—**E. aldehyde.** Ger., *Aethylaldehyd.* See ACETIC ALDEHYDE.

ETHYLIDENE, n. E^{2}th-i^{2}l′i^2-den. Fr., *éthylidène.* Ger., *Aethyliden.* A bivalent radicle, $C_2H_4 = CH_3-CH=$, isomeric with ethylene. [B, 4.]—**E. bichloride.** Fr., *bichlorure d'éthylidène.* Ger., *Aethylidenbichlorid.* See *E. dichloride.*—**E. bromide.** An unstable, thick, yellow liquid, $C_2H_4Br_2 = CH_3-CHBr_2$, insoluble in water (by which it is decomposed at high temperatures), and formed by passing aldehyde vapor into cooled phosphorus pentabromide. [B, 244 (a, 27).]—**E. chloride.** Ger., *Aethylidenchlorid, Aethylidenchlorür.* See *E. dichloride.*—**E. chloroethylate.** Ger., *Aethylidenchlorüräthyläther.* Monochlorethylic ether, $C_2H_4Cl.O.-C_2H_5$, an oily liquid boiling at about 98° C. [B, 5.]—**E. dibromide.** Ger., *Aethylidendibromür.* A yellowish, oily liquid, $C_2H_4Br_2 = CH_3,CHBr_2$. [B.]—**E. dichloride.** Ger., *Aethylidendichlorür.* A colorless liquid, $C_2H_4Cl_2 = CH_3CHCl_2$, having an odor resembling that of chloroform, denser than water, boiling at 58° to 60° C., identical with chlorethyl chloride, and resulting from the action of phosphorus perchloride on aldehyde. It has been used as an anæsthetic. [B, 5; B, 244 (a, 27).]—**E. diethylether.** Ger., *Aethylidendiäthyläther.* See ACETAL.—**E. dimethylate.** Ger., *Aethylidendimethylat.* A liquid, $C_2H_4.(O.CH_3)_2$, boiling at about 65° C. [B, 5.]—**E. ethylate.** Ger., *Aethylidendiäthylat.* See ACETAL.—**E. oxide.** Ger., *Aethylidenoxyd.* See ACETIC ALDEHYDE.—**E. oxychloride.** Ger., *Aethylidenoxychlorür, Diäthylidenchlorüroxyd.* A liquid, $C_2H_4.Cl.O.Cl.C_2H_4$, formed by the action of hydrochloric-acid gas upon acetic aldehyde, and having the odor of both of these bodies. [B, 5.]—**E. sulphide.** A thick oil, C_2H_4S. [B, 93.]

ETHYLIDENELACTAMIC ACID, n. E^{2}th-i^{2}l″i^{2}d-en-la^{2}k-ta^{2}m′i^{2}k. Fr., *acide éthylidène-lactamique.* Ger., *Aethylidenlactaminsäure.* Alanine. [B.]

ETHYLIDENELACTIC ACID, n. E^{2}th-i^{2}l″i^{2}d-en-la^{2}k′ti^{2}k. Ger., *Aethylidenmilchsäure.* Fermentation (or ordinary) lactic acid, $CH_3-CH(OH)-CO,OH = C_3H_6O_3$, formed by the union of ethylidene with carbonic acid. [B, 4.]

ETHYLIN, n. E^{2}th′i^{2}l-i^{2}n. Ger., *Aethylin.* A body derived from glyceryl alcohol (glycerin) by the substitution of one or more molecules of the radicle (C_2H_5O) for hydroxyl (OH). The term is ordinarily limited to *mone*′, $C_3H_5.(OH)_2(C_2H_5O) = C_5H_{12}O_3$, a liquid boiling at 230° C. *Die*′, $C_3H_5(OH)(C_2H_5O)_2 = C_7H_{16}O_3$, is a liquid having an odor of pepper, and boiling at 182° C. *Trie*′, $C_3H_5(C_2H_5O)_3 = C_9H_{20}O_3$, is a liquid boiling at 185° C. [B, 4.]

ETHYLIZATION, n. E^{2}th-i^{2}l-i^{2}z-a′shu^{3}n. The administration of ethyl bromide for anæsthetic purposes. [R. J. Levis, "Med. Rec.," 1880, pp. 342–344 (B).]

ETHYLIZE, v. tr. E^{2}th′i^{2}l-iz. To anæsthetize with ethyl bromide. [W. R. Williams, "Brit. Med. Jour.," Mar. 1, 1884, p. 402.]

ETHYLMANNITE, n. E^{2}th-i^{2}l-ma^{2}n′it. Fr., *éthyl-mannite.* Ger., *Aethylmannit.* Of Berthelot, a syrupy liquid, $C_{10}H_{10}O_5$, very soluble in ether, obtained by the action of potash, water, and e. bromide upon mannite. [A, 301 (a, 21); B, 107.]

ETHYLNICOTINE, n. E^{2}th-i^{2}l-ni^{2}k′o-ten. Ger., *Aethylnicotin.* A body, $C_{10}H_{14}(C_2H_5)_2N_2$″, known only in its compounds. [a, 27.]—**E. hydrate.** Ger., *Aethylnicotinhydrat.* A powerful base, $C_{10}H_{14}(C_2H_5)_2N_2(OH)_2$, that has not been isolated. Its aqueous solution is colorless, odorless, very bitter, and strongly alkaline. When evaporated to a certain degree of concentration it gives out a smell of decaying fish. [B, 244 (a, 27).]

ÉTHYLOXYDOCARBOAMIDE (Fr.), n. A-tel-o^{2}x-e-do-ka^{3}r-bo-a^3-med. Urethane. [A, 385 (a, 21).]

ETHYLMORPHINE, n. E^{2}th-i^{2}l-mo^{2}rf′en. Fr., *éthocodéine.* Ger., *Aethylmorphin.* A tertiary base, $C_{17}H_{17},NO_2(C_2H_5)(OCH_3)$, an alcoholic morphine derivative obtained from codeine ethyliodide. [B, 244 (a, 27).]—**E. hydriodide.** Fr., *iodhydrate d'éthyle-morphine.* A stable crystalline salt, $(C_{17}H_{18}(C_2H_5)NO_3HI)_2 + H_2O$, prepared by heating finely pulverized morphine for some hours on the water-bath with ethyl iodide and alcohol. [B, 244 (a, 27).]

ETHYLPHOSPHINE, n. E^{2}th-i^{2}l-fo^{2}s′fen. Ger., *Aethylphosphin.* A phosphine in which one or more ethyl molecules replace hydrogen atoms in the radicle PH_3. There are known: (1) *primary e.* (or simply *e.*), $P,(C_2H_5),H_2$, a mobile, colorless, highly refracting liquid whose vapor has a very powerful odor and an excessively bitter taste; (2) *secondary e.*, $P,(C_2H_5)_2,H$, a liquid which inflames spontaneously on exposure to air, possesses a very strong odor, and has a great affinity for oxygen, so as to produce irritant effects when brought into contact with the tissues; and (3) *tertiary e.*, $P,(C_2H_5)_3$, a colorless, mobile liquid, having a strong odor, which, when the liquid is diluted, resembles that of hyacinths. These bodies act as feeble bases, combining with acids to form salts whose constitutions are analogous to those of the salts of the ethylamines. [B.]

ETHYLPHOSPHINIC ACID, n. E^{2}th-i^{2}l-fo^{2}s-fi^{2}n′i^{2}k. Ger., *Aethylphosphinsäure.* A dibasic acid, $P.(C_2H_5),O,(OH)_2$, produced by the oxidation of primary ethylphosphine, occurring as a solid mass resembling spermaceti and melting at 41° C. [B.]

ETHYLPHOSPHORIC ACID, n. E^{2}th-i^{2}l-fo^{2}s-fo^{2}r′i^{2}k. Fr., *acide éthyl-phosphorique.* Ger., *Aethylphosphorsäure.* Monethyl phosphate, $H_2(C_2H_5)PO_4$, or phosphoric acid in which ethyl replaces hydrogen. [B.]

ETHYLPIPERIDINE, n. E^{2}th-i^{2}l-pi^{2}p-e^{2}r′i^{2}d-en. Fr., *éthylpipéridine.* Ger., *Aethylpiperidin.* An artificial alkaloid; a substitution compound, $C_5H_4(C_2H_5)N,H_6 = C_7H_{15}N$, of piperidine; a strongly alkaline base, boiling at 128° C., capable of distillation, and forming addition compounds with the ethyl, methyl, and methylene iodides. Two isomeric varieties are known, both colorless, oily liquids. [B, 4 (a, 27), 79.]

ETHYLPROPYL, n. E^{2}th-i^{2}l-pro′pi^{2}l. Ger., *Aethylpropyl.* See PENTANE.

ETHYLPROPYLENE, n. E^{2}th-i^{2}l-pro′pi^{2}l-en. Fr., *éthylpropylène.* See AMYLENE.

ETHYLPYRIDINE, n. E^{2}th″i^{2}l-pi^{2}r′i^2-den. Fr., *éthyl-pyridine.* Ger., *Aethylpyridin.* A 1-molecule ethyl substitution compound of pyridine, $C_5H_4(C_2H_5)N = C_7H_9N$, of which two isomeric varieties, both liquids, are known. [B. 2, 79.]—**E. hydrate.** Ger., *Aethylpyridinhydrat.* A body, $C_7H_9N + H_2O = C_7H_{11}NO$. [B, 2.]

ETHYLPYRROL, n. E^{2}th-i^{2}l-pi^{2}r′o^{2}l. Ger., *Aethylpyrrol.* A colorless liquid, $C_4H_4,N,C_2H_5 = C_6H_9N$, a 1-molecule ethyl substitution compound of pyrrol. [B, 3.]

ETHYLQUINOLINE, n. E^{2}th″i^{2}l-kwi^{2}n′o-len. Fr., *éthylquinoléine.* Ger., *Aethylchinolin.* A substitution compound, $C_9H_6-(C_2H_5)N$, of quinoline. One compound, having probably the constitution $C_6[H,H,H,H,CH-CH-C(C_2H_5)-N,-,]$ is known: also an isomeric body, ethyl-benzoquinoline, a colorless oil, $C_6[H,H,H,H,CH-C(C_2H_5)-CH-N,-,]$. [B, 79.]—**E. hydride.** A body, $C_5(H_2,H_2,H_2,N,C_2H_5,-,-,)C_4(H,H,H,H,)$, or kairine less an atom of oxygen. [W. Filehne, "Berl. klin. Wchnschr.," No. 45, 1882 (B).]

ETHYLSILICON, n. E^{2}th-i^{2}l-si^{2}l′i^{2}k-o^{2}n. Ger., *Aethylsilicium.* A trivalent radicle, $Si(C_2H_5)$‴. [B, 3.]

ETHYLSTRYCHNINE, n. E^{2}th″i^{2}l-stri^{2}k′nin. Fr., *éthylstrychnine.* Ger., *Aethylstrychnin.* A substitution compound, $C_{21}H_{21}(C_2H_5)N_2O_2 = C_{23}H_{26}N_2O_2$, homologous with strychnine. [B, 2.]—**E. hydrate.** Fr., *hydrate d'éthyl-strychnine.* Ger., *Aethylstrychninhydrat.* A substance, $C_{23}H_{28}N_2O_3 = C_{23}H_{26}N_2O_2 + H_2O$, compounded of e. and the elements of a molecule of water; prepared from the iodide by the action of silver oxide upon the latter. [B, 2; B, 244 (a, 27).]

ETHYLSULFAS (Lat.), n. m. E^{2}th″i^{2}l(u^{6}l)-su^{3}l(su^{4}l)′fa^{2}s(fa^{3}s). See SULPHOVINATE.—**E. sodicus** [Fr. Cod.]. Sodium sulphovinate. [B.]

ETHYLSULPHINIC ACID, n. E^{2}th-i^{2}l-su^{3}lf-i^{2}n′i^{2}k. Ger., *Aethylsulfinsäure.* An acid, C_2H_5,SO,OH, known through its salts. It bears the same relation to propionic acid that the thioethers bear to the oxygen ethers. [B.]

ETHYLSULPHONIC ACID, n. E^{2}th-i^{2}l-su^{3}lf-o^{2}n′i^{2}k. Ger., *Aethylsulfonsäure. Aethylschwefligsäure.* An oily, acid liquid, $H,(C_2H_5),SO^3 = C_2H_5-(SO_2)-OH$, crystalline at low temperatures. [B, 3.]

ETHYLSULPHURIC ACID, n. E^{2}th-i^{2}l-su^{3}lf-u^2′ri^{2}k. Ger., *Aethylschwefelsäure.* Sulphovinic acid. [B.] See ETHYL *sulphate.*

ETHYLSULPHUROUS ACID, n. E^{2}th-i^{2}l-su^{3}lf′u^2 ru^{3}s. Ger., *Aethylschwefligsäure.* See ETHYLSULPHONIC ACID.

ETHYLTARTARIC ACID, n. E2th-i2l-ta3r-ta2r'i2k. A 1-molecule ethyl substitution compound of tartaric acid, $C_2H_2(OH)_2(CO,OC_2H_5),(COOH)$. [B, 4 (*a*, 27).]

ETHYLTERPENE, n. E2th-i2l-tu5rp'en. Fr., *éthyl-terpène, éterpène*. A camphor-like, crystalline substance, $C_{12}H_{20} = C_{10}H_{15}.C_2H_5$. [B, 93.]

ETHYLTHALLINE, n. E2th''i2l-tha2l'len. Fr., *éthylthalline*. Ger., *Aethylthallin, Aethyltetrahydroparachinanisol*. An alkaloid, $C_{12}H_{17}NO$, a non-toxic febrifuge. Its salts are readily soluble in water, have an agreeable, bitter taste, and lower the temperature decidedly when administered to healthy animals. [Straup and von Jaksch, "Ztschr. f. klin. Med.," 1884 (*a*, 27).]—**E. hydrochloride.** An addition compound of e., $C_{12}H_{17}NO,HCl$, a very acid, bitter, hygroscopic substance, readily soluble in water. [Straup and von Jaksch, *l. c.* (*a*, 27).]

ETHYLTHIOCARBAMIC ACID, n. E2th-i2l-thi-o-ka3rb-a2m'i2k. Ger., *Aethylthiocarbaminsäure*. Thiocarbamic acid in which a molecule of ethyl replaces an atom of hydrogen, $H(C_2H_5)-N-CS-SH$; an oily liquid which, on standing, hardens into a crystalline mass. [B.]

ETHYLTHIOUREA, n. E2th i2l-thi-o-u2-re'a3. Ger., *Aethylthioharnstoff*. A substitution product of urea in which sulphur replaces oxygen and ethyl replaces hydrogen. [B.]

ETHYLTROPIDINE, n. E2th-i2l-trop'i2d-en. A quaternary compound derived from tropine. [B, 244 (*a*, 27).]—**E. chloraurate.** A crystalline compound, $C_8H_{13}N.C_2H_5Cl.AuCl_3$. [B, 244 (*a*, 27).]

ETHYLTROPINE, n. E2th-i2l-trop'en. A non-volatile, brown, amorphous substance, $C_8H_{15}(C_2H_5)NO$. [B, 244 (*a*, 27).]

ÉTHYLURE (Fr.), n. A-te-lu6r. See ETHIDE.

ETHYLUREA, n. E2th-i2l-u2-re'a3. Ger., *Aethylharnstoff*. Syn.: *ethyl carbamide*. An ethyl substitution compound of urea. Several varieties are known: (1) *Ethylurea*, $CO\left\{\begin{matrix}N(C_2H_5)H\\NH_2\end{matrix}\right.$, forming prismatic crystals melting at 92° C.: (2) *a-Diethylurea*, $CO\left\{\begin{matrix}N(C_2H_5)_2\\NH_2\end{matrix}\right.$; (3) *β-Diethylurea*, $CO\left\{\begin{matrix}N(C_2H_5)H\\N(C_2H_5)H\end{matrix}\right.$; (4) *Methylethylurea*, $CON_2H_2(C_2H_5)(CH_3)$: (5) *Triethylurea*, $CO\left\{\begin{matrix}N(C_2H_5)H\\N(C_2H_5)\end{matrix}\right.$; and (6) *Tetrethylurea*, $CO\left\{\begin{matrix}N(C_2H_5)_2\\N(C_2H_5)_2\end{matrix}\right.$. All are crystalline solids except the last, which is a liquid. [B.]

ETHYLVANILLIC ACID, n. E2th-i2l-va2n-i2l'i2k. A 1-molecule ethyl substitution compound of vanillic acid, $C_6H_3(OC_2H_5)(OCH_3)CO_2H$, boiling at 193° to 194° C. [B, 3 (*a*, 27).]

ETHYLVANILLIN, n. E2th-i2l-va2n-i2l'i2n. Fr., *éthyl-vanilline*. Ger., *Aethylvanillin*. An ethyl substitution product, $C_8H_7(C_2H_5)O_3$, of vanillin, a crystalline body, melting at 64° to 65° C., subliming without decomposition, and resulting from the action of ethyl iodide on a solution of potassium vanillate in boiling alcohol. [B, 244 (*a*, 27).]

ETHYLVINYL, n. E2th-i2l-vin'i2l. See BUTYLENE.

ÉTINCELLE (Fr.), n. A-ta2n2-se2l. A spark. [A, 301 (*a*, 21).]

ÉTIOCRATIQUE (Fr.), adj. A-te-o-kra3-tek. From αἰτία, a cause, and κρατεῖν, to rule. Of Foussagrives, acting against the cause of a disease (said of remedies). [A, 518.]

ETIOLATED, adj. E'ti2-o-lat-e2d. Lat., *albicatus*. Fr., *étiolé*. Ger., *weisswerdend, gebleicht*. Blanched, especially by exclusion from sunlight. [B, 19 (*a*, 24).]

ETIOLATION, n. E-ti2-o-la'shu3n. Fr., *étiolement*, from *étioler* (O. Fr., *estioler*), to become slender or puny. Ger., *Bleichung*. The state of being or becoming, or the process of causing to become, etiolated. [G, 15, 30.]

ETIOLIN, n. E'ti2-o-li2n. Fr., *étioline, phylloxanthéine*. The yellow pigment of etiolated leaves. [B, 46 (*a*, 14), 121 (*a*, 24).]

ETIOLOGICAL, adj. E2t-i2-o-lo2j'i2k-a2l. See ÆTIOLOGICAL.

ETIOLOGY, n. E-ti2-o2l'o-ji2. See ÆTIOLOGY.

ÉTIQUE (Fr.), adj. A-tek. See HECTIC.

ÉTIREMENT (Fr.), n. A-ter-ma3n2. A drawing out (see NERVE-*stretching*). [A, 518.]

ETISIS (Lat.), n. f. E2t'i2 si2s. Gen., *etis'eos, et'isis*. Fr., *étisie*. See PHTHISIS.

ÉTIVAZ (Fr.), n. A-te-va3. A place in the canton of Vaux, Switzerland, where there are sulphurous springs. [L, 105, 135 (*a*, 14).]

ÉTITE (Fr.), n. A-tet. See AETITE.

ETNAGH-BERRIES, n. pl. E2t'na3-be2r''i2z. The fruit of *Juniperus communis*. [A, 505 (*a*, 21).]

ETNOS (Lat.), n. n. E2t'no2s. Gen., *et'neos (-is)*. Gr., ἔτνος. Of Galen, porridge made from beans, peas, or the like. [A, 387; L, 94.]

ÉTOFFÉ (Fr.), adj. A-to3f-fa. Having masses of well-developed muscle (said of a horse). [A, 301 (*a*, 21).]

ÉTOILE (Fr.), n. A-twa3l. A star (see ASTER); in botany, the name of many monocotyledons bearing stellate fruits. [B, 121 (*a*, 24).]—**E. amylacée.** A reproductive bulbil of the *Chara*. [A, 385 (*a*, 21).]—**E. blanche.** The *Ornithogalum umbellatum*. [B, 173 (*a*, 24).]—**E. chardon.** In the Antilles, the *Eryngium fœtidum*. [B, 121 (*a*, 24).]—**E. d'eau, E. de berger.** The *Alisma (Damasonium) stellatum*. [B, 121, 173 (*a*, 24).]—**E. de mer.** The *Ornithogalum umbellatum*. [B, 121, 173.]—**E's des pôles.** See *Polar* STARS.—**E. de Verheyen.** See STELLULÆ *Verheyenii*.—**E. du matin.** The *Pharbitis nil*. [B, 121, 173 (*a*, 24).]—**E. fille.** See DIASTER.—**E. mère.** See ASTER (1st def.).

ÉTOILÉ (Fr.), adj. A-twa3-la. Stellate; as a n., a stellate bandage; as a n., in the f. pl., *étoilées*, see STELLATÆ.

ÉTONNEMENT (Fr.), n. A-to3n-ma3n2. See STUPOR.—**E. cérébral.** Of Trousseau, a stupor analogous to that which follows fright, occurring in cerebral apoplexy when the brain is compressed or lacerated. [D, 72.]—**E. du sabot.** A painful, congestive state of the vascular tissue of the hoof; caused by a shock against a hard body. [A, 301 (*a*, 21).]

ETOR (Lat.), n. n. E(a)'to2r. Gen., *e'toros (-is)*. Gr., ἦτορ. Ger., *Herz, Leben*. The heart. [A, 322 (*a*, 21).]

ÉTOUFFEMENT (Fr.), n. A-tuf-ma3n2. See SUFFOCATION.

ÉTOUPADE (Fr.), n. A-tu-pa3d. A wad of tow. [L, 88.]—**E. de Moschati.** A wad of tow impregnated with a mixture of 2 grammes of alum, beaten with the white of an egg; used for ulcerated frost-bites and bed-sores. [L, 77 (*a*, 14).]

ÉTOUPE (Fr.), n. A-tup. See TOW.—**E. goudronnée.** See OAKUM.

ÉTOURDISSEMENT (Fr.), n. A-tur-des-ma3n2. See VERTIGO.

ÉTRANGLÉ (Fr.), adj. A-tra3n2-gla. Strangulated. [A, 385 (*a*, 21).]

ÉTRANGLE-CHIEN (Fr.), n. A-tra3n2-g'l-shi2-a2n2. See ASPERULA *cynanchica*.

ÉTRANGLE-LOUP (Fr.), n. A-tra3n2-g'l-lu. The *Aconitum lycoctonum* and the *Paris quadrifolia*. [B, 121, 173 (*a*, 24).]

ÉTRANGLEMENT (Fr.), n. A-tra3n2-gl'ma3n2. See STRANGULATION and CONSTRICTION.—**E's annulaires** [Ranvier]. See NODES *of Ranvier*.—**E. aponévrotique.** The state in which an inflamed part is prevented from swelling by an unyielding aponeurosis. [A, 385 (*a*, 21).]

ÉTRANGUILLON (Fr.), n. A-tra3n2-gel-yo2n2. A form of angina which attacks horses and cows. [L, 42.]

ÉTRETAT (Fr.), n. A-tr'-ta3. A sea-bathing resort on the English Channel, in the department of the Seine-Inférieure, France. [A, 319 (*a*, 21).]

ÉTRIER (Fr.), n. A-tre-a. 1. See STAPES. 2. A figure-of-eight bandage for the foot. [A, 301.]

ÉTRILLE (Fr.), n. A-trel-y'. The *Agaricus labyrinthiformis* and the *Dœdalea quercina*. [B, 121, 173 (*a*, 24).]

ÉTROITESSE (Fr.), n. A-trwa3-te2s. See STENOSIS.—**E. absolue** [Velpeau]. Simple narrowing of the pelvis without alteration of shape (see PELVIS *æquabiliter justo minor*). [A, 96.]—**E. relative** [Velpeau]. Narrowing of the pelvis from distortion. [A, 96.]

ETRON (Lat.), n. n. E(a)'tro2n. Gr., ἦτρον. See HYPOGASTRIUM.

ETRONCUS (Lat.), n. n. E2t(at)-ro2n2k'u3s(u4s). From ἦτρον, the hypogastrium, and ὄγκος, a mass. Ger., *Unterleibsgeschwulst*. A tumor in the hypogastrium. [A, 322 (*a*, 21).]

ETTE, n. In Malabar, a tree (probably a species of *Strychnos*) all parts of which, boiled in the oil of *Helia azedarach*, are used externally for snake-bites and as an embrocation, and internally, infused with wine, as a febrifuge. [B, 88 (*a*, 14).]

ETTE-AMBE, n. In Ceylon, the *Mangifera indica*. [B, 121 (*a*, 24).]

ETTLE, n. E2t't'l. See NETTLE.

ETUA, n. The *Kigelia africana*. [B, 121 (*a*, 24).]

ÉTUI (Fr.), n. A-twe. See SHEATH.—**E. cortical.** See STEM.—**E. de l'hippocampe.** The hippocampal convolution. [I, 55 (K).]—**E. médullaire.** See *Medullary* CANAL.—**E. plastinien.** Of Carnoy, a resistant membrane supposed to inclose each nuclear fibril. [J, 15.]

ÉTUVE (Fr.), n. A-tu6v. 1. An oven or stove. [A, 301.] 2. A natural or artificial recess connected with a thermal mineral spring in which the vapor of the latter serves for a species of bath; also the use of mineral waters under such conditions. [L, 49 (*a*, 14).]—**E. humide.** See VAPORARIUM.—**E. sèche.** See TEPIDARIUM.

ETYMODRYS (Lat.), n. f. E2t-i2m(u6m)'o(o2)-dri2s(dru6s). Gen., *etymod'ryos (-is)*. Gr., ἐτυμόδρυς (from ἔτυμος, true, and δρῦς, the oak). The genus *Quercus*. [L, 94.]

ETYPIC, ETYPICAL, adj's. E-ti2p'i2k, -i2k-a2l. From *ex*, without, and τύπος, a type. See ATYPICAL.

EUÆMIA (Lat.), n. f. U2-e'(a3-a')-mi2-a3. Gr., εὐαιμία (from εὖ, well, and αἷμα, blood). Ger., *Euämie, gute Beschaffenheit des Bluts*. Of Galen, a healthy condition of the blood. [A, 325 (*a*, 21).]

EUÆSTHESIA (Lat.), n. f. U2-e2s(a3-e2s)-thez(thas)'i2-a3. Gr., εὐαισθησία (from εὖ, well, and αἴσθησις, sensation). Ger., *gute Beschaffenheit der Sinne*. A normal condition of the senses. [A, 322 (*a*, 21).]

EUALTHES (Lat.), adj. U2-a2l(a3l)'thez(thas). Gr., εὐαλθής. Of Hippocrates, easily healed. [A, 325 (*a*, 21).]

EUANALEPSIS (Lat.), n. f. U2-a2n(a3n)-a3-le2p(lap)'si2s. Gen., *euanalep'seos (-is)*. From εὖ, easily, and ἀνάληψις, recovery. Rapid recovery from disease. [A, 322 (*a*, 21).]

EUANALEPTOS (Lat.), adj. U2-a2n(a3n)-a3-le2p(lap)'to2s. Gr., εὐανάληπτος. 1. Easy to recover. 2. Of Hippocrates, easily and comfortably suspended (said of fractured limbs). [A, 311, 325 (*a*, 21).]

EUANASPHALTOS (Lat.), adj. U2-a2n(a3n)-a3-sfa2l(sfa3l)'-to2s. Gr., εὐανάσφαλτος. See EUALTHES.

EUANTHEMON (Lat.), **EUANTHEMUM** (Lat.), n's n. U2-a2n(a3n)'the2m-o2n, -u3m(u4m). Gr., εὐάνθεμον. The genus *Anthemis*. [L, 84.]

EUANTHES (Lat.), adj. U2-a2n(a3n)'thez(thas). Gr., εὐανθής (from εὖ, well, and ἄνθος, a flower). Blooming; of the blood, red; of the urine, reddish. [Hippocrates (A, 325 [*a*, 21]).]

EUAPHES (Lat.), adj. U^2'a^{2}f(a^{3}f)-ez(as). Gr., εὐαφής (from εὖ, well, and ἁφή, the sense of touch). Ger., *weich, sanft.* 1. Yielding to the touch, soft, delicate. 2. Touching gently. [A, 311, 322 (α, 21).]

EUAPHIA (Lat.), n. f. U^2-a^{2}f(a^{3}f)'i^2-a^3. Gr., εὐάφεια. Ger., *Weichheit, Sanftheit.* Softness to the touch. [A, 311, 322 (α, 21).]

EUAPHION (Lat.), n. n. U^2-a^{2}f(a^{3}f)'i^2-o^{2}n. Gr., εὐάφιον. An old preparation for hæmorrhoids. [A, 325 (α, 21).]

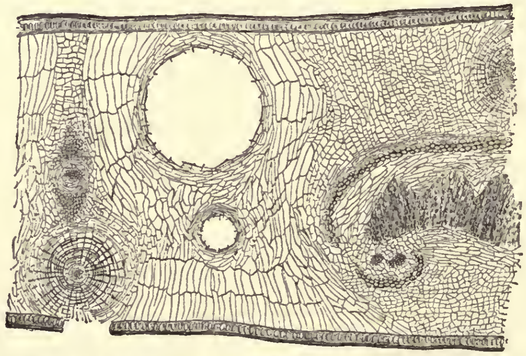
EUBLE (Fr.), n. U^5-b'l. The *Sambucus ebulus.* [B, 121, 173 (α, 24).]

EUCALIN, EUCALOSE, n's. U^2'ka^2-li^{2}n, -los. An amorphous substance, $C_{12}H_{12}O_6$, produced by the decomposition of melitose. Its aqueous solution is dextrorotary. [B, 3, 4.]

EUCALYN, n. U^2'ka^2-li^{2}n. Fr., *eucalyne* (1st def.). 1. Of Berthelot, a syrupy, slightly saccharine principle, $C_{12}H_{12}O_{12} + 2HO$, which remains undecomposed after the fermentation of melitose. [A, 301 (α, 21).] 2. See Eucalin.

EUCALYPTENE, n. U^2-ka^{2}l-i^{2}p'ten. Fr., *eucalyptène.* A substance, $C_{12}H_{18}$, $C_{10}H_{16}$, or $C_{24}H_{18}$, according to various writers, boiling at 165° C.; obtained by distilling eucalyptol over phosphoric anhydride or by treating it with hydrochloric acid. [B, 244 (α, 27).]

EUCALYPTIN, n. U^2-ka^{2}l-i^{2}p'ti^{2}n. Of Pereira, a pectin-like substance obtained from a tincture of Botany Bay kino by treating it with ammonia. [B, 5 (α, 21).]



EUCALYPTOL, n. U^2-ka^{2}l-i^{2}p'to^{2}l. Fr., *e.* Ger., *E.* A homologue of camphor, $C_{12}H_{20}O_2$; a thin, colorless, or pale-yellow liquid of camphoraceous odor, tasting like mint, of the sp. gr. of 0·905, boiling at 175° C., readily soluble in alcohol, less soluble in water; obtained by distilling the resin, leaves, or wood of *Eucalyptus globulus;* used internally (inhaled, injected, or swallowed) as an antiseptic, antizymotic, expectorant, antiperiodic, and balsamic remedy, and externally for various rubefacient and antiseptic applications, in the form of a liniment, ointment, or alcoholic or ethereal solution. [A, 301, 319 (α, 21); B, 10, 244 (α, 27).]

EUCALYPTOLENE, n. U^2-ka^{2}l-i^{2}p'to^{2}l-en. Fr., *eucalyptolène.* Ger., *Eucalyptolen.* A hydrocarbon polymerous with eucalyptene, boiling at 300° C.; obtained by treating eucalyptol with phosphoric acid. [A, 385 (α, 21); Thomas (α, 27).]

EUCALYPTUS (Lat.), n. f. U^2-ka^{2}l(ka^{3}l)-i^{2}p(u^{6}p)'tu^{3}s(tu^{4}s). From εὖ, well, and καλύπτειν, to cover. Fr., *e.* Ger., *E., Schönmütze.* It., *eucalipto.* Sp., *eucaliptus.* 1. Australian gum-tree; a genus of the *Myrtaceæ,* or of the *Leptospermeæ* [Bentham and Hooker], indigenous to Australia and Tasmania, and naturalized in various semi-tropical countries. The trees often grow from 200 to 400 feet in height and 80 feet in circumference, and have been supposed to destroy malaria in localities where they are made to grow, through their taking up from marshy soils and evaporating from their leaves large daily amounts of water, as well as exhaling considerable quantities of a volatile oil from the leaves. For this purpose they have been planted in various marshy localities. 2. Of the U. S. Ph., the leaves of *E. globulus.* [B, 5, 173, 180, 185 (α, 24).]—**Alcoolature d'e.** [Fr. Cod.] (Fr.). A preparation made by bruising the fresh leaves of *E. globulus,* macerating them for ten days in a closed vessel in an equal quantity of 90-per-cent. alcohol, stirring from time to time, straining with expression, and filtering. [B, 113 (α, 21).]—**Aqua eucalypti.** See *Eau distillée d'e.*—**Cigarettes d'e.** [Fr. Cod.] (Fr.). Cigarettes each containing 1 gramme of dried e.-leaves. [B.]—**Eau distillée d'e.** [Fr. Cod.] (Fr.). Lat., *aqua eucalypti.* A preparation made by distilling 1 part of the leaves of *E. globulus* with water until 4 parts of distillate are obtained. [B.]—**E. acmenoides.** An oil-yielding species. [F. v. Müller, "Proc. of the Am. Pharm. Assoc.," xxi.]—**E. à éperon** (Fr.). See *E. rostrata.*—**E. albens.** The white box of Australia. [α, 24.]—**E. à manne** (Fr.). See *E. mannifera.*—**E. amygdalina.** Peppermint-tree; a species in high repute as a means of rendering malarious localities habitable. It is one of the chief sources of e.-oil. [F. v. Müller, "Am. Jour. of Pharm.," Apr., 1886, p. 181; "Pharm. Jour. and Trans.," Jan. 9, 1886, p. 581; B, 5, 172, 185 (α, 24).]—**E. citriodora.** A species cultivated in the East Indies, by some considered a variety of *E. maculata.* Its oil has a citron-like odor; its bark yields a species of kino used in tanning and dyeing. [B, 172 (α, 24).]—**E. corymbosa.** Victoria bloodwood; a species cultivated in Australia and the East Indies which yields a valuable kino used for tanning and dyeing. [B, 172, 185 (α, 24).]—**E. crebra.** A species of which the foliage has a lemon odor, and the oil closely resembles in odor that of verbena. [F. v. Müller, *l. c.*]—**E. dealbata.** The gray box of Victoria. [B, 275 (α, 24).]—**E. dumosa.** A small variety of *E. incrassata,* growing in Australia. The leaves and slender twigs, when punctured or injured, yield an exudation which, when dried, constitutes e. manna. [F. v. Müller, *l. c.*; "Proc. of the Am. Pharm. Assoc.," xxi (α, 14).]—**E. eugenioides.** An oil-yielding species. [F. v. Müller, *l. c.*]—**E. fissilis.** Messmate-tree; a species growing in South Australia, New South Wales, and Tasmania. The fresh leaves yield a volatile oil of sp. gr. 0·903. ["Proc. of the Am. Pharm. Assoc.," xxi (α, 14).]—**E. gigantea.** The stringy-bark; it yields one of the best qualities of timber. [B, 19 (α, 24).]—**E. globulus.** Fr., *e. globuleux, bois de gommier.* Blue-gum-tree. The leaves (e. [U. S. Ph.], Fr., *feuilles d'e.* [Fr. Cod.], Ger., *E'blätter*) are highly camphoraceous, aromatic, bitter, and astringent, from the presence of an essential oil (see Eucalyptol and *Oil of e.*). [B, 5, 173, 185 (α, 24).]—**E. goniocalyx.** The white-gum-tree of Australia, a species yielding e.-oil of 0·914 sp. gr. ["Proc. of the Am. Pharm. Assoc.," xxi, xxvii (α, 14).]—**E. gracilis.** A species furnishing a large amount of e. oil. [F. v. Müller, *l. c.*]—**E.-gum.** Red-gum, Australian kino; a gum collected from incisions made into the trunk of several species of *E.,* but especially *E. resinifera.* It is originally of dark-red, but appears in commerce in large irregular dark brown pieces, of a bitter taste. ["Proc. of the Am. Pharm. Assoc.," xxxi (α, 14).]—**E. gummi.** The Tasmanian cider-tree. It yields a cool, refreshing liquid from incisions made into its bark during the spring. [B, 19 (α, 24).]—**E. hæmastoma.** A species yielding an oil with a peppermint-like odor. [F. v. Müller, *l. c.*]—**E. incrassata.** One of the chief sources of e. oil, the variety which it furnishes being, however, used chiefly in the arts. [F. v. Müller, *l. c.*]—**E. kino.** See *E. resinifera.*—**E.-leaves.** Lat., *e.* [U. S. Ph.]. Fr., *feuilles d'e.* [Fr. Cod.]. Ger., *E'blätter.* The leaves of *E. globulus.*—**E. leucoxylon.** The iron-bark-tree of Australia. The leaves yield e. oil. ["Proc. of the Am. Pharm. Assoc.," xxi, xxvii (α, 14).]—**E. longifolia.** The wollybutt of Victoria and New South Wales; it yields e. oil. ["Proc. of the Am. Pharm. Assoc.," xxi (α, 14).]—**E. macrocarpa.** A stout shrub found growing in Australia, from 6 to 8 ft. high. [B, 219 (α, 21).]—**E. maculata.** In Queensland, the spotted gum-tree; a species yielding Australian kino. A variety of this species is known as *E. citriodora.* [B, 5; F. v. Müller, *l. c.*; "Proc. of the Am. Pharm. Assoc.," xxiv (α, 14).]—**E.-manna.** A variety of manna obtained by puncturing the bark and leaves of *E. mannifera,* occurring in small, rounded, and opaque masses, and said to resemble ordinary manna in medicinal properties. [B, 5, 173, 180 (α, 24).]—**E. mannifera.** Fr., *e. à manne.* Ger., *mannabringende Schönmütze.* A species found in Australia, yielding e.-manna. [B, 5 (α, 27).]—**E. melliodora.** A species poor in oil. [F. v. Müller, *l. c.*]—**E. microcorys.** An oil-yielding species. [F. v. Müller, *l. c.*]—**E. obliqua.** Fr., *e. oblique.* Stringy-bark-tree of Australia, a species furnishing a moderate amount of oil of sp. gr. 0·500. [F. v. Müller, *l. c.*; "Proc. of the Am. Pharm. Assoc.," xxi, xxvii (α, 14).]—**E. odorata.** The peppermint-tree of South Australia; it furnishes a large amount of e. oil. [F. v. Müller, *l. c.*; "Proc. of the Am. Pharm. Assoc.," xxi (α, 14).]—**E.-oil.** See *Oil of e.*—**E. oleosa.** The mallee-scrub of Victoria; a small species, furnishing a volatile oil with a mint-like odor, one of the chief sources of e. oil. [F. v. Müller, *l. c.*; "Proc. of the Am. Pharm. Assoc.," xxi, xxvii (α, 14).]—**E. paniculata.** The bloodwood-tree of Queensland.—**E. piperita.** Fr., *e. poivré.* A species furnishing an oil with a peppermint-like odor. [F. v. Mül-

EUCALYPTUS GLOBULUS. (AFTER DE LANESSAN.)

TRANSVERSE SECTION OF THE LEAF OF EUCALYPTUS GLOBULUS. (AFTER DE LANESSAN.)

ler, *l. c.*]—**E. raveretiana.** An oil-yielding species. [F. v. Müller, *l. c.*]—**E. resinifera.** Fr., *e. résinifère, arbre à la gomme.* Ger., *harzbringende Schönmütze.* One of the chief sources of Australian kino. [B, 5, 173, 180 (*a*, 24).]—**E. robusta.** Fr., *e. gigantesque.* A species found in Australia, with hard durable wood; it yields gum. [B, 173 (*a*, 24).]—**E. rostrata.** Fr., *e. à éperon.* A variety, according to some, of *E. robusta;* it is poor in oil, but yields the most important of the e. gum resins, a mucilaginous astringent said to be used as a substitute for kino. [B, 5, 173 (*a*, 24); F. v. Müller, *l. c.*]—**E. salmonophloia.** An oil-yielding species. [F. v. Müller, *l. c.*]—**E. salubris.** A West Australian species. [F. v. Müller, *l. c.*]—**E. staigeriana.** See *E. crebra.*—**E. stuartiana.** A species of the white-gum-tree found in Australia; one of the most gigantic in size, growing to a height of 425 to 500 feet. ["Proc. of the Am. Pharm. Assoc.," xxi (*a*, 14).]—**E. uncinata.** A species furnishing a large amount of e. oil. [F. v. Müller, *l. c.*]—**E. viminalis.** A species found in New South Wales, South Australia, Tasmania, and Victoria; one of the sources of *e. manna.* It is poor in oil. [B, 5 (*a*, 24); F. v. Müller, *l. c.*; "Proc. of the Am. Pharm. Assoc.," xxi (*a*, 14).]—**Extractum eucalypti fluidum** [U. S. Ph.]. Fr., *extrait liquide d'e.* Ger., *flüssiges Eukalyptusextrakt.* Fluid extract of e.; made by moistening 25 oz. (av.) of e. in No. 30 powder with 8¾ oz. (av.) or 10¼ fl. oz. of alcohol, packing firmly in a cylindrical percolator, adding enough alcohol to saturate the powder and leave a stratum above it when the liquid begins to percolate, closing the lower orifice and closely covering the percolator, macerating for forty-eight hours, allowing the percolation to proceed, gradually adding alcohol, until the e. is exhausted, reserving the first 20¼ fl. oz. of the percolate, and evaporating the remainder to a soft extract, dissolving this in the reserved portion, and adding enough diluted alcohol to make the fluid extract measure 24 fl. oz. It is of a deep-brown or olive-brown color, and has the astringent, bitter, and slightly aromatic taste of the leaves. [B, 81 (*a*, 21).]—**Feuilles d'e** [Fr. Cod.] (Fr.). See *E.-leaves.*—**Fluid extract of e.** See *Extractum eucalypti fluidum.*—**Folia eucalypti.** See *E.-leaves.*—**Oil of e.** Lat., *oleum eucalypti* [U. S. Ph.]. Fr., *huile volatile d'e.* [Fr. Cod.]. Ger., *E'öl, Eukalyptusöl.* An essential oil obtained by distilling the leaves of various species, chiefly *E. amygdalina* and *E. dumosa* (together with *E. oleosa, E. incrassata, E. gracilis,* and *E. uncinata*). The oil is largely used as a diluent for valuable essential oils employed as perfumes, and as a solvent of resins. In Australia it is a domestic remedy for rheumatism, and is used in veterinary practice as an embrocation for swellings, bruises, and stiff joints. [F. v. Müller, *l. c.*]—**Oleum æthereum eucalypti globuli rectificatum.** See Eucalyptol.—**Oleum eucalypti** [U. S. Ph.]. See *Oil of e.*—**Sirop d'e.** [Fr. Cod.] (Fr.). A preparation made by infusing for six hours in a closed vessel 1 part of the dried petals of *E. globulus* in 15 parts of boiling, distilled water, straining with expression, allowing to settle, decanting, and adding white sugar in the proportion of 18 parts to 10 of colature, allowing to come quickly to a boil, and straining. [B, 113 (*a*, 21).]—**Teinture d'e** [Fr. Cod.] (Fr.). A preparation made by macerating for ten days in a closed vessel 1 part of coarsely powdered *E. globulus* in 5 parts of 80-per-cent. alcohol, stirring from time to time, straining with expression, and filtering. [B, 113 (*a*, 21).]—**Tincture eucalypti globuli.** Ger., *E'tinctur.* Of Lorimer, a tincture made by digesting 1 part of the fresh or dried leaves of e. with 3 or 5 parts of alcohol; used in intermittent fever. [A, 319 (*a*, 21).]—**Tisane d'e.** [Fr. Cod.] (Fr.). A preparation made by infusing for half an hour 1 part of the dried leaves of *E. globulus* in 100 parts of boiling distilled water, and straining. [B, 113 (*a*, 21).]—**Vin d'e.** [Fr. Cod.] (Fr.). A preparation made by reducing 3 parts of the root of *E. globulus* to a coarse powder, macerating it for 10 days in 100 parts of Grenache wine, in a closed vessel, stirring from time to time, straining with expression, and filtering. [B, 113 (*a*, 21).]

EUCARDIOS (Lat.), adj. U^2-ka^{3}rd'i^2-os. Gr., εὐκάρδιος (from εὖ, well, and καρδία, the stomach). Of Galen, grateful to the stomach. [A, 325 (*a*, 21).]

EUCHARISTOS (Lat.), n. m. U^2-ka^{2}r(cha^{3}r)-i^{2}st'o^{2}s. Gr., εὐχάριστος (from εὖ, well, and χαρίζεσθαι, to be pleasing). Of Myrepsus, an antidote. [L, 94.]

EUCHERES (Lat.), adj. U^2'ke^{2}r(ch^{2}e^{2}r)-ez(as). Gr., εὐχερής (from εὖ, easily, and χείρ, the hand). Of Hippocrates, mild, void of danger (said of convulsions). [A, 325 (*a*, 21).]

EUCHEUMA (Lat.), n. n. U^2-ku^2(ch^{2}u^2)'ma^3. Gen., *eucheum'atos (-is).* Of Agardh, a genus of *Algæ,* of the *Sphærococcoideæ.* [B, 121 (*a*, 24).]—**E. gelatinæ.** A species yielding agar-agar. [B, 81.]—**E. spinosum** [Agardh]. A species of the *Algæ,* brownish-white, and having thorny projections on its branches. It furnishes agar-agar. [B, 81 (*a*, 27).]

EUCHLORINE, n. U^2-klor'en. Lat., *euchlorinium.* Fr., *e.* Ger., *Euchlorin.* Of Davy, a gas produced by treating potassium chlorate with hydrochloric acid, now known to be a mixture of free chlorine and chlorine peroxide. It is a very powerful oxidizing and disinfecting agent. [B, 3.]

EUCHRESTA (Lat.), n. f. U^2-kre^{2}st(ch^{2}re^{2}st)'a^3. Fr., *euchreste.* A genus of the *Leguminosæ.* [L, 49, 107.]—**E. Horsfeldii.** A variety growing in India, where the seeds are used as a specific for the bites of poisonous animals. [L, 49, 107.]

EUCHRŒA (Lat.), n. f. U^2-kre'(ch^{2}ro^2'e^2)-a^3. Gr., εὔχροια (from εὖ, well, and χρώς, the complexion). Of Hippocrates, a normal state of the complexion. [A, 311 (*a*, 30).]

EUCHROMATOPSIA (Lat.), n. f. U^2-krom(ch^{2}rom)-a^{2}t(a^{3}t)-o^{2}p'si^2-a^3. From εὖ, well, χρῶμα, color, and ὄψις, sight. The faculty of distinguishing colors correctly. [L, 158 (*a*, 29).]

EUCHYLIA (Lat.), n. f. U^2-kil(ch^{2}u^{6}l)'i^2-a^3. Gr., εὐχυλία (from εὖ, well, and χυλός, the chyle). Ger., *gute Beschaffenheit des Chylus.* A healthy condition of the chyle. [A, 322 (*a*, 21).]

EUCHYLOS (Lat.), **EUCHYLUS** (Lat.), adj's. U^2-kil(ch^{2}u^{6}l)'-o^{2}s, -u^{3}s(u^{4}s). Gr., εὔχυλος. Having healthy juices. [L, 94.]

EUCHYMIA (Lat.), n. f. U^2-kim(ch^{2}u^{6}m)'i^2-a^3. Gr., εὐχυμία (from εὖ, well, and χυμός, juice). A healthy condition of the juices. [A, 322 (*a*, 21).]

EUCHYMUS (Lat.), adj. U^2-kim(ch^{2}u^{6}m)'u^{3}s(u^{4}s). Gr., εὔχυμος. Having healthy juices. [A. 322 (*a*, 21).]

EUCINÉSIE (Fr.), n. U^6-se-na-ze. See Eukinesia.

EUCLEA (Lat.), n. s. U^2'kle^2-a^3. A genus of ebenaceous trees or shrubs. [B, 42 (*a*, 24).]—**E. racemosa.** Fr., *e. rameux.* A species found in South Africa. The fruit is sweet and is eaten by the Hottentots, who also make a kind of wine from it. [B, 173 (*a*, 24).]—**E. undulata.** Of Thunberg, the *guarri* of the Hottentots (see *E. racemosa*). [B, 46, 88 (*a*, 14).]

EUCŒLIOS (Lat.), adj. U^2-sel'(ko^2'e^{2}l)-i^2-o^{2}s. Gr., εὐκοίλιος (from εὖ, easily, and κοιλία, the belly). Of Dioscorides, easing the bowels (said of fresh cherries); as a n., in the n. pl., *eucœlia,* cherries. [A, 311, 325 (*a*, 21).]

EUCRASIA (Lat.), n. f. U^2-kra(kra^3)'zi^2(si^2)-a^3. Gr., εὐκρασία (from εὖ, easily, and κρᾶσις, a mixing). Fr., *eucrasie.* Of the humoral pathologists, the state of health resulting from a normal elaboration of the juices. [A, 301.]

EUCRASIC, adj. U^2-kraz'i^{2}k. Fr., *eucrasique.* 1. In a state of eucrasia. 2. Capable of ameliorating dyscrasiæ. [A, 301 (*a*, 21).]

EUCRASY, n. U^2'kra-zi^2. See Eucrasia.

EUCRINES (Lat.), adj. U^2'kri^{2}n-ez(as). Gr., εὐκρίνης. 1. Of Galen, distinct, discrete, explicit. 2. Of Hippocrates, easy to diagnosticate (said of a disease). [A, 325 (*a*, 21).]

EUCYCLIC, adj. U^2-si^{2}k'li^{2}k. Gr., εὔκυκλος (from εὖ, well, and κύκλος, a circle). Fr., *eucyclique.* Of Braun, having isomerous and regularly alternate whorls (said of a flower). [B, 121, 279 (*a*, 24).]

EUCYCLOS (Lat.), adj. U^2-si^{2}k(ku^{6}k)'lo^{2}s. Gr., εὔκυκλος (from εὖ, well, and κύκλος, a circle). Orbicular, circular. [A, 325 (*a*, 21).]

EUCYESIA (Lat.), **EUCYESIS** (Lat.), n's. f. U^2-si(ku^6)-ez-(as)'i^2-a^3, -es(as)'i^{2}s. Gen., *eucyes'iœ, -eos (-is).* From εὖ, favorably, and κύησις, pregnancy. Normal pregnancy. [A, 88.]

EUDIAPNEUSTIA (Lat.), n. f. U^2-di(di^2)-a^{2}p(a^{3}p)-nu^{2}st'i^2-a^3. From εὖ, easily, διά, through, and πνεῖν, to blow. Fr., *eudiapneustie.* A healthy condition of transpiration. [L, 41, 42, 43.]

EUDIOMETER, n. U^2-di^2-o^{2}m'e^{2}t-u^{5}r. Lat., *eudiometrum* (from εὐδία, fair weather, and μέτρον, a measure). Fr., *eudiomètre.* Ger., *E., Luftgütemesser* (1st. def.). 1. Originally, an instrument for determining the amount of oxygen present in the air, upon which the salubrity of the latter was thought to depend. [B, 2.] 2. An instrument for exploding gases by means of an electric spark in Bunsen's method of volumetric analysis of gases. It is a graduated glass tube, from 500 to 600 mm. long and 20 mm. in diameter, open at one end and closed at the other. Two platinum wires enter it at its closed end, the glass being blown around them so as to make air-tight joints. By means of these wires the electric spark is passed through the gas collected in the inverted tube. [*a*, 27.]—**Explosion e.** See *E.* (2d def.).

EUDIOMETRY, n. U^2-di^2-o^{2}m'e^{2}t ri^2. Fr., *eudiométrie.* See *Gasometric* analysis.

EUDIPLEURAL, adj. U^2-di-plu^{2}r'a^{2}l. From εὖ, well, δις, twice, and πλευρά, the side. Ger., *eudipleurisch.* Having well-marked bilateral symmetry. [L, 176.]

EUDYNAMIA (Lat.), n. f. U^2-di^{2}n(du^{6}n)-a(a^3)'mi^2-a^3. From εὖ, well, and δύναμις, power. 1. Of Bartel, the specific vital power. [A, 322 (*a*, 21).] 2. See Eucrasia.

EUECPLYTOS (Lat.), adj. U^2-e^{2}k'pli^2(plu^6)-to^{2}s. Gr., εὐέκπλυτος (from εὖ, well, and ἐκπλύνειν, to wash out). Of Hippocrates, having the property of cleansing or washing (said of ptisans). [A, 325 (*a*, 21).]

EUECTICOS (Lat.), **EUECTICUS** (Lat.), adj's. U^2-e^{2}k'ti^{2}k-o^{2}s, -u^{3}s(u^{4}s). Gr., εὐεκτικός, εὐέκτης, εὔεκτος. 1. In good condition, healthy. 2. Conducive to health; as a n., in the f., *euectica,* hygienic gymnastics. [A, 311, 325 (*a*, 21).]

EUELCES (Lat.), n. m. U^2-el'sez(kas). Gr., εὐελκής (from εὖ, easily, and ἕλκος, an ulcer). A person in whom ulcers are readily cured. [A, 325 (*a*, 21).]

EUELPIDION (Lat.), **EUELPIDIUM** (Lat.), n's. n. U^2-e^{2}l-pi^{2}d'i^2-o^{2}n, -u^{3}m(u^{4}m). Gr., εὐελπίδιον. A liquid collyrium. [L, 94.]

EUEMBOLOS (Lat.), n. m. U^2-e^{2}m'bo^{2}l-o^{2}s. Gr., ευέμβολος (from εὖ, well, and ἐμβάλλειν, to insert). A surgeon skilled in setting bones. [A, 325 (*a*, 21).]

EUEMES (Lat.), **EUEMETOS** (Lat.), adj's. U^2'e^{2}m-ez(as), u^2-e^{2}m-e(a)'to^{2}s. Gr., εὐεμής, εὐέμητος (from εὖ, easily, and ἐμεῖν, to vomit). Vomiting easily or inclined to vomit. [A, 325 (*a*, 21).]

EUENIOS (Lat.), adj. U^2-en(an)'i^2-o^{2}s. Gr., εὐήνιος (from εὖ, easily, and ἡνία, the reins). Yielding, tractable. [A, 325 (*a*, 21).]

EUERETHISIA (Lat.), n. f. U^2 e^{2}r-e^2-thi(the)'zi(si^2)-a^3. From εὖ, easily, and ἐρεθίζειν, to excite. Of Bégin, the normal irritability of the muscles. [A, 322 (*a*, 21).]

EUETHES (Lat.), adj. U^2-eth(ath)'ez(as). Gr., εὐήθης. See Benign.

EUEXIA (Lat.), n. f. U^2-e^{2}x'i^2-a^3. Gr., εὐεξία. Fr., *euexie, euhexie.* Ger., *Euhexie, Euphorie.* Of Galen, a healthy habit of body. [A, 326 (*a*, 21).]

EUGENATE, n. U^2'je^{2}n-at. Fr., *eugénate.* A salt of eugenic acid. [B.]

EUGÉNÉSIQUE (Fr.), adj. U^6-zha-na-zek. Fertile, or more fertile than others (said of the crossing of breeds). [A, 301 (*a*, 21).]

EUGENIA (Lat.), n. f. U^2-jen(ge^{2}n)-i(e)'a^3. Gr., εὐγένεια (from εὐγενής, well-born). Fr., *eugénia.* Ger., *Eugenia.* West India

myrtle; a genus of the *Myrtaceæ*, tribe *Myrteæ*. [B, 42, 275 (α, 24).]—**E. acris.** The *Myrcia acris*. [B, 81 (α, 21).]—**E. acutangula.** Fr., *eugénia à angles aigus*. See Barringtonia *acutangula*.—**E. angustifolia.** A species found in the West Indies and Venezuela; the seeds are used as an antodontalgic, in stomatitis, and, in cataplasm, to relieve after-pains. [B, 46, 180 (α, 24).]—**E. aromatica.** See *E. caryophyllata*.—**E. arrabidæ.** A variety furnishing an aromatic bark, used in India as an astringent. [L, 49, 187.]—**E. caryophyllata.** Fr., *giroflier aromatique, bois de clou.* Ger., *Gewürzreicher, Gewürznelken*. Clove-tree; an evergreen species indigenous to the Moluccas, bearing numerous small flowers in terminal cymes. It is cultivated in the adjacent islands, eastern Africa, and the West Indies. The unexpanded flowers or dried flower-buds are the cloves of the U. S. and Br. Ph's. [B, 5, 173, 180 (α, 24).] Cf. Cloves and Caryophyllus.—**E. caryophyllifolia.** See Syzygium *caryophyllifolium*.—**E. cauliflora.** A species found in Brazil, having the properties of *E. Michelli*. [B, 180 (α, 24).]—**E. cheken.** The *Myrtus cheken*. [B, 81 (α, 21).] See Chequen.—**E. corticosa.** See Syzygium *caryophyllifolium*.—**E. corymbosa.** A species found in the East Indies. An infusion of the bark is used in ophthalmia. [B, 180 (α, 24).]—**E. cotinifolia.** The *Myrtus acris*. [B, 173 (α, 24).]—**E. disticha.** In the West Indies, the wild coffee-tree. [B, 275 (α, 24).]—**E. floribunda.** A species found in the West Indies, resembling *E. Michelli* in properties. [B, 180 (α, 24).]—**E. fragrans.** Zebra-wood; a species found in Jamaica, with fragrant leaves; employed in diarrhœa, in dyspepsia, and as a vulnerary. [B, 180 (α, 24).]—**E. fructo candido.** Fr., *eugénia à fruit blanc*. A variety of *E. jambos*. [B, 173 (α, 24).]—**E. fructo nigro.** Fr., *eugénia à fruit noire*. A variety of *E. jambos*. [B, 173 (α, 24).]—**E. jambolana.** The *Syzygium jambolanum*. [W. Lascelles-Scott, "Brit. and Colon. Druggist," July 31, 1886, p. 107.]—**E. jamboo, E. jambos, E. jamrose.** The *Jambosa vulgaris*. [B, 180 (α, 24).]—**E. lineata.** Guava-berry; a species found in the island of Tortola, used like *E. Michelli*. The fruit is eaten, and also furnishes a cordial. [B, 180, 185 (α, 24).]—**E. macrocarpa.** A species indigenous to the East Indies, cultivated for its fruit. [B, 180 (α, 24).]—**E. maire.** A species growing in New Zealand, where the natives call it *whawhako*. The bark contains 16·7 per cent. of tannin. ["Proc. of the Am. Pharm. Assoc.," xxiv (α, 14).]—**E. malaccensis.** Fr., *eugénia de Malacca*. Malay apple; a species found in India and the Malayan Peninsula. The large, quince-shaped fruit (Fr., *jamrose de Malacca*), with an odor of apples and a delicate flavor, is eaten. The bark is used in decoction as an astringent. An allied species (or variety) is found in the Sandwich and Fiji Islands, where the fruit is called *Kavika*. [B, 173, 180, 185, 275 (α, 24).]—**E. Michelli.** Fr., *eugénia du Brésil*. A species growing in Brazil. The fruits (Fr., *cerises de Cayenne*) are edible and refrigerant, and furnish a syrup, a vinegar, and a wine. [B, 173, 180 (α, 24).]—**E. montana.** See *E. fragans*.—**E. oblata.** A species indigenous to the East Indies and cultivated in Chittagong for its fruit. [B, 180 (α, 24).]—**E. paniculata.** See *E. fragrans*.—**E. pimenta.** See Pimenta *officinalis*.—**E. pseudo-caryophyllus.** A species found in Brazil, all parts of which have a strong aromatic smell similar to that of cloves, for which the fruits (*cravos da terra*) are used. [B, 180 (α, 24).]—**E. racemosa.** See Barringtonia *racemosa*.—**E. spiculata.** A species growing in Chili, called there *Arrayán*; used medicinally like *E. cheken*. ["Proc. of the Am. Pharm. Assoc.," xxiv (α, 14).]—**E. uniflora.** See *E. Michelli*.—**E. variabilis.** A variety found in Chili and Brazil, used in diarrhœa and rheumatism. [L, 49, 87.]—**E. Vellozii.** See *E. arrabidæ*.—**E. venosa.** The *Jambosa venosa*. [B, 180 (α, 24).]—**E. zeylanica.** A variety used as a stimulant and antisyphilitic. [L, 49, 87.]

EUGÉNIA (Fr.), n. U^5-zha-ne-a^3. See Eugenia.—**E. à angles aigus.** See Eugenia *acutangula*.—**E. à feuilles de fustet** (Fr.). See Myrtus *acris*.—**E. à fruit blanc.** See Eugenia *fructo candido*.—**E. à fruit noir.** See Eugenia *fructo nigro*.—**E. à grappes.** See Barringtonia *racemosa*.—**E. du Brésil.** See Eugenia *Michelli*.

EUGENIC ACID, n. U^2-je^{2}n'i^{2}k. Fr., *acide eugénique*. See Eugenol.

EUGENIN, n. U^2'je^{2}n-i^{2}n. Fr., *eugénine*. Ger., *E.* Camphor of cloves; a crystalline substance, $C_{10}H_{12}O_2$, isomeric with eugenol, soluble in alcohol and in ether, and formed spontaneously in distilled water of cloves, or obtained from cloves by means of alcohol. It has a slight clove odor. [A, 301 (α, 21); B, 81 (α, 21); L, 56, 87 (α, 14).]

EUGENOL, n. U^2'je-no^{2}l. Fr., *eugénol*. Ger., *E.* It., *e.* A colorless, oily liquid, $C_{10}H_{12}O_2$, boiling at 247° C., found in essence of cloves, of cinnamon, etc. It has the constitution of a monethylic ether of a diatomic phenol. It has been used as an antiseptic and antipyretic. ["Pharm. Ztschr. f. Russland," xxv, p. 723; "Am. Jour. of Pharm.," Mar., 1887, p. 127; Leubuscher, "Wien. med. Blätter," 1889, No. 8; "Therap. Gaz.," Mar., 1889, p. 344; L, 87 (α, 27).]

EUGENOXYCARBONIC ACID, n. U^2-je^{2}n-o^{2}x-i^2-ka^{3}rb-o^{2}n'i^{2}k. Fr., *acide eugénoxycarbonique*. An acid, $C_{22}H_{12}O_8$, isomeric with eugenol. [A, 385 (α, 21).]

EUGEOS (Lat.), adj. U^2-je(ga)'o^{2}s. Gr., εὔγειος (from εὖ, well, and γῆ, the earth). Fruitful, fertile; as a n., the uterus, also the hymen. [L, 84, 94.]

EUGETIC (or **EUGETINIC**) **ACID**, n. U^2-je^{2}t'i^{2}k, -je^{2}t-i^{2}n'i^{2}k. Fr., *acide eugétique* (ou *eugétinique*). Ger., *Eugetinsäure*. A colorless, crystalline derivative, $C_{11}H_{12}O_4$, of eugenol, melting at 124° C., and dissolving with difficulty in water; a member of the cinnamic group. [B, 4 (α, 27).]

EUGEUS (Lat.), adj. U^2-je(ga)'u^{3}s(u^{4}s). See Eugeos.

EUGION (Lat.), **EUGIUM** (Lat.), n's m. U^2-ji(ge)'o^{2}n, -u^{3}m-(u^{4}m). For deriv., see Eugeos. Old names for the uterus. [A, 500.]

EUGRANIE, n. In Provence, the *Punica granatum*. [B, 121 (α, 24).]

EUHÉMIE (Fr.), n. U^5-a-me. See Euæmia.

EUKINESIA (Lat.), n. f. U^2-ki^{2}n-ez(as)'i^2-a^3. From εὖ, well, and κίνησις, movement. Normal power of movement. [A, 316.]

EULACHON, n. U^2'la^{2}k-o^{2}n. The candle-fish (*Thaleichthys pacificus*) of the northern Pacific. [B, 5.]—**E.-oil.** An oil furnished abundantly by the e.; recommended as a substitute for cod-liver oil. [E. L. Shurly, "N. Y. Med. Jour.," Nov. 29, 1884, p. 611; B, 5.]

EULÆ (Lat.), n. f. pl. U^{2}l'e(a^3-e^2). Gr., εὐλαί. Of Hippocrates, maggots. [L, 84.]

EULALIA (Lat.), n. f. U^2-la(la^3)'li^2-a^3. A genus of graminaceous plants.—**E. japonica.** A species the root of which yields the Japanese drug *boo-kung*, employed like *Triticum repens*. [E. M. Holmes, "Proc. of the Am. Pharm. Assoc.," xxviii (α, 14).]

EUL-CHA (Chin.), n. Kino. [L, 77 (α, 21).]

EULOGIUM (Lat.), n. n. U^2-loj(lo^{2}g)'i^2-u^{3}m(u^{4}m). Of Rhazes, an exanthem. [Forrestus (α, 325 [α, 21]).]

EULOPHIA (Lat.), n. f. U^2-lof(lo^{2}f)'i^2-a^3. A genus of *Epiphytæ*, of the tribe *Vandeæ*. [B, 19, 42 (α, 24).]—**E. campestris, E. herbacea.** The East Indian salep-plant; one of the species from which the salep of the Indians (*salep misri*) is obtained. [B, 5, 18 (α, 24).]

EULYPTOL, n. U^2-li^{2}p'to^{2}l. Of Schmeltz, an antiseptic compound containing 6 parts of salicylic acid, 1 part of carbolic acid, and 1 part of eucalyptus oil. It has a strong, aromatic odor and an acrid, burning taste, and is readily soluble in alcohol, in ether, and in chloroform, also in a mixture of equal parts of alcohol and glycerin and in alkaline solutions, sparingly soluble in water. ["Am. Jour. of Pharm.," Jan., 1887, p. 19 (α, 27).]

EULYSIN, n. U^2'li^{2}s-i^{2}n. Fr., *eulysine*. 1. A greenish-yellow resin found in the bile, accompanying bilin, readily soluble in alcohol. 2. A yellow transformation-product of decacrylic acid, $C_{24}H_{36}O_5$. [L, 87 (α, 27).]

EUMEROGENESIS (Lat.), n. f. U^2-me^{2}r-o(o^3)-je^{2}n(ge^{2}n)'e^{2}s-i^{2}s. Gen., *eumerogenes'eos* (*-gen'esis*). From εὖ, well, μέρος, a part, and γένεσις, production. Of E. R. Lankester, the kind of segmentation or budding which results in a complex organism whose various buds or segments are nearly alike and form a linear aggregate, as in the tape-worm. Each such segment is then termed a eumeromorph or said to be eumeristic. ["Encycl. Brit." (J).]

EUNE (Lat.), n. f. U^{2}n'e(a). Gr., εὐνή. 1. A lying down. 2. A couch, a bed. 3. Coitus. [A, 325 (α, 21).]

EUNÉ, n. In Provence, the *Hedera helix*. [B, 121 (α, 24).]

EUNUCH, n. U^2'nu^{3}k. Gr., εὐνοῦχος (from εὐνή, a bed, and ἔχειν, to hold). Fr., *eunuque*. Ger., *E.* A human male rendered impotent by removal or injury of the genitals. [A, 301 (α, 21).]

EUNUCHION (Lat.), n. n. U^2-nu^{2}k(nuch^2)'i^2-o^{2}n. Gr., εὐνούχιον (from εὐνοῦχος, a eunuch). Lettuce; so called from its supposed antaphrodisiac effects. [A, 325 (α, 21).]

EUNUCHISMUS (Lat.), n. m. U^2-nu^2(nu)-ki^{2}z(ch^{2}i^{2}s)'mu^{3}s(mu^{4}s). Fr., *eunuchisme*. The state of being a eunuch. [A, 518.]

EUNUQUE (Fr.), n. U^5-nu^{6}k. See Eunuch.

EUNUCHIUM (Lat.), n. n. U^2-nu^{2}k(nuch^2)'i^2-u^{3}m(u^{4}m). See Eunuchion.

EUODIC, adj. U^2-od'i^{2}k. Gr., εὐώδης (from εὖ, well, and ὄζειν, to smell). Lat., *euodes*. See Aromatic (1st def.).

EUONIC ACID, n. U^2-o^{2}n'i^{2}k. A substance obtained by Wenzell (1862) from the bark of *Euonymus atropurpureus*. It occurs in acicular crystals. [B, 81 (α, 27).]

EUONYMIN, n. U^2-o^{2}n'i^2-mi^{2}n. Lat., *euonyminum*. Fr., *évonymine*. A bitter substance obtained from the bark of *Euonymus atropurpureus*, insoluble in water, soluble in alcohol and in ether; used as a cholagogue. [B, 81 (α, 27).]

EUONYMINA (Lat.), n. f. U^2-o^{2}n-i^2(u^6)-min(men)'a^3. See Euonymin.—**Liquor euonyminæ et pepsinæ compositus.** An English proprietary preparation of euonymin and pepsin. ["Brit. Med. Jour.," Feb. 14, 1885, p. 335.]

EUONYMITE, n. U^2-o^{2}n'i^{2}m-it. Fr., *évonymite*. A sugar, $C_7H_8(OH)_8$, obtained from the inner bark, a species of *Euonymus*. [A, 518.]

EUONYMUS (Lat.), n. m. U^2-o^{2}n'i^2(u^6)-mu^{3}s(mu^{4}s). From εὖ, well, and ὄνομα, a name. Fr., *évonymus, fusain*. Ger., *Spillbaum* (1st def.), *Spindelbaum* (1st def.). 1. Of Linnæus, a genus of the *Celastrineæ*, tribe *Celastreæ*. 2. Of the U. S. Ph, the bark of *E. atropurpureus*. [B, 5, 42, 173, 180, 275 (α, 24).]—**Cortex euonymi.** The bark of *E. atropurpureus*. [B, 95.]—**E. americanus.** The strawberry-bush, burning-bush, arrow-wood; a species found in moist woods in the United States and Canada. The bark is used as a cathartic, diuretic, alterative, tonic, and cholagogue. [B, 5, 34 (α, 24); "Proc. of the Am. Pharm. Assoc.," vii, viii (α, 14).]—**E. atropurpureus.** Wahoo, spindle-tree, burning-bush; a species growing throughout the northern and western United States, the bark of which (*E.* [U. S. Ph.]) has been employed as a cholagogue and diuretic. [B, 5 (α, 24).]—**E. europæus.** Fr., *fusain d'Europe, bois à lardoires* (ou *carré*), *bonnet de prêtres, fusaix, fasin garni, garas*. Ger., *gemeiner Spindelbaum, Pfaffenhütchen, Pfaffenkäppchen, Pfefferriesel, Hundsbaum, Zweckenholz*. Ananbeam, cat-tree, louse-berry-tree, peg-wood; a species common in Europe, where the seeds are considered purgative and diuretic. They furnish a pale-yellow dye, and also an oil used as an insecticide and vulnerary, and contain a crystallizable principle discovered by Kubel, and probably analogous to mannite. [B, 5, 173, 180, 275 (α, 24); "Proc. of the Am. Pharm. Assoc.," xi (α, 14).]—**E. tingens.** A species found in India, which furnishes a yellow dye and is em-

ployed in ophthalmia. [B, 5 (a, 24).]—**Extractum euonymi** [U. S. Ph.]. Fr., *extrait d'écorce de fusain.* Ger., *Spillbaumrindenextrakt.* An extract made by exhausting 1 part of e. in No. 30 powder with diluted alcohol so as to obtain 3 parts of tincture, evaporating to a yellowish-brown mass, and combining with 5 per cent. of glycerin. [B, 81 (a, 21).]

EUOSMITE, n. U^2-oz^2'mit. A yellowish-brown, fossil resin, $C_{34}H_{29}O_2$, of aromatic and camphoraceous odor, melting at 77° C., and soluble in cold alcohol and in ether; found at Bayershof, Germany. [B, 244 (a, 27).]

EUPATHIA (Lat.), n. f. U^2-pa^{2}th(pa^{3}th)-i(e)'a^3. Gr., εὐπάθεια. 1. A condition of high sensibility and receptivity. 2. A high degree of well-being. [A, 322 (a, 21).]

EUPATOIRE (Fr.), n. U^5-pa^3-twa^{3}r. 1. An old term for the genus *Agrimonia.* 2. The genus *Eupatorium.* [B, 121 (a, 24).]—**E. à feuilles d'arroche.** See EUPATORIUM *atriplicifolium.*—**E. à feuilles de chanvre.** See EUPATORIUM *cannabinum.*—**E. à feuilles de sophie.** See EUPATORIUM *sophiæfolium.*—**E. à feuilles de teucrium.** See EUPATORIUM *teucrifolium.*—**E. à feuilles rondes.** See EUPATORIUM *rotundifolium.*—**E. aquatique, E. bâtarde.** See BIDENS *tripartita.*—**E. chanvrin, E. commune.** See EUPATORIUM *cannabinum.*—**E. crénelée.** See EUPATORIUM *crenatum.*—**E. d'Avicenne.** See EUPATORIUM *cannabinum.*—**E. de la Jamaïque.** See DALEA *fruticosa.*—**E. de Mésué.** See ACHILLEA *ageratum.*—**E. des anciens** (ou **Grecs**). See AGRIMONIA *eupatoria.*—**E. du Chili.** See EUPATORIUM *chilense.*—**E. femelle.** See BIDENS *tripartita.*—**E. perfoliée.** See EUPATORIUM *perfoliatum.*—**E. pourprée.** See EUPATORIUM *purpureum.*—**Extrait liquide d'e. perfoliée.** See *Extractum* EUPATORII *fluidum.*—**Hydrolé d'e, Infusion d'e.** See *Infusum* EUPATORII.

EUPATORIA (Lat.), n. f. U^2-pa(pa^3)-to'ri^2-a^3. See AGRIMONIA.

EUPATORIN, n. U^2-pa-to'ri^{2}n. Lat., *eupatorinum.* Fr., *eupatorine.* Ger., *E.* Of Righini, a crystalline glucoside, a bitter and acidulous white substance extracted from *Eupatorium cannabinum,* insoluble in water, soluble in alcohol, in ether, in chloroform, in boiling water, and in concentrated acids. [L, 41, 43, 87; "Proc. of the Am. Pharm. Assoc.," xxix (a, 14).]

EUPATORIOPHALACRON (Lat.), n. n. U^2-pa(pa^3)-to"ri^2-o(o^3)-fa^{2}l(fa^{3}l)'a^3-kro^{2}n. From *eupatorium* (*q. v.*), and φαλακρός, bald-headed. Naked-headed agrimony, a species of *Eupatorium.* [L, 94.]

EUPATORIUM (Lat.), n. n. U^2-pa(pa^3)-to'ri^2-u^{3}m(u^{4}m). Fr., *eupatoire.* Ger., *Wasserdosten, Ablkraut.* It., Sp., *eupatorio.* 1. Boneset; a genus of the *Compositæ.* 2. Of the U. S. Ph., the *E. perfoliatum* and (1840) other species of *E.* [B, 5, 42, 173, 180 (a, 24).]—**E. ageratoides.** Nettle-leaved hemp-agrimony, white sanicle; a species found in Canada and the United States. [B, 34, 275 (a, 24).]—**E. amarum.** The *Mikania amara* (seu *guaco*). ["Proc. of the Am. Pharm. Assoc.," xxix (a, 14).]—**E. aquaticum alterum** (seu **fœmina**). See BIDENS *tripartita.*—**E. Arabum.** See *E. cannabinum.*—**E. aromaticum.** White snake-root; a species growing in Michigan; used as an aromatic and antispasmodic. ["Proc. of the Am. Pharm. Assoc.," vii (a, 14).]—**E. atriplicifolium.** Fr., *eupatoire à feuilles d'arroche, herbe au chat, langue de chat.* A West Indian species, employed as an emmenagogue, aperient, and vulnerary. [B, 173 (a, 24).]—**E.-Aufguss** (Ger.). See *Infusum eupatorii.*—**E. Avicennæ.** See *E. cannabinum.*—**E. aya-pana.** See AYA-PANA.—**E. cannabinum.** Fr., *eupatoire à feuilles de chanvre* (ou *chanvrin,* ou *commune,* ou *d'Avicenne*), *herbe Sainte-Cunégoude, origan des marais, pantagruélion sauvage.* Ger., *hanfartiger Wasserdosten, Wasserhanf, Kunigundenkraut, Hirschklee, Abkraut.* Andurion, common hemp, agrimony, hemp-weed, holy rope, water-agrimony; a species found in Europe and central Asia. The root and herb (*radix* et *herba eupatorii,* seu *cannabini,* seu *hepatorii,* seu *consolidæ aquaticæ*) was formerly official and used in intestinal complaints, fevers, and dyspepsia. The root contains a volatile oil, resin, and extractives. [B, 173, 180, 275 (a, 24).]—**E. chilense.** Fr., *eupatoire du Chili.* A species found in Chili, from which a yellow dye is obtained. [B, 173 (a, 24).]—**E. collinium.** Sp., *yerba del ángel* [Mex. Ph.]. A species found in the mountains of Guadalupe Hidalgo, in Mexico, where the leaves are used in atonic diarrhœa and as an antiperiodic, and fraudulently in making beer. [J. M. Maisch, "Am. Jour. of Pharm.," Apr., 1886, p. 168; "Proc. of the Am. Pharm. Assoc.," xxiv (a, 14).]—**E. connatum.** See *E. perfoliatum.*—**E. crenatum.** Fr., *eupatoire crénelée.* A species found in Brazil, employed in infusion and locally in snake-bites. [B, 173 (a, 24).]—**E. dalea.** Fr., *eupatoire de la Jamaïque.* A species found in the West Indies. The leaves are substituted for vanilla for their odor. [B, 173, 180 (a, 24).]—**E. fœniculaceum.** Dog-fennel, a common weed found in the southern United States. The juice is used for relieving the pain of insects' bites. [B, 81 (a, 21).]—**E. glandulosum.** See *E. perfoliatum.*—**E. glutinosum.** The *chussalongo,* or *matico,* of South America. [B, 18.]—**E. Græcorum.** The *Agrimonia eupatoria.* [B, 173 (a, 24).]—**E. guaco.** See *Mikania guaco.*—**E. incarnatum.** A species said to contain coumarin, found in the United States from North Carolina to Texas, and in Mexico, where it is called *mata* and is used to perfume smoking tobacco. [B, 5 (a, 24); "Proc. of the Am. Pharm. Assoc.," xvi, xx (a, 14).]—**E. maculatum.** Purple boneset; a species found in the United States and Canada. [B, 34, 180 (a, 24).]—**E. mezues.** See ACHILLEA *ageratum.*—**E. nervosum.** A species found in Jamaica, where it is employed as a stimulant in typhus and typhoid fevers and as a cholagogue. [B, 5 (a, 24).]—**E. odoratum.** Ger., *wohlbriechende Wasserdosten.* A species found in the West Indies, Martinique, and Guiana; a bitter tonic. [B, 180 (a, 24).]—**E. parviflorum.** See MIKANIA *guaco.*—**E. perfoliatum.** Fr., *eupatoire perfoliée.* Ger., *durchnacksenblättriges Wasserdosten.* Boneset, Indian ague-weed, vegetable antimony, thoroughwort, Indian sage; a well-known species found in the United States and Canada. The leaves and flowery tops are the e. of the U. S. Ph. The plant contains a bitter principle, eupatorin, and has tonic, diaphoretic, vermifuge, and, in large doses, emetic and aperient properties. It has also been used as an antiperiodic. [B, 5, 173, 180, 275 (a, 24); "Am. Jour. of Pharm.," Feb., 1888, p. 77.]—**E. pilosum, E. pubescens.** Fr., *eupatoire à feuilles de teucrium.* Wild hoarhound; a species found from Massachusetts to Louisiana in wet places. It has been used like *E. perfoliatum,* though it is less bitter and tonic. [B, 5, 173, 180, 275 (a, 24).]—**E. purpureum.** Ger., *purpurrother Wasserdosten.* Purple hemp, agrimony, queen of the meadow, gravel-root, grumpel-weed, Joe-pye weed; a species found in the United States from Canada to Virginia. Its root, aromatic and bitter, is said to be used in nephritic diseases. [B, 5, 34, 275 (a, 24).]—**E. repandum.** Ger., *ausgeschweifter Wasserdosten.* A species found in the West Indies; used as an emmenagogue and as a vulnerary. [B, 180 (a, 24).]—**E. rotundifolium.** Fr., *eupatoire à feuilles rondes, langue de vache.* Wild hoarhound; a species found in New Jersey and the southern United States. [B, 34, 173 (a, 24).]—**E. salvia.** A species found in the central provinces of Chili; employed as a nervine. ["Proc. of the Am. Pharm. Assoc.," xvi (a, 14).]—**E. sanctum** ["Flor. mex. ined."]. See *E. collinium.*—**E. satureiæfolium.** See MIKANIA *guaco.*—**E. sessilifolium.** A species found in rocky woods from Massachusetts to Indiana and Georgia. The flowers are white. [B, 34 (a, 24).]—**E. Soleirolii.** A variety of *E. cannabinum.* [B, 180 (a, 24).]—**E. sophiæfolium.** Fr., *eupatoire à feuilles de sophie.* A species indigenous to America. The leaves are considered tonic, aperient, and astringent. [B, 173 (a, 24).]—**E. teucrifolium.** See *E. pilosum.*—**E. triangulare.** See *E. atriplicifolium.*—**E. trifoliatum.** See *E. cannabinum.*—**E. triplinerve.** See AYA-PANA.—**E. truncatum.** See *E. perfoliatum.*—**E. verbenæfolium.** See *E. pilosum.*—**E. veronicæfolium.** Sp., *Gobernadora de Puebla* [Mex. Ph.]. A Mexican species; the leaves are used in baths and fomentations for rheumatic pains. [J. M. Maisch, "Am. Jour. of Pharm.," Dec., 1885, p. 601.]—**E. veterum.** The *Agrimonia eupatoria.* [B, 173 (a, 24).]—**E. villosum.** In Jamaica, the bitter-bush. A decoction or an extract of the leaves and twigs is used in fevers, and as a cardiac stimulant. ["Proc. of the Am. Pharm. Assoc.," xxiv (a, 14).]—**E. vinæfolium.** See MIKANIA *guaco.*—**Extractum eupatorii fluidum** [U. S. Ph.]. Fr., *extrait liquide d'eupatoire.* Ger., *flüssiges Wasserdostenextrakt.* A fluid extract made by exhausting 25 oz. (av.) of e. in No. 30 powder with sufficient diluted alcohol to make 24 fl. oz. [B, 81 (a, 21).]—**Infusum eupatorii** [U. S. Ph. (1870, 1820), Dutch Ph., 1805. Niemann's Notes]. Fr., *tisane d'herbe à fièvre.* Ger., *E.-Aufguss.* A preparation made by macerating for two hours in a covered vessel 1 troy ounce of the leaves and flowering tops of *E. perfoliatum* in 1 pint of boiling water, and straining. [B, 81 (a, 21).]—**Purple e.** See *E. purpureum.*

EUPEGES (Lat.), adj. U^2-pe(pa)'jez(gas). Gr., εὐπηγής (from εὖ, well, and πηγνύναι, to fasten together). Of Hippocrates, thick, solid, compact (said of the uterus). [A, 325 (a, 21).]

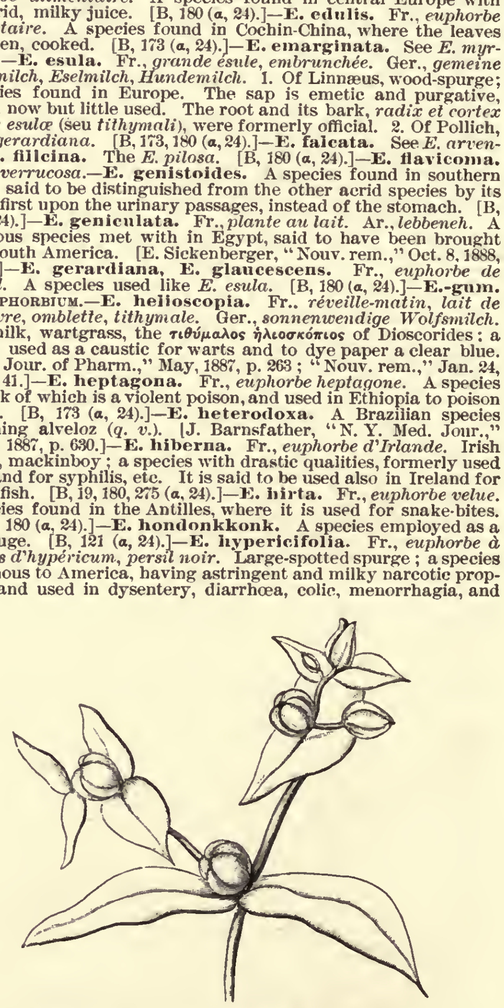
EUPEPSIA (Lat.), n. f. U^2-pe^{2}p'si^2-a^3. Gr., εὐπεψία (from εὖ well, and πέπτειν, to digest). Fr., *eupepsie.* 1. Normal digestion. [K.] 2. The quality of being easily digestible. [A, 322 (a, 21).]

EUPEPTIC, adj. U^2-pe^{2}p'ti^{2}k. Gr., εὔπεπτος. Fr., *eupeptique.* Pertaining to, having, or promoting, good digestion.

EUPEPTUS (Lat.), adj. U^2-pe^{2}p'tu^{3}s(tu^{4}s). Gr., εὔπεπτος. 1. Easy of digestion. 2. Having a good digestion. [A, 311, 322 (a, 21).]

EUPERISTALSIS (Lat.), n. f. U^2-pe^{2}r-i^2-sta^{2}l(sta^{3}l)'si^{2}s. Gen., *euperistal'seos* (*-is*). From εὖ, well (see also PERISTALSIS). Normal peristalsis. [K, 16.] Cf. DYSPERISTALSIS.

EUPHARYNGIDÆ (Lat.), n. f. pl. U^2-fa^{2}r(fa^{3}r)-i^{2}n(u^{6}n^2)'ji^{2}d-(gi^{2}d)-e(a^3-e^2). From εὖ, well, and φάρυγξ, the pharynx. A deep-sea family of the *Lyomeri,* characterized by the excessive development of the jaws and oral parts. [L, 354.]

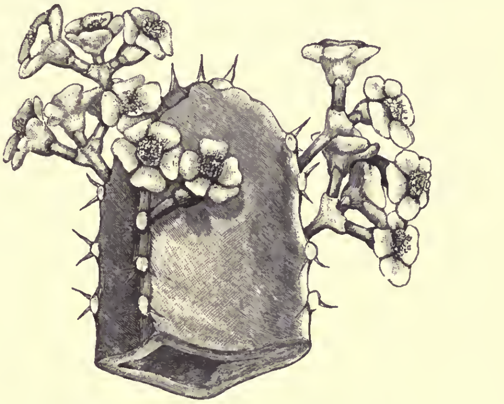


EUPHLOGIA (Lat.), n f. U^2-floj(flo^{2}ğ)'i^2-a^3. From εὖ, well, and φλογία, a flame. Fr., *euphlogie.* Of Rhazes, a benign form of small-pox. [A, 322; D, 74; L, 41.]

EUPHONIA (Lat.). n. f. U^2-fon'i^2-a^3. From εὖ, well, and φωνή, the voice. A condition in which the speech is clear and easy. [A, 322.]

EUPHORBE [Fr. Cod.] (Fr.), n. U^6-forb. See EUPHORBIA.—**Alcoolé d'e.** See *Teinture d'e.*—**E. à corolles.** See EUPHORBIA *corollata.*—**E. à feuilles de fustet.** See EUPHORBIA *cotinifolia.*—**E. à feuilles de genévrier.** See EUPHORBIA *pithyusa.*—**E. à feuilles de myrte.** See EUPHORBIA *myrtifolia* (2d def.).—**E. à feuilles de nérium.** See EUPHORBIA *neriifolia.*—**E. à feuilles de pourpier.** See EUPHORBIA *portulacoides.*—**E. à feuilles de thym.** See EUPHORBIA *thymifolia.*—**E. à feuilles d'hypéricum.** See EUPHORBIA *hypericifolia.*—**E. à feuilles étroites.** See EUPHORBIA *palustris angustifolia.*—**E. à globules.** See EUPHORBIA *pilulifera.*—**E. à grandes fleurs.** See EUPHORBIA *corollata.*—**E. alimentaire.** See EUPHORBIA *edulis.*—**E. blanchâtre.** See EUPHORBIA *canescens.*—**E. chamésycé.** See EUPHORBIA *chamæsyce.*—**E. chargée de papilles.** See EUPHORBIA *papillosa.*—**E. cyprès.** See EUPHORBIA *cyparissias.*—**E. d'Afrique.** See EUPHORBIA *officinarum.*—**E. de Carthage.** See EUPHORBIA *punicea.*—**E. de Chine.** See EUPHORBIA *chinensis.*—**E. de Gérard.** See EUPHORBIA *gerardiana.*—**E. des anciens.** See EUPHORBIA *antiquorum.*—**E. des bois.** See EUPHORBIA *silvatica.*—**E. des boutiques.** See EUPHORBIA *officinarum.*—**E. des Canaries.** See EUPHORBIA *canariensis.*—**E. des marais.** See EUPHORBIA *palustris.*—**E. d'Éthiope.** See EUPHORBIA *officinarum.*—**E. épineuse.** See EUPHORBIA *epinosa.*—**E. émétique.** See EUPHORBIA *ipecacuanha.*—**E. noueuse.** See EUPHORBIA *nodosa.*—**E. panachée.** See EUPHORBIA *picta.*—**E. péplis, E. péplus.** See EUPHORBIA *peplis.*—**E. tachetée.** See EUPHORBIA *maculata.*—**E. velue.** See EUPHORBIA *hirta* and EUPHORBIA *villosa.*—**E. vomitive.** See EUPHORBIA *ipecacuanha.*—**Gomme-résine d'e.** [Fr. Cod.]. See EUPHORBIUM.—**Huile d'e.** 1. See *Oil of* EUPHORBIA. 2. See *Oleum* EUPHORBII.—**Poudre d'e.** [Fr. Cod.]. A powder made by drying the resin of

Euphorbia resinifera in a moderately hot oven, triturating in an iron mortar, and passing through a No. 80 silk sieve. [B, 113 (α, 21).]—**Teinture d'e.** [Fr. Cod.]. Lat., *tinctura euphorbii.* A tincture made by macerating for ten days in a closed vessel 1 part of *Euphorbia resinifera* in 5 parts of 80-per-cent. alcohol, stirring from time to time, straining with expression, and filtering. A similar prepation was official in some of the older pharmacopœias of Europe. [B, 119 (α, 21).]



EUPHORBIA (Lat.), n. f. U[2]-fo[2]rb'i[2]-a[3]. Named for *Euphorbus*, physician to King Juba, of Mauretania. Fr., *euphorbe.* Ger., *Wolfsmilch.* Devil's- (or wolf's-) milk, gum-thistle, spurge; of Linnæus, a genus of the *Euphorbieæ*, all species of which have a milky juice. The *Euphorbiaceæ* (Fr., *euphorbiacées;* Ger., *Euphorbiaceen*), or spurgeworts, are: Of St.-Hilaire, R. Brown, and others, a family or order of monochlamydeous dicotyledons, made by Lindley the type of his euphorbial alliance (*Euphorbiales*) of diclinous exogens; of Endlicher, a family (order) of the *Tricoccæ*, including the *Euphorbieæ*, *Hippomaneæ*, *Sapieæ*, *Acalypheæ*, *Crotoneæ* (*Ricineæ*, *Phyllantheæ*, and *Buceæ*, *Buxineæ*, or *Buxaceæ*); of Bentham and Hooker, a family or order comprising the *Euphorbieæ*, *Stenolobieæ*, *Buxeæ*, *Phyllantheæ*, *Galearieæ*, and *Crotoneæ;* of H. Baillon (who considers the *E.* as having the greatest affinities with the *Malvaceæ*), an order comprising two grand groups, the *E.* with one ovule, and the *E.* with two ovules, the first group comprising the *Euphorbieæ*, *Ricineæ*, *Jatropheæ*, *Crotoneæ*, and *Excœcarieæ*, the second comprising the *Dichapetaleæ*, *Phyllantheæ*, and *Callitricheæ*. The *E.* comprise over 200 known genera, *Euphorbia*, *Hura*, *Mercurialis*, *Acalypha*, *Siphonia*, *Ricinus*, etc. An acrid stimulant and poisonous principle pervades the whole odor, but it is volatile, and is easily expelled by heat. The *Euphorbiales* of Lindley (1833) are an alliance of *Syncarpæ*, including the *Euphorbiaceæ*, *Stackhousieæ*, *Fouquieraceæ*, *Celastrinæ*, and *Malpighiaceæ*, and (in 1847) an alliance of diclinous exogens (*Exogenæ diclinæ*), comprising the *Euphorbiaceæ*, *Scepaceæ*, *Callitrichaceæ*, *Empetraceæ*, and *Nepenthaceæ*. The *Euphorbieæ* are: 1. Of Sprengel, an order of the *Tricoccæ;* of Jussieu (1832), a tribe of the *Euphorbiaceæ;* of Reichenbach, a division of the *Rutaceæ*, including *Euphorbia*, *Pedilanthus*, *Acalyphia*, *Croton*, *Jatrophra*, etc., or (Reichenbach) the *Callitrichnæ*, *Tithymaleæ*, *Hippomaneæ*, *Acalypeæ*, *Ricineæ*, *Phyllantheæ*, and *Bixeæ*, or subsequently the *E. genuinæ* (including the *Callitrichineæ*, *Tithymaleæ*, and *Ricineæ*), *Crotoneæ*, and *Buxeæ*. 2. Of Blume, Brongniart, Jussieu (1847), Bartling, and others, the *Tithymaleæ* of Reichenbach. 3. Of Baillon, a series of euphorbiaceous plants, comprising *Euphorbia* and *Pedilanthus;* of Bentham and Hooker, a tribe of the *Euphorbiaceæ*, including *Euphorbia*, *Pedilanthus*, *Synadenium*, *Calycopeplus*, and *Anthostema*. The *Euphorbiideæ* of Baillon are a division of the one-ovuled *Euphorbiaceæ*. [B, 19, 34, 42, 43, 121, 170, 173, 180, 275 (α, 24).]—**E. acuminata.** A variety of *E. falcata.* [α, 24.]—**E. aleppica.** Ger., *dichtbeblätterte Wolfsmilch.* Of Linnæus, a species found in southeastern Europe and the East. In the Levant it is used as a purge. Probably the εὐφόρβιον δένδρον of Dioscorides. [B, 180 (α, 24).]—**E. amygdaloides.** Ger., *mandelblättrige Wolfsmilch.* 1. Of Duby, the *E. esula* (1st def.). 2. Of Linnæus, a species found in southern and central Europe, having properties similar to those of *E. cyparissias* and *E. esula*. The root was formerly used in southern France in intermittent fevers. [B, 173, 180 (α, 24).]—**E. anacampserolides.** The *Pedilanthus padifolius*. [B, 173 (α, 24).]—**E. antiquorum.** Fr., *euphorbe des anciens.* Ger., *Wolfsmilch der Alten.* Malay, *schadida-calli.* Triangular spurge; the εὐφόρβιον δένδρον of Dioscorides; a species found in Egypt, Arabia, and the East Indies, supposed by some to be the plant from which the ancients derived *euphorbium*. In the East Indies the corrosive juice which flows from the branches is used externally in rheumatism and for toothache; a plaster (also containing asafœtida) made from the roots is applied to the abdomen as a vermifuge, the root-bark furnishes a purgative, and a decoction of the stems is employed in gout. [B, 5, 172, 173, 180 (α, 24).]—**E. apios.** A species the root of which (the ἄπιος of Dioscorides) is used in Greece as a purgative. [B, 180 (α, 24).]—**E. arborea.** A species indigenous to southern Africa, the milky juice of which is used for poisoning arrows. [B, 185 (α, 24).]—**E. arvensis.** A species growing in middle and southern Europe, and in North Africa. [α, 24.]—**E. Atolo.** A species found in the Maldive Islands, where it is used in baths for gastralgia and as an application to sores. [B, 180 (α, 24).]—**E. balsamifera.** Balsam-spurge; a species indigenous to the Canary Islands yielding a sweet milky juice, which is cooked and eaten. [B, 180, 275 (α, 24).]—**E. buxifolia.** A species found in the West Indies. The drastic, milky juice, combined with lemonade or the sap of *Hibiscus sabdariffa*, is used in constipation, jaundice, dropsy, and intermittent fever. [B, 180 (α, 24).]—**E. cajogala.** See *E. gerardiana.*—**E. canariensis** [Austr. Ph., Dan. Ph., Gr. Ph., Swiss Ph., Hung. Ph.]. Fr., *euphorbe des Canaries.* Ger., *kanarische Wolfsmilch.* A very poisonous species; supposed to furnish euphorbium. [B, 5, 173, 180 (α, 24).]—**E. canescens.** Fr., *euphorbe blanchâtre.* Ger., *grauhaarige Wolfsmilch.* Of Linnæus and others, a variety of *E. chamæsyce*. In Spain an infusion is employed in syphilis. [B, 173, 180 (α, 24).]—**E. capitata.** See *E. pilulifera.*—**E. caput medusæ.** In Ethiopia, a species used to poison arrows. [B, 180 (α, 24).]—**E. cattimandoo.** Tel., *cattimandu.* Madras caoutchouc-plant; a species found in the East Indies. The milk which it yields furnishes a cement, and is applied externally in rheumatism. The fresh juice is used as a vesicant. [B, 172 (α, 24).]—**E. cerebrina.** A species used to expel tape-worms. [B, 121 (α, 24).]—**E. chamæsyce.** Fr., *euphorbe chamésycée.* A species found in southern Europe, central and southern Asia, and the West Indies, the γαμαισύκη of Dioscorides. 2. The herb (*herba chamæsyces*) was formerly used as a purge and as a caustic. [B, 173, 180 (α, 24).]—**E. characias.** The τιθύμαλος of Hippocrates, the τιθύμαλος χαρακίας of Dioscorides; a species used as a caustic externally, internally in intestinal obstruction, dropsy, and intermittent fevers. The milk is used on the Italian coast to kill fish. [B, 180 (α, 24).]—**E. chilensis.** A species found in Chili. The juice is used as a drastic purgative. [B, 5 (α, 24).]—**E. chinensis.** Fr., *euphorbe de Chine.* A variety of *E. neriifolia.* [B, 173 (α, 24).]—**E. corollata.** Fr., *euphorbe à corolles* (ou *grandes fleures*). White-flowered spurge; a species formerly recognized in the U. S. Ph. The root is used as a purgative, diaphoretic, and expectorant, and, when fresh, as a caustic. [B, 5, 173, 180 (α, 24).]—**E. cotonifolia.** Fr., *euphorbe à feuilles de fustet.* In the Antilles and South America, a species reputed to be a violent poison, and used in Brazil to kill fish. [B, 46, 173, 180 (α, 24).]—**E. cyparissia, E. cyparissias, E. cyparissus.** Fr., *euphorbe* (ou *petit*) *cyprès, petite ésule, rhubarbe des pauvres.* Ger., *Cypressenwolfsmilch.* Ar., *alsebram.* Cypress-spurge, welcome-to-our-house, a species found throughout Europe. The herb, *herba euphorbiæ cupressinæ*, and especially the root and its bark, *radix et cortex radicis esulæ minoris* (seu *tithymali*, seu *tithymali cyparissiæ*), were formerly in use as a purgative. It yields a yellow dye. [B, 173, 180, 275 (α, 24).]—**E. Daiechampii.** See *E. esula.*—**E. dendroides.** A species found in southern Europe; the τιθύμαλος μέγας of Hippocrates, the τιθύμαλος δενδροειδές of Dioscorides. It is extremely poisonous, yet was formerly used as a drastic purge. [B, 180 (α, 24).]—**E. depauperata.** A species used as a vermifuge. [B, 121 (α, 24).]—**E. dichotoma.** See *E. peplis.*—**E. divaricata.** See *E. dendroides.*—**E. Drummondi.** A species indigenous to western Australia, yielding drumine. ["Am. Jour. of Pharm.," May, 1887, p. 263.]—**E. dulcis.** Fr., *euphorbe alimentaire.* A species found in central Europe with sub-acrid, milky juice. [B, 180 (α, 24).]—**E. edulis.** Fr., *euphorbe alimentaire.* A species found in Cochin-China, where the leaves are eaten, cooked. [B, 173 (α, 24).]—**E. emarginata.** See *E. myrtifolia.*—**E. esula.** Fr., *grande ésule, embrunchée.* Ger., *gemeine Wolfsmilch, Eselmilch, Hundemilch.* 1. Of Linnæus, wood-spurge; a species found in Europe. The sap is emetic and purgative, though now but little used. The root and its bark, *radix et cortex radicis esulæ* (seu *tithymali*), were formerly official. 2. Of Pollich, the *E. gerardiana*. [B, 173, 180 (α, 24).]—**E. falcata.** See *E. arvensis.*—**E. filicina.** The *E. pilosa*. [B, 180 (α, 24).]—**E. flavicoma.** See *E. verrucosa.*—**E. genistoides.** A species found in southern Africa, said to be distinguished from the other acrid species by its acting first upon the urinary passages, instead of the stomach. [B, 180 (α, 24).]—**E. geniculata.** Fr., *plante au lait.* Ar., *lebbeneh.* A poisonous species met with in Egypt, said to have been brought from South America. [E. Sickenberger, "Nouv. rem.," Oct. 8, 1888, p. 433.]—**E. gerardiana, E. glaucescens.** Fr., *euphorbe de Gérard.* A species used like *E. esula*. [B, 180 (α, 24).]—**E.-gum.** See EUPHORBIUM.—**E. helioscopia.** Fr., *réveille-matin, lait de couleuvre, omblette, tithymale.* Ger., *sonnenwendige Wolfsmilch.* Cat's-milk, wartgrass, the τιθύμαλος ἡλιοσκόπιος of Dioscorides; a species used as a caustic for warts and to dye paper a clear blue. ["Am. Jour. of Pharm.," May, 1887, p. 263; "Nouv. rem.," Jan. 24, 1889, p. 41.]—**E. heptagona.** Fr., *euphorbe heptagone.* A species the milk of which is a violent poison, and used in Ethiopia to poison arrows. [B, 173 (α, 24).]—**E. heterodoxa.** A Brazilian species furnishing alveloz (*q. v.*). [J. Barnsfather, "N. Y. Med. Jour.," June 4, 1887, p. 630.]—**E. hiberna.** Fr., *euphorbe d'Irlande.* Irish spurge, mackinboy; a species with drastic qualities, formerly used in Ireland for syphilis, etc. It is said to be used also in Ireland for killing fish. [B, 19, 180, 275 (α, 24).]—**E. hirta.** Fr., *euphorbe velue.* A species found in the Antilles, where it is used for snake-bites. [B, 173, 180 (α, 24).]—**E. hondonkkonk.** A species employed as a vermifuge. [B, 121 (α, 24).]—**E. hypericifolia.** Fr., *euphorbe à feuilles d'hypéricum, persil noir.* Large-spotted spurge; a species indigenous to America, having astringent and milky narcotic properties, and used in dysentery, diarrhœa, colic, menorrhagia, and

EUPHORBIA LATHYRIS. (AFTER DE LANESSAN.)

leucorrhœa, and as an application to warts. [B, 5, 173 (α, 24).]—**E. icterodoxa.** See *E. heterodoxa.*—**E. ipecacuanha.** Fr., *euphorbe émétique* (ou *vomitive*), *faux ipecacuanha, ipecacuanha de Canada.* Ipecacuanha-spurge, American ipecacuanha; a species common in pine barrens and other sandy places in the middle and southern United States, especially along the seaboard. The dry root is light and brittle, of a grayish color and a sweetish taste. It is a certain purge, somewhat milder than *E. corollata*, but in overdoses apt to produce nausea and vomiting; in small doses it is diaphoretic. It is an unfit substitute for ipecacuanha, because of its tendency in overdoses to produce general prostration and hyper-

catharsis. [B, 5, 173, 180 (a, 24).]—**E. læta.** See *E. dendroides.*—**E. lanuginosa.** See *E. platyphyllos.*—**E. lathyris.** Fr., *épurge* [Fr. Cod.], *catapuce, catherinette, ginousèle, herbe à l'épurge.* Ger., *kreuzblättrige Wolfsmilch, kleines Springkraut, Maulwurfskraut.* Caper-bush (or -spurge), e.-oil-plant, myrtle-spurge, wild caper, mole-plant; a species indigenous to Europe and found in North America. The seed, *semen cataputiæ minoris* (seu *tithymali latifolii,* seu *lathyris majoris,* seu *euphorbiæ*), was formerly used as an emetic and purgative; the oil (see *Oil of E.*) is still used. [B, 5, 121, 173, 180 (a, 24).]—**E. ligularia.** An East Indian species sacred to Munsa, goddess of serpents. The root, mixed with black pepper, is used both internally and externally in snake-bites, and the milky juice is employed as a caustic application to warts and skin eruptions and internally as a purgative. [B, 172, 180 (a, 24).]—**E. linearifolia.** See *E. cajogala.*—**E. linearis.** Fr., *euphorbe linéaire.* A species found in the Antilles and South America. In Brazil its milky juice is applied to syphilitic ulcers. [B, 173 (a, 24).]—**E. literata.** See *E. platyphyllos.*—**E. maculata.** Fr., *euphorbe tachetée.* Sp., *yerba de la golondrina* [Mex. Ph.]. Milk-purslane, West Indian eyebright; a species found in Mexico and the United States. In Mexico the juice is used to remove spots from the cornea, and the decoction as a lotion in skin diseases. The plant is sometimes substituted for *Chelidonium majus,* and is said to possess properties similar to those of *E. hypericifolia.* [J. M. Maisch, "Am. Jour. of Pharm.," Apr., 1886, p. 168; B, 5, 173, 275 (a, 24).]—**E. mucronata.** See *E. falcata.*—**E. myrsinitis.** A species found in southern Europe, supposed to be the τιθύμαλος θῆλυς or the μυρσινίτης of Dioscorides. It has similar properties to those of *E. paralias.* [B, 180 (a, 24).]—**E. myrtifolia.** Fr., *euphorbe à feuilles de myrte* (2d def.), *pantouflier des nègres* (2d def.). 1. Of Lamarck, the *Penditanthus tithymaloides.* 2. Of Linnæus, negro's-slippers; a poisonous species found in Jamaica. [B, 173, 180 (a, 24).]—**E. neriifolia.** Fr., *euphorbe à feuilles de nérium.* 1. Of Linnæus, the *E. ligularia;* according to some, the *E. nivulia.* 2. Of Roxburgh, the *E. nivulia.* [B, 172, 173, 180 (a, 24).]—**E. nivulia.** A species indigenous to the East Indies, very much like the *E. ligularia.* The juice of the leaves is employed as a purgative, and, mixed with margosa-oil, as an external application in rheumatism. The pulp of the stem, mixed with green ginger, is used to prevent hydrophobia. The juice of the leaves, warmed, is used for earache, and is sometimes rubbed over the eyes to remove dimness of sight; the leaves, warmed and applied externally, are said to promote the flow of urine. [B, 172 (a, 24).]—**E. nodosa.** Fr., *euphorbe noueuse.* A variety of *E. thymifolia.* [B, 173 (a, 24).]—**E. officinarum** [Austr. Ph., Dan. Ph., Gr. Ph., Swiss Ph., Hung. Ph.]. Fr., *euphorbe des boutiques* (ou *d'Afrique,* ou *d'Éthiope*). Ger., *officinelle Wolfsmilch.* Poisonous gum-thistle; a species found in central and southern Africa, the εὐφόρβιον δένδρον of Dioscorides, which affords euphorbium. The capsules are used to poison predatory animals. [B, 5, 173, 180, 275 (a, 24).]—**E.-oil.** See *Oil of e.*—**E.-oil-plant.** See *E. lathyris.*—**E. palustris.** Fr., *euphorbe des marais, turbith noir.* Ger., *Sumpf-Wolfsmilch.* Marsh-spurge; a species found in southern and central Europe and central Asia; the root and root-bark were formerly in use as a drastic purgative. The plant is still sometimes used instead of pellitory in toothache. [B, 173, 180 (a, 24).]—**E. palustris angustifolia.** Fr., *euphorbe à feuilles étroites.* A narrow-leaved variety of *E. palustris.* [B, 173 (a, 24).]—**E. papillosa.** Fr., *euphorbe chargée de papilles.* A species found in Brazil, where the root is used as a purgative. [B, 173 (a, 24).]—**E. paralias.** Sea-side spurge; a species found in southern Europe, the τιθύμαλος παράλιος of Dioscorides, the root, herb, and seed of which were formerly used as an emetic and as a caustic application to warts, skin eruptions, etc. [B, 180, 275 (a, 24).]—**E. parviflora.** A species used like *E. hirta.* [A, 479.]—**E. peplis.** Fr., *euphorbe péplis.* Hyssop-spurge, purple spurge; a species indigenous to southern Europe, the πεπλίς of Dioscorides, the πέπλιον of Hippocrates; anciently used as an expectorant and cholagogue. ["Am. Jour. of Pharm.," May, 1887, p. 263; B, 173, 180 (a, 24).]—**E. peploides.** A species having the properties of, and perhaps identical with, *E. peplus.* [B, 173, 180 (a, 24).]—**E. peplus.** Fr., *euphorbe péplus, omblette, petit réveille-matin.* Ger., *Gastenwolfsmilch.* Petty spurge; a species indigenous to Europe, the herb of which, *herba esulæ rotundifoliæ,* was formerly in use as a purgative. The juice, applied to the skin, causes heat, swelling, erysipelatous inflammation, and vesication. [A, 319; B, 173, 180, 275 (a, 24).]—**E. petiolaris.** Fr., *petit mancenillier.* A very poisonous species growing in the Antilles. [B. 46.]—**E. pilosa.** Of Brotero, see *E. verrucosa;* of Linnæus, see *E. villosa.*—**E. pilulifera.** Fr., *euphorbe à globules, herbe à serpens* (ou *Jean-Renaud*), *mal famée* (ou *nommée*). A species found in the Antilles and in Australia. The active principle is an acrid resin soluble in water and in dilute alcohol. It contains one or more glucosides, but no alkaloids or volatile principles. It acts as a cardiac and respiratory stimulant. It is used as a remedy for poisonous bites, combined with magnesia in syphilis, and in infusion (of the leaves) in asthma, and in dysentery and colic. The milky juice is used to destroy warts. In toxic doses the plant is said to arrest respiration. [B, 5, 173, 180 (a, 24); "Proc. of the Am. Pharm. Assoc.," xxx, xxxiii, xxxiv (a, 14); J. H. Bunting, "Am. Jour. of Pharm.," Nov., 1888, p. 552; "Glasgow Med. Jour.," Jan., 1889, p. 1.]—**E. pinifolia.** See *E. esula* (1st def.).—**E. piscatoria.** A species indigenous to South America; used for poisoning arrows and destroying fish. [B, 180, 185 (a, 24).]—**E. pithyusa.** Fr., *euphorbe à feuilles de genévrier.* The πιτοῦσα of Dioscorides, a species found in Europe. The root is emetic. [B, 173, 180 (a, 24).]—**E. platyphyllos (obtusifolia).** The τιθύμαλος πλατύφυλλος of Dioscorides, a species found throughout Europe, especially southern Europe; one of the milder species in its properties. [B, 180 (a, 24).]—**E. platyphyllos obtusifolia.** The *E. platyphyllos* of Linnæus. [B. 180 (a, 24).]—**E. polycarpa.** A species (called *golondrina* in Mexico) used in decoction in Arizona and Southern California as a remedy for snake-bites. [Palmer, "Am. Jour. of Pharm.," Dec., 1878; "Proc. of the Am. Pharm. Assoc.," xxvii (a, 14).]—**E. portulacoides.** Fr., *euphorbe à feuilles de pourpier.* A species found in South America. In Chili the milk, the root, and the leaves in decoction are used as a purgative and emetic. [B, 173, 180 (a, 24).]—**E. prostrata.** Trailing red spurge; a species found in the southwestern parts of the United States and in Mexico; emetic and cathartic; believed to be the *golondrinera* of the Mexicans, who use it as an antidote to the poison of serpents. It is said to have no injurious effects on the system unless used in large quantities. [B, 5, 275 (a, 24).]—**E. pulcherrima.** A species growing in warm, moist regions and cultivated in gardens, in Mexico, where it is called *flor de noche buena.* The bracts are used as a galactagogue, and a decoction is employed as a resolvent. ["Proc. of the Am. Pharm. Assoc.," xxiv (a, 14).]—**E. pungens.** See *E. spinosa.*—**E. punicea.** Fr., *euphorbe de Carthage, fleur de feu.* Scarlet-flowered spurge, vegetable leather; a species yielding caoutchouc. The juice is poisonous, and is used by the negro women as a depilatory. In the Antilles the seed and leaves are used to kill fish. [B, 173, 275 (a, 24).]—**E. resinifera** [Belg. Ph., 2d ed., Fr. Cod., Ger. Ph., Norw.

EUPHORBIA RESINIFERA. (AFTER DE LANESSAN.)

Ph., Russ. Ph., Swed. Ph.]. Euphorbium-gum-plant; a species found in Morocco; according to Baillon. the true source of euphorbium. [B, 121, 275 (a, 24).]—**E. rotundifolia.** See *E. peploides.*—**E. schimperiana.** A species used as a vermifuge. [B, 121 (a, 24).]—**E. serpyllifolia.** A species found in Europe, used like *E. portulacoides.* [B, 180 (a, 24).]—**E. silvatica.** Fr., *euphorbe des bois.* See *E. amygdaloides.*—**E. sollsequa.** See *E. dulcis.*—**E. spinosa.** Fr., *euphorbe épineuse.* A species found in southern Europe, the ἱπποφαές of Dioscorides and Hippocrates. The herb is used as a purgative; the root as an emetic and purgative. [B, 173, 180 (a, 24).]—**E. subciliata.** See *E. platyphyllos.*—**E. terracina.** A species growing in Africa. The dried root, called *waskiza,* is exported from Morocco, and used as an emetic. ["Proc. of the Am. Pharm. Assoc.," xxiii (a, 14).]—**E. tetragona.** A species said to furnish euphorbium. [B, 19 (a, 24).]—**E. thymifolia.** Fr., *euphorbe à feuilles de thym.* Tamil., *chin-amaum-patchayarise sittra paladi.* Tel., *biddarie-nanabeeam.* Beng., *shewt-kherua.* A species found in the East Indies, where the leaves and seeds, which are slightly aromatic and astringent, are used as a vermifuge. [B, 172, 173, 180 (a, 24).]—**E. tirucalli.** Fr., *euphorbe tirucalli.* Malay, Tamil., *tirucalli.* Beng., *lunka sij.* Indian tree-spurge, milk-hedge; a tree found in the East Indies, where the fresh acrid juice is employed as a vesicatory, and the root in decoction internally for gastralgia. On the Malabar coast, the milky juice is said to be given, mixed with butter, as a purgative. It is said to be employed internally, combined with milk, in syphilis. [B, 172, 173, 180 (a, 24).]—**E. tithymaloides.** See PEDILANTHUS *tithymaloides.*—**E. tortilis.** Fr., *euphorbe tortillée.* A species found in the East Indies. The juice is used as a cathartic, externally as a vesicant, and, combined with castor-oil, as a liniment in rheumatism and paralysis. [B, 173 (a, 24).]—**E. tribuloides.** Fr., *euphorbe tribuloïde.* A species found in the Canaries, where the juice is employed as a sudorific. [B, 173 (a, 24).]—**E. trigona.** A species very similar to *E. antiquorum;* it is indigenous to the East Indies, and is said to furnish euphorbium. [B, 180 (a, 24).]—**E. veneta.** See *E. characias.*—**E. verrucosa.** Fr., *euphorbe verruqueuse.* Hairy spurge. In France the root is used in intermittent fevers. [B, 173 (a, 24).]—**E. verticillata.** See *E. petiolaris.*—**E. villosa.** Fr., *euphorbe velue.* A species found in Russia. Used in decoction as a cathartic and emetic. According to Andrejewsky, in Russia and Gallicia the root is used in hydrophobia. [B, 173, 180 (a, 24); "Proc. of the Am. Pharm. Assoc.," xxx (a, 14).]—**E. viminalis.** The *Sarcostemma viminale.* [B, 214.]—**E. virgata.** A species used like *E. esula.* [B, 180 (a, 24).]—**E. virosa.** A species found in South America; used as an arrow-poison. [B, 180 (a, 24).]—**E. vulgaris.** Go-quick, a species growing in Michigan; the root is a strong purgative. ["Proc. of the Am. Pharm. Assoc.," vii (a, 14).]—**Oil of e.** Fr., *huile d'euphorbe.* A fixed, colorless, inodorous, and, when fresh, nearly insipid oil, obtained from the seeds of *E. lathyris.* It is a powerful but uncertain and nauseating purgative [B, 5 (a, 24).]

EUPHORBIC ACID, n. U²-fo²rb'i²k. Fr., *acide euphorbique.* A brown, amorphous substance, obtained by the action of dilute acids on euphorbium. [B, 18.]

EUPHORBIN, n. U²-fo²rb'i²n. Fr., *euphorbine.* Ger., *E.* A bitter, acrid substance obtained from euphorbium. [A, 301, 518.]

EUPHORBIUM (Lat.), n. n. U^2-fo^{2}rb'i^2-u^{3}m(u^{4}m). Fr., *gomme d'euphorbe*. Ger., *E.*, *Euphorbiengummi*, *Euphorbienharz*, *E'harz*. Gum-e., the concrete resinous juice of certain species of *Euphorbia*. Its precise source is unknown, having been ascribed to *Euphorbia officinarum*, *canariensis*, *antiquorum*, etc., but it is now thought that *Euphorbia resinifera* is its chief source, most of it coming from Morocco and Barbary. It occurs in the form of tears or oblong masses of about the size of a pea, with small holes produced by the prickles of the plant, and has a light-yellowish or reddish color, acrid taste, and slight odor. It contains resin, wax, calcium malate, lignin, bassorin, volatile oil, and water, and is violently emetic and cathartic. Largely diluted with wheat-flour or starch, it is employed as an errhine in amaurosis, deafness, and other obstinate affections of the head. It is a vesicant, and is employed as such especially in veterinary practice. [B, 5, 19, 173, 180, 185 (a, 24).]—**Compound oil of e.** Lat., *oleum de euphorbio compositum*. A preparation made by bruising ½ oz. each of *Delphinium staphisagria* and *Saponaria officinalis*, 6 drachms of *Anthemis pyrethrum*, 1½ oz. of dry *Calamintha grandiflora*, 10 drachms of *Costus*, and 5 drachms of castoreum, macerating for three days in 3½ pints of fragrant white wine, boiling with 1½ lb. of the oil of *Cheirantes cheiri*, adding, before the wine is quite consumed, ½ oz. of e., and then finishing the boiling. [L, 94 (a, 21).]—**Emplastrum de euphorbio.** Fr., *emplâtre ischiadique*. A plaster made by melting together 64 parts of white resin and 12 of turpentine, adding 3 of e. [Dan. Ph., 1805, Würt. Ph., 1798]; or 8 parts of white resin, 4 of turpentine, and 3 of e. [Lip. Ph., 1794, Dutch Ph., 1885, Niemann's Notes]. [B, 97, 119 (a, 14).]—**Emplastrum euphorbii** [Gr. Ph.]. See *Emplastrum* CANTHARIDUM *perpetuum*.—**E.-gum-plant.** See EUPHORBIA *resinifera*.—**E.-resin.** See *E.*—**E'tinktur** (Ger.). See *Teinture d'*EUPHORBE.—**Oleum euphorbii** [Sp. Ph., 1798, Sard. Ph., 1773, Würt. Ph., 1798]. Fr., *huile d'euphorbe*. Oil of e., made by digesting 1 part of e. in 12 parts of olive-oil, and filtering [Sp. Ph., 1798]; or by boiling 1 part of e., 10 parts of oil of cloves, and 4 of wine until the moisture is consumed, and straining [Würt. Ph., 1798]; or by boiling together 6 parts of e., 40 of *oleum cheirinum*, and 24 of aromatic wine until the wine is evaporated. [B, 119 (a, 21); L, 94 (a, 21).]—**Tinctura euphorbii.** See *Teinture d'*EUPHORBE.

EUPHORBONE, n. U^2-fo^{2}rb'on. Ger., *Euphorbon*. A principle, $C_{20}H_{22}O_2$, found in euphorbium and thought to be its drastic principle. [Fluckiger (A, 385).]

EUPHORIA (Lat.), n. f. U^2-fo(fo^2)'ri^2-a^3. Gr., εὐφορία. Fr., *euphorie* (1st def.), *bien-être* (2d def.). Ger., *Euphorie*. 1. Of Jussieu, a genus of sapindaceous trees found in Asia and tropical Oceanica. 2. A state of general bodily well-being. [Samuel (A, 319); B, 42 (a, 24).]—**E. litchi.** The *Nephelium litchi*. [B, 42, 173, 180 (a, 24).]—**E. longan, E. longana.** Fr., *longanier*. Ger., *Longanbaum*. A species having edible fruits, the longan of commerce, or dragon's-eye (Fr., *œil de dragon*), which is dried and preserved, and is said to be less fine than that of *Nephelium litchi*. [B, 121, 173, 180 (a, 24).]—**E. nephelium.** The *Nephelium lappaceum*. [B, 173, 180 (a, 24).]—**E. punicea.** The *Nephelium litchi*. [B, 173 (a, 24).]

EUPHRAGIA (Lat.), n. f. U^2-fra(fra^3)'ji^2(gi^2)-a^3. See EUPHRASIA.

EUPHRAISE (Fr.), n. U^5-fre^{2}z. See EUPHRASIA.—**Eau d'e., Hydrolat d'e.** See *Aqua* EUPHRASIÆ.

EUPHRASIA (Lat.), n. f. U^2-fraz(fra^{3}s)'i^2-a^3. From εὐφρασία, cheerfulness. Fr., *euphraise*. Ger., *Augentrost*. Of Linnæus, a genus of the *Scrophularineæ*, tribe *Euphrasieæ*. The *Euphrasieæ* (Fr., *euphrasiées*) are a tribe of scrophulariaceous plants distinguished chiefly by the unequally separated anther-cells. [B, 34, 42, 121, 170 (a, 24).]—**Aqua euphrasiæ** [Palat. Disp., 1764, Sard. Ph., 1773]. Fr., *eau* (ou *hydrolat*) *d'euphraise*. A preparation made by distilling off 1 part from a mixture of 1 part of *E. officinalis* and 3 parts of water. [B, 119 (a, 21).]—**E. alpestris.** A variety of *E. officinalis*. [B, 180 (a, 24).]—**E. gramen.** The *Stellaria holostea*. [B, 200.]—**E. imbricata.** A variety of *E. officinalis*. [B, 180 (a, 24).]—**E. micrantha.** See *E. alpestris*.—**E. neglecta, E. nemorosa.** Varieties of *E. officinalis*. [B, 180 (a, 24).]—**E. odontites.** The *Bartsia odontites*.—**E. officinalis.** Fr., *euphraise officinale*, *brise-* (ou *casse-*) *lunette*, *eufraise*, *herbe à l'ophthalmie*, *langeole*, *luminet*. Euphrasy, eyebright; a species common in heaths and dry meadows, formerly held in high repute for its medicinal virtues, the var. *pratensis* being recommended as the best because its herb, *herba euphrasiæ* (seu *euphragræ*, seu *ophthalmica*, seu *ocularia* [Ger., *Augentrostkraut*, *Augenkraut*]) contains more of the astringent and bitter properties than the other varieties. Its use was recommended by the old herbalists both outwardly and inwardly, in powder and in decoction, for diseases of the eyes. It is still a domestic remedy, and has been recommended for colds in the head. [B, 5, 19, 173, 180 (a, 24); G. M. Garland, "Boston Med. and Surg. Jour.," Nov. 7, 1889, p. 453.]—**E. pratensis, E. rostkoviana.** A variety of *E. officinalis*. [B, 180 (a, 24).]—**E. rubra.** The *Bartsia odontites*. [B, 180 (a, 24).]—**E. stricta.** See *E. nemorosa*.

EUPHRASY, n. U^2'fra-zi^2. The genus *Euphrasia*, especially the *Euphrasia officinalis*. [B, 19, 34, 275 (a, 24).]

EUPHYLLUM (Lat.), n. n. U^2-fi^{2}l(fu^{6}l)'lu^{3}m(lu^{4}m). From εὖ, well, and φύλλον, a leaf. A true leaf. [a, 24.]

EUPION (Lat.), n. n. U^2-pi(pe)'o^{2}n(on). Gen., *eupi'onos* (*-is*). From εὖ, well, and πίων, fat. Fr., *eupione*. Ger., *Feinfett*. Of Reichenbach, a mixture of the lower members of the paraffin series of hydrocarbons, which form oily liquids. [B, 3.]—**Amber e.** See *Oleum* SUCCINI.—**E. animal** (Fr.). Of Becker, a limpid oil having a strong hyacinth odor and a pungent (afterward sweet) taste, obtained by distillation and repeated rectification of Dippel's animal oil. [B, 119 (a, 21).]

EUPLASIA (Lat.), n. f. U^2-plaz(pla^{3}s)'i^2-a^3. Normal formation.

EUPLASTIC, adj. U^2-pla^{2}st'i^{2}k. Lat., *euplasticus* (from εὖ, well, and πλάσσειν, to fashion). Fr., *euplastique*. 1. Readily undergoing organization; the opposite of *cacoplastic*. 2. Promoting euplasia. [A, 301.]

EUPLECTOPTERA (Lat.), **EUPLEXOPTERA** (Lat.), n's, n. pl. U^2-ple^{2}k-to^{2}p'te^{2}r-a^3, -ple^{2}x-o^{2}p'te^{2}r-a^3. The *Forficutidæ*. [L, 121.]

EUPNÉIQUE (Fr.), adj. U^{5}p-na-ek. Facilitating respiration, alleviating dyspnœa. [M. Fourrier, "Rev. gén. de chin. et de thérap.," May 23, 1889, p. 337.]

EUPNŒA (Lat.), n. f. U^{2}p-ne'(no^2'e^2)-a^3. Gr., εὔπνοια (from εὖ, well, and πνεῖν, to breathe). Fr., *respiration facile* (3d def.). Ger., *Eupnöe*. 1. A condition in which the amounts of oxygen and of carbon dioxide in the blood are normal, and the respiratory centre is moderately active, thus producing normal respiratory movements. 2. A condition midway between apnœa and dyspnœa. 3. Normal breathing. [J.]

EUPNOICUS (Lat.), **EUPNOUS** (Lat.), **EUPNUS** (Lat.), adj's. U^{2}p-no(no^2)'i^{2}k-u^{3}s(u^{4}s), u^{2}p'no(no^2)-u^{3}s(u^{4}s), -nu^{3}s(nu^{4}s). In a state of or conducing to eupnœa. [A, 322.]

EUPORISTA (Lat.), n. n. pl. U^2-po^{2}r-i^{2}s'ta^3. From εὐπόριστος, easy to procure. Of Linnæus, remedies which are easily obtained or consisting of plants indigenous to a country and likely to be of use. [L, 94, 105, 135 (a, 14).]

EUPTERON (Lat.), n. n. U^{2}p'te^{2}r-o^{2}n. From εὖ, well, and πτερόν, a feather. The *Ceterach officinarum*. [B, 88 (a, 14).]

EUREKA SPRING, n. U^2-re'ka^3. One of the springs at Saratoga, New York. [A, 363.]

EUREKA SPRINGS, n. U^2-re'ka^3. A place in Carroll County, Arkansas, where there is an alkaline and saline spring. [A, 363 (a, 21).]

EURHYTHMIA (Lat.), n. f. U^2-ri^{2}th(ru^{6}th)'mi^2-a^3. Gr., εὐρυθμία. Fr., *eurhythmie*. Regularity (as of the pulse). [A, 325.]

EURIBALI, n. See *Juribali* BARK.

EURODES (Lat.), adj. U^2-rod'ez(as). Gr., εὐρώδης (from εὐρώς, decay, and εἶδος, resemblance). Carious. [A, 322.]

EURODONTICUS (Lat.), adj. U^2-ro(ro^3)-do^{2}nt'i^{2}k-u^{3}s(u^{4}s). From εὐρώς, decay, and ὀδοὺς, a tooth. Affected with dental caries. [A, 322.]

EURŒOS (Lat.), n. m. U^2-re'(ro^2'e^2)-o^{2}s. Gr., εὔροιος. See LAPIS *judaicus*.

EUROLOÏÉMIE [Piorry] (Fr.), n. U^5-ro-lo-e-a-me. Epidemic typhus. [L, 82.]

EUROMESOCEPHALUS (Lat.), adj. U^2''ro(ro^3)-me^{2}s-o(o^3)-se^{2}f(ke^{2}f)'a^{2}l(a^{3}l)-u^{3}s(u^{4}s). From εὐρύς, broad, μέσος, the middle, and κεφαλή, the head. Of Mayer, having the bitemporal diameter long. [L.]

EUROPISOCEPHALUS (Lat.), adj. U^2-ro^{2}p''i^{2}s-o(o^3)-se^{2}f(ke^{2}f)'a^{2}l(a^{3}l)-u^{3}s(u^{4}s). From εὐρύς, broad, ὀπίσω, behind, and κεφαλή, the head. Ger., *europisocephal*. Of Mayer, having the skull broad in the occipital region. [L.]

EUROPROCEPHALUS (Lat.), adj. U^2''ro(ro^3)-pro(pro^2)-se^{2}f(ke^{2}f)'a^{2}l(a^{3}l)-u^{3}s(u^{4}s). From εὐρύς, broad, πρό, in front, and κεφαλή, the head. Ger., *europrocephal*. Of Mayer, having the skull broad in the frontal region. [L.]

EUROS (Lat.), n. m. U^2'ro^{2}s(ros). Gen., *eurot'os* (*-is*). Gr., εὐρώς. Rottenness, putrefaction. [L, 94 (a, 21).]

EUROTIA (Lat.), n. f. U^2-ro'shi^2(ti^2)-a^3. A genus of the *Atriplliceæ*. [B, 42 (a, 24).]—**E. lanata.** Of Moquin, a species growing throughout the Western territories, used as fodder for cattle. It is said to be useful in malarial affections. [B, 66.]

EUROTIN, n. U^2-rot'i^{2}n. A variety of diastase found in *Eurotium oryzæ*. ["Proc. of the Am. Pharm. Assoc.," xxviii (a, 14).]

EUROTIUM (Lat.), n. n. U^2-ro'shi^2(ti^2)-u^{3}m(u^{4}m). From εὐρώς, mold. Of Link, a genus of *Fungi* of the *Thecasporei*. [B, 121, 291 (a, 24).]—**E. aspergillus flavus.** A species found in the auditory canal, having a yellow fructification that, when luxuriantly developed, gives the entire fungus a yellowish hue. In its conidial stage it is called *Aspergillus flavus* [Brefeld] (seu *flavescens* [Wreden]). [B, 72; a, 24.] Cf. ASPERGILLUS *fumigatus*.—**E. aspergillus glaucus.** One of the mildews most common on preserved fruits. [B, 291 (a, 24).]—**E. aspergillus niger.** A species distinguished by the large size and dark-brown color of its conidiophores, fruit, and sterigmata, and by the division of the latter into terminal, palmately arranged branches. In its conidial stage it is called *Aspergillus niger* [Van Nighen] (seu *nigricans* [Wreden]) and *Sterigmatocystis antacustica*.—**E. epixylon.** See *E. aspergillus glaucus*.—**E. herbariorum.** 1. Of Link, the *E. aspergillus glaucus*. 2. Of Fuckel, the *E. repens*. [B, 72.]—**E. oryzæ.** A species with a conspicuous, yellow perithecium, white, floccose mycelium, numerous asci, and sponidia not catenate. It is found on the fermenting grain of rice in Germany. [B; Saccordo (a, 24).]—**E. repens.** One of the mildews most common on preserved fruits. [B, 291 (a, 24).]

EURYALE (Lat.), n. f. U^2-ri(ru^6)'a^{2}l(a^{3}l)-e(a). Gen., *eury'ales*. From εὐρύαλος, wide. Of Salisbury, a genus of the *Nymphææ*. [B, 42 (a, 24).]—**E. ferox.** A species used in India as a tonic and as an article of food. [A, 479.]

EURYANGEIUM (Lat.), n. U^2-ri^2(ru^6)-a^{2}n(a^{3}n^2)-ji'(ge^2-e')-u^{3}m(u^{4}m). From εὐρύς, broad, and ἀγγεῖον, a vessel. Of Kauffmann, a genus of umbelliferous plants; of other authors, a section of *Ferula*. [B, 121 (a, 24).]—**E. sumbul.** See FERULA *sumbul*.

EURYBIA (Lat.), n. f. U^2-ri^{2}b(ru^{6}b)'i^2-a^3. The genus *Olearia*. [B, 121 (a, 24).]—**E. argophylla.** The *Olearia argophylla*. [B, 42, 214.]—**E. corymbosa.** The *Aster corymbosus*. [B, 42, 214, 215.]

EURYCEPHALOUS, adj. U^2-ri^2-se^{2}f'a^{2}l-u^{3}s. From εὐρύς, broad, and κεφαλή, the head. Fr., *eurycéphale*. Having the head broad. [A, 301.]

EURYCEROUS, adj. U^2-ri^{2}s'e^2-ru^{3}s. Gr., εὐρύκερως (from εὐρύς, broad, and κέρας, a horn). Fr., *eurycère*. Having broad horns. [L, 56.]

EURYCHASMUS (Lat.), adj. U^2-ri^2(ru^6)-ka^{2}z(ch^{2}a^{3}s)'mu^{3}s-(mu^{4}s). From εὐρύς, broad, and χάσμα, a chasm. Ger., *eurychasm*. Having an angle of between 153° and 154°, formed by the intersection at the punctum alæ vomeris of two lines drawn from that point to the punctum spinæ nasalis posterioris, and the punctum foraminis magni anterius. [Lissauer (L).]

EURYCHORIA (Lat.), n. f. U^2-ri^2(ru^6)-kor(ch^{2}or)'i^2-a^3. Gr., εὐρυχωρία (from εὐρύς, broad, and χωρίον, a region). An internal sinus or cavity. [L, 94 (a, 21).]

EURYCLES (Lat.), n. m. U^2'ri^2(ru^6)-klez(klas). From Εὐρυκλῆς, the name of a soothsayer who was a ventriloquist. 1. A ventriloquist. [A, 322.] 2. Of Salisbury, a genus of amaryliads; of Bentham and Hooker, a genus of the *Amarylleæ*, comprising two species found in northern Australia, one of which is also found in the Malay Archipelago. [B, 42 (a, 24).]—**E. amboinensis, E. silvestris.** Ger., *amboinische Röhrenlilie*. A species the bulb of which acts like *Scilla maritima*, only more powerfully. In the Moluccas the leaves are applied externally to carbuncles and boils. [B, 180 (a, 24).]

EURYCNÉMIE (Fr.). n. U^6-rek-na-me. From εὐρύς, broad, and κνήμη, the leg. A relative transverse widening of the upper two thirds of the tibia, associated with a great development of the muscles of the leg; the reverse of *platycnémie* (*q. v.*). [Kuhff, "Rev. d'anthropol.," 1881, 2; "Rev. des sci. méd.," Apr., 1882.]

EURYCOMA (Lat.), n. f. U^2-ri^{2}k(ru^{6}k)'o^{2}m-a^3. From εὐρύς, broad, and κόμη, the hair. A genus of Sumatran shrubs of the *Simarubaceæ*. [B, 19 (a, 24).]—**E. longifolia.** A species said to be a valuable febrifuge. [B, 19 (a, 24).]

EURYGNATHISMUS (Lat.), n. m. U^2-ri^{2}g(ru^{6}g)-na^{2}th(na^{3}th)-i^{2}z(i^{2}s)'mu^{3}s(mu^{4}s). The condition of being eurygnathous. [L.]

EURYGNATHOUS, adj. U^2-ri^{2}g'na^{2}th-u^{3}s. From εὐρύς, broad, and γνάθος, the jaw. Fr., *eurygnathe*. Having the upper jaws broad (as in the Mongolians). [I. Geoffroy St.-Hilaire (A, 301).]

EURYLABIS (Lat.), adj. U^2-ri^{2}l(ru^{6}l)'a^{2}b(a^{3}b)-i^{2}s. From εὐρύς, broad, and λαβίς, a forceps. Fr., *eurylabe*. Having the anus furnished with very large pinchers or forceps. [L, 180.]

EURYNTER (Lat.), n. m. U^2-ri^{2}n(ru^{6}n)'tu^{6}r(tar). Gen., *eurynter'os* (*-is*). From εὐρύνειν, to make broad. Fr., *euryntère*. Ger., *Ausdehnungswerkzeug*. A dilating instrument. [L, 135 (a, 14).]

EURYNOTE (Fr.), adj. U^6-re-not. From εὐρύς, broad, and νῶτον, the back. Having the back broad. [A, 385.]

EURYPERISTROPHIK (Ger.), n. Oi-ri^2-pe^{2}r-i^2-stro-fek'. From εὐρύς, broad, and περιστροφή, rotation. Of Küneke, the rotation of the fœtal head in its passage through the pelvis from an occipito-posterior to an occipito-anterior position. [A, 91.]

EURYPERISTROPHISCH (Ger.), adj. Oi-ru^6-pe^{2}r-i^2-strof'-i^{2}sh. Pertaining to *Euryperistrophik* (*q. v.*). [A, 91.]

EURYPROCTOS (Lat.), adj. U^2-ri^2(ru^6)-pro^{2}k(prok)'to^{2}s. Gr., εὐρύπρωκτος (from εὐρύς, broad, and πρωκτός, the rump or the anus). Having broad buttocks or a dilated anus. [A, 322, 387.]

EURYPTERIDA (Lat.), n. U^2-ri^{2}p(ru^{6}p)-te^{2}r'i^{2}d-a^3. From εὐρύς, broad, and πτερόν, a feather. 1. An extinct suborder of the *Arthropoda*. 2. An order or suborder of the *Merostomata*. The *Eurypteridæ* are a family of the same. [L, 121, 147, 228, 353, 354.]

EURYPYGE (Fr.), adj. U^6-re-pezh. From εὐρύς, broad, and πυγή, the rump. Having a large rump or tail. [L, 41.]

EURYPYLOUS, adj. U^2-ri^{2}p'i^{2}l-u^{3}s. From εὐρύς, broad, and πύλη, a gate. Of sponges, having a direct communication of the flagellated chambers with the incurrent and excurrent canals. [L, 121.]

EURYSMA (Lat.), n. n. U^2-ri^{2}z(ru^{6}s)'ma^3. Gen., *eurys'matos* (*-is*). From εὐρύνειν, to dilate. Fr., *eurysme*. Ger., *Erweiterung*. 1. Dilatation. 2. A dilated structure. [A, 322.]

EURYSMATICUS (Lat.), adj. U^2-ri^{2}z(ru^{6}s)-ma^{2}t(ma^{3}t)'i^{2}k-u^{3}s-(u^{4}s). Pertaining to or affected with dilatation. [A, 322.]

EURYSOMA (Lat.), n. U^2-ri^2(ru^6)-so'ma^3. Gen., *euryso'matos* (*-is*). From εὐρύς, broad, and σῶμα, the body. Of Dujardin, a subgenus of the genus *Distoma*. [L, 18.]

EURYSTOMA (Lat.), **EURYSTOMÆ** (Lat.), n's n. pl. and f. pl. U^2-ri^{2}s(ru^{6}s)'to^{2}m-a^3, -e(a^3-e^2). From εὐρύς, broad, and στόμα, the mouth. Fr., *eurystomes*. Ger., *Weitmündige*. A legion (or order) of the *Ctenophora* having wide mouths. The *Eurystomata* are a suborder of the *Ophidia*, including species having a dilatable mouth-cavity. [L, 173, 180, 210.]

EURYSTOMATOUS, adj. U^2-ri^2-sto^{2}m'a^{2}t-u^{3}s. Of or resembling the *Eurystomata*. [L, 121.]

EURYTHALIA (Lat.), n. f. U^2-ri^2(ru^6)-tha^{2}l(tha^{3}l)-i(e)'a^3. The genus *Gentiana*. [B, 121 (a, 24).]—**E. amarella.** See Gentiana *amarella*.—**E. campestris.** The *Gentiana campestris*. [B, 180 (a, 24).]—**E. germanica, E. pratensis.** The *Gentiana amarella*. [B, 173 (a, 24).]

EURYTHMY, n. U^2-ri^{2}th'mi^2. See Eurhythmia.

EUSARCOS (Lat.), adj. U^2-sa^{3}rk'o^{2}s. Gr., εὔσαρκος (from εὖ, well, and σάρξ, flesh). Ger., *fleischig*. Plump, robust. [A, 322, 325.]

EUSCAPHIS (Lat.), n. f. U^2'ska^{2}f(ska^{3}f)-i^{2}s. Gen., *euscaph'idos* (*-is*). Of Bentham and Hooker, a small genus of sapindaceous plants of the *Melianthеæ*, found in Japan. [B, 42, 121 (a, 24).]—**E. staphyleoides.** A species the internal bark of which is bitter and astringent, and in Japan is given in infusion, in dysentery and chronic diarrhœa. [B, 121 (a, 24).]

EUSÉ, n. In Provence, the *Quercus ilex*. [B, 121 (a, 24).]

EUSEMIA (Lat.), n. f. U^2-se^{2}m(sam)-i(e)'a^3. Gr., εὐσημία, (from εὖ, well, and σῆμα, a sign). Fr., *eusémie*. A favorable sign. [A, 322, 325, 387; L, 41.]

EUSINE (Lat), n. f. U^2'si^{2}n-e(a). Of Dioscorides, the *Parietaria officinalis*. [B, 88 (a, 14).]

EUSITIA (Lat.), n. f. U^2-si^{2}sh(si^{2}t)'i^2-a^3. Gr., εὐσιτία. A good appetite. [A, 325.]

EUSOMPHALUS (Lat.), n. m. U^2(e^2-u^4)-so^{2}m'fa^{2}l(fa^{3}l)-u^{3}s(u^{4}s). From εὖ, good, and ὀμφαλός, the navel. Fr., *eusomphalien*. Of I. Geoffroy St.-Hilaire, a double monster of which each individual performs its vital functions independently of the other and has its own umbilicus. [L, 41, 49, 88.]

EUSPLANCHNIA (Lat.), n. f. U^2-spla^{2}n^{2}k(spla^{3}n^{2}ch^2)'ni^2-a^3. Gr., εὐσπλαγχνία (from εὖ, well, and σπλάγχνα, the entrails). A healthy condition of the internal organs. [A, 322.]

EUSPLANCHNOS (Lat.), adj. U^2-spla^{2}n^{2}k(spla^{3}n^{2}ch^2)'no^{2}s. Gr., εὔσπλαγχνος. Having healthy viscera. [A, 325.]

EUSPONGIA (Lat.), n. f. U^2-spo^{2}n(spo^{2}n^2)'ji^2(gi^2)-a^3. From εὖ, well, and σπόγγος, a sponge. A genus of the *Spongiadæ*; in the pl., *Euspongiæ*, a family of the *Dictyospongiæ* having the network well marked. [L, 121; "Proc. of the Zool. Soc.," 1867, p. 498 (L).]—**E. equina.** The variety furnishing the ordinary bath-sponge. [L, 121.]—**E. Matthewsii.** A variety found in the vicinity of the Caroline Islands. [L, 121.]—**E. officinalis (adriatica).** The variety furnishing the Turkey or Levant sponge, the softest and most valued variety. [L, 121.]—**E. zimocca.** A hard, dense variety. [L, 121.]

EUSPORANGIATE, adj. U^2-spor-a^{2}n'ji^2-at. From εὖ, well, σπορά (see Spore), and ἀγγεῖον, a vessel. Having sporangeia formed from a group of cells. [B, 279.] Cf. Leptosporangiate.

EUSTACHIAN, adj. U^{2}s-tak'i^2-a^{2}n. Fr., *d'Eustache*. Ger., *Eustachisch*. 1. Discovered or described by Bartolomeo Eustachio. 2. Pertaining to the E. tube.

EUSTATHES (Lat.), adj. U^{2}s'ta^{2}th(ta^{3}th)-ez(as). Gr., εὐσταθής (from εὖ, well, and ἱστάναι, to stand). Fr., *eustathe*. Constant, regular (said of the seasons and diseases, in the latter case sometimes meaning mild); as a n., of Hartig, the outermost layer of cellulose in vegetable cells. [B, 121 (a, 24); L, 94 (a, 21).]

EUSTHENIA (Lat.), n. f. U^{2}s-the^{2}n-i(e)'a^3. Gr., εὐσθένεια. Robustness. [A, 387.]

EUSTOMACHUS (Lat.), adj. U^2-sto^{2}m'a^{2}k(a^{3}ch^2)-u^{3}s(u^{4}s). Gr., εὐστόμαχος. 1. Easy of digestion. 2. Having good digestion. 3. Promoting digestion. [A, 322, 325, 387.]

EUSTRONGYLUS (Lat.), n. m. U^2-stro^{2}n(stro^{2}n^2)'ji^{2}l(gu^{6}l)-u^{3}s(u^{4}s). From εὖ, well, and στρογγύλος, round. A genus of the *Strongylidæ*. [Diesing (L, 16).]—**E. gigas.** Fr., *strongle géant* (ou *des reins*). A species found in the kidney of many of the lower animals, and rarely in man. The male is about a foot, the female from 2 to 3 feet in length, and from ¼ to ½ inch in breadth, with a blunt head, a single oral aperture, and six papillæform nodules. It is probably viviparous. On the tail of the male there is a cup-shaped bursa, while that of the female is blunt. The vaginal orifice is on the ventral surface, near the head. [L, 17, 18.]

EUTAXIA (Lat.), n. f. U^2-ta^{2}x(ta^{3}x)'i^2-a^3. Gr., εὐταξία (from εὖ, well, and τάττειν, to arrange). Fr., *eutaxie*. Ger., *Eutaxie*. A normal state of the organism as to the arrangement and action of its various parts. [A, 322, 325; L, 41.]

EUTECTIC [Guthrie], adj. U^2-te^{2}k'ti^{2}k. From εὖ, well, and τίκτειν, to produce. Of stable structure, solidly combined (said of mixtures which, in passing from a liquid to a solid state, behave like a simple body, the temperature remaining constant and the constituent substances forming the mixture remaining associated during the process of solidification). [T. Turner, "Chem. News"; "Jour. of the Am. Chem. Soc.," Apr., 1885, p. 11 (B).]

EUTER (Ger.), n. Oit'e^{2}r. The udder. [A, 521.]

EUTERPE (Lat.), n. f. U^2-tu^{6}rp(te^{2}rp)'e(a). Gen., *euterp'es*. From Εὐτέρπη, one of the Muses. Fr., *e*. A genus of the *Palmæ*, tribe *Arecæ*. [B, 42, 121 (a, 24).]—**E. caribæa.** Fr., *chou palmiste*, *arbre au chou*. Ger., *eigentliche Kohlpalme*, *Kohlbaum*. West Indian cabbage-palm; a species the fruit of which yields a palm-oil. The heart of the young leaves is boiled and pickled like cabbage. [B, 19, 180, 275 (a, 24).]—**E. edulis.** Fr., *arec comestible*, *palmier à huile*, *palmiste franc*. The assai-palm of Pará. The young terminal buds furnish a nutritive and agreeable food. The trunk supplies sago. [B, 19, 42, 121 (a, 24).]—**E. globosa.** Fr., *e. globuleuse*. A species found in Brazil. The young buds are eaten. [B, 173 (a, 24).]—**E. montana.** A species found in the West Indies. The central portion of the upper part of the stem and the leaf-bud are eaten, cooked or pickled. [B, 19 (a, 24).]—**E. oleracea.** See *E. globosa*.—**E. pisifera.** A variety of the *E. globosa*. [B, 173 (a, 24).]

EUTEXIA (Lat.), n. f. U^2-te^{2}x'i^2-a^3. The state of being eutectic. [B.]

EUTHANASIA (Lat.), n. f. U^2-tha^{2}n(tha^{3}n)-az(a^{3}s)'i^2-a^3. Gr., εὐθανασία (from εὖ, well, and θάνατος, death). Fr., *euthanasie*. Ger., *Euthanasie*. An easy, peaceful, or painless death. [D.]

EUTHENIA (Lat.), n. U^2-then(than)'i^2-a^3. Gr., εὐθηνία. Vigor, health. [L, 94 (a, 21).]

EUTHERIA (Lat.), n. m. pl. U^2-the(tha)'ri^2-a^3. From εὖ, well, and θήρ, a beast. Of Huxley, the *Monodelphia*. [L, 121, 210.]

EUTHESIA (Lat.), n. f. U^2-thez(the^{2}s)'i^2-a^3. Gr., εὐθεσία (from εὖ, well, and τιθέναι, to place). Fr., *euthésie*. Ger., *Euthesie*. Of Galen, a strong habit of body. [L, 94 (a, 21).]

EUTHYCORYPHUS (Lat.), adj. U^2-thi^2(thu^6)-ko^{2}r'i^2(u^6)-fu^{3}s-(fu^{4}s). From εὐθύς, straight, and κορυφή, the crown of the head. Ger., *euthycoryph*. Having an angle of from 142° to 151° formed at a point highest above and in the same vertical plane with a line drawn from the punctum occipitale to the punctum bregmatis, the angle being formed by two lines drawn from those points respectively and meeting at the point indicated. [Lissauer (L).] Cf. CYRTOCORYPHUS and HOMALOCORYPHUS, and see cut under CATANTOSTOMUS.

EUTHYENTERON (Lat.), n. n. U^2-thi^2(thu^6)-e^{2}n'te^{2}r-o^{2}n. From εὐθύς, straight, and ἔντερον, an intestine. Of Aristotle, the rectum. [A, 322.]

EUTHYENTEROPOLYPUS (Lat.), n. m. U^2-thi^2(thu^6)-e^{2}n''-te^{2}r-o(o^3)-po^{2}l'i^{2}p(u^{6}p)-u^{3}s(u^{4}s). For deriv., see EUTHYENTERON and POLYPUS. Ger., *Mastdarmpolyp*. A rectal polypus. [A, 322.]

EUTHYENTEROSTENOMA (Lat.), n. n. U^2-thi^2(thu^6)-e^{2}n''-te^{2}r-o(o^3)-ste^{2}n-o'ma^3. Gen., *euthyenterostenom'atos* (*-is*). From εὐθύς, straight, ἔντερον, an intestine, and στενοῦν, to contract. Ger., *Mastdarmverengerung*. Stricture of the rectum. [A, 322.]

EUTHYMETOPUS (Lat.), adj. U^2-thi^2-(thu^6)-me^{2}t-op'u^{3}s(u^{4}s). From εὐθύς, straight, and μέτωπον, the forehead. Having a frontal angle of 141° or more. [Lissauer (L).]

EUTHYMIA (Lat.), n. f. U^2-thi^{2}m(thu^{6}m)'i^2-a^3. Gr., εὐθυμία (from εὖ, well, and θυμός, the soul). Fr., *euthymie*. Ger., *guter Gemüthszustand*. Of Hippocrates, tranquillity of mind, gladness. [L, 43, 95.]

EUTHYNEUROUS, adj. U^2-thi^2-nu^2'ru^{3}s. Pertaining to or resembling the *Euthyneura* (a branch of the *Anisopleura*). [L, 121.]

EUTHYOPISTHOCRANIUS (Lat.), adj. U^2-thi^2(thu^6)-o^{2}p-i^{2}s-tho(tho^3)-kran(kra^{3}n)'i^2-u^{3}s(u^{4}s). From εὐθύς, straight, ὄπισθεν, behind, and κρανίον, the skull. Ger., *euthyopisthokran*. Having an angle of between 154° and 172° formed by the union of two lines drawn from the external occipital protuberance and the punctum occipitale, at the point upon the skull highest above the horizontal plane. [Lissauer (L).]

EUTHYPNOE (Lat.), **EUTHYPNŒA** (Lat.), n's. f. U^2-thi^{2}p-(thu^{6}p)'no(no^2)-e(a), -thi^{2}p(thu^{6}p)-ne'(no^2'e^2)-a^3. From εὐθύς, straightforward, and πνεῖν, to breathe. The state of being euthypnous. [A, 322.]

EUTHYPNOUS, adj. U^2-thi^{2}p'nu^{3}s. Gr., εὐθύπνοος. Lat., *e*. Of Galen, breathing easily. [L, 94.]

EUTHYPOROS (Lat.), **EUTHYPORUS** (Lat.), adj's. U^2-thi^{2}p-(thu^{6}p)'o^{2}r-o^{2}s, -u^{3}s(u^{4}s). Gr., εὐθύπορος (from εὐθύς, straight, and πορεύεσθαι, to travel). Of Galen, direct (said of the extension of a fractured limb). [L, 94 (*a*, 21).]

EUTHYURANUS (Lat.), adj. U^2-thi^2(thu^6)-u^2(u)-ran(ra^{3}n)'-u^{3}s(u^{4}s). From εὐθύς, straight, and οὐρανός, heaven. Ger., *euthyuran*. Having an angle of from 163·5° to 180° formed at a point highest above and in the same vertical plane with a line drawn from the punctum occipitale to the punctum bregmatis, the angle being formed by two lines drawn from those points respectively and meeting at the point indicated. [Lissauer (L).] Cf. HOMALURANUS and CYRTURANUS.

EUTOCIA (Lat.), n. f. U^2-to(to^2)'si^2(ki^2)-a^3. Gr., εὐτοκία (from εὖ, easily, and τίκτειν, to bring forth). Fr., *eutocie*. Ger., *Eutokie*, *gesundheitsgemässe Geburt*. It., Sp., *e*. An easy parturition, unattended with any deviation from the natural course of events. The opposite of *dystocia*.

EUTOCOUS, adj. U^2'to^{2}k-u^{3}s. Gr., εὔτοκος. Lat., *eutocos*. 1. Having easy labors. 2. Prolific. [A, 322.]

EUTOLMIA (Lat.), n. f. U^2-to^{2}l'mi^2-a^3. Gr., εὐτολμία (from εὐτολμεῖν, to be resolute). Fr., *eutolmie*. Ger., *Eutolmie*. Courage, confidence of recovery (in patients). [A, 325, 521.]

EUTONIA (Lat.), n. f. U^2-ton(to^{2}n)'i^2-a^3. Gr., εὐτονία (from εὖ, well, and τείνειν, to stretch). Fr., *eutonie*. Ger., *gehörige Kraft*. Strength, tone, vigor. [L, 43.]

EUTONOS (Lat.), adj. U^2'to^{2}n-o^{2}s. Gr., εὔτονος. Possessed of eutonia. [A, 322.]

EUTROPHIA (Lat.), n. f. U^2-tro(tro^2)'fi^2-a^3. Gr., εὐτροφία (from εὖ, well, and τρέφειν, to nourish). Fr., *eutrophie*. Ger., *Wohlgenährtheit*. Good and abundant nutrition. [L, 43.]

EUTROPHIC, adj. U^2-trof'ik. Gr., εὔτροφος. Lat., *eutrophos*. 1. Nutritious. 2. Well nourished. [A, 322, 387.]

EUTROPIC, adj. U^2-tro^{2}p'i^{2}k. Gr., εὔτροπος (from εὖ, easily, and τρέπειν, to turn). Turning with the sun (said of twining stems coiling from right to left of the observer, viewing the coil from the outside as in the hop). ["Am. Jour. of Sci.," ser. 3, xiii, p. 391 (*a*, 24).]

EUTROPION (Lat.), n. n. U^2-trop(tro^{2}p)'i-o^{2}n. Inversion.—**E. partiale.** An inversion of the ciliary margin of the eyelid, so that the edge of the lid as well as the cilia rubs against the eyeball. [F.]—**E. totale.** Inversion of the entire length of the ciliary margin of the lid from internal to external canthus. [F.]

EUXANTHATE, n. U^2-za^{2}n'that. A salt of euxanthic acid. [B, 244 (*a*, 27).]

EUXANTHIC ACID, n. U^2-za^{2}n'thi^{2}k. Fr., *acide euxanthique*. Ger., *Euxanthinsäure*. A pale-yellow, crystalline substance, $C_{21}H_{18}O_{11}$, occurring, combined with magnesium, in East Indian yellow (*purree*). By some it is considered a vegetable substance, by others it is thought to be derived from the intestinal or urinary excretion of the camel, elephant, or buffalo. [B, 244 (*a*, 27).]

EUXANTHIN, n. U^2-za^{2}n'thi^{2}n. Fr., *euxanthine*. Ger., *E*. The principal constituent, $C_{19}H_{16}O_{10}$, of East Indian yellow purree. It forms shining yellow prisms. [B, 4 (*a*, 27).]

EUXANTHONE, n. U^2-za^{2}n'thon. Fr., *euxanthone*, *purréon*. Ger., *Euxanthon*. Porphyric acid; a compound, $C_{20}H_{12}O_6$, occurring as a yellow crystalline sublimate, obtained by heating euxanthic acid to from 160° to 180° C. [B. 244 (*a*, 27).]

EUXANTHONIC ACID, n. U^2-za^{2}n-tho^{2}n'i^{2}k. See EUXANTHIC ACID.

EUZET-LES-BAINS (Fr.), n. U^5-za-la-ba^{2}n^2. A place in the department of Gard, France, where there are cold and thermal springs, sulphurous, bituminous, and calcareous. [L, 41, 49, 87 (*a*, 14).]

EUZOMIS (Lat.), **EUZOMON** (Lat.), n's f. and n. U^2-zo'mi^{2}s, -mo^{2}n. Gr., εὔζωμον. The genus *Eruca*. [A, 322; L, 94 (*a*, 21).]

EUZOODYNAMIA (Lat.), n. f. U^2-zo-o(o^3)-di^{2}n(du^{6}n)-a(a^3)'-mi^2-a^3. From εὖ, well, ζῷον, a living being, and δύναμις, power. Fr., *euzoodynamie*. Of Gilbert, integrity of the vital forces, and perfect functional regularity. [L, 32.]

EVACUANT, adj. E-va^{2}k'u^2-a^{2}nt. Lat., *evacuans*. Fr., *évacuant*, *évacuateur*. Ger., *abführend*. It., Sp., *evacuante*. Causing evacuation, purgative or cathartic; as a n., an e. remedy. [A, 301.]

EVACUATION, n. E-va^{2}k-u^2-a'shu^{3}n. Gr., κένωσις. Lat., *evacuatio* (from *ex*, out, and *vacuus*, empty). Fr., *évacuation*. Ger., *Abgang*, *Abgehen*, *Ausleerung*, *Entleerung*. It., *evacuazione*. Sp., *evacuación*. 1. The act of removal of the contents of a cavity. It is often used to signify the emptying of the rectum, and in this sense is synonymous with *alvine e.* 2. Matter discharged from the rectum. [D, 1.]

EVACUATIVE, adj. E-va^{2}k'u^2-a-ti^{2}v. See EVACUANT.

EVACUATOR, n. E-va^{2}k'u^2-a-to^{2}r. A mechanical device for washing calculous *débris* out of the bladder in the operation of lithotrity. [F. N. Otis, "N. Y. Med. Jour.," Aug. 24, 1889, p. 197.] See LITHOLAPAXY.

EVACUATORIUM (Lat.), n. n. E(a)-va^{2}k(wa^{3}k)-u^2(u)-a(a^3)-to'ri^2-u^{3}m(u^{4}m). An excretory duct.—**E. seminis.** See VAS *deferens*.

EVAGAIDOS, n. A barbarous word of unknown origin and meaning, used in the term *humor e.* [L, 349.]

ÉVAGINATION (Fr.), n. A-va^3-zhe-na^3-se-o^{2}n^2. From *ex*, out of, and *vagina*, a sheath. Protrusion from a sheath or of anything invaginated. [A, 385.]

EVALVATE, adj. E-valv'at. Lat., *evalvis*. Fr., *évalve*. Ger., *klappenlos*. Without valves (said of fruits and especially of indehiscent fruits). [B, 1, 123 (*a*, 24).]

EVANESCENT, adj. E^{2}v-a^{2}n-e^{2}s'e^{2}nt. Lat., *evanescens*, *evanidus*. Fr., *évanescent*. Ger., *verschwindend*, *verlöschend*. Fugacious; of Mirbel, failing to develop and finally disappearing (said of a glandular reproductive organ); of Kirby, not distinct (said of a prothorax represented simply by a membrane); of leaves, decreasing abnormally, and disappearing. [B, 1, 123 (*a*, 24); L, 180.]—**E.-venose.** In botany, having lateral veins that disappear within the margin of the leaf. [B, 19 (*a*, 24).]

EVANIDINERVUS (Lat.), adj. E(a)-va^{2}n(wa^{3}n)-i^2-di^2-nu^{5}r-(ne^{2}r)'vu^{3}s(wu^{4}s). Fr., *évanidinervé*. See EVANESCENT-*venose*.

EVANIDUS (Lat.), adj. E(a)-va^{2}n(wa^{3}n)'i^{2}d-u^{3}s(u^{4}s). See EVANESCENT.

ÉVANOUISSEMENT (Fr.), n. A-va^3-nu-es-ma^{3}n^2. Fainting. [L, 41, 88.]

EVAPORABLE, adj. E-va^{2}p'o^{2}r-a-b'l. Fr., *évaporable*. Ger., *verdampfbar*. Susceptible of being evaporated. [L, 180.]

EVAPORATE, v. tr. and intr. E-va^{2}p'o-rat. Lat., *evaporare*. Fr., *évaporer*. Ger., *abdampfen*, *abdunsten*, *evaporiren*, *verdampfen*, *verdunsten*. It., *evaporare*. Sp., *evaporar*. 1. To convert from a solid or liquid state into a gaseous, by means of slow artificial or natural heat. 2. To undergo such a conversion. [*a*, 17, 27.]

EVAPORATING, adj. E-va^{2}p'o^{2}r-at-i^{2}n^2. Lat., *evaporans*. Readily undergoing evaporation.

EVAPORATION, n. E-va^{2}p-o-ra'shu^{3}n. Lat., *evaporatio* (from *ex*, out, and *vapor*, steam). Fr., *évaporation*. Ger., *abdampfung*. It., *evaporazione*. Sp., *evaporación*. The act or process of evaporating. **E. in vacuo.** Fr., *évaporation dans le vide*. A process of evaporating extracts in an exhausted receiver which may be accomplished more rapidly and at a lower temperature than by the ordinary process. [L, 41 (*a*, 21).]

EVAPORATORIUM (Lat.), n. n. E(a)-va^{2}p(wa^{3}p)-o^{2}r-a(a^3)-to'-ri^2-u^{3}m(u^{4}m). An evaporating apparatus.

EVAPOROMETER, n. E-va^{2}p-o^{2}r-o^{2}m'e^{5}t-u^{6}r. From *evaporare*, to evaporate, and μέτρον, a measure. Fr., *évaporomètre*. See ATMIDOMETER.

ÉVAUX (Fr.), n. A-vo. A place in the department of the Creuse, France, where there are warm sulphurous springs. [L, 87, 88, 105 (*a*, 14).]

EVEN, adj. Ev'n. Of feathers, equal in length; of leaves, having a smooth surface, free from inequalities. [L, 343.]

EVENING-FLOWER, n. Ev'n'i^{2}n^2-flu^5-u^4-u^{5}r. The genus *Hesperantha*. [B, 275 (*a*, 24).]

EVENING-PRIMROSE, n. Ev'n-i^{2}n^2-pri^{2}m'roz. The *Œnothera biennis*. [B, 121, 185 (*a*, 24).]—**Common e.-p.** See *E.-p.*—**Dandelion-leaved e.-p.** The *Œnothera taraxacifolia*. [B, 275 (*a*, 24).]—**Large-flowered e.-p.** The *Œnothera Lamarckiana*. [B, 275 (*a*, 24).]—**Large rose-tinted e.-p.** The *Œnothera marginata*. [B, 275 (*a*, 24).]—**Orange-flowered e.-p.** The *Œnothera bistorta Veitchi*. [B, 275 (*a*, 24).]—**Tall-white e.-p.** The *Œnothera speciosa*. [B, 275 (*a*, 24).]

EVENNESS, n. Ev'n'ne^{2}s. Lat., *planitudo*. Fr., *égalité*, *uniformité*. Ger., *Ebenheit*. The quality of being even. [*a*, 17.]

ÉVENT (Fr.), n. A-va3n2. The vent, or blow-hole, of a cetacean. [L, 43, 180.]

ÉVENTAIL (Fr.), n. A-va3n2-ta3-y'. 1. A fan. 2. The *Hordeum zeocriton.* [B, 121, 173 (a, 24).]—**E. astigmatique.** See *Astigmatic* FAN.—**E. fibreux.** Of Leuret and Gratiolet, the radiating appearance seen in a cross-section of the corpus striatum. [I, 35 (K).]—**E. pédonculaire.** The beginning of the corona radiata in the crus cerebri. Figured by Leuret and Gratiolet. [I, 35 (K).]

ÉVENTÉ (Fr.), adj. A-va3n2-ta. Deprived of aroma. [A, 301.]

EVENTRATION, n. E-ve2n-tra'shu3n. Lat., *eventratio* (from *e*, out of, and *venter*, the belly). Fr., *éventration.* Ger., *Bauchbruch.* It., *sventrazione.* Sp., *eventración.* 1. A partial protrusion of the contents of the abdomen, between the two recti muscles, in consequence of their separation. 2. A hernia appearing at any point of the anterior or lateral surfaces of the abdomen, outside of the recti muscles. [E.] 3. See EXENTERATION.

EVENTUS (Lat.), n. m. E(a)-ve2nt(we2nt)'u3s(u4s). The termination (of a disease). [L, 94.]

EVER, n. E2v'u5r. The *Lolium perenne.* [A, 505 (a, 21).]

EVERFERNE, n. E2v'u5r-fu5rn. The *Polypodium vulgare.* [A, 505 (a, 21).]

EVER-GRASS, n. E2v'u5r-gra2s. The *Lolium perenne.* [A, 505 (a, 21).]

EVERGREEN, adj. E2v'u5r-gren. Lat., *sempervirens.* Fr., *toujours vert.* Ger., *immergrün.* Having leaves which remain on the stem without apparent change throughout at least one period of suspension of vegetation (said especially of pines and spruces). [B, 229 (a, 24).]

EVERLASTING, n. E2v-u5r-la2st'i2n2. A name for various species of the *Compositæ* (*e. g.*, *Gnaphalium*, *Helicryson*, and *Antennaria*), which retain their form and color when dried. [A, 505 (a, 21); B, 275 (a, 24).]—**Australian e.-flower.** The *Helichrysum lucidum* (seu *bracteatum*), and *Helipterum Manglesii.* [B, 275 (a, 24).]—**Bridal e.-flower.** The *Gnaphalium leontopodium.* [B, 275 (a, 24).]—**Common American e.-flower.** The *Gnaphalium polycephalum*, and *Gnaphalium decurrens.* [B, 275 (a, 24).]—**Common shrubbery e.-flower.** The *Helichrysum stœchas.* [B, 275 (a, 24).]—**E. Moor.** The *Antennaria dioica.* [A, 505 (a, 21).]—**E. pea.** The *Lathyrus latifolius*, etc. [B, 275 (a, 24).]—**Jamaica e.-flower.** The *Gnaphalium americanum.* [B, 275 (a, 24).]—**Large-flowered e.-flower.** The *Helichrysum macranthum.* [B, 275 (a, 24).]—**Moor** (or **Mountain**) **e.-flower.** The *Antennaria dioica.* [B, 275 (a, 24).]—**Mouse-ear e.-flower.** The *Antennaria plantaginifolia.* [B, 275 (a, 24).]—**Pearly e.-flower.** The *Antennaria margaritacea.* [B, 275 (a, 24).]—**Pink-rosette e.-flower.** The *Rhodanthe Manglesii.* [B, 275 (a, 24).]—**Rosy e.-flower.** The *Rhodanthe Manglesii maculata.* [B, 275 (a, 24).]—**Rosy-flowered mountain e.-flower.** The *Antennaria dioica minor.* [B, 275 (a, 24).]—**Swan River e.-flower.** The *Rhodanthe Manglesii.* [B, 275 (a, 24).]—**Sweet-scented e.-flower.** The *Gnaphalium polycephalum.* [B, 274 (a, 24).]—**Tasmanian e.-flower.** The *Helichrysum apiculatum.* [B, 275 (a, 24).]—**Yellow e.-flower.** The *Helichrysum orientale* and *Helichrysum* (*Gnaphalium*) *arenarium.* [B, 275 (a, 24).]

EVERNESIC ACID, n. E2v-u5r-ne2s'i2k. A substance, $C_9H_{10}O_4$, crystallizing in nacreous lamellæ, fusible at 157° C., and either extracted from lichens, or formed by treating evernic acid with milk of baryta. [B, 244 (a, 27).]

EVERNIA (Lat.), n. f. E(a)-vu2rn(we2rn)'i2-a3. From εὐερνής, sprouting well, flourishing. A small genus of lichens belonging to the *Parmeliei*, some of the species of which furnish dye, others, when powdered with starch, were used formerly as a basis of hair-powder and perfumes, and also as a substitute for gum arabic in cotton-printing. It was employed also as a demulcent under the name of *muscus acaciæ.* [B, 19, 180 (a, 24).]—**E. furfuracea.** A species of *E.* found in France which is considered a febrifuge. [B, 173 (a, 24).]—**E. prunastri.** The *Parmelia prunastri.* [B, 180 (a, 24).]—**E. vulpina.** A European species which is used in Norway mixed with powdered glass to kill wolves. It furnishes a dye called *valpuline.* [" Proc. of the Am. Pharm. Assoc.," xxvii (a, 14).]—**E. xantholina.** A variety of *E. vulpina.* [B, 173 (a, 24).]

EVERNIC ACID, n. E-vu5rn'i2k. Fr., *acide évernique.* Ger., *Everniasäure.* A homologue, $C_{17}H_{16}O_7$, of lecanoric acid, occurring in little crystalline spheres, and extracted from *Evernia prunastri.* [B, 244 (a, 27).]

EVERNINIC ACID, n. E2v-u5r-ni2n'i2k. Fr., *acide évernique.* Ger., *Everninsäure.* See EVERNESIC ACID.

EVERNITIC ACID, n. E2v-u5r-ni2t'i2k. Fr., *acide évernitique.* An acid, $C_9H_5(NO_2)_3H_2O_4$, resembling styphnic oxypicric acid and prepared by treating everninic acid with nitric acid. It forms long yellow acicular crystals. [B, 244 (a, 27).]

EVEROCKS, n. E2v'u5r-o2x. The *Rubus chamœmorus.* [A, 505 (a, 21).]

ÉVERRER (Fr.), v. tr. A-ve2r-ra. To cut out a so-called worm (a tendon, nerve, or the like) from an animal. [A, 301.]

EVERRICULUM (Lat.), n. n. E(a)-vu5r(we2r)-ri2k'u2(u4)-lu3m-(lu4m). Fr., *éverricule.* A scoop for cleaning out fragments of stone or other foreign bodies from the bladder. [E.]

EVERSIBLE, adj. E-vu5rs'i2b'l. Capable of being everted. [L, 11.]

EVERSION, n. E-vu5r'zhu3n. Gr., ἀνατροπή. Lat., *eversio.* Fr., *éversion.* Ger., *Ausstülpung*, *Herauswenden.* A turning outward. [A, 322.]

EVERTEBRATA (Lat.), n. n. pl. E(a)-vu5r(we2r)-te2-bra-(bra3)'ta3. See INVERTEBRATA.

EVERTICULUM (Lat.), n. m. E(a)-vu5r(we2r)-ti2k'u2(u4)-lu3m-(lu4m). Fr., *éverticule.* See EVERRICULUM.

EVERY, n. E2v'u5r-i2. The *Lolium perenne.* [A, 505 (a, 21).]

EVE'S-CUSHION, n. Evz'ku4sh-u3n. The *Saxifraga hypnoides.* [B, 275 (a, 24).]

EVEWEED, n. Ev'wed. The *Hesperis matronalis.* [A, 505 (a, 21).]

EVIA (Lat.), n. f. E(a)'vi2(wi2)-a3. A genus of the *Anacardiaceæ*, tribe *Spondieæ*, closely allied to, if not identical with, the *Spondias.* Its fruits are edible. [B, 19, 42, 121 (a, 24).]—**E. amara.** The *Spondias amara.* [B, 173 (a, 24).]

ÉVIAN (Fr.), n. A-ve-a3n2. A place in Switzerland, near Lake Geneva, where there is a spring containing free carbonic acid, sodium chloride, sodium carbonate, etc. [L, 87, 88, 105, 135 (a, 14).]

ÉVIDEMENT (Fr.), n. A-ved-ma3n2. Ger., *Aushöhlen.* It., *vuotamento.* A scooping out. [L, 41.]—**E. des os, E. sous-périosté.** Of Sédillot, the operation of scraping out carious bone with a sharp scoop. [A, 319.]

ÉVIDEUR (Fr.), n. A-ve-du5r. An instrument used in *évidement.* [A, 385.]

EVIL, n. Ev'l. A popular term for certain diseases.—**Aleppo e.** Lat., *febris aleppensis.* Fr., *mal d'Aleppo.* Ger., *Aleppokrankheit*, *Aleppobeule*, *Aleppopustel.* See *Aleppo* BOIL.—**Fox e.** Baldness. [A, 301.] See ALOPECIA.—**King's e.** See SCROFULA.

EVIM PANNAH, n. In Malabar, the *Caryota ureus.* [B, 121 (a, 24).]

EVIRATION, n. E2v-i2r-a'shu3n. Lat., *eviratio* (from *e*, priv., and *vir*, a man). Fr., *éviration.* 1. Castration. 2. The premature loss of sexual power in men. [L, 41.]

EVISCERATION, n. E-vi2s-u5r-a'shu3n. Lat., *evisceratio* (from *ex*, out, and *viscera*, the viscera). Fr., *éviscération.* Ger., *Ausleerung*, *Ausweidung.* It., *svisceraziono.* Sp., *evisceración.* That variety of embryotomy which consists in removing the contents of the thorax and abdomen.—**E. of the eyeball.** Fr., *éviscération de l'œil.* Ger., *E. des Auges.* An operation which consists in first excising the anterior portion of the eyeball and then completely evacuating its contents, leaving nothing behind but the sclerotic. [F.]

EVISTIOLA (Lat.), n. f. E(a)-vi2s(wi2s)-ti(ti2)'o2l-a3. Of Paracelsus, a leprous affection of the nape of the neck. [L, 84.]

EVITTATE, adj. E-vi2t'at. Lat., *evittatus* (from *ex*, out, and *vitta*, a band). Fr., *évitté.* Ger., *striemenlos.* Having no stripes, vittæ, or spots. [B, 1, 19, 123 (a, 24).]

EVODIA (Lat.), n. f. E(a)-vod'i2-a2. Fr., *évodie.* Of Forster, a genus of the *Rutaceæ*, tribe *Zanthoxyleæ.* [B, 42 (a, 24).]—**E. aromatica.** See AGATHOPHYLLUM *aromaticum.*—**E. febrifuga.** See ESENBECKIA *febrifuga.*—**E. fraxinifolia.** Of Helbig, a species furnishing a pale-yellow oil said to have the power of masking the odor of iodoform. [B, 5 (a, 24).]—**E. glauca.** A species found in Japan that contains berberine, and is used as a yellow dye. [B, 5 (a, 24); " Proc. of the Am. Pharm. Assoc.," xxvii, xxxiv, xxxv (a, 14).]—**E. hortensis.** A species found in the New Hebrides, where it is used as a vulnerary, and internally for headache. [B, 180 (a, 24).]—**E. longifolia.** A species found in the Fiji Islands, where it is called *Ucisalusala.* The leaves, steeped in the milk of the cocoa-nut, are used to prevent abortion. [B, 5 (a, 24); " Proc. of the Am. Pharm. Assoc.," xxxiii, xxxiv (a, 14).]—**E. ravensara.** See AGATHOPHYLLUM *aromaticum.*—**E. rutæcarpa.** A Japanese shrub. The fruit and stalks are used as a purgative and emmenagogue. [B, 81 (a, 21).]

EVODINE, n. E2v'o-den. See ESENBECKINE.

ÉVODYLE (Fr.), n. A-vo-del. A compound, $C_{11}H_{21}O$, a homologue of acetyl, whose hydride is the essential constituent of oil of rue. [B, 244 (a, 27); L, 49.]

EVOLUTE, EVOLUTED, adj's. E2v-o-lu2t', -lu2t'e2d. Lat., *evolutus.* Fr., *évoluté.* Ger., *entwickelt*, *enthüllt.* Developed, expanded (said of flowers and other organs). [B, 1, 121, 123 (c, 24).]

ÉVOLUTIF (Fr.), adj. A-vo-lu5-tef. Pertaining to evolution. [A, 385.]

ÉVOLUTILITÉ (Fr.), n. A-vo-lu5-te-le-ta. Capability of undergoing evolution. [A, 301.]

EVOLUTIO (Lat.), n. f. E(a)-vo2l(wo2l)-u2(u)'shi2(ti2)-o. Gen., *evolutio'nis.* See EVOLUTION.—**E. conduplicato corpore.** Of Röderer, that form of spontaneous evolution of the fœtus in which the presenting shoulder is forced downward and imprisoned under the symphysis pubis. " The trunk having been enormously flexed, the head and thorax simultaneously enter the pelvic cavity, the former being deeply imbedded in the latter. The second arm and shoulder lie between the breech and thorax on the one hand, and the head on the other. The presenting shoulder having been expelled, the head and thorax are born together, and these are followed by the breech and the legs." [A, 22.]—**E. ex omnibus partibus.** A term formerly applied in embryology to that form of development in which there is no germinal streak. [L, 353.]—**E. ex una parte.** A term in embryology formerly applied to that form of development in which a germinal streak is formed. [L, 353.]—**E. spontanea.** See *Spontaneous* EVOLUTION.

EVOLUTION, n. E2v-o-lu2'shu3n. Lat., *evolutio* (from *evolvere*, to unroll). Fr., *évolution.* Ger., *Entwickelung.* It., *evoluzione.* Sp., *evolución*, *desarrollo.* 1. The gradual development of an organism or of one or more of its parts. 2. Of Darwin and others, the supposed process of gradual change by which new species arise and low organisms are converted into higher ones in the course of long periods of time. 3. Of the uterus, its growth and development during pregnancy (the opposite of *involution*). 4. In chemistry, the gradual liberation of a substance (*e. g.*, a gas) from

a compound. 5. In obstetrics, see *Spontaneous e.*—**Cephalic spontaneous e.** Fr., *évolution spontanée céphalique.* Of Velpeau, that variety of spontaneous e. in which the cephalic pole descends. [A, 24.]—**Doctrine of e.** Ger., *Evolutionslehre.* 1. The theory of the origin of species by the operation of internal agencies, as distinguished from environment. 2. That theory in embryology which held that the formation of the embryo began in the ovarian ovum, as opposed to epigenesis (*q. v.*). [A, 8.]—**E's aplasie** (Ger.). Defective fœtal development. [Samuel (A, 319).]—**Hypothesis of e.** See *Doctrine of e.*—**Pelvic spontaneous e.** Fr., *évolution spontanée pelvienne.* Of Velpeau, that variety of spontaneous e. in which the pelvic pole descends. [A, 24.]—**Spontaneous e.** Lat., *evolutio spontanea.* Fr., *évolution spontanée.* Ger., *Selbstentwickelung.* It., *evoluzione spontanea.* Sp., *evolución espontánea.* The natural expulsion of a fœtus that presents transversely without the occurrence of spontaneous version. "The presenting shoulder is forced into the depths of the true pelvis by the violence of the uterine contractions, instead of being diverted laterally, as is the case in spontaneous version, and becomes firmly fixed beneath the symphysis, while the corresponding arm protrudes through the vulva. The body of the fœtus is then so forcibly flexed that the breech and the head lie in close proximity to each other. The former is in contact with the sacro-iliac synchondrosis, while the latter is immovably held between the breech and the upper border of the symphysis. The neck and shoulder, which rest against the lower border of the symphysis, now become the pivot upon which the fœtus rotates. The trunk of the fœtus is driven beyond the shoulder, and the thorax, breech, and legs are born in the order named. The other shoulder then follows, and the head is finally expelled." This is the variety described by Douglas; for the other, see EVOLUTIO *conduplicato corpore.* Although the term "spontaneous expulsion" has been attributed to Douglas, he expressly says: "I wish to retain the appellation 'spontaneous evolution,' given by Dr. Denman to the event of a delivery, in arm presentation, unaided by the accoucheur; both because the fact is known by the term, and because it appears to me more suitable than that of expulsion." [A, 22, 40, 67.] See also *Cephalic* and *Pelvic spontaneous e.* and cf. *Spontaneous* VERSION.—**Theory of e.** See *Doctrine of e.*—**Vitiated e.** See CENOGENESIS.

ÉVOLUTION (Fr.), n. A-vo-lu^6-se-o^{3}n^2. See EVOLUTION.—**E. forcée.** An evolution (in the obstetrical sense) made possible or induced by forcible measures directed to the destruction of the integrity of the fœtus, such as rhachiotomy, etc. [A, 54.]—**E. nodulaire graisseuse du foie.** Syn.: *interversion lobulaire.* Of Sabourin, the nodular lesion of cirrhosis of the liver, consisting, according to him, of a vesiculo-fatty degeneration of the cells surrounding the portal spaces, which extends toward the central veins of the neighboring hepatic lobules. [Rev. de méd.," May, July, 1883; "Union méd.," Aug. 25, 1883, p. 340.]—**E. régressive.** See HISTOLYSIS.

ÉVOLUTIONISME (Fr.), n. A-vo-lu^6-se-o^{3}n^2-i^{2}z'm. See *Doctrine of* EVOLUTION.

ÉVOLUTIONISTE (Fr.), n. A-vo-lu^6-se-o^{3}n-est. A believer in the doctrine of evolution. [A, 301.]

EVOLVULUS (Lat.), n. m. E(a)-vo^{2}l(wo^{2}l)'vu^2(wu^4)-lu^{3}s(lu^{4}s). A genus of the *Convolvulaceæ*, tribe *Convolvuleæ.* [B, 42, 121 (α, 24).]—**E. alsinoides, E. hirsutus.** Fr., *liserotte à feuilles d'alsine.* Ger., *mierenartige Kriechwinde.* A species found in India: given in decoction as a tonic febrifuge and in intestinal affections. [B, 173, 180 (α, 24).]

ÉVONYMINE (Fr.), n. A-vo-ne-men. See EUONYMIN.

EVULSION, n. E-vu^{3}l'shu^{3}n. Lat., *evulsio* (from *evellere*, to pluck out). Fr., *évulsion, arrachement.* Ger., *Ausreissung.* Forcible extraction. [A, 322, 325, 385.]

EVULSIVE, adj. E-vu^{3}l'si^{2}v. Fr., *évulsif.* Pertaining to or serving for evulsion. [A, 385.]

EXACERBATION, n. E^{2}x-a^{2}s-u^{5}r-ba'shu^{3}n. From *acerbus*, harsh. Gr., παλιγκότησις. Fr., *e.* Ger., *Verstärkung, Steigerung.* It., *esacerbazione.* Sp., *exacerbación.* A temporary aggravation of the symptoms of a disease. [A, 301, 322.]

EXACUM (Lat.), n. n. E^{2}x'a^{2}k(a^{3}k)-u^{3}m(u^{4}m). Fr., *centaurelle, gentianelle.* Ger., *Kugelröhre.* A genus of the *Gentianeæ*, tribe *Eraceæ.* [B, 42, 121 (α, 24).]—**E. bicolor.** Hind. *ooda-chiretta.* A small plant of the *Gentianaceæ*, found in the East Indies, where it is sold under the name of *country kariyàt.* It is powerfully bitter, and is a substitute for gentian as a stomachic. [B, 172 (α, 24).]—**E. filiforme.** The *Gentiana filiformis.* [B, 19 (α, 24).]—**E. guianense.** See SEBÆA *guianensis.*—**E. hyssopifolium.** The *Cicendra hyssopifolia.* [B, 172 (α, 24).]—**E. pedunculatum.** An East Indian species, used as a febrifuge. [B, 180 (α, 24).]—**E. purpureum.** The *Seboea guianensis.* [B, 180 (α, 24).]—**E. ramosum.** See COUTOUBEA *ramosa*—**E. spicatum.** See COUTOUBEA *spicatum.*—**E. tenuifolium.** Fr., *centaurelle violet.* A Guiana species, used as a febrifuge. [B, 173, 180 (α, 24).]—**E. tetragonum.** An East Indian species having properties similar to those of the *E. bicolor.* [B, 172 (α, 24).]—**E. verticillatum.** Fr., *gentiane vertecillée.* A West Indian species furnishing a bitter tonic and febrifuge. [B, 173, 180 (α, 24).]—**E. violaceum.** See *E. tenuifolium.*—**E. zeylanicum.** The *Lisianthus zeylanicus.* [B, 180 (α, 24).]

EXÆMATOSIS (Lat.), n. f. E^{2}x-e^{2}m(a^3-e^{2}m)-a^3-to'-si^{3}s. From *ex*, out, and αἷμα, blood. Gen., *exœmatos'eos (-is).* 1. See HÆMATOSIS. 2. A wounding sufficient to draw blood. [L, 135 (α, 14).]

EXÆMIA (Lat.), n. f. E^{2}x-e^{2}m'(a^3-am')-i^2-a^3. See ANÆMIA.

EXÆMOS (Lat.), adj. E^{2}x-em'(a^3-am')-o^{2}s. Gr., ἔξαιμος. See ANÆMIC.

EXÆRESIS (Lat.), n. f. E^{2}x-e^{2}r'(a^3'e^{2}r)-e^{2}s-i^{2}s. Gr., ἐξαίρεσις (from ἐξ, out, and αἵρεσις, a taking). Gen., *exœres'eos. exœr'esis.* Fr., *exérèse.* Ger., *Herausnehmen.* One of the general divisions of surgery according to the ancients, including all operations by which parts of the body were removed; such as amputation, excision, ablation, etc. [E.]

EXAGOGE (Lat.), n. f. E^{2}x-a^{2}g(a^{3}g)-o'je(ga). Gen., *exagog'es.* Gr., ἐξαγωγή. 1. A departure, evacuation, excretion. 2. Death. [A, 322, 387.]

EXAGOGIS (Lat.), n. f. E^{2}x-a^{2}g(a^{3}g)-o'ji^{2}s(gi^{2}s). Gr., ἐξαγωγίς. An excretory channel. [A, 322.]

EXALATE, adj. E^{2}x-al'at. From *ex*, without, and *ala*, a wing. Without wings. [L, 48 (α, 24).]

EXALBUMINOUS, adj. E^{2}x-a^{2}l-bu^2'mi^2-nu^{3}s. Lat., *exalbuminosus* (from *ex*, priv., and *albumen*). Fr., *exalbuminé.* Ger., *eiweisslos.* Destitute of albumen. [B, 1 (α, 24).]

EXALGINE, n. E^{2}x-a^{2}l'jen. From *ex*, priv., and ἄλγος, pain. Fr., *e.* Ger., *Exalgin.* Methyl acetanilide, $C_9H_{11}NO = C_6H_5N \left\{ \begin{matrix} CH_3 \\ C_2H_3 \end{matrix} \right. O$, a derivative of the aromatic series, discovered by Brigonnet, prepared by the action of methyl iodide on sodium acetanilide; occurring in acicular or tabular crystals. It is closely allied to antipyrine in its physiological action, but said to have less power as an antipyretic and more as an analgesic. It is eliminated with the urine, and is said to decrease the amount of sugar in the urine in diabetes. In poisonous doses it causes convulsions, cyanosis, and dyspnœa. [Dujardin-Beaumetz, "Comptes rend. de l'Ac. des sci.," Mar. 18, 1889 (α, 18); A. B. Pope, "N. Y. Med. Jour.," Feb. 22, 1890, p. 209; "Proc. of the Am. Pharm. Assoc.," xxxvii (α, 14); α, 27.]

EXALIPSIS (Lat.), n. f. E^{2}x-a^{2}l(a^{3}l)-i^{2}p(ep)'si^{2}s. Gen., *exalips'eos (-is).* Gr., ἐξάλειψις. Ger., *Verschwindenmachen.* A blotting out, obliteration (as of a blemish by something smeared over it, of an ulcer by healing it). [A, 322.]

EXALIPTRUM (Lat.), n. n. E^{2}x-a^{2}l(a^{3}l)-i^{2}p(ep)'tru^{3}m(tru^{4}m). Gr., ἐξάλειπτρον. A pot or box for perfumes, ointments, etc. [A, 322, 387.]

EXALLAGE (Lat.), **EXALLAXIS** (Lat.), n's. f. E^{2}x-a^{2}l(a^{3}l)'-la^3-je(ga), -a^{2}l(a^{3}l)-la^{2}x(la^{3}x)'i^{2}s. Gen., *exal'lages, -allax'eos (-is).* Gr., ἐξαλλαγή, ἐξάλλαξις. Alteration (as of tissues). [A, 322, 387.]

EXALMA (Lat.), **EXALSIS** (Lat.), n's, n. and f. E^{2}x-a^{2}l(a^{3}l)'-ma^3, -si^{3}s. Gen., *exal'matos (-is), exal'seos (-is).* Gr., ἔξαλμα, ἔξαλσις (from ἐξ, out, and ἅλλεσθαι, to leap). Ger., *Ausspringen.* Dislocation of one of the vertebræ or of one of the carpal or tarsal bones. [E.]

EXALTATION, n. E^{2}x-a^{4}lt-a'shu^{3}n. Gr., ὕψωσις. Lat., *exaltatio* (from *exaltare*, to lift up). Fr., *e.* Ger., *Erhöhung* (2d def.), *Aberwitz, Grössenwahnsinn* (3d def.). 1. Anciently, sublimation. 2. An increase of a function. 3. An insane state characterized by delusions of grandeur. [A, 301, 322, 325, 385.]

EXALTATUS (Lat.), adj. E^{2}x-a^{2}l(a^{3}l)-ta(ta^3)'tu^{3}s(tu^{4}s). Fr., *élancé.* Ger., *hoch.* Of stems, tall and slender. [B, 1, 123 (α, 24).]

EXAMBLOMA (Lat.), **EXAMBLOSIS** (Lat.), n's. n. and f. E^{2}x-a^{2}m(a^{3}m)-blo'ma^3, -si^{2}s. Gen., *examblom'atos (-is), blos'eos (-is).* Gr., ἐξάμβλωμα, ἐξάμβλωσις (from ἐξαμβλοῦν, to make to miscarry). Fr., *examblome, examblose.* Ger., *Fehlgeburt.* Abortion. [A, 322, 325.]

EXAMINATION, n. E^{2}x-a^{2}m-i^2-na'shu^{3}n. Lat., *examinatio* (from *examinare*, to examine). Fr., *examen, exploration.* Ger., *Untersuchung.* It., *esame.* Sp., *exámen.* The process of ascertaining the properties, condition, etc., of a substance or an organism by means of the senses or, in the case of a person, by asking questions.—**Bimanual e., Combined e., Conjoined e.** Fr., *exploration combinée.* Ger., *gemischte* (oder *mehrseitige*) *Untersuchung.* It., *esplorazione combinata.* Sp., *exploración mixta, manipulación combinada.* The e. of a part (*e. g.*, the uterus) with both hands, each hand approaching it by a different route.—**Digital e.** An e. with the finger.—**External e.** Fr., *examen extérieur, vue* (2d def.). Ger., *äussere Untersuchung.* It., *esplorazione esterna.* Sp., *exámen externo.* 1. Physical e. from without. 2. See INSPECTION.—**Instrumental e.** Ger., *instrumentelle Untersuchung.* An e. by means of instruments.—**Internal e.** Fr., *exploration interne.* Ger., *innere Untersuchung.* It., *esplorazione interna.* Sp., *exámen interno.* An e. of the interior or of a part by means of the finger or an instrument inserted within the body.—**Manual e.** Fr., *exploration manuelle.* Ger., *manuelle Untersuchung.* It., *esplorazione manuale.* Sp., *exámen manual.* An e. with the hand.—**Microscopical e.** E. with the microscope.—**Oral e.** Fr., *examen oral.* Ger., *mündliches Examen.* It., *esaminazione orale.* Sp., *exámen oral.* The e. of a patient by interrogation, as opposed to physical e.—**Physical e.** Fr., *exploration physicale.* Ger., *physikalische Untersuchung.* It., *esplorazione fisicale.* Sp., *exámen fisical.* E. by means of sight, hearing, smell, touch, etc., as distinguished from interrogation.—**Post-mortem e.** The e. of a dead body, especially with the object of ascertaining the cause of death.

EXANASTOMOSIS (Lat.), n. f. E^{2}x-a^{2}n(a^{3}n)-a^{2}s(a^{3}s)-to^{2}m-o'-sis. Gen., *exanastomo'seos (-is).* Gr., ἐξαναστόμωσις. See ANASTOMOSIS.

EXANASTROPHE (Lat.), n. f. E^{2}x-a^{2}n(a^{3}n)-a^{2}s(^{3}s)'tro(tro^2)-fe(fa). Gr., ἐξαναστροφή. See CONVALESCENCE.

EXANGEIA (Lat.), n. E^{2}x-a^{2}n(a^{3}n^2)-ji'(ge^2-e')-a^3. From ἐξ, out, and ἀγγεῖον, a vessel. Dilatation of a blood-vessel; in Young's classification of diseases, a genus of the *Paraphymata.* [L, 290.]—**E. aneurysma.** See ANEURYSM.—**E. intermedia.** Aneurysm by anastomosis. [L, 290.]—**E. mixta.** Varicose aneurysm. [L, 290.]—**E. varix.** See VARIX.

EXANIA (Lat.), n. f. E^{2}x-an(a^{3}n)'i^2-a^3. Fr., *exanie.* See PROCTOCELE.

EXANIMATION, n. E^{2}x-a^{2}n-i^{2}m-a'shu^{3}n. Lat., *exanimatio* (from *ex*, priv., and *anima*, the soul). Fr., *e.* Ger., *Entseelung* (1st def.), *Tödtung* (2d def.). 1. Swooning. 2. Death. [A, 322.]

EXANNULATE, adj. E^{2}x-a^{2}n'u^2-lat. Lat., *exannulatus* (from *ex*, without, and *annulus*, a ring). Fr., *exannulé*. Ger., *unberingt*. In botany, destitute of an annulus. [B, 1, 77, 123 (*a*, 24).]

EXANTENNATUS (Lat.), adj. E^{2}x-a^{2}n(a^{3}n)-te^{2}n-at(a^{3}t)'u^{3}s-(u^{4}s). From *ex*, without, and *antenna* (*q. v.*). Fr., *exantenné*. Ger., *fuhlhornlos*. Having no antennæ. The *Exantennatæ-branchiales* (Fr., *exantennées-branchiales*) of Lamarck, are an order of the *Arachnides* [L, 180] and the *Exantennatæ-tracheales* (Fr., *exantennées-trachéennes*) of Lamarck, are an order of the *Arachnides*, comprising those which are deprived of antennæ, and breathe through the trachea. [L, 180.]

EXANTHALOSE, n. E^{2}x-a^{2}n'tha^{2}l-os. From ἐξανθεῖν, to effloresce. Fr., *e.* Of Beudant, efflorescent hydrated sodium sulphate. [A, 316, 385.]

EXANTHEM, n. E^{2}x-a^{2}n'the^{2}m. Gr., ἐξάνθημα (from ἐξ, out, and ἄνθος, a blossom). Lat., *exanthema*. Fr., *exanthème*. Ger., *E.*, *Ausschlag*. It., *esantema*. Sp., *exantema*. 1. A superficial and commonly inflammatory disease or eruption of the skin consisting either of a uniform rash or of discrete efflorescences distributed more or less generally over the surface of the body. 2. In a restricted sense, an exanthematous fever. [G.]—**Acute e.** Lat., *exanthema acutum*. An acute infectious disease arising from a specific contagion, characterized by a regular succession of individual stages and by special morbid manifestations on the skin. [A, 326 (*a*, 21).]—**Anomalous e.** See RUBEOLA.—**Carbuncular e.** An e. characterized by the formation of swellings, imperfectly suppurating, with indurated edges and for the most part a sanious core. [L, 83.]—**Ichorous e.** See EMPHLYSIS.—**Pustulous e.** See EMPYESIS.—**Rash e.** See EXANTHESIS (2d def.).

EXANTHEMA (Lat.), n. n. E^{2}x-a^{2}n(a^{3}n)-the(tha)'ma^3. Gen., *exanthem'atos* (*-is*). Gr., ἐξάνθημα (from ἐξανθεῖν, to effloresce). See EXANTHEM; in the pl., *exanthemata*, the eruptive fevers. [G.]—**E. antivariolosum.** See VACCINIA.—**E. Autenriethi.** Syn.: *ecthyma antimoniale*. The pustular eruption produced by the action of antimony on the skin; first described by Autenrieth. [G.]—**E. balsamicum.** A form of e. characterized by erythematous and roseola spots, which sometimes occurs after the use of copaiba. [A, 326 (*a*, 21).]—**E. cæruleum** [Lewin]. See MACULÆ *cæruleæ*.—**E. labiale.** See HERPES *labialis*.—**E. maculosum syphiliticum.** See *Syphilitic roseola*.—**E. internum.** See ENANTHEMA.—**E. iodicum.** A toxic exanthem due to iodine; more particularly an erythema papulatum due to internal use of iodine or its compound. [G.]—**E. miliare.** See MILIARIA.—**E. pestis.** 1. An exanthem associated with the plague. 2. The exanthem of variola. [G.]—**E. serosum.** See PEMPHIGUS.—**E. strophulus.** See STROPHULUS.—**E. subaxillare.** Of Flenck, an eruption in one or both axillæ of vesicles which break and often secrete a great abundance of viscid fluid, and leave thin crusts; probably eczema. [G, 11.]—**E. syphiliticum.** A syphilitic eruption. [G.]—**E. urticatum.** Urticaria. [G.]—**E. vaccina.** See VACCINIA.—**Exanthemata vaccinalia.** Cutaneous diseases incident to vaccination; embracing local affections, such as phlegmonous inflammation at the site of the vaccination, erysipelas, eczema, and the like, as well as such general affections as erythema, and eczematous, herpetic, pustular, and gangrenous eruptions. [G, 27.]—**Major exanthemata.** The exanthematous fevers. [G.]—**Minor exanthemata.** Cutaneous diseases, such as erythema, urticaria, and herpes, accompanied with fever not of an essential nature. [G.]—**Sine exanthemate.** Not accompanied by a rash (said of irregular cases of the exanthematous fevers).

EXANTHEMATIC, n. E^{2}x-a^{2}n-the^{2}m-a^{2}t'i^{2}k. Lat., *exanthematicus*. See EXANTHEMATOUS.

EXANTHEMATISCHESIS (Lat.), n. f. E^{2}x-a^{2}n(a^{3}n)-the(tha)-ma^{2}t(ma^{3}t)-i^{2}s'ke^2(ch^{2}e^2)-si^{2}s. Gen., *exanthematisches'eos* (*-is'chesis*). From ἐξάνθημα, an exanthem, and ἴσχειν, to hold. The suppression of an exanthem. [G.]

EXANTHEMATOLOGY, n. E^{2}x-a^{2}n-the^{2}m-a^3-to^{2}l'o ji^2. Lat., *exanthematologia* (from ἐξάνθημα, an exanthem, and λόγος, understanding). Fr., *exanthématologie*. The science of exanthematous diseases. [G.]

EXANTHEMATOPHTHALMIA (Lat.), n. f. E^{2}x-a^{2}n(a^{3}n)-the(tha)-ma^3-to^{2}f-tha^{2}l(tha^{3}l)'mi^2-a^3. From ἐξάνθημα, an exanthem, and ὀφθαλμία, ophthalmia. An obsolete term for an inflammation of the conjunctiva and eyelids and sometimes of the eyeball following a cutaneous eruption (especially a febrile exanthema). [F.]

EXANTHEMATOSCHESIS (Lat.), n. f. E^{2}x-a^{2}n(a^{3}n)-the^{2}m-(tham)-a^{2}t(a^{3}t)-o^{2}sk(o^{2}sch^2)'e^{2}s-i^{2}s. See EXANTHEMATISCHESIS.

EXANTHEMATOUS, adj. E^{2}x-a^{2}n-the^{2}m'a^{2}t-u^{3}s. Lat., *exanthematus*, *exanthematicus*. Fr., *exanthémateux*. Ger., *exanthematisch*, *ausschlagartig*. Pertaining to or attended with an exanthem. [G.]

EXANTHÈME (Fr.), n. E^{2}x-a^{3}n^2-te^{2}m. See EXANTHEM and EXANTHEMA.—**E. coïtal.** See MAL *de coït*.—**E. fugace.** Roseola. [D, 72.]

EXANTHÉMOGÈNE (Fr.), adj. E^{2}x-a^{3}n^2-ta-mo-zhe^{2}n. From ἐξάνθημα, an exanthem, and γεννᾶν, to engender. Causing a rash. [A, 385.]

EXANTHESIS (Lat.), n. f. E^{2}x-a^{2}n(a^{3}n)-the(tha)'si^{2}s. Gen., *exanthes'eos* (*-is*). Gr., ἐξάνθησις. Fr., *exanthèse*. 1. An exanthem, or, more properly, the breaking out of an exanthem. 2. Of Good, an order of skin diseases (a genus of the *Exanthematica*) characterized by "simple cutaneous, rose-colored efflorescences in circumscribed plots, with little or no elevation," and comprising rosalia (scarlatina), rubeola, and urticaria. [G, 52.]—**E. arthrosia.** See DENGUE.—**E. rosalia.** See SCARLATINA.—**E. rosalia arthrodynia** [Cack]. See DENGUE.

EXANTHISMA (Lat.), n. n. E^{2}x-a^{2}n(a^{3}n)-thi^{2}z(thi^{2}s)'ma^3. Gen., *exanthis'matos* (*-is*). Gr., ἐξάνθισμα. 1. Anciently, a pustule or boil. [A, 387.] 2. A non-acuminated rash; in Young's classification of skin diseases, a genus of the *Epiphymata*. [L, 290.]

EXANTHROPIA (Lat.), n. f. E^{2}x-a^{2}n(a^{3}n)-thro'pi^2-a^3. From ἐξ, out, and ἄνθρωπος, man. Fr., *exanthropie*. See APANTHROPIA.

EXAPOPHYSATUS (Lat.), adj. E^{2}x-a^{2}p(a^{3}p)-o(o^3)-fi^2(fu^6)-sat-(sa^{3}t)'u^{3}s(u^{4}s). From *ex*, out, and ἀποφύειν, to put forth an offshoot. Fr., *exapophysé*. Having no apophysis (said of mosses). [L, 180.]

EXAPSIS (Lat.), n. f. E^{2}x-a^{2}p(a^{3}p)'si^{2}s. Gen., *exap'seos* (*-is*). Gr., ἔξαψις (from ἐξ, from, and ἅπτειν, to fasten). See PYROSIS.

EXARAGMA (Lat.), n. n. E^{2}x-a^{2}r(a^{3}r)-a^{2}g(a^{3}g)'ma^3. Gen., *exarag'matos* (*-is*). Gr., ἐξάραγμα (from ἐξαράσσειν, to dash out). Fr., *exaragme*. Ger., *Splitterbruch*. Of Galen, a comminuted fracture. [L, 41, 94, 135 (*a*, 14).]

EXARATE, adj. E^{2}x-a'rat. Lat., *exaratus*. Fr., *sillonné*. Ger., *ausgefurcht*. Of plant-organs, furrowed, sulcate—with few deep but not parallel lines. [B, 1, 123 (*a*, 24).]

EXARILLATE, adj. E^{2}x-a^{2}r'i^{2}l-at. From *ex*, priv., and *arillus*, an aril. Having no aril. [L, 56.]

EXARISTATE, adj. E^{2}x-a^{3}r-i^{2}st'at. Lat., *exaristatus* (from *ex*, priv., and *arista*, an ear of corn). Fr., *exaristé*. Ger., *unbegrannt*, *grannenlos*. Beardless, without an awn (said of grasses, etc.). [B, 1, 123 (*a*, 24).]

EXARMA (Lat.), n. n. E^{2}x-a^{3}rm'a^3. Gen., *exarm'atos* (*-is*). Gr., ἔξαρμα (from ἐξαίρειν, to raise). Fr., *exarme*. Ger., *Erhebung*, *vorstehende Geschwulst*. A projecting tumor. [L, 41, 84, 135 (*a*, 14).]

EXARSIO (Lat.), n. f. E^{2}x-a^{3}r'si^2-o. Gen., *exarsio'nis*. From *ex*, out, and *ardere*, to burn. A high temperature. [L, 84, 94.]

EXARTEMA (Lat.), n. n. E^{2}x-a^{3}r-te(ta)'ma^3. Gen., *exartem'atos* (*-is*). Gr., ἐξάρτημα (from ἐξαρτᾶν, to hang upon). An amulet. [L, 94.]

EXARTERIITIS (Lat.), n. f. E^{2}x-a^{3}r-te^{2}r(tar)-i^2-i(e)'ti^{2}s. Gen., *exarteriit'idos* (*-is*). Fr., *exartérite*. Inflammation of the outer coat of an artery. [L, 20, 41, 43.]

EXARTHRE (Fr.), adj. E^{2}x-a^{3}rt'r. Situated upon or near the external margin or angle of an appendage of an arthropod. [L.]

EXARTHREMA (Lat.), **EXARTHROMA** (Lat.), n. n. E^{2}x-a^{3}r-thre(thra)'ma^3, -thro'ma^3. Gen., *exarthrem'atos* (*-is*), *-throm'atos* (*-is*). Gr., ἐξάρθρημα, ἐξάρθρωμα (from ἐξ, out, and ἄρθρον, a joint). Fr., *exarthrème*, *exarthrome*. See LUXATION.

EXARTHROS (Lat.), adj. E^{2}x-a^{3}r'thro^{2}s. From ἐξ, out, and ἄρθρον, a joint. Of Hippocrates, having large, prominent joints. [L, 94 (*a*, 21).]

EXARTHROSIS (Lat.), n. f. E^{2}x-a^{3}r-thro'si^{2}s. Gen., *exarthroseos* (*-is*). Gr., ἐξάρθρωσις. Fr., *exarthrose*. See LUXATION.

EXARTICULATION, n. E^{2}x-a^{3}r-ti^{2}k-u^2-la'shu^{3}n. Lat., *exarticulatio* (from *ex*, out, and *articulus*, a joint). Ger., *Exartikulation*. 1. Dislocation of a bone. [A, 322.] 2. Amputation through a joint. [E.]

EXARTICULATUS (Lat.), adj. E^{2}x-a^{3}r-ti^{2}k-u^2(u^4)-la(la^3)'tu^{3}s-(tu^{4}s). Fr., *exarticulé*. Ger., *gelenklos*. Of insects, having no visible articulation in the antennæ. [L, 41, 116.]

EXARYSIS (Lat.), n. f. E^{2}x-a^{2}r(a^{3}r)'i^{2}s(u^{6}s)-i^{2}s. Gen., *exarys'eos* (*-ar'ysis*). Gr., ἐξάρυσις. Exhaustion. [A, 322.]

EXASPERATE, adj. E^{2}x-a^{2}sp'e^{2}r-at. Lat., *exasperatus*. Fr., *bosselé*. Ger., *rauh*. Rough, bristled, covered with sharp points. [B, 1, 19, 123 (*a*, 24).]

EXASPERATIO (Lat.), n. f. E^{2}x-a^{2}sp(a^{3}sp)-e^{2}r-a(a^3)'shi^2-(ti^2)-o. Gen., *exasperatio'nis*. Roughening (as of the skin). [L, 94 (*a*, 21).]

EXASPÉRATION (Fr.), n. E^{2}x-a^{3}s-pa-ra^3-se-o^{3}n^2. See EXACERBATION.

EXASTOSIE (Fr.), n. E^{2}x-a^3-sto-ze. From ἔξαστις, fluff. Of Fermond, the expansion of a plant-organ in its development. [A, 301.]

EXATMOSCOPIUM (Lat.), n. n. E^{2}x-a^{2}t(a^{3}t)-mo(mo^3)-skop-(sko^{2}p)'i^2-u^{3}m(u^{4}m). Fr., *exatmoscope*. See ATMIDOMETER.

EXBIBITION, n. E^{2}x-bi^2-bi^2'shu^{3}n. From *ex*, out, and *bibere*, to drink. Fr., *e.*, *suintement*. The passage of fluids out of a body, as opposed to imbibition. [K.]

EXCÆCARIA (Lat.), n. f. E^{2}x-se(ka^3-e^2)-ka(ka^3)'ri^2-a^3. From *excæcare*, to blind. Fr., *excæcarie*. Ger., *Blindenbaum*. A genus of euphorbiaceous plants, of the *Crotoneæ*. The *Excæcarieæ* (Fr., *excæcariées*) are a series of the *Euphorbiaceæ*. [B, 42, 121, 180 (*a*, 24).]—**E. agallocha.** Fr., *excæcarie agalloche*, *faux calambac*. Ger., *Agalloch-Blindenbaum*. A small tree found in the East Indies. The wood (*lignum aquillarieæ*, seu *aquillinum*, seu *agallochum spurium*) was once considered the true aloes-wood. The juice, which is acrid and vesicant, is applied to ulcers, and is considered antisyphilitic. An oil obtained from the wood is used in rheumatism. [B, 19, 173, 180 (*a*, 24).] See AGALLOCHUM and ALOESWOOD.—**E. biglandulosa.** The *Sapium biglandulosum*. [*a*, 24.]—**E. camettia.** A small tree found in the East Indies having an acrid, milky juice, containing caoutchouc, and having vesicant properties. An infusion of the leaves is used externally in syphilis and for indolent ulcers. [B, 172, 173 (*a*, 24).]—**E. cochinchinensis.** A species found in Cochin-China, which yields a spurious species of aloes-wood. The leaves are astringent, and are used in epilepsy. The gum resin is purgative. [B, 173, 180 (*a*, 24).]—**E. hibernica.** A species having similar properties to those of *E. agal-*

locha. [B, 121 (*a*, 24).]—**E. lanceolata.** Fr., *arbre aveuglant, bois d'aloès, calambac.* A species found in Brazil. It furnishes a reddish-brown, hard, unctuous, and very bitter wood (eagle-wood, agalloch), having an aroma like myrrh, and burning with an agreeable odor. [B, 121 (*a*, 24).]—**E. sebifera.** The *Stillingia sebifera.* [B, 81 (*a*, 21).]—**E. spinosa.** A species the juice of which has sudorific and depurative properties, and is employed in syphilis. [B, 121 (*a*. 24).]—**E. silvatica.** Queen's-delight; a species growing in Virginia, Florida, and Texas. The juice is sudorific, and the bitter root (yaw-root) is used in syphilis. [B, 46 (*a*, 14), 121 (*a*, 24).]

EXCALCARATE, adj. E^{2}x-ka^{2}l'ka^{2}r-at. Lat., *excalcaratus* (from *ex*, without, and *calcar*, a spur. Without a spur. [L, 48 (*a*, 27).]

EXCANDESCENTIA (Lat.), n. f. E^{2}x-ka^{2}n(ka^{3}n)-de^{2}s-se^{2}n-(kan)'shi^2(ti^2)-a^3. From *excandescere*, to glow. Gr., ὀξυθυμία. Morbid irascibility. [A, 325.]

EXCARNATION, EXCARNIFICATION, n's. E^{2}x-ka^{3}rn-a'shu^{3}n, -i^2-fi^2-ka'shu^{3}n. From *ex*, priv., and *caro*, flesh. Fr., *e.* The process of freeing an anatomical preparation from superfluous material. [A, 385.]

EXCASTRATUS (Lat.), adj. E^{2}x-ka^{2}st(ka^{3}st)-rat(ra^{3}t)'u^{3}s-(u^{4}s). Castrated. [A, 325.]

EXCATHISMA (Lat.), n. n. E^{2}x-ka^{2}th(ka^{3}th)-i^{2}z(i^{2}s)'ma^3. Gen., *excathis'matos (-is).* A semicupium. [L, 94.]

EXCAVATE, adj. E^{2}x'ka^{2}v-at. Hollowed out. [L.]

EXCAVATEUR (Fr.), n. E^{2}x-ka^3-va^3-tu^{6}r. See EXCAVATOR.

EXCAVATIO (Lat.), n. f. E^{2}x-ka(ka^3)-va(wa^3)'shi^2(ti^2)-o. Gen., *excavatio'nis.* See EXCAVATION.—**E. Douglasii.** See *Douglas's* POUCH.—**E. ischiorectalis, E. perinæi, E. recto-ischiadica.** See *Ischio-rectal* FOSSA.—**E. recto-uterina (peritonæi).** Douglas's pouch in the female. [L, 332.]—**E. recto-vaginalis fasciæ pelvis.** The pouch formed by the pelvis fascia in the middle line, between the vagina and the rectum. [L, 332.]—**E. rectovesicalis (peritonæi).** See *Recto-vesical* POUCH.—**E. vesico-uterina (peritonæi).** See *Vesico-uterine* POUCH.—**E. vesico-vaginalis fasciæ pelvis.** The pouch formed by the pelvic fascia in the middle line, between the bladder and the vagina. [L, 332.]

EXCAVATION, n. E^{2}x-ka-va'shu^{3}n. Lat., *excavatio* (from *ex*, out, and *cavus*, hollow). Fr., *e.* Ger., *E., Aushöhlung.* It., *escavazione.* Sp., *excavación.* 1. The act of making a hollow. 2. A hollow. [D.]—**Atrophische E.** (Ger.). An e. due to atrophy. —**Drucke'.** An e. due to pressure.—**E. du petit bassin** (Fr.). The cavity of the true pelvis. [L, 88.]—**E. médiane de la base du cerveau** (Fr.). See *Interpeduncular* SPACE.—**Pelvic e.** Fr., *e. pelvienne* (ou *du bassin*). See *Pelvic* CAVITY.

EXCAVATO-PUNCTATUS (Lat.), adj. E^{2}x-ka^2(ka^3)-va(wa^3)''-to(to^3)-pu^{3}n^{2}k(pu^{4}n^{2}k)-ta(ta^3)'tu^{3}s(tu^{4}s). From *ex*, out, *cavus*, hollow, and *punctum*, a point. Marked with pointed sulci. [B, 121 (*a*, 21).]

EXCAVATOR (Lat.), n. m. E^{2}x-ka^2(ka^3)-va(wa^3)'to^{2}r; in Eng., e^{2}x'ka^{2}v-at-o^{2}r. Gen., *excavato'ris.* Fr., *excavateur.* Ger., *E.* An instrument for excavating. [A, 385.]

EXCAVATUS (Lat.), adj. E^{2}x-ka^2(ka^3)-va(wa^3)'tu^{3}s(tu^{4}s). From *ex-cavare*, to hollow out. In entomology, hollowed out. [*a*, 27.]

EXCELSIOR SPRING, n. E^{2}x-se^{2}l'si^2-o^{2}r. One of the springs at Saratoga (*q. v.*).

EXCELSIOR SPRINGS, n. E^{2}x-se^{2}l'si^2-o^{2}r. A place in Clay County, Missouri, where there are springs containing iron, alumina, silica, various chlorides, and magnesium, calcium, and sodium carbonates. [A, 363 (*a*, 21).]

EXCENTRIC, adj. E^{2}x-se^{2}n'tri^{2}k. Lat., *excentricus* (from ἐξ, out, and κέντρον, a centre). See ECCENTRIC.

EXCEREBRATION, n. E^{2}x-se^{2}r-e^2-bra'shu^{3}n. Lat., *excerebratio* (from *ex*, out, and *cerebrum*, the brain). Fr., *excérébration.* Ger., *Enthirnung.* The operation of removing the brain of the fœtus, in order to diminish the size of the head, and thus render delivery possible, in cases of great disproportion.

EXCEREBRATUS (Lat.), adj. E^{2}x-se^{2}r(ke^{2}r)-e^2-brat(bra^{3}t)'-u^{3}s(u^{4}s). See ANENCEPHALOUS.

EXCERNENT, adj. E^{2}x-su^{6}rn'e^{2}nt. Lat., *excernens* (from *excernere*, to sift out). See EXCRETORY.

EXCERNICULUM (Lat.), n. n. E^{2}x-su^{6}rn(ke^{2}rn)-i^{2}k'u^2(u^4)-lu^{3}m(lu^{4}m). Lit., a little sieve; of the old writers, a secretory organ. [A, 325.]

EXCESTRENSE (Lat.), n. n. E^{2}x-se^{2}s(ke^{2}s)-tre^{2}ns'e(a). An old preparation of the Lond. Ph., made by macerating and boiling various vegetable drugs in oil. [A, 325.]

EXCIDENTIA (Lat.), n. f. E^{2}x-si^{2}d(ki^{2}d)-e^{2}n'shi^2(ti^2)-a^3. From *excidere*, to fall down or out. See PROLAPSE and PROCIDENTIA.

EXCIPIENT, n. E^{2}x-si^{2}p'i^2-e^{2}nt. Lat., *excipiens* (from *excipere*, to receive). Fr., *e.* Ger., *E.* Any indifferent substance serving to give form, consistence, etc., to a medicinal substance blended with or dissolved in it. [A, 301, 518.]—**E. savonneux de Steers** (Fr.). See *Tinctura* SAPONIS.

EXCIPULA (Lat.), n. f. E^{2}x-si^{2}p(ki^{2}p)'u^2(u^4)-la^3. From *excipere*, to receive. Fr.. *excipule.* Ger., *Gehäuse* (2d def.), *Fruchtgehäuse* (2d def.). 1. A receptacle. 2. That part of a thallus in lichens which forms a rim to the shield; the hypothecium in disciform apothecia. The *Excipuleæ* of Corda are a section of the *Phragmotrichiaceæ.* The *Excipulei* of Léveillé, are a section of the *Sarcopsidei.* [B, 1, 77, 123, 170 (*a*, 24).]

EXCIPULIFORM, adj. E^{2}x-si^2-pu^{2}l'i^2-fo^{2}rm. Lat., *excipuliformis* (from *excipula* (*q. v.*), and *forma*, form). Fr., *excipuliforme.* Ger., *gehäuseförmig.* Cup-shaped. [B, 1, 123 (*a*, 24).]

EXCIPULUM (Lat.), n. n. E^{2}x-si^{2}p(ki^{2}p)'u^2(u^4)-lu^{3}m(lu^{4}m). See EXCIPULA.

EXCISION, n. E^{2}x-si^{2}zh'u^{3}n. Lat., *excisio* (from *ex*, out, and *cædere*, to cut). Fr. *e.* Ger., *Auslösung, Ausschneidung.* It., *escisione.* Sp., *escisión.* The cutting out of a part. [E.]—**E. blocus** (Fr.). E., particularly of a chancre, *en bloque.* [Aubert, "Lyon méd.," Apr. 2, 1882.]—**Intermediate e.** An e. performed in the intermediate period between the commencement of an inflammation and the complete establishment of suppuration. [E.]—**Primary e.** An e. performed before the period of inflammation. [E.]—**Secondary e.** An e. performed after suppuration has been fully established. [E.]—**Subperiosteal e.** The removal of a portion of a bone leaving the periosteum in position. [*a*, 29.]

EXCISOR (Lat.), n. m. E^{2}x-siz(kes)'o^{2}r. Gen., *exciso'ris.* Fr., *exciseur, emporte-pièce.* Ger., *Ausschneider.* An instrument for cutting out a portion of tissue.—**E. prostatæ.** An instrument devised for the purpose of removing the prostate. [*a*, 29.]

EXCISURA (Lat.), n. f. E^{2}x-si(ke)-su'ra^3. Ger., *Ausschnitt.* A notch. [B, 123 (*a*. 24).]—**E. calami scriptorii.** The cleft of the calamus scriptorius. [L, 349 (*a*, 29).]

EXCITABILITY, n. E^{2}x-sit-a-bi^{2}l'i^2-ti^2. Lat., *excitabilitas.* Fr., *excitabilité.* Ger., *Reizbarkeit, Erregbarkeit.* It., *eccitabilità.* Sp., *excitabilidad.* Capability of being excited; sensitiveness to stimulation. [B. 1 (*a*, 24).]—**Cell e.** The character or property of a cell which makes it capable of responding to a stimulus or excitation. [J.]—**Independent e.** Ger., *unabhängige Erregbarkeit.* The power possessed by a muscle of responding to a stimulus applied directly to its substance (without the intervention of its motor nerves). [Landois (K).]—**Reflex e.** Sensitiveness to reflex irritation.—**Specific muscular e.** Ger., *specifische muskulöse Erregbarkeit.* See *Independent e.*

EXCITANT, adj. E^{2}x'si^{2}t-a^{2}nt. Lat., *excitans* (from *excitare*, to rouse). Fr., *e.* Ger., *reizend, erregend.* It., *eccitante.* Sp., *excitante.* Stimulating the action of any of the organs, especially that of the nervous system; as a n. (Ger., *Reizmittel*), a remedy so acting. [A, 326 (*a*, 21).]

EXCITATEUR (Fr.), n. E^{2}x-se-ta^3-tu^{6}r. See EXCITOR.

EXCITATION, n. E^{2}x-si^2-ta'shu^{3}n. Fr., *e.* Ger., *Erregung.* It., *eccitazione.* Sp., *excitación.* The production of excitement, also a state of excitement, especially of the nervous system. [A, 518.]

EXCITATOR (Lat.), n. m. E^{2}x-si^2(ki^2)-ta(ta^3)'to^{2}r. Gen., *excitato'ris.* See EXCITOR.

EXCITEMENT, n. E^{2}x-sit'me^{2}nt. Lat., *excitatio.* Fr.. *e.* Ger., *Reizung.* It., *eccitamento.* Sp., *excitacion.* 1. In general, the state of being excited. 2. Of Cullen, the re-establishment of the normal activity of the brain on waking or on emerging from any pathological state of the cerebral functions. [A, 301.]

EXCITING, adj. E^{2}x-sit'i^{2}n^2. 1. Causing excitement. 2. Of the causes of disease, acting immediately, as opposed to remotely (see *Proximate* CAUSE).

EXCITO-MOTOR, EXCITO-MOTORY, adj's. E^{2}x''sit-o-mo'to^{2}r, -to^{2}r-i^2. Fr., *excito-moteur.* Exciting muscular action (said of drugs and of particular portions of the nervous system).

EXCITO-NUTRIENT, adj. E^{2}x-sit''o-nu^2'tri^2-e^{2}nt. Excited by impressions reflected from some other region of the body, especially the centre nervous system (said of a condition of nutrition in some parts). [J, 16.]

EXCITOR, n. E^{2}x-sit'o^{2}r. Lat., *excitator.* Fr., *excitateur.* Ger., *Erreger.* 1. See EXCITANT. 2. See DISCHARGER. 3. An electrode to be placed in contact with a nerve to produce excitation. [B.]

EXCITORY-MOTOR, adj. E^{2}x-sit''o-ri^2-mo'to^{2}r. See EXCITO-MOTOR.

EXCITO-SECRETORY, adj. E^{2}x-sit''o-se'kre-to-ri^2. Tending to produce secretions, especially by impressions reflected from some other part of the body, as the secretion of tears excited by mental emotions. [J, 16.]

EXCITO-VASO-MOTOR, adj. E^{2}x-sit''o-vas-o-mo'to^{2}r. Allowing stimuli to reach the vaso-motor centres and thus give rise to a constriction of the blood-vessels and consequently an increased arterial blood-pressure (said especially of an afferent nerve). [J, 57, 183.]

EXCLUSION, n. E^{2}x-klu^2'zhu^{3}n. Lat., *exclusio* (from *excludere*, to shut out). Fr., *e.* Ger., *E.* 1. A shutting out (as of germs from a wound). 2. A dismissing from further consideration (see DIAGNOSIS *by e.*).

EXCLUSORIUM (Lat.), n. n. E^{2}x-klu^2(klu)-so'ri^2-u^{3}m(u^{4}m). An old term for an oxytocic or abortifacient. [A, 325.]

EXCOCHLEATION, n. E^{2}x-ko^{2}k-le-a'shu^{3}n. Lat., *excochleatio* (from *ex*. out of, and *cochlear*, a spoon). Ger., *E.* The operation of curetting a cavity (*e. g.*, that of the uterus). [E. Braun von Fernwald, "Arch. f. Gynäk.," xxxvii, 1890, p. 452.]

EXCŒCARIA (Lat.), n. f. E^{2}x-se(ko^2-e^2)-ka(ka^3)'ri^2-a^3. See EXCÆCARIA.

EXCORIABILIS (Lat.), n. f. E^{2}x-kor(h^{2}or)-i^2-a(a^3)'bi^{2}l-i^{2}s. From *ex*, from, and *corium*, leather. Of Spigelius, the dartos. [L, 349 (*a*, 29).]

EXCORIATION, n. E^{2}x-ko-ri^2-a'shu^{3}n. Lat., *excoriatio, excoriatura* (from *ex*, out. and *corium*, bark). Fr. *e.*, *écorchure.* Ger., *E., Abziehung.* It., *escoriazione.* Sp., *excoriación.* See ABRASION.

EXCORTICATION, n. E^{2}x-ko^{2}rt-i^2-ka'shu^{3}n. Lat., *excorticatio* (from *ex*, away from, and *cortex*. bark). See DECORTICATION.

EXCREABLE, adj. E^{2}x'kre-a-b'l. See EXSCREABLE.

EXCREATION, n. E^{2}x-kre-a'shu^{3}n. See EXSCREATION.

EXCREMENT, n. E^{2}x'kre^2-me^{2}nt. Gr., περιττωμα. Lat., *excrementum* (from *excernere*, to discharge). Fr., *excrement*. Ger., *E.* It., *escremento*. Sp., *excremento*. Any effete material discharged from the body, especially the fæces. [K.]—**White e. of dogs.** See ALBUM *græcum.*

EXCRÉMENT (Fr.), n. E^{2}x-kra-ma^{3}n^2. See EXCREMENT.—**E's de paon.** See EXCREMENTUM *pavonis galli.*

EXCREMENTITIAL, adj. E^{2}x-kre^{2}m-e^{2}nt-i^{2}sh'a^{2}l. See EXCREMENTITIOUS.

EXCRÉMENTITION (Fr.), n. E^{2}x-kra-ma^{3}n^2-te-se-o^{3}n^2. Of C. Robin, the process of excretion. [A, 385.]

EXCREMENTITIOUS, adj. E^{2}x-kre^2-me^{2}nt-i^{2}sh'u^{3}s. Lat., *excrementitius.* Fr., *excrémentitiel.* Of the nature of excrement.

EXCREMENTO DE LAGARTO [Mex. Ph.] (Sp.), n. E^{2}x-kra-me^{2}n'to da la^3-ga^{3}r'to. See ASPHALT.

EXCRÉMENTO-RÉCRÉMENTITIEL (Fr.), adj. E^{2}x-kra-ma^{3}n^2-to-ra-kra-ma^{3}n^2-te-se-e^{2}l. Partly discharged as excrementitious and partly taken up into the system again (said of secretions). [A, 385.]

EXCREMENTUM (Lat.), n. n. E^{2}x-kre(kra)-me^{2}nt'u^{3}m(u^{4}m). See EXCREMENT.—**Excrementa cerebri.** Syn.: *purgamenta cerebri.* Nasal discharge. [L, 349 (α, 29).]—**Mensium e., Menstruum e.** The menstrual discharge. [Aristotle (H).]

EXCRESCENCE, n. E^{2}x-kre^{2}s'e^{2}ns. Lat., *excrescentia* (from *ex*, out, and *crescere*, to grow). Fr., *excroissance.* Ger., *Excrescenz, Auswuchs.* It., *escrescenza.* Sp., *excrescencia.* A morbid outgrowth from a cutaneous or mucous surface; in botany, a nodule or embryo-bud on the surface of a stem, a gall, etc. [A, 385; B, 1, 77, 123 (α, 24).]—**Cauliflower e.** [J. Clarke]. Fr., *choux-fleurs, néoplasme en forme de chou-fleur.* Ger., *Blumenkohlgeschwulst.* Soft cancer of the cervix uteri.—**Fungous e. of the umbilicus.** Fr., *excroissance fongueuse de l'ombilic* [Nélaton], *végétations de l'ombilic chez les nouveau-nés* [Broussolle], *fongus de l'ombilic des nouveau-nés* [Dugès], *bourgeonnement de l'ombilic* [Depaul], *végétation ombilicale* [Guersant], *fongosité de la région ombilicale* [Descroizilles], *adénome* (ou *granulome*) *de l'ombilic* [Chandelux]. Syn.: *granuloma of the umbilicus* [Virchow], *warty tumor of the umbilicus* [Holmes], *vascular polypus of the umbilicus* [Owen]. An exuberant, nipple-like fungous growth springing from the umbilicus after the separation of the umbilical cord. [A, 524; E. Broussolle, "Rev. mens. des mal. de l'enfance," July, 1886, p. 314.]—**Horny e.** See CORNU *cutaneum.*—**Papillary e's of the membrana tympani.** Fr., *excroissances papillaires de la membrane du tympan.* Ger., *warzige Auswüchse des Trommelfells.* Light-red papillæ, of varying size, occurring singly or in groups, or in great numbers spread over the whole surface of the tympanic membrane. They are a somewhat uncommon result of chronic myringitis. [F, 32.]—**Warty e.** See CONDYLOMA.

EXCRESCENT, adj. E^{2}x-kre^{2}s'e^{2}nt. Lat., *excrescens.* Fr., *e.* Ger., *auswachsend.* Having the form of an excrescence.

EXCRESCENTIA (Lat.), n. f. E^{2}x-kre^{2}s-se^{2}n(ke^{2}n)'shi^2(ti^2)-a^3. See EXCRESCENCE.—**E. carnosa.** See SARCOMA.—**E. gingivæ.** See EPULIS.—**Excrescentiæ quercus infectoriæ.** The galls on the oak. [B, 180 (α, 24).]—**E. vesicæ urinariæ.** See CYSTHYPERSARCOSIS.

EXCRETA (Lat.), n. n. pl. E^{2}x-kre(kra)'ta^3. From *excernere*, to discharge. Matters voided from the body, especially the urine and fæces. [A, 385.]

EXCRÉTEUR (Fr.), n. E^{2}x-kra-tu^{5}r. See EXCRETORY.

EXCRETIN, n. E^{2}x-kret'i^{2}n. Fr., *excrétine.* Ger., *E.* A non-nitrogenous, crystalline body, $C_{20}H_{36}O$, resembling cholesterin, obtained from human fæces by exhausting with alcohol, and precipitating with milk of lime. [K, 8.]

EXCRETION, n. E^{2}x-kre'shu^{3}n. Gr., ἔκκρισις, διαχώρησις. Lat., *excretio.* Fr., *excrétion.* Ger., *Aussonderung.* It., *escrezione.* Sp., *excreción.* The separation from the economy of those things which are not necessary to it; also any substance so rejected. [K.]

EXCRETOLEIC ACID, n. E^{2}x-kret-o-le'i^{2}k. Fr., *acide excrétoléique.* Ger., *excretoleische Säure.* An acid found in the fæces. Its formula is unknown. [K.]

EXCRETORY, adj. E^{2}x'kre^{2}t-o-ri^2. Lat., *excretorius.* Fr., *excrétoire.* Ger., *excretorisch, absondernd.* Pertaining to excretion. [L, 343.]

EXCRETUM (Lat.), n. n. E^{2}x-kret(krat)'u^{3}m(u^{4}m). See EXCREMENT.

EXCROISSANCE (Fr.), n. E^{2}x-krwa^{3}s-sa^{3}n^{2}s. See EXCRESCENCE.—**E. fongeuse de l'ombilic.** See *Fungous* EXCRESCENCE *of the umbilicus.*

EXCURRENT, adj. E^{2}x'ku^{5}r-e^{2}nt. Lat., *excurrens* (from *excurrere*, to run out). Fr., *excourant.* Ger., *auslaufend.* 1. Leading outward (said of canals). [L, 121.] 2. Of the trunk of a tree, continued straight to the top. [B, 121, 123, 291 (α, 24).]

EXCURSION, n. E^{2}x-ku^{5}r'zhu^{3}n. Lat., *excursio* (from *ex*, out, and *currere*, to run). Outward movement (as of the ribs in inspiration), movement away from a given point.

EXCURVATION, n. E^{2}x-ku^{5}rv-a'shu^{3}n. Lat., *excurvatio.* Fr., *e.* Outward curvature.

EXCUSSIO (Lat.), **EXCUTIO** (Lat.), n's f. E^{2}x-ku^{3}s(ku^{4}s)'-shi^2(si^2)-o, -ku^2(ku)'shi^2(ti^2)-o. Gen., *excussion'is, -cution'is.* From *excussere*, to remove. 1. The action of a distant irritation on an organ. [A, 325.] 2. An instrument for removing foreign bodies. [A, 322.]—**E. ventriculi.** Ger., *Magenbürste.* An old instrument in the form of a brush for removing foreign bodies from the upper part of the alimentary canal. [A, 322.]

EXDERMOPTOSIS (Lat.), n. f. E^{2}x-du^{5}rm(de^{2}rm)-o^{2}p-to'si^{2}s. Gen., *exdermoptos'eos* (*-is*). From ἐξ, out, and δέρμα, the skin, and πτῶσις, a falling. Fr., *e.* Of Huguier, an hypertrophy of the sebaceous glands with retained secretion. [A, 33.] Probably the same lesion as that of molluscum contagiosum (*q. v.*).

EXECHEBRONCHOS, adj. E^{2}x-e^{2}k(e^{2}ch^2)-e^2-bro^{2}n^{2}k-(bro^{2}n^{2}ch^2)'o^{2}s. From ἐξέχειν, to stand out, and βρόγχος, the trachea. Of Hippocrates, having a prominent throat. [L, 94 (α. 21).]

EXECHEGLUTOS (Lat.), n. E^{2}x-e^{2}k(e^{2}ch^2)-e^2-glu^2(glu)'to^{2}s. Gr., ἐξεχέγλουτος (from ἐξέχειν, to stand out, and γλουτός, the rump). One who has prominent buttocks. [L, 84.]

EXEDENS (Lat.), adj. E^{2}x'e^{2}d-e^{2}nz(ans). From *exedere*, to eat up. Ger., *fressend.* Devouring, consuming, corroding, phagedænic. [G.]

EXELCOSIS (Lat.), n. f. E^{2}x-e^{2}l-ko'si^{2}s. Gen., *exelcos'eos* (*-is*). From ἐξ, out, and ἕλκωσις, ulceration. Fr., *exelcose.* Ger., *Verschwärung.* See EXULCERATION.

EXELCYSMUS (Lat.), n. m. E^{2}x-e^{2}l-si^{2}z(ku^{5}s)'mu^{3}s(mu^{4}s). Gr., ἐξελκυσμός (from ἐξ, out, and ἕλκειν, to draw). The raising or replacement of depressed bone in fractures of the skull. [L, 50, 135 (α, 14).]

EXEMBRYONATÆ (Lat.), n. f. pl. E^{2}x-e^{2}m-bri^2(bru^6)-o^{2}n-at(a^{3}t)'e(a^3-e^2). Of Richard, a division corresponding to the *Cryptogamæ.* [B, 170 (α, 24).]

EXENCEPHALIA (Lat.), n. E^{2}x-e^{2}n(e^{2}n^2)-se^{2}f(ke^{2}f)^{2}al(a^{3}l)'-i^2-a^3. Fr., *exencéphalie.* Ger., *Exencephalie.* From ἐξ, without, and ἐγκέφαλος, the brain. Of Larger, a generic term for meningocele, encephalocele, hydrencephalocele, and synencephalocele; a malformation in which a portion of the cranial contents lies outside the skull. [A, 15.]—**Complete e.** Fr., *exencéphalie complète.* That form in which there is no proper tumor, but the skull is wholly or in great part membranous. [A, 15.]

EXENCEPHALUS (Lat.), n. m. E^{2}x-e^{2}n(e^{2}n^2)-se^{2}f(ke^{2}f)'a^{2}l-(a^{3}l)-u^{3}s(u^{4}s). Fr., *exencéphale, exencéphalien.* A monster characterized by exencephalia. [L, 87 (α, 14).]

EXENTERATIO (Lat.), n. f. E^{2}x-e^{2}n-te^{2}r-a(a^3)'shi^2(ti^2)-o. Gen., *exenteration'is.* See EXENTERATION.—**E. bulbi.** Removal of the contents of the eyeball, leaving the sclera and the optic nerve. [A, 326 (α, 21).]—**E. orbitæ.** Fr., *exentération de l'orbite.* Ger., *Ausweidung des Augenhöhle.* It., *esenterazione dell'orbita.* Sp., *desentrañación del órbita.* The removal of the entire contents of the orbit, including sometimes the periosteum. [F.]

EXENTERATION, n. E^{2}x-e^{2}n-te^{2}r-a'shu^{3}n. From ἐξ, out of, and ἔντερα, the entrails. Fr., *exentération.* Ger., *Exenteration.* 1. See EVISCERATION. 2. The removal of the contents of any cavity.—**E. of the eyeball.** See EXENTERATIO *bulbi.*—**E. of the orbit.** See EXENTERATIO *orbitæ.*

EXENTERICUS (Lat.), adj. E^{2}x-e^{2}n-te^{2}r'i^{2}k-u^{3}s(u^{4}s). Situated outside the intestine. [A, 322.]

EXENTERIREN (Ger.), n. E^{2}x-e^{2}n-te^{2}r-e're^{2}n. See EXENTERATION.

EXENTERISIS (Lat.), **EXENTERISMUS** (Lat.), n's f. and m. E^{2}x-e^{2}n-te^{2}r'i^{2}s-i^{2}s, -te^{2}r-i^{2}z(i^{2}s)'mu^{3}s(mu^{4}s). See EXENTERATION.

EXENTÉRITE (Fr.), n. E^{2}x-a^{3}n^2-ta-ret. Intestinal peritonitis. [L, 41.]

EXEPITHEL (Ger.), n. E^{2}x-e^{2}p-i^2-te^{2}l'. Ectodermic epithelium. [J.]

EXERAMA (Lat.), n. n. E^{2}x-e^{2}r-a(a^3)'ma^3. Gen., *exeram'atos* (*-is*). Gr., ἐξέραμα (from ἐξερᾶν, to cast off). Fr., *exerame.* Ger., *Ausgeleerte.* Of Hippocrates, vomited matter. [L, 84.]

EXERASIS (Lat.), **EXERASMUS** (Lat.), n's f. and m. E^{2}x-e^{2}r-a(a^3)'si^{2}s, -a^{2}z(a^{3}s)'mu^{3}s(mu^{4}s). The expulsion of matter by defæcation, vomiting, expectoration, etc. [A, 322.]

EXERCIRKNOCHEN (Ger.), n. E^{2}x-e^{2}r-tser'kno^{3}ch^2-e^{2}n. See *Exercise*-BONE.

EXERCISE, n. E^{2}x'u^{5}r-siz. Gr., ἄσκησις, γυμνασία. Lat., *exercitatio.* Fr., *exercice.* Ger., *Uebung.* The voluntary use of any power or faculty; as commonly used, systematic muscular exertion for the benefit of the health.—**Active e.** E. by voluntary muscular movements.—**Cumulative e.** E. which is augmented from day to day. [α, 29.]—**Double concentric e.** That variety of antagonistic gymnastics in which movements by the patient are resisted by the assistant. [A, 77.]—**Double eccentric e.** That variety of antagonistic gymnastics in which movements by an assistant are resisted by the patient. [A, 77.]—**E.-bone.**—See under BONE.—**Passive e.** E. in which the body is subjected to movements imparted from without, the only voluntary exertion made being such as is required to maintain the balance and posture.

EXERCITATIO (Lat.), **EXERCITIUM** (Lat.), n's f. and n. E^{2}x-u^{5}r(e^{2}r)-si^{2}t(ki^{2}t)-a(a^3)'shi^2(ti^2)-o, -si^{2}sh(ki^{2}t)'i^2-u^{3}m(u^{4}m). Gen., *exercitation'is, -cit'ii.* See EXERCISE.

EXÉRÈSE (Fr.), n. E^{2}x-a-re^{2}z. See EXÆRESIS.

EXERRHOSIS (Lat.), n. f. E^{2}x-e^{2}r-ro'si^{2}s. From ἐξερύειν. Fr., *exerrhose.* Evaporation caused by insensible transpiration. [L, 32, 94.]

EXERT (Fr.), adj. E^{2}x-e^{2}r. See EXSERT.

EXESION (Ger.), n. E^{2}x-a-se-on'. The gradual superficial destruction of organic parts, especially bone, resulting from abscesses and other destructive processes. [A, 326 (α, 21).] Cf. ARROSION, EXFOLIATION, and USUR.

EXESUS (Lat.), adj. E^{2}x-es(as)'u^{3}s(u^{4}s). From *exedere*, to eat away. Ger., *ausgefressen, wurmfrässig.* In botany, decayed, worm-eaten, carious. [B, 123 (α, 24).]

EXFŒTATION, n. E^{2}x-fe-ta'shu^{3}n. Fr., *e.* See *Ectopic* GESTATION.

EXFOLIATIO (Lat.), n. f. E^{2}x-fol(fo^{2}l)-i^2-a(a^3)'shi^2(ti^2)-o. Gen., *exfoliation'is.* See EXFOLIATION.—**E. areata linguæ.** Ger., *kreisfleckige Exfoliation der Zunge, flüchtige gutartige Plaques der Zungenschleimhaut, Landkartenzunge, geographische Zunge.* A disease of the mucous membrane of the tongue characterized by round or gyrate patches of a reddish color denuded of epithelium, and surrounded by a narrow border of yellowish, apparently thickened epithelium. The disease has been most commonly observed in children, but occurs also in adults. It differs from leucoplakia buccalis chiefly in the tendency of patches to change rapidly from place to place and to disappear suddenly. [Caspary, "Vierteljahrsch. f. Derm. u. Syph.," vii, 1880, p. 183 (G); Unna-id., viii, 1881, p. 295 (G); Mibelli, "Giorn. ital. del. mal. ven. e del. pelle," 1888, p. 383; "N. Y. Med. Jour.," Aug. 3, 1889, p. 135.]—**E. areata palmæ manus.** Ger., *kreisfleckige Exfoliation der Hohlhand.* A disease of the palms and palmar surfaces of the fingers described by Unna ("Vierteljahrsch. f. Derm. u. Syph.," viii, 1881, p. 295) characterized by circular patches denuded of cuticle which were regarded by Unna as allied to *e. areata linguæ.* [G.]

EXFOLIATION, n. E^{2}x-fol-i^2-a'shu^{3}n. Lat., *exfoliatio* (from *exfoliare,* to strip off leaves). Fr., *e.* Ger., *Abblätterung.* 1. In botany, the separation of dead leaves. [B, 1 (*a*, 24).] 2. The separation of dead tissue (*e. g.*, the epidermis or a superficial portion of bone) in the form of flakes or sheets. [G.]—**Insensible e.** E. in pieces too small to attract attention (*e. g.*, that of the uterine mucosa in menstruation).

EXFOLIATIVE, adj. E^{2}x-fol'i^2-at-i^{2}v. Lat., *exfoliativus.* Fr., *exfoliatif.* Ger., *exfoliativ, abblätternd.* Pertaining to or producing exfoliation. [A, 385.]

EXFOLIATIVUM (Lat.), n., n. of adj. *exfoliativus* (*trepanum* understood). E^{2}x-fol(fo^{2}l)-i^2-a^{2}t(a^{3}t)-i(e)'vu^{3}m(wu^{4}m). An old name for an instrument for scaling off layers of dead bone. [L, 94 (*a*, 21).]

EXHALAISON (Fr.), n. E^{2}x-a^{3}l-e^{2}z-o^{3}n^2. See EXHALATION.

EXHALANT, adj. E^{2}x-hal'a^{2}nt. Lat., *exhalans.* Fr., *e.* Ger., *ausdünstend.* Serving for exhalation.

EXHALATION, n. E^{2}x-ha^{2}l-a'shu^{3}n. Gr., ἀναθυμίασις. Lat., *exhalatio* (from *exhalare,* to breathe out). Fr., *e.* Ger., *Ausdünstung.* It., *esalazione.* Sp., *exhalación.* 1. The giving off of finely divided or vaporous substances, as of water and carbon dioxide, from the lungs, from the skin, etc. 2. Expiration. [J.] 3. An escape of some of the constituents of the blood through unbroken capillaries.—**Areolar e.** Lat., *exhalatio areolaris.* Fr., *e. aréolaire.* 1. A secretion of fluid within the interstices of tissues. 2. The fluids of the eye (aqueous, vitreous, etc.). [K.]—**Pulmonary e.** Fr., *e. pulmonaire, haleine.* 1. Air expired from the lungs. 2. The watery vapor excreted by the lungs and sent out with the expired air. [J, 16, 33.]

EXHAUSSÉ (Fr.). adj. E^{2}x-os-sa. Lat., *sublatus.* Of Mirbel, placed upon a gynophore (said of the ovary of a flower). [B, 1 (*a*, 24).]

EXHAUSTIO (Lat.), n. f. E^{2}x-ha^{4}st'(ha^3'u^{4}st)-i^2-o. Gen., *exhaustion'is.* From *exhaurire,* to draw out. See EXHAUSTION.—**E. uteri.** Extreme weakness of the uterus in labor. [A, 326 (*a*, 21).]

EXHAUSTION, n. E^{2}x-a^{4}st'shu^{3}n. Lat., *exhaustio.* Fr., *e.* (1st def.), *épuisement* (2d def.). Ger., *E.* (1st def.), *Erschöpfung* (2d def.). 1. In pharmacy, the process of dissolving out one or more of the constituents of a crude drug by maceration or percolation. 2. A state of prostration of the vital forces. [D.]—**Heat e., Solar e.** See INSOLATION.

EXHIBITION, n. E^{2}x-i^{2}b-i^{2}sh'u^{3}n. Lat., *exhibitio* (from *exhibere,* to display). The administration or employment of a particular remedy.

EXHIBITIONISM, n. E^{2}x-i^{2}b-i^{2}sh'u^{3}n-i^{2}z'm. Fr., *exhibitionisme.* A form of perversion of the sexual instinct characterized by a propensity to display the genitals in the presence of other persons. [Magnan, "Progr. méd."; "N. Y. Med. Jour.," July 26, 1890, p. 101.]

EXHIBITIONNISTE (Fr.), n. E^{2}x-e-be-se-o^{3}n-nest. Of Lasègue, a person manifesting exhibitionism.

EXHILARANT, adj. E^{2}x-i^{2}l'a^{2}r-a^{2}nt. Lat., *exhilarans.* Fr., *exhilarant.* Ger., *erheiternd.* Causing exhilaration.

EXHILARATION, n. E^{2}x-i^{2}l-a^{2}r-a'shu^{3}n. Lat., *exhilaratio* (from *exhilarare,* to gladden). Fr., *e.* Ger., *Heiterkeit.* 1. A condition of moderate exaltation of the mental and bodily powers, accompanied with a feeling of content and often with a tendency to boisterousness; often seen in the first stage of the action of alcohol and after a refreshing bath, etc. 2. The production of such a condition.

EXHUMATION, n. E^{2}x-hu^{2}m-a'shu^{3}n. From *ex,* out of, and *humus,* the soil. Fr., *e.* Ger., *E.* The digging up of a corpse or parts of a corpse, whether according to a legal injunction, on grounds other than that, or accidentally. [Blumenstock (A, 319 [*a*, 21]); L, 88.]

EXHYMÉNINE (Fr.), n. E^{2}x-e-ma-nen. From ἐξ, outward, and ὑμήν, a membrane. See EXTINE.

EXIDIA (Lat.), n. f. E^{2}x-i^{2}d'i^2-a^3. Fr., *e.* Ger., *Ohrpilz.* Of Fries, a genus of the *Hymenomycetes,* tribe *Cupularei,* having a soft, gelatinous horizontal receptacle. They live on other plants. The *Exidei* are a subdivision of the *Tremellini.* [B, 121, 170 (*a*, 24).]—**E. auricula Judæ.** Fr., *e. à oreille, auriculaire, oreille de Judas.* Ger., *gemeiner Ohrpilz, Judasohr, Hollunderschwamm.* Judas's-ear, Jew's-ear; a fungus that is considered an astringent and has been used in diseases of the throat, in dropsy, and in ophthalmia. [B, 173, 180 (*a*, 24).]

EXIGUOUS, adj. E^{2}x-i^{2}g'u^2-u^{3}s. Lat., *exiguus.* Fr., *exigu.* Ger., *schlank.* In botany, slender. [B, 1, 123 (*a*, 24).]

EXILE, adj. E^{2}x'i^{2}l. Lat., *exilis, graciles, tenuis.* Fr., *grêle.* In botany, long, delicate, slender. [B, 1, 123 (*a*, 24).]—**E.-tree.** The *Thevetia nereifolia.* [B, 172 (*a*, 24).]

EXINANITION, n. E^{2}x-i^{2}n-a^{2}n-i^{2}sh'u^{3}n. Lat., *exinanitio.* Fr., *e.* Ger., *völlige Erschöpfung.* Extreme exhaustion. [L, 41, 43.]

EXINDUSIATE, adj. E^{2}x-i^{2}n-du^{2}s'i^2-at. Lat., *exindusiatus.* Fr., *exindusié.* Ger., *unverschleiert, schleierlos.* Having no indusium. [B, 1, 19, 123 (*a*, 24).]

EXINE, n. E^{2}x'en. See EXTINE.

EXINTINE, n. E^{2}x-i^{2}nt'en. Of Fritzsche, a membrane in the pollen-grain, lying between the intine and the extine and next the former; probably but a fold of one of these membranes. [B, 19, 77 (*a*, 24).] Cf. INTEXTINE.

EXIPOTICOS (Lat.), adj. E^{2}x-i^2-po^{2}t(pot)'i^{2}k-o^{2}s. Gr., ἐξιπωτικός. Cleansing, digestive. [Galen (A, 325).]

EXIRIS (Lat.), n. f. E^{2}x-i(e)'ri^{2}s. See IRIDOPTOSIS.

EXISCHIOS (Lat.), **EXISCHIUS** (Lat.), adj's. E^{2}x-i^{2}sk-(i^{2}sch^2)'i^2-o^{2}s, -u^{3}s(u^{4}s). Gr., ἐξίσχιος. Having broad hips, as from dislocation of the femur. [A, 322.]

EXITÈLE (Fr.), n. E^{2}x-e-te^{2}l. Oxide of antimony. [L, 41.]

EXITIALIS (Lat.), adj. E^{2}x-i^{2}sh(i^{2}t)-i^2-a(a^3)'li^{2}s. From *exitium,* ruin. Pernicious, deadly. [A, 325.]

EXITURA (Lat.), n. f. E^{2}x-i^{2}t-u^2(u)'ra^3. 1. An old name for an abscess. 2. Of Paracelsus, a purulent or putrid discharge. [A, 325.]

EXITUS (Lat.), n. m. E^{2}x'i^{2}t-u^{3}s(u^{4}s). Gr., ἔξοδος. 1. A termination. 2. An outlet. [A, 318, 322.]—**E. letalis, E. lethalis.** A fatal termination.

EXOARTERITIS (Lat.), n. f. E^{2}x-o-a^{3}rt-e^{2}r(ar)-i(e)'ti^{2}s. See EXARTERITIS.

EXOCARDIAC, EXOCARDIAL, adj's. E^{2}x-o-ka^{3}rd'i^2-a^{2}k, -a^{2}l. From ἔξω, without, and καρδία, the heart. Fr., *exocardiaque.* Situated or originating outside the heart. [A, 385.]

EXOCARDITIS (Lat.), n. f. E^{2}x-o-ka^{3}rd-i(e)'ti^{2}s. Gen., *exocardit'idos* (*-is*). Inflammation of the outer surface of the heart or of the visceral pericardium. [A, 301, 518; L, 41.]

EXOCARP, n. E^{2}x'o-ka^{3}rp. From ἔξω, without, and καρπός, a fruit. Fr., *exocarpe.* Ger., *äussere Fruchthülle.* The outer layer of the pericarp. [B, 291 (*a*, 24).]

EXOCARPOS (Lat.), **EXOCARPUS** (Lat.), n's m. E^{2}x-o-ka^{3}rp'o^{2}s, -u^{3}s. A genus of the *Santalaceæ,* tribe *Anthoboleæ.* [B, 42, 121 (*a*, 24).]—**E. latifolius.** A species yielding West Australian sandal-wood, with but little fragrance. [E. M. Holmes, "Pharm. Jour. and Trans.," Mar. 27, 1886; "Am. Jour. of Pharm.," May, 1886, p. 254.]

EXOCCIPITAL, adj. E^{2}x-o^{2}k-si^{2}p'i^{2}t-a^{2}l. Lat., *exoccipitalis* (from *ex,* away from, and *occiput* [*q. v.*]). Fr., *e.* Occipital and situated externally. [L.] See *E.* BONE.

EXOCHAS (Lat.), **EXOCHE** (Lat.), n's f. E^{2}x'o^{2}k(o^{2}ch^2)-a^{2}s-(a^{3}s), -e(a). Gr., ἐξοχή, ἐξοχάς. Fr., *exoche.* Ger., *Afterbeule.* Lit., a prominence; of the old writers, a condyloma. [A, 301, 322, 325.]

EXOCHORION (Lat.), n. n. E^{2}x-o-ko(ch^{2}o^2)'ri^2-o^{2}n. From ἔξω, without, and χόριον (see CHORION). Fr., *e.* Ger., *E.* 1. Of Dutrochet, the decidua vera. 2. Of Velpeau, the outer layer of the chorion at an early stage of development. [A, 45.]

EXOCHORRHYPIA (Lat.), n. f. E^{2}x-o-ko^{2}r(ch^{2}o^{2}r)-ri^{2}p(ru^{6}p)'-i^2-a^3. From ἔξοχος, elevated, and ῥύπος (see RUPIA). Rupia prominens. [A, 322.]

EXOCŒLARIUM (Lat.), n. n. E^{2}x-o-sel(ko^2-e^{2}l)-a(a^3)'ri^2-u^{3}m-(u^{4}m). From ἔξω, without, and κοιλία, a hollow. The parietal cœlum-epithelium or the cell-layer which forms the inner covering of the body wall. [L, 146.]

EXOCŒLE, n. E^{2}x'o-sel. In certain corals, a chamber or division of the cœlenteron situated between every two pairs of mesenteries. ["Quart. Jour. of Micr. Sci.," 1885, p. 578 (L).]

EXOCŒLAR, EXOCŒLIC, adj's. E^{2}x-o-sel'a^{3}r, -i^{2}k. Relating to the exocœle. ["Quart. Jour. of Micr. Sci.," 1885, p. 578 (L).]

EXOCOLITIS (Lat.), n. f. E^{2}x-o-kol-i(e)'ti^{2}s. Gen., *exocolit'idos* (*-is*). From ἔξω, without, and κῶλον, the colon. Inflammation of the peritoneal coat of the colon. [*a*, 29.]

EXOCRÂNE (Fr.), n. E^{2}x-o-kra^{3}n. From ἔξω, without, and κρανίον, the skull. The external surface of the cranium. [L, 150.]

EXOCULATION, n. E^{2}x-o^{2}k-u^2-la'shu^{3}n. Lat., *exoculatio* (from *ex,* out of, and *oculus,* the eye). 1. Removal of the eyeball. 2. Destruction of sight. [A, 322.]

EXOCYSTIS (Lat.), n. f. E^{2}x-o-si^{2}st(ku^{6}st)'i^{2}s. From ἔξω, without, and κύστις, the bladder. Fr., *exocyste.* Ger., *Blasenvorfall.* Prolapse of the urinary bladder. [L, 135 (*a*, 14).]

EXODERM, n. E^{2}x'o-du^{3}rm. Lat., *exoderma* (from ἔξω, without, and δέρμα, the skin). Fr., *exoderme.* 1. See ECTODERM. 2. The external crust of the body of an insect. [L, 146, 180.]

EXODIC, adj. E^{2}x-o^{2}d'i^{2}k. Lat., *exodicus* (from ἐξ, away from, and ὁδός, a path). Fr., *exodique.* See EFFERENT.

EXŒDESIS (Lat.), n. f. E^{2}x-e^{2}d(o^2-e^{2}d)-e(a)'si^{2}s. Gen., *exœdes'eos* (*-is*). From ἐξοιδαίνειν, to swell. Fr., *exœdèse.* Ger., *Ausschwellung.* Swelling. [L, 135 (*a*, 14).]

EXOEMUM (Lat.), n. n. E^{2}x-o-em(am)'u^{3}m(u^{4}m). Fr., *exoème.* Of Richard, two small fascicles of hairs at the top of the glume in grasses. [B, 1 (*a*, 24).]

EXOGASTRITIS (Lat.), n. f. E^{2}x-o(o^3)-ga^{2}s(ga^{3}s)-trit(tret)'i^{2}s. Gen., *exogastrit'idos (-is)*. From ἔξω, without, and γαστήρ, the belly. Inflammation of the peritoneal coat of the stomach. [*a*, 29.]

EXOGEN, n. E^{2}x'o-je^{2}n. From ἔξω, outward, and γεννᾶν, to engender. An exogenous plant.

EXOGENETIC, adj. E^{2}x-o-je^{2}n-e^{2}t'i^{2}k. Arising from external causes. [*a*, 29.]

EXOGENOUS, adj. E^{2}x-o^{2}j'e^{2}n-u^{3}s. Lat., *exogenus*. Fr., *exogène*. Lit., outward-growing (said of most dicotyledons, the stems of which increase from within outward). The term is not now distinctive of dicotyledons, as some monocotyledons and some acotyledons are also exogenous, and some dicotyledons endogenous. The *Exogenæ* are: 1. Of De Candolle (1818), a primary division of vascular plants, and synonymous with dicotyledons, comprising the *Thalamafloreæ*, *Calicifloreæ*, *Corollifloreæ*, and *Monochlamydieæ*; or of Lindley (1830), a subclass of vascular plants comprising the tribes *Angiospermæ* and *Gymnospermæ*, and in 1833 the subclasses *Polypetalæ*, *Tricompletæ*, and *Monopetalæ*, and in 1847 the subclasses of the *Diclinæ*, *Hypogynæ*, *Perigynæ*, and *Epigynæ*. 2. Of Link, a class consisting of the subclasses *Vaginales*, *Vaginantes*, *Perigonatæ Xeranthæ*, *Hypanthæ Epanthæ*, *Anthodiatæ Perigynæ*, *Leguminosæ Catastemones*, *Anastemones Allostemones*, *Apetalæ Hydrophytæ*, *Catadytæ*, and *Amentaceæ*. 3. Of Wood, the first province of the subkingdom *Phænogamia* (flowery plants), and divided into the *Angiospermæ* and *Gymnospermæ*, the *Angiospermæ* being subdivided into *Dialypetalæ* (*Polypetalæ*), *Gamopetalæ* (*Monopetalæ*), and *Apetalæ* (*Monochlamydieæ*); the *Gymnospermæ* having the single division *Conoideæ*. [B, 1, 34, 77 (*a*, 24).]

EXOGNATH, n. E^{2}x'o^{2}g-na^{2}th. From ἔξω, without, and γνάθος, the jaw. Fr., *exognathe*. The accessory branch of a gnathite. [L, 41, 158.]

EXOGNATHION (Lat.), n. n. E^{2}x-o^{2}g-na(na^3)'thi^2-o^{2}n. The alveolar process of the superior maxilla. [L, 332.]

EXOGNOSIS (Lat.), n. f. E^{2}x-o^{2}g-no'si^{2}s. Gen., *exognos'eos (-is)*. From ἐξ, out of, from, and γιγνώσκειν, to learn, to know. A term proposed by C. H. Leonard, to signify diagnosis by exclusion. ["Leonard's Illustr. Med. Jour.," Jan., 1883, p. 11.]

EXOGONIUM (Lat.), n. n. E^{2}x-o-gon(go^{2}n)'i^2-u^{3}m(u^{4}m). A section of the genus *Ipomœa*. [B, 121 (*a*, 24).]—**E. jalapa, E. officinale, E. purga.** See Ipomæa *jalapa*.

EXOGONYANCON (Lat.), n. m. E^{2}x-o-go^{2}n-i^2(u^6)-a^{2}n^2(a^{3}n^2)'-ko^{2}n(kon). From ἔξω, outward, γόνυ, the knee, and ἀγκών, an angle. Bowleggedness. [E.]

EXOGYNOUS, adj. E^{2}x-o^{2}j'i^{2}n u^{3}s. Lat., *exogynus* (from ἐξ, out of, and γυνή, a female). Fr., *exogyne*. Having the style projecting decidedly from the flower. [L, 32.]

EXOLCE (Lat.), n. f. E^{2}x-o^{2}l'se(ka). Gen., *exol'ces*. Gr., ἐξολκή. Extraction. [A, 387.]

EXOLCEUS (Lat.), n. m. E^{2}x-o^{2}l'su^{2}s(ku^{2}s). Ger., *Beinheber*. A bone-elevator. [A, 322.]

EXOLCYSMUS (Lat.), n. m. E^{2}x-o^{2}l-si^{2}z(ku^{6}s)'mu^{3}s(mu^{4}s). See Exelcysmus.

EXOMETRA (Lat.), n. f. E^{2}x-o-me^{2}t(mat)'ra^3. From ἔξω, outward, and μήτρα, the womb. Fr., *exomètre*. Ger., *Umstürzung der Gebärmutter*. Inversion or prolapse of the uterus. [L, 41, 135 (*a*, 14).]

EXOMETRITIS (Lat.), n. f. E^{2}x-o-me^{2}t(mat)-ri(re)'ti^{2}s. Gen., *exometrit'idos (-is)*. Fr., *exométrite*. Perimetritis; of Hervieux, parametritis. [A, 89.]—**Angeioleucitic e.** Fr., *exométrite angioleucitique*. Parametritis originating in inflammation or thrombosis of the lymphatics. [A, 89.]

EXOMPHALIA (Lat.), n. f. E^{2}x-o^{2}m-fa(fa^3)'li^2-a^3. Fr., *exomphalie*. Protrusion of the navel. [A, 385.]

EXOMPHALOCELE (Lat.), n. f. E^{2}x-o^{2}m-fa^{2}l(fa^{3}l)-o(o^3)-se-(ka)'le(la); in Eng., e^{2}x-o^{2}m'fa^{2}l-o-sel. From ἐξ, out of, ὀμφαλός, the navel, and κήλη, a tumor. Fr., *exomphalocèle*. Ger., *Nabelbruch*. See *Umbilical* hernia.

EXOMPHALON (Lat.), n. n. E^{2}x-o^{2}m'fa^{2}l(fa^{3}l)-o^{2}n. Gr., ἐξόμφαλον. Fr., *exomphalie*. Prominence or protrusion of the navel. [A, 387.]

EXOMPHALOS (Lat.), n. m. E^{2}x-o^{2}m'fa^{2}l(fa^{3}l)-o^{2}s. Gr., ἐξόμφαλος. Properly, a person having an umbilical hernia or a prominent navel; as commonly used, an umbilical hernia. [E.]—**E. aquosus.** See Hydromphalon.

EXONCOMA (Lat.), n. n. E^{2}x-o^{2}n^2-ko'ma^3. Gen., *exoncom'atos (-is)*. Gr., ἐξόγκωμα. Ger., *hervorragende Geschwulst*. A prominent tumor. [E; L, 135 (*a*, 14).]

EXONCOSIS (Lat.), n. f. E^{2}x-o^{2}n^2-ko'si^{2}s. Gen., *exoncos'eos (-is)*. Gr., ἐξόγκωσις. The formation or growth of an exoncoma. [E.]

EXONDÉ (Fr.), adj. E^{2}x-o^{2}n^{2}da. See Exundatus.

EXONEIROGMOS (Lat.), **EXONEIROSIS** (Lat.), n's m. and f. E^{2}x-o^{2}n-ir(e^2-i^{2}r)-o^{2}g'mo^{2}s, -o'si^{2}s. From ἐξ, out of, and ὄνειρος, a dream. Fr., *exonirose*. Ger., *nächtliche Samenergiessung*. A nocturnal emission of semen. [L, 41, 84.]

EXOPHACIN, n. E^{2}x-o-fas'i^{2}n. From ἔξω, without, and φακῆ, a lentil. A liquid uncoagulable albuminous principle found by Frémy and Valenciennes in the cortical layers of the crystalline lens. [L, 88 (*a*, 27).]

EXOPHLŒUM (Lat.), n. n. E^{2}x-o-fle'(flo^2'e^2)-u^{3}m(u^{4}m). See Epiphlœum.

EXOPHTHALMIA (Lat.), n. f. E^{2}x-o^{2}f-tha^{2}l(tha^{3}l)'mi^{2}a^3. From ἐξ, out, and ὀφθαλμός, the eye. Fr., *exophthalmie*. Ger., *Exophthalmie*, *Augenvorfall*. It., *esoftalmia*. Sp., *exoftalmia*. Abnormal protrusion of the eyeball.—**E. cachectica.** Fr., *exophthalmie cachectique*. See *Exophthalmic* goître.—**E. fungosa.** Fr., *exophthalmie fongueuse*. Ger., *schwammiger Bulbusvorfall*. A late stage of glioma retinæ, after the malignant growth has filled the eyeball and caused a perforation of the cornea or anterior portion of the sclera. The growth then protrudes, proliferates very rapidly, and gives a fungous appearance to the front of the eyeball. [F.]

EXOPHTHALMIC, adj. E^{2}x-o^{2}f-tha^{2}l'mi^{2}k. Lat., *exophthalmicus*. Fr., *exophthalmique*. Ger., *exophthalmisch*. Pertaining to or accompanied with exophthalmia.

EXOPHTHALMITIS (Lat.), n. f. E^{2}x-o^{2}f-tha^{2}l(tha^{3}l)-mi(me)'-ti^{2}s. Gen., *exophthalmit'idos (-is)*. An obsolete term for exophthalmia accompanied by inflammation of the contents of the orbit or of the capsule of Tenon. [F.]

EXOPHTHALMOMETER, n. E^{2}x-o^{2}f-tha^{2}l-mo^{2}m'e^{2}t-u^{5}r. From the ἐξόφθαλμος, with prominent eyes, and μέτρον, a measure. Fr., *exophthalmomètre*. Ger., *E*. The name given subsequently by Cohn to his ophthalmoprostatometer. [F.]

EXOPHTHALMOS (Lat.), **EXOPHTHALMUS** (Lat.), n's m. E^{2}x-o^{2}f-tha^{2}l(tha^{3}l)'mo^{2}s, -mu^{3}s(mu^{4}s). Gr., ἐξόφθαλμος. Fr., *exophthalme*. Ger., *E*. Properly, a person affected with exophthalmia; as commonly used, exophthalmia.—**E. anæmicus, E. cachecticus.** See *Exophthalmic* goître.—**E. paralyticus.** Exophthalmia resulting from total or partial paralysis of the oculomotor or other muscles of the eye. [A, 319 (*a*, 21).]—**E. simplex.** Of the older authors, that form of exophthalmia in which the cause is unknown. [A, 319 (*a*, 14).]—**Pulsating E.** Fr., *exophthalmie pulsative* (ou *pulsatile*). Ger., *pulsirendes Glotzenauge*. A disease of the orbit, characterized by a complex group of symptoms consisting in protrusion of the eyeball; the presence of peculiar, audible noises over the region of the orbit and the cranial bones in the vicinity; and a visible pulsation in the eyeball or the anterior portion of the orbital aperture. These symptoms are due either to a disease of the blood-vessels in the orbit or in the cranial cavity, which may be either a true aneurysm, or a spurious traumatic aneurysm; an arterio-venous aneurysm or varix aneurysmaticus; an aneurysm by anastomosis; or finally it may be due in rare instances to some obstruction to the venous current through the cavernous sinus. [F.]

EXOPHYLLOUS, adj. E^{2}x-o-fi^{2}l'u^{3}s. From ἔξω, without, and φύλλον, a leaf. Of Dumortier, without a sheath, nude (said of the young leaves of dicotyledons developed without a sheath in distinction to those of monocotyledons). [*a*, 24.]

EXOPLASM, n. E^{2}x'o-pla^{2}z'm. From Gr., ἔξω, outside, and πλάσμα (see Plasma). See Ectoplasm.

EXOPODITE, n. E^{2}x-o^{2}p'o^{2}d-it. From ἔξω, without, and πούς, a foot. The external of the two branches into which the protopodite of crustaceans divides. [L, 121, 354 (*a*, 27).]

EXOPROSOPUS (Lat.), adj. and n. m. E^{2}x-o-pro^{2}s-op'u^{3}s(u^{4}s). From ἔξω, without, and πρόσωπον, the face. See Epignathus.

EXOPTILATE, EXOPTILE, adj's. E^{2}x-o^{2}p'ti^{2}l-at, -o^{2}p'ti^{2}l. Lat., *exoptilis* (from ἔξω, without, and πτίλον, a wing). Fr., *exoptile*. Lit., having a free plume or wing; of the gemmule of a dicotyledonous embryo, not entirely shut up in its cotyledonary cavity. [Lestiboudois (B, 1 [*a*, 24]).]

EXORBITISMUS (Lat.), n. m. E^{2}x-o^{2}rb-i^{2}t-i^{2}z(i^{2}s)'mu^{3}s(mu^{4}s). Fr., *exorbitisme*. See Exophthalmia.

EXORESCENTIA (Lat.), n. f. E^{2}x-o^{2}r-e^{2}s-se^{2}n(ke^{2}n)'shi^2(ti^2)-a^3. From *exoriri*, to appear. See Exacerbation.

EXORHIZA (Lat.), n. f. E^{2}x-o-ri(re)'za^3. From ἔξω, without, and ῥίς, the nose. Fr., *exorhize*. Ger., *Naktwurzel*, *Freiwurzel*. A root destitute of a sheath. The *Exorhizæ* of Richard are a subdivision of the *Embryonatæ*, including all plants so characterized. [B, 1, 123, 170 (*a*, 24).]

EXORHIZAL, adj. E^{2}x-o-riz'a^{2}l. Lat., *exorhizus* (from ἔξω, without, and ῥίζα, a root). Fr., *exorhizé*. Ger., *naktwurzelig*, *freiwurzelig*. Having a root destitute of a sheath. [B, 1, 123 (*a*, 24).]

EXORMIA (Lat.), n. f. E^{2}x-o^{2}rm'i^2-a^3. From ἐξορμᾶν, to send forth. Ger., *Ausbruch* (1st def.), *Hautgries* (2d def.), *Wahnsinn* (3d def.). 1. An outbreak or attack of disease. 2. In Good's classification of skin diseases, an order characterized by small acuminated elevations of the cuticle, not containing fluid nor tending to suppuration, commonly terminating in a scurf. It corresponds to the *Papulæ* of Willan. 3. Of Pausanias, dementia. [G, 62; L, 107, 135 (*a*, 14).]

EXORRHIZA (Lat.), n. f. E^{2}x-o^{2}r-riz(rez)'a^3. See Exorhiza.

EXORTUS (Lat.), n. n. E^{2}x-o^{2}r'tu^{3}s(tu^{4}s). Gen., *exort'us*. From *exoriri*, to come forth. An appearance, a springing up. [A, 318.]—**E. unguium.** See Lunula.

EXOSEPTA (Lat.), n. n. pl. E^{2}x-o(o^3)-se^{2}p'ta^3. From ἔξω, without, and *septum* (*q. v.*). The septa of certain corals, which are situated in the exocœles. ["Proc. of the Zool. Soc.," 1886, p. 133 (L).]

EXOSIS (Lat.), n. f. E^{2}x-o'si^{2}s. Gen., *exos'eos (-is)*. Gr., ἔξωσις. Protrusion, dislocation. [Hippocrates, Galen (A, 325).]

EXOSKELETAL, adj. E^{2}x-o-ske^{2}l'e^{2}t-a^{2}l. Relating to, connected with, or formed from, the exoskeleton. [L, 14.]

EXOSKELETON, n. E^{2}x-o-ske^{2}l'e-tu^{3}n. From ἔξω, without, and σκελετός (see Skeleton). Fr., *exosquelette*. The more superficially situated support of the body in animals, *i. e.*, the skin, nails, scales, hairs, feathers, hoofs, etc. [B, 28; L, 343.]—**Placoid e.** The "dermal defenses" of certain elasmobranch fishes, being spinous, tooth-like, or tubercular calcifications of the cutaneous papillæ. [A, 13.]

EXOSMA (Lat.), n. n. E^{2}x-o^{2}z(os)'ma^3. Gen., *exos'matos (-is)*. Gr., ἔξωσμα. A protruded part. [A, 322.]

EXOSMIC, adj. E2x-o2z'mi2k. Fr., *exosmique*. See EXOSMOTIC.

EXOSMOMETER, n. E2x-o2s-mo2m'e2t-u5r. Lat., *exosmometrum*. Fr., *exosmomètre*. See ENDOSMOMETER.

EXOSMOSE, n. Lat., *exosmosis* (from ἔξω, outside, and ὠσμός, a thrusting). Fr., *e*. Ger., *Aushauchung*. In osmosis, the passage of a current outward. [B, 19, 229 (*a*, 24).] Cf. ENDOSMOSE.

EXOSMOTIC, adj. E2x-o2s-mo2t'i2k. Lat., *exosmoticus*. Fr., *exosmotique*. Ger., *exosmotisch*. Pertaining to or of the nature of exosmose. [A, 301.]

EXOSMUS (Lat.), n. m. E2x-o2z(os)'mu3s(mu4s). See EXOSIS.

EXOSPORE, n. E2x'o-spor. Lat., *exosporium* (from ἔξω, without, and σπόρος, a seed). Fr., *e*. The outer coat of a spore. [B, 121, 291 (*a*, 24).]

EXOSPOROUS, adj. E2x-o2s'po2r-u3s. Lat., *exosporeus*. Fr., *exosporé*. Having the spores developed on the outside of the basidia. The *Exosporeæ* are a division of the *Hymenomycetes* so characterized. [A, 385 ; B, 121, 291 (*a*, 24).]

EXOSQUELETTE (Fr.), n. E2x-o-ske2-le2t. See EXSKELETON.

EXOSSIS (Lat.), n. f. E2x-o2s'i2s. The *Acipenser huso*. [L, 94 (*a*, 21).]

EXOSTEMA (Lat.), n. n. E2x-o(o3)-ste(sta)'ma3. Gen., *exostem'atos* (*-is*). From ἔξω, without, and στῆμα, a stamen. Fr., *exostème*. Ger., *Exostemme*, *Exosteme*. A genus of the *Rubiaceæ*, tribe *Cinchoneæ*, distinguished from the true *Cinchona* by having the stamens projecting beyond the corolla. [B, 42, 121 (*a*, 24).]—**E. à feuilles étroites** (Fr.). See *E. angustifolium*.—**E. à fleurs dissemblables** (Fr.). See *E. dissimiliflorum*.—**E. à fleurs nombreuses** (Fr.). See *E. floribundum*.—**E. à longues fleurs** (Fr.). See *E. longiflorum*.—**E. angustifolium.** Fr., *exostema à feuilles étroites*. Ger., *schmalblättrige Exostemme*. A species found on river-banks in Santo Domingo, where the bark, *cortex chinæ angustifoliæ* (Ger., *China von St.-Domingo*) is used. It has a sweetish, aromatic taste. Very little, if any, is exported to Europe. [B, 173, 180 (*a*, 24).]—**E. à petites fleurs** (Fr.). See *E. parviflorum*.—**E. australe.** Fr., *e. austral*. Ger., *südliche Exostemme*. A species found in Brazil. The bark (*quina do mato*) is used as a febrifuge. [B, 173, 180 (*a*, 24).]—**E. brachycarpum.** Fr., *e. de la Jamaïque*. Ger., *kurzfrüchtige Exostemme*. A species found in Jamaica. The bark, *cortex chinæ brachycarpæ*, has the bitter taste of the cinchona-barks, but is not astringent. [B, 173, 180 (*a*, 24).]—**E. caribæum.** Fr., *e. caraïbe*, *bois-chandelle*, *Marie-galante*, *poirier de montagne*, *quinquina caraïbe* (ou *des Antilles*). Ger., *caribäische Exostemme*. Sea-side beech, primewood ; a species found in the West Indies and the Caribbean islands. The bark, *cortex chinæ caribæus* (seu *jamaicensis*), *cinchina* (ou *china*) *caribæa*, *cortex jamaicensis* (seu *caribæus*), is used in the West Indies as a febrifuge (in the Bahamas, in intestinal affections) and was once exported to Europe, though but little used. It is one of the false barks that have sometimes been sold for cinchona. [B, 5, 173, 180, 275 (*a*, 24) ; "Proc. of the Am. Pharm. Assoc.," xxiv (*a*, 14).]—**E. coriaceum.** Fr., *e. coriace*. A species found in the Antilles. Its bark is used as a tonic and febrifuge. [B, 173 (*a*, 24).]—**E. corymbiferum.** Fr., *e. corymbifère*. Ger., *doldentraubiges Exostemme*. The *Badusa corymbifera*. [B, 42, 173, 180, 214 (*a*, 24).]—**E. corymbosum.** Fr., *e. encorymbe*. A species found in Peru ; tonic and febrifuge. [B, 173 (*a*, 24).]—**E. cuspidatum.** Fr., *e. cuspidé*. Ger., *feinspitzige Exostemme*. A species found in Brazil, where the bark (*quina do mato*) is used like that of *E. australe*. [B, 173, 180 (*a*, 24).]—**E. de la Jamaïque** (Fr.). See *E. brachycarpum*.—**E. de Philipps** (Fr.). See *E. philippicum*.—**E. dissimiliflorum.** Fr., *e. à fleurs dissemblables*. A species found in Peru, resembling in properties *E. floribundum*. [B, 173 (*a*, 24).]—**E. du Pérou** (Fr.). See *E. peruvianum*.—**E. en corymbe** (Fr.). See *E. corymbosum*.—**E. floribundum.** Fr., *e. à fleurs nombreuses*. Ger., *reichblüthige Exostemme*. A species found in the West Indies. The bark (*cortex chinæ Piton* [seu *Santæ Luciæ*], *china Piton* [seu *montana*, seu *martinicensis*]) is a febrifuge, emetic, and tonic, and is the best known of the false cinchona-barks. [B, 5, 173, 180 (*a*, 24).]—**E. lineatum.** Fr., *e. linéaire*. A species found in Santo Domingo. The bark is very like that of *E. floribundum*, with which it is often mixed. [B, 173, 180 (*a*, 24).]—**E. longiflorum.** Fr., *e. à longues fleurs*. A species found in Guiana, having the same properties as *E. dissimiliflorum*. [B, 173 (*a*, 24).]—**E. macrocnemia.** The *Remijia macrocnemia*. [B, 283.]—**E. parviflorum.** Fr., *e. à petites fleurs*. A species found in the Antilles ; used as a tonic and febrifuge. [B, 5, 173 (*a*, 24).]—**E. peruvianum.** Fr., *e. du Pérou*. A species found in the Colombian Andes, with a bitter bark ; used as a febrifuge. [B, 173, 180 (*a*, 24).]—**E. philippicum.** Fr., *e. de Philipps*. A species found in Peru, having the properties of the other species. [B, 173 (*a*, 24).]—**E. souzanum.** Ger., *Souza's Exostemme*. A species found especially in the Province of Piauhy, Brazil. The bark (*quina do Piauhy*) has a very bitter, somewhat slimy taste, resembling that of true cinchona. [B, 180 (*a*, 24).]—**E. triflorum.** A species found in Peru, where its bark is used as a febrifuge. [B, 173, 282 (*a*, 24).]

EXOSTEMME (Ger.), n. E2x-o-ste2m'me2. See EXOSTEMA.—**Caribäische e.** See EXOSTEMA *caribæum*.—**Doldentraubige E.** See EXOSTEMA *corymbiferum*.—**Feingspitzige E.** See EXOSTEMA *cuspidatum*.—**Kurzfrüchtige E.** See EXOSTEMA *brachycarpum*.—**Reichblüthige E.** See EXOSTEMA *floribundum*.—**Schmalblätterige E.** See EXOSTEMA *angustifolium*.—**Souza's E.** See EXOSTEMA *souzanum*.—**Südliche E.** See EXOSTEMA *australe*.

EXOSTOMA (Lat.), n. n. E2x-o2st-o'ma3. Gen., *exostom'atos* (*-is*). From ἐξ, out, and ὀστέον, a bone. See EXOSTOSIS.

EXOSTOMA (Lat.), n. n. E2x-o2s(os)'to2m-a3. From ἔξω, without, and στόμα, an aperture. Fr., *exostome*. Ger., *äusserer Eimund*. The opening in the primine of the ovule of a plant. [B, 19, 77, 123 (*a*, 24).]

EXOSTOSE (Fr., Ger.), n. E2x-os-toz, -toz'e2. See EXOSTOSIS.—**E. crânienne** (Fr.). See *Ivory* EXOSTOSIS.—**E. de croissance** (Fr.). Of Broca, a cartilaginous exostosis ; so-called because of its frequency in the young. [Marchand (A, 319).]—**E. éburnée** (Fr.). See *Ivory* EXOSTOSIS.—**E. en plaque.** See *Laminar* EXOSTOSIS.—**E. épiphysaire.** See *E. essentielle*.—**E. essentielle.** An exostosis which is the result of an error of development ; found principally at the extremities of the long bones. [L, 88 (*a*, 29).]—**E. goutteuse.** An exostosis of gouty origin. [L, 49 (*a*, 29).]—**E. rhumatismale.** An exostosis of rheumatic origin. [L, 49 (*a*, 29).]—**E. sous-unguéale.** A partial hypertrophy of the spongy tissue of the distal phalanx, especially observed on the great toe in young people of a very lymphatic or scrofulous diathesis. [L, 49 (*a*, 29).]—**E. spongieuse.** See *Spongy* EXOSTOSIS.—**E. symptomatique.** See *Symptomatic* EXOSTOSIS—**E. syphilitique.** See *Syphilitic* EXOSTOSIS.—**E. tendineuse.** An exostosis which replaces the tendon of insertion in old and gouty people. [L, 49 (*a*, 29).]

EXOSTOSIS (Lat.), n. f. E2x-o2s-to'si2s. Gen., *exostos'eos* (*-is*). Gr., ἐξόστωσις (from ἐξ, out, and ὀστέον, a bone). Fr., *exostose*. Ger., *Exostose*, *Beingeschwulst*, *Knochenauswuchs*. It., *esostosi*. Sp., *exostosis*. 1. A morbid bony outgrowth or enlargement ; an osseous tumor. [A, 326 (*a*, 21).] 2. A diseased condition in plants in which hard masses of wood are produced, projecting like tumors from the stem or roots. [B, 19 (*a*, 24).]—**Button-like e.** See *E. eburnea clavata*.—**Cancellous e.** See *Parenchymatous e*.—**Cartilaginous e.** Lat., *e. cartilaginea*. Fr., *exostose cartilagineuse*. A bony tumor in which the amounts of bone and cartilage are nearly equal. [E.]—**Cauliflower e., Cellular e.** See *Spongy e*.—**Compact e.** See *Ivory e*.—**Dental e.** See ODONTOMA.—**Epiphyseal e.** An e. formed on an epiphysis of a bone. [*a*, 29.]—**E. apophytica.** An e. consisting of an enlargement of a normal bony prominence at the point of insertion of a tendon or fascia. [Birsh-Hirschfeld (A, 319)].—**E. bursata.** An e. springing from an articular surface and inclosed in a cartilaginous or synovial capsule, together sometimes with free cartilaginous bodies. [Fehleisen, "Arch. f. klin. Chir.," xxxiii, 1 ; "Ann. of Surg.," July, 1886, p. 77 ; J. Bell, "Ann. of Surg.," ix, p. 112 ; "Ctrlbl. f. Chir.," Oct. 26, 1889, p. 775.]—**E. cartilaginea.** See *Cartilaginous e*.—**E. clavata.** See *E. eburnea clavata*.—**E. eburnea.** See *Ivory e*.—**E. eburnea clavata.** E. characterized by little round, flat growths on the cranium, which look like ivory buttons. [A, 326 (*a*, 21).]—**E. maligna.** See OSTEOMYELITIS.—**E. medullosa.** E. characterized by a large collection of medullary tissue corresponding to the medullary canal in the large bones. [A, 326 (*a*, 21).]—**E. multiplex.** See *Multiple e*.—**E. spongiosa.** See *Spongy e*.—**E. steatomatodes.** See OSTEOSARCOMA.—**E. subunguealis.** See *Subungual e*.—**False E.** Fr., *exostose fausse*. An appendix developed upon a bone which has not the nature of bone or has not the same constitution. [L, 41 (*a*, 29).]—**Hyponychial e.** See *Subungual e*.—**Ivory e.** Fr., *exostose* (ou *ostéome*) *éburnée*. A tumor composed of compact bone, peculiar to the cranial bones. [E.]—**Laminar e.** Fr., *exostose laminée*. An e. formed of superposed laminæ. [L, 41 (*a*, 29).]—**Medullary e.** See *E. medullosa*.—**Multiple e.** Lat., *e. multiplex*. The occurrence of a number of exostoses in the same subject. [Marchand (A, 319).]—**Parenchymatous e.** A bony tumor developed from the cancellous structure.—**Parosteal e.** An e. originating in the connective tissue. [Marchand (A, 319).]—**Periosteal e.** An e. originating from the periosteum. [Marchand (A, 319).] Cf. HYPEROSTOSIS.—**Scorbutic e.** An e. of scorbutic origin. [L, 49 (*a*, 29).]—**Scrofulous e.** An e. of scrofulous origin. [L, 49 (*a*, 29).]—**Spongy e.** Fr., *exostose spongieuse*. Lat., *e. spongiosa*. Ger., *spongiöse Exostose*. An e. consisting almost wholly of spongy bone tissue. [Marchand (A, 319).]—**Subungual e.** Fr., *exostose sous-unguéale*. A form of e. found beneath the nail, generally of the great toe. [Marchand (A, 319).]—**Symptomatic e.** An e. by traumatic or non-traumatic inflammation, or by syphilis. [L, 88 (*a*, 29).]—**Syphilitic e.** Lat., *e. syphilitica*. Fr., *exostose syphilitique*. Ger., *syphilitische Exostose*. An e. due to syphilis, usually a hyperostosis. [Marchand (A, 319).]—**True e.** See *E*.

EXOSTOTIC, adj. E2x-o2st-o2t'i2k. Lat., *exostoticus*. Pertaining to or of the nature of an exostosis. [A, 322.]

EXOTERIC, adj. E2x-o-te2r'i2k. Gr., ἐξωτερικός. Lat., *exotericus*. Fr., *exotérique*. Ger., *exoterisch*. Resulting from causes external to the organism. [L, 107.]

EXOTHECA (Lat.), **EXOTHECIUM** (Lat.), n's f. and n. E2x-o-the(tha)'ka3, -si2(ki2)-u3m(u4m). From ἔξω, without, and θήκη, a case. Fr., *exothèque*. The outer covering of an anther. [B, 77, 121 (*a*, 24).] Cf. *Endothecium*.

EXOTHERMIC, adj. E2x-o-thu5rm'i2k. From ἔξω, without, and θερμός, hot. Fr., *exothermique*. Of light, determining chemical action. [L, 41.]

EXOTHESIS (Lat.), n. f. E2x-o-the(tha)'si2s. Gen., *exothes'eos* (*-is*). Gr., ἐξώθησις (from ἐξωθεῖν, to expel). See DISLOCATION.

EXOTIC, adj. E2x-o2t'i2k. Gr., ἐξωτικός. Lat., *exoticus*. Fr., *exotique*. Ger., *ausländisch*. It., *essotico*. Sp., *exotico*. Not indigenous ; of foreign origin. [*a*, 24.]

EXOTICADENIA (Lat.), n. f. E2x-o2t(ot)-i2k-a2d(a3d)-e2n-i(e)'a3. See EXOTICUDENIA.

EXOTICHÆMATICUS (Lat.), adj. E2x-o2t(ot)-i2-ke2m(ch2a3-am)-a2t(a3t)'i2k-u3s(u4s). From ἐξωτικός, foreign, and αἷμα, blood. Pertaining to the transfusion of blood. [L, 135 (*a*, 14).]

EXOTICHÆMATOSIS (Lat.), n. f. E2x-o2t(ot)-i2-ke2m(ch2a3-am)-a3-to'si2s. Gen., *exotichæmatos'eos* (*-is*). Ger., *Bluttransfusion*. Transfusion of blood. [A, 322.]

EXOTICOMANIA (Lat.), n. f. E2x-o2t(ot)-i2k-o(o3)-man(ma3n)'i2-a3. From ἐξωτικός, foreign, and μανία, mania. Fr., *exoticomanie*. Ger., *übermässige Vorliebe für Fremdes*. An excessive fondness for anything foreign. [A, 322.]

EXOTICOSYMPHYSIS (Lat.), n. f. E2x-o2t(ot)-i2k-o(o3)-si2m-(su6m)'fi2(fu6)-si2s. Gen., *exoticosymphys'eos* (*-sym'physis*). From

ἐξωτικός, foreign, and σύμφυσις, a growing together. Fr., *exotico-symphyse.* The union of a substance with the organism (*e. g.*, the adhesion of a flap in plastic surgery). [A, 322.]

EXOTICUDENIA (Lat.), n. f. E²x-o²t(ot)-i²k-u²(u)-den(de²n)-i(e)'a³. From ἐξωτικός, foreign, and οὐδένεια, worthlessness. Fr., *exoticudénie.* Ger., *Geringschätzung ausländischer Mittel.* Excessive dislike for anything foreign. [A, 322.]

EXOTRACHELUS (Lat.), adj. and n. m. E²x-o-tra²k(tra²ch)-e(a)'lu³s(lu⁴s). From ἔξω, without, and τράχηλος, the neck. See Epignathus.

EXPANSIBILITY, n. E²x-pa²n-si²-bi²l'i²-ti². Lat., *expansibilitas* (from *expandere*, to stretch out). Fr., *expansibilite.* Ger., *Ausdehnbarkeit.* Capability of expanding or of being expanded. [L, 180.]

EXPANSION, n. E²x-pa²n'shu³n. Lat., *expansio* (from *expandere*, to spread out). Fr., *e.* Ger., *E.*, *Ausdehnung.* A spreading out, increase of volume.—**Coefficient of e.** Ger., *Ausdehnungskoëffizient.* Sp., *coeficiente de dilatación.* The increase in length or volume of one of the equal parts of a substance when its temperature is raised one degree from zero. [a, 27.]—**E. fascié** (Fr.). Of De Candolle, an unusual spreading of limbs or branches in certain plants. [B, 1 (a, 24).]—**E. pédonculaire** (Fr.). The divergence of the pyramids in the medulla oblongata. [a, 29.]—**Linear e.** Ger., *Längenausdehnung.* Elongation by e. [a, 27.]—**Muscle-e.** Ger., *Muskel-Ausdehnung.* The degree to which a muscle is stretched by an attached weight. [K, 35.]

EXPANSUS (Lat.), adj. E²x-pa²n(pa³n)'su³s(su⁴s). Fr., *étendu.* Ger., *ausgedehnt.* Stretched (said by Mirbel of the nectary when it is spread as a covering upon the top of the ovary). [B, 1 (a, 24).]

EXPECTANT, adj. E²x-pe²kt'a²nt. Lat., *exspectans.* Fr., *e.* Ger., *expectirend, expectativ.* Characterized by non-interference in the absence of clear indications (said of a method of treating disease).

EXPECTATION, n. E²x-pe²kt-a'shu³n. Lat., *exspectatio.* Fr., *e.*, *expectantisme.* Ger., *Abwarten.* The expectant method of treating disease.—**E. of life.** In life insurance, the length of time that a person of a given age and in good health may be expected to live.

EXPECTORANT, adj. E²x-pe²kt'o²r-a²nt. Lat., *expectorans* (from *ex*, out of, and *pectus*, the chest). Fr., *e.* Ger., *auswurfbefördernd.* It., *espettorante.* Sp., *expectorante.* Promotive of expectoration. [A, 326 (a, 21).]

EXPECTORATION, n. E²x-pe²kt-o²r-a'shu³n. Lat., *expectoratio.* Fr., *e.* Ger., *Ausspeien* (1st def.), *Speichel* (2d def.). It., *espettorazione, spurgo.* Sp., *expectoración.* 1. The act of expelling from the mouth matter which has been brought to it from the lungs or from the passages which lead to them. 2. See Sputum. [D, 1.]—**Prune-juice e.** The peculiar sputum of pneumonia, especially when the disease is hastening to a fatal termination. It is less abundant, less tenacious, and darker in color than the ordinary rusty sputa of pneumonia. [D, 1.]

EXPECTORATIVE, adj. E²x-pe²kt'o²r-a-ti²v. See Expectorant.

EXPELLENT, adj. E²x-pe²l'e²nt. Lat., *expellens.* Ger., *austreibend.* Facilitating the expulsion of noxious material from the system. [A, 322.]

EXPERIENCE, n. E²x-pe'ri²-e²ns. Lat., *experientia* (from *experiri*, to try). Fr., *expérience.* Ger., *Erfahrung.* 1. The act of undergoing, taking part in, or personally observing, an occurrence. 2. Knowledge based on observation.

EXPERIMENT, n. E²x-pe²r'i²-me²nt. Gr., ἐμπειρία. Lat., *experimentum* (from *experiri*, to try). Fr., *expérience, épreuve.* Ger., *E.*, *Probe, Versuch.* A trial, test ; the careful and methodical observation of what takes place under conditions that have been arranged for the purpose of eliminating all sources of error in deduction so far as possible.—**Active e.** An e. in which the observer determines or controls the conditions.—**Archimedes's e.** An e. for demonstrating the principle that when a body is plunged into a liquid, a part of its weight, equal to the weight of the displaced liquid, is lost. A cylindrical weight is suspended from the pan of a hydrostatic balance by means of a tube of the same volume as itself. If when the weight is plunged into water the hollow is filled with the same, the equilibrium is exactly maintained. [B, 21 (a, 27).]—**Check-e., Control-e.** An e. consisting in the repetition of a previous e., the conditions being changed in some particular so as to prove the validity of the inference drawn from the first e.—**Croaking e.** Ger., *Quarrversuch.* The production of a croak in a male frog deprived of its brain by gently pinching the dorsal integument. [Landois (K).]—**Crucial e.** See *Crucial* test.—**Dropping e.** Fr., *épreuve tombante.* Ger., *Fallversuch.* A simple e. devised by Hering to show whether there is a normal binocular act of vision. A cylindrical tube, 25 cm. long, and wide enough to be looked through with both eyes, has at one end, and fastened on its outside, two long needles, which must be so bent outward that they can not be seen on looking through the tube. A fine silken thread connects the point of one needle with that of the other. Midway between the needles is a knot in the thread, or a small bead, which then lies in the centre of the field of vision of the tube. The tube is held close before the face, with the thread horizontal, and the patient looks through the tube with both eyes ; the bead in the middle serves as a fixation point. Small balls of different sizes are allowed to fall about twelve times, one after the other, some before and some behind the bead. One who sees binocularly can tell with certainty whether a ball falls within or beyond the fixation point, while one who perceives the retinal image of one eye only is frequently deceived. [F.]—**Embrace e.** Ger., *Umarmungsversuch.* Stimulation of the skin overlying the sternum of a male frog deprived of its brain. so as to cause it to embrace reflexively the object used to produce the irritation. [Landois (K).]—**Fechner's paradoxical e.** Fr., *épreuve paradoxale de Fechner.* Ger., *Fechner's paradoxer Versuch.* An e. introduced by Fechner in the domain of the color-sense for the determination of binocular light-perception. In the case of most observers, when one eye is closed, Fechner found that at first there was a slight clouding of the common visual field, but this was quickly followed by an equal clearing up of the field. If the visual field of one eye is darkened by a gray glass held before the eye, and then the common visual field or a white object in it be regarded, the latter appears darker than when the eye behind the gray glass is entirely closed. [F.]—**Gellé's e.** An e. by which Gellé professes that a diagnosis can be made between affections of the middle ear and of the labyrinth. If the air in the meatus is condensed by means of a rarefying apparatus, the tone of a tuning-fork, brought into contact with the india-rubber tube or the bones of the head, will be decidedly weakened. If an obstacle to the conduction of sound exists, as in ankylosis of the stapes, according to Gellé, the tone remains unchanged during the e. ; if, however, the labyrinth is affected and the stapes movable, at every condensation there will be a feeling of giddiness and noises in the ear, symptoms of an increase of pressure in the labyrinth. [F, 32.]—**Hering's e.** See *Dropping e.*—**Kuhne's e.** An e. to demonstrate the contractility of plasmodium by means of electricity. [a, 27.]—**Passive e.** An e. in which nature determines the conditions, the observer simply taking cognizance of what goes on.—**Rinne's e.** An e. consisting in setting a tuning-fork (pitched in the bass C) on the vertex or mastoid process, and allowing it to vibrate till the note is no longer heard ; the prongs of the fork are then brought close to the ear, and in normal circumstances the tone will be heard again. When this e. turns out positive, according to Lucæ, there is an affection of the internal ear. When it turns out negative, there is disturbance in the sound-conducting apparatus, though there may be a simultaneous affection of the nervous apparatus. [F, 32.]—**Scheiner's e.** An e. for proving that the eye can not accommodate for a near and a distant object at the same time. It consists in fixing the gaze upon a small object, and then looking beyond it at some distant point. The image of the former then appears to be double and blurred. [K.]—**Torricelli's e.** An e. designed to demonstrate the amount of atmospheric pressure by means of a cistern barometer. [a, 27.]—**Valsalvian e.** The condensation of the air in the naso-pharynx by a strong act of expiration, performed with closed mouth and nostrils, thus driving the air up through the Eustachian tubes into the tympanic cavities and forcing the drum-membranes outward. [F.]

EXPERIMENTAL, adj. E²x-pe²r-i²-me²nt'a²l. Lat., *experimentalis.* Fr., *expérimental.* Ger., *e.* Pertaining to or derived from experiment or experience.

EXPERIMENTATION, n. E²x-pe²r-i²-me²nt-a'shu³n. Fr., *expérimentation.* Ger., *E.* The performance of experiments.

EXPÉRIMENTÉ (Fr.), adj. E²x-pa-re-ma³n²-ta. Subjected to experiment. [A, 385.]

EXPERIMENTUM (Lat.), n. n. E²x-pe²r-i²-me²nt'u³m(u⁴m). See Experiment.—**E. crucis.** See *Crucial* test.

EXPERT, n. E²x'pu⁵rt. Lat., *expertus* (from *experiri*, to be experienced). Fr., *e.* Ger., *E.*, *Fachmann.* A person reputed to have special skill or experimental knowledge of a particular subject.

EXPERTISE (Fr.), n. E²x-pe²r-tez. A medical or medico-legal investigation by an expert. [Max-Simon, " Lyon méd.," Dec. 6, 1885, p. 429.]

EXPIRATEUR (Fr.), adj. E²x-pe-ra³-tu⁵r. See Expiratory.

EXPIRATION, n. E²x-pi²-ra'shu³n. Gr., ἐκπνοή. Lat., *exspiratio* (from *ex*, out, and *spirare*, to breathe). Fr., *e.* Ger., *E.*, *Ausathmung.* It., *espirazione.* Sp., *expiración.* Breathing out, exhalation. 1. The act of expelling the air from the lungs. In ordinary tranquil breathing, e. is accomplished (*a*) by gravity and the elasticity of the thorax, both of which tend to bring the ribs back to the position occupied before inspiration ; (*b*) by the elasticity of the lungs ; (*c*) by the elasticity of the abdominal walls and viscera which arch the relaxed diaphragm back into the thorax. In this way the thorax is narrowed in its three diameters and the air is forced from the lungs. [J.] 2. In botany, the act by which plants reject or expel through their leaves a part of the gas which they absorb. [B, 1 (a, 24).]—**E'akt** (Ger.). The act of e. [J.]—**E. forcée** (Fr.). See *Labored e.*—**E'skrampf** (Ger.). See *Expiratory* tetanus.—**E'sluft** (Ger.). See *Expired* air.—**E'smuskeln** (Ger.). See Muscles *of expiration.*—**E'sstillstand** (Ger.). See *Expiratory* standstill. — **E'stetanus** (Ger.). See *Expiratory* tetanus.—**Forced e., Forcible e.** See *Labored e.*—**Labored e.** Fr., *e. forcée.* Ger., *forcirte E.* Expiratory movements in which the ordinary expiratory efforts due to the elasticity of the lungs, thorax, and abdomen are assisted and increased by the so-called expiratory auxiliaries, *i. e.*, the abdominal and part of the thoracic muscles. If the respiratory movements become excessively labored there is brought into co-ordinate action every muscle in the body which can either directly, or indirectly, by giving fixed support to other muscles, lessen the cavity of the thorax, and thus force the air from the lungs. [J.]—**Prolonged e.** Fr., *e. prolongée.* A prolonged expiratory sound heard on auscultation ; one of the physical signs, in many cases, of certain pulmonary diseases. Heard over a limited area in the upper part of the chest, it often indicates tuberculosis ; heard over the middle region of the lungs, it may indicate emphysema. [D, 1.]—**Systolic e.** An e. due to the filling of the pulmonary arteries and consequent pressure upon the lungs (said of the slight e. at the beginning of the cardiac systole). [J, 57.]

EXPIRATORY, adj. E²x'pi²r-a²t-o-ri². Fr., *expirateur.* Ger., *expiratorisch.* It., *espiratore.* Sp., *expirador, expiratorio.* Pertaining to expiration. [J.]

EXPIRED, adj. E²x-pird'. Lat., *exspiratus*, Fr., *expiré.* Breathed out, given off from the lungs. [A, 385.]

EXPLANATE, adj. E^{2}x'pla^{2}n-at. Lat., *explanatus.* Ger., *ausgebreitet.* 1. Of an insect, having the sides of the prothorax so depressed and dilated as to form a broad margin. [L, 56.] 2. Of plants, stretched out in an even plane or laid one upon another. [B, 121 (*a*, 24).]

EXPLETIVE, adj. E^{2}x'ple^{2}t-i^{2}v. Lat., *expletivus* (from *explere*, to fill up). Fr., *explétif.* Serving to complete a connection (said of nerve-fibres). [A, 301.]

EXPLICATUS (Lat.), adj. E^{2}x-pli^2-ka(ka^3)'tu^{3}s(tu^{4}s). From *explicare*, to unfold. Fr., *expliqué.* Ger., *entfaltet.* Of flowers, unfolded, evolved, developed. [B, 123 (*a*, 24).]

EXPLODENDUS (Lat.), adj. E^{2}x-plod-e^{2}nd'u^{3}s(u^{4}s). See Explosus.

EXPLORATEUR (Fr.), adj. E^{2}x-plo-ra^2-tu^{3}r. Exploratory; as a n., an exploring instrument. [A, 326 (*a*, 21).]

EXPLORATION, n. E^{2}x-plo-ra'shu^{3}n. Lat., *exploratio* (from *explorare*, to explore). Fr., *e.* Ger., *Untersuchung.* It., *esplorazione.* Sp., *exploración.* An examination, especially of parts situated under and hidden by other parts. [A, 326 (*a*, 21).]

EXPLORATIVE, adj. E^{2}x-plo'ra-ti^{2}v. See Exploratory.

EXPLORATORIUM (Lat.), n. n. E^{2}x-plo-ra(ra^2)-to'ri^2-u^{3}m-(u^{4}m). See Explorer.

EXPLORATORY, adj. E^{2}x-plor'a-to-ri^2. Lat., *exploratorius.* Fr., *explorateur.* Ger., *explorativ.* Serving the purpose of exploration.

EXPLORER, n. E^{2}x-plor'u^{3}r. Lat., *exploratorium.* Fr., *explorateur.* Ger., *Untersuchungsinstrument.* Any instrument for exploring.—**Electrical e.** See *Induction* balance.

EXPLOSION, n. E^{2}x-plo'zhu^{3}n. Gr., ἐξέλασις. Lat., *explosio* (from *explodere*, to drive away). Fr., *e.* Ger., *Verpuffung.* It., *esplosione.* Sp., *explosión.* 1. A noisy and violent commotion from the bursting of a receptacle containing gas or liquid under pressure or from the sudden evolution of gas in consequence of chemical action precipitated by ignition or concussion. 2. In pathology, the sudden occurrence of symptoms (*e. g.*, convulsions). [A, 385.]

EXPLOSIVE, adj. E^{2}x-plos'i^{2}v. Lat., *explosivus.* Fr., *explosif.* Ger., *explosiv.* Pertaining to, attended with, or prone to give rise to explosion. [A, 385.]

EXPLOSUS (Lat.), adj. E^{2}x-plo'su^{3}s(su^{4}s). Ger., *aussprühend.* In botany, extruded suddenly and with violence (said of spores). [B, 198.]

EXPOSURE, n. E^{2}x-poz'u^{3}r. Lat., *expositio* (from *exponere*, to lay bare). Fr., *exposition.* Ger., *Blossstellung.* 1. A laying bare to view, to the sun, to the action of cold, etc.; a divesting of the ordinary clothing so as to lay a part open to observation. 2. Subjection to the danger of infection.

EXPRESSED, adj. E^{2}x-pre^{2}st'. Lat., *expressus.* Fr., *exprimé.* Ger., *ausgedrückt.* Pressed out.

EXPRESSION, n. E^{2}x-pre^{2}sh'u^{3}n. Lat., *expressio* (from *exprimere*, to squeeze out). Fr., *e.* Ger., *Ausdrücken* (1st def.), *Herausdrängen* (1st def.), *Ausdruck* (2d def.). 1. A squeezing out (as of a juice, of the fœtus or placenta from the uterus, etc.). 2. The recognizable manifestation of a condition (physical, bodily, mental, or emotional). [A, 301.]—**Credé's method of e.** Fr., *méthode d'e. de Credé.* See *E. of the placenta.*—**E. of the fœtus.** Fr., *e. artificielle du fœtus, e. utérine.* Ger., *Kristeller'sche E'smethode.* A method of hastening the expulsion of the fœtus during labor by rubbing, squeezing, and pressing upon the uterus. With the woman lying on her back, the obstetrician tries to displace any coils of intestine that may lie in front of the uterus; then he grasps the fundus in both hands, with the thumbs in front and the rest of the hands behind. Gentle friction is practised at first, increasing its force and directing it from above downward. This is continued from five to eight seconds, diminishing gradually, after the manner of the natural contractions. After an interval, varying from half a minute to three minutes, the manipulation is renewed, a fresh portion of the uterus being seized; and this is repeated ten, twenty, or forty times if necessary. [Kristeller, "Berl. klin. Woch.," 1867, No. 6; A, 24.]—**E. of the placenta.** Lat., *expressio placentæ.* Fr., *délivrance par e.* Ger., *Credé'scher Handgriff, Herausdrängen der Placenta.* The procedure of pressing out the placenta from the uterus after the expulsion of the fœtus. The uterus is grasped between the two hands, and they are forced together slowly and equably, so as to stimulate and aid uterine contraction.—**Placental e.** See *E. of the placenta.*—**Rectal e.** A method of hastening the birth of the fœtal head by pressing forward upon it with two fingers inserted into the rectum and hooked into the mouth or under the chin. [A, 22.]—**Uterine e.** Fr., *e. utérine.* See *E. of the fœtus.*—**Vesical e.** A procedure proposed by J. Heddaeus for retention of urine where there is no mechanical impediment. With the femoral muscles relaxed, the bladder is grasped with both outspread hands through the abdominal wall, and gentle and steady compression made in the direction of its neck. ["Berlin. klin. Woch."; "Dtsch. Med.-Ztg."; "N. Y. Med. Jour.," Feb. 23, 1889, p. 211.]

EXPUITION, n. E^{2}x-pu^2-i^{2}sh'u^{3}n. See Exspuition.

EXPULSION, n. E^{2}x-pu^{3}l'shu^{3}n. Gr., Lat., *expulsio* (from *expellere*, to expel). Fr., *e.* Ger., *Ausstossung.* It., *espulsione.* Sp., *expulsión.* The process by which anything is expelled; as used by some old French writers, an abortion at a later period of gestation than that denoted by *écoulement* and *effluxion* (q. v.). [A, 44.]—**Spontaneous e.** In obstetrics, the e. of the fœtus in an abnormal attitude (as when it is doubled upon itself by uterine contraction in a transverse presentation). Cf. *Spontaneous* evolution and *Spontaneous* version.

EXPULSIVE, adj. E^{2}x-pu^{3}l'si^{2}v. Lat., *expellens.* Fr., *expulsif.* Ger., *austreibend.* Causing expulsion; in obstetrics, serving to expel the uterine contents (said of the pains of labor); in pharmacology, diaphoretic. [L, 107.]

EXPULSORIUM (Lat.), n. n. E^{2}x-pu^{3}l(pu^{4}l)-so'ri^2-u^{3}m(u^{4}m). An expulsive agent or channel. [L.]—**E. seminis.** See Vas *deferens.*

EXPULTEUR (Fr.), adj. E^{2}x-pu^{6}l-tu^{3}r. Expulsive. [A, 301.]

EXPULTRIX (Lat.), n., f. of adj. *expultor* (*vis* understood). E^{2}x-pu^{3}l(pu^{4}l)'tri^{2}x. Gen., *expultric'is.* Fr., *expultrice.* Ger., *Treibkraft.* Expulsive force. [A, 322.]

EXPURGANS (Lat.), adj. E^{2}x-pu^{3}rg(pu^{4}rg)'a^{2}nz(a^{3}ns). Gen., *expurgant'is.* Fr., *expurgant.* Serving to facilitate the discharge of excrementitious matter. [L, 49.]

EXPURGATION, n. E^{2}x-pu^{2}r-ga'shu^{3}n. Fr., *e.* See Purgation.

EXRUPÉAL (Fr.), n. E^{2}x-ru^6-pa-a^{3}l. The squamosal bone in fishes. [L, 207.]

EXSANGUINATED, adj. E^{2}x-sa^{2}n^2'gwi^{2}n-at-e^{2}d. See Exsanguine.

EXSANGUINATION, n. E^{2}x-sa^{2}n^2-gwi^{2}n-a'shu^{3}n. From *ex*, out, and *sanguis*, blood. Deprivation of blood (as in the process of squeezing the blood from a limb toward the trunk by bandaging).

EXSANGUINE, EXSANGUINEOUS, adj's. E^{2}x-sa^{2}n^2'-gwi^{2}n, -sa^{2}n^2-gwi^{2}n'e^2-u^{3}s. Fr., *exsangue.* Ger., *blutarm.* Deprived of or destitute of blood.

EXSANGUINITY, n. E^{2}x-sa^{2}n^2-gwi^{2}n'i^{2}t-i^2. Lat., *exsanguinitas.* Fr., *exsanguinité.* The state of being exsanguine.

EXSANGUINOUS, EXSANGUIOUS, adj's. E^{2}x-sa^{2}n^2'gwi^{2}n-u^{3}s, -gwi^2-u^{3}s. See Exsanguine.

EXSARCOMA (Lat.), n. n. E^{2}x-sa^{3}rk-o'ma. Gen., *exsarcom'atos (-is).* See Sarcoma.

EXSCREATIO (Lat.), n. f. E^{2}x-skre(skre^2)-a(a^3)'shi^2(ti^2)-o. Gen., *exscreatio'nis.* Fr., *exscréation, crachement.* Ger., *Räuspern.* The act of spitting out mucus, etc., from the mouth and the upper air-passages. [L, 49.]

EXSCULPTUS (Lat.), adj. E^{2}x-sku^{3}lp(sku^{4}lp)'tu^{3}s(tu^{4}s). From *exsculpere*, to dig out. Ger., *ausgegraben, ausgestochen.* Scrobiculate, but with very regularly formed hollows. [B. 123, 198 (*a*, 24).]

EXSCUTELLATE, adj. E^{2}x-sku^2-te^{2}l'at. Lat., *exscutellatus* (from *ex*, priv., and *scutellum* [*q. v.*]). Fr., *exscutellé.* Of an insect, having no scutellum. [L, 180.]

EXSECTION (Lat.), n. f. E^{2}x-se^{2}k'shu^{3}n. From *ex*, out, and *secare*, to cut. The cutting out of a part. [E.] Cf. Excision and Resection.

EXSERTED, adj. E^{2}x-su^{6}rt'e^{2}d. Lat., *exsertus.* Fr., *exsert.* Ger., *hervortretend, hervorstehend.* Projecting beyond the orifice of an organ (said of stamens larger than the corolla). [B, 19, 121, 123 (*a*, 24).]

EXSERTILE (Fr.), adj. E^{2}x-se^{2}r-tel. See Protractile.

EXSERTION, n. E^{2}x-su^{3}r'shu^{3}n. Lat., *exsertio* (from *exserere*, to protrude). Fr., *e.* Of De Candolle, see Insertion.

EXSERTOR (Lat.), n. m. E^{2}x-su^{6}rt(se^{2}rt)'or. Gen., *exserto'ris.* A muscle serving to protrude a part. [L.]—**E. linguæ.** See Genio-*glossus.*

EXSICCATION, n. E^{2}x-si^{2}k-a'shu^{3}n. See Desiccation.

EXSICCATIVE, adj. E^{2}x'si^{2}k-a-ti^{2}v. See Desiccant.

EXSICCATOR (Lat.), n. m. E^{2}x-si^{2}k-kat(ka^{3}t)'o^{2}r; in Eng., e^{2}x'si^{2}k-at-o^{2}r. See Desiccator.

EXSPIRATIO (Lat.), n. f. E^{2}x-spi^{2}r-a(a^3)'shi^2(ti^2)-o. Gen., *exspiratio'nis.* See Expiration.

EXSPIRATOR (Lat.), n. m. E^{2}x-spi^{2}r-at(a^{3}t)'o^{2}r; in Eng., e^{2}x'spi^{2}r-at-o^{2}r. A large flask with a stop-cock devised by Vierordt to receive expired air for analysis. [J, 53.]

EXSPUITION, n. E^{2}x-spu^2-i^{2}sh'u^{3}n. Lat., *exspuitio* (from *ex*, out, and *spuere*, to spit). Fr., *exspuition.* The act of spitting. [A, 301.]

EXSTASIS (Lat.), n. f. E^{2}x'sta^{2}s(sta^{3}s)-i^{2}s. Gen., *exstas'eos (ex'stasis).* See Ecstasy.

EXSTILLATION, n. E^{2}x-sti^{2}l-a'shu^{3}n. See Distillation.

EXSTINCTIO (Lat.), n. f. E^{2}x-sti^{2}n^{2}k'shi^2(ti^2)-o. Gen., *exstinctio'nis.* See Extinction.

EXSTIPULACEOUS, EXSTIPULAR, EXSTIPULATE, adj's. E^{2}x-sti^{2}p-u^{2}l-a'shu^{3}s, -sti^{2}p'u^{2}l-a^{2}r, -at. Lat., *exstipulaceus, exstipulatus* (from *ex*, priv., and *stipula*, a stipule). Fr., *exstipulacé, exstipulé.* Ger., *nebenblattlos, afterblattlos.* Destitute of stipules. [B, 1, 123 (*a*, 24).]

EXSTIRPATIO (Lat.), n. f. E^{2}x-sti^{2}r-pa(pa^3)'shi^2(ti^2)-o. Gen., *exstirpatio'nis.* See Extirpation.

EXSTROPHY, n. E^{2}x'stro-fi^2. Lat., *exstrophia* (from ἐξ, outward, and στροφή, a turning). Fr., *exstrophie, renversement* (1st def.). Ger., *Exstrophie.* 1. That state of a hollow organ in which it is turned inside out. 2. A malformation in which the interior of a hollow organ (*e. g.*, the bladder) is exposed by a defect of the abdominal wall. 3. Of the eyelid, see Ectropion.

EXSUCCATIO (Lat.), n. f. E^{2}x-su^{3}k(su^{4}k)-ka(ka^3)'shi^2(ti^2)-o. Gen., *exsuccation'is.* From *ex*, and *succus*, juice. See Ecchymoma and Ecchymosis.

EXSUCCOUS, adj. E^{2}x-su^{3}k'u^{3}s. Lat., *exsuccus* (from *ex*, priv., and *succus*, juice). Ger., *saftlos, saftleer.* Without juice. [B, 19, 123 (*a*, 24).]

EXSUCTION, n. E^{2}x-su^{3}k'shu^{3}n. From *exsugere*, to suck out. Fr., *exsuccion.* Ger., *Aussaugung.* A sucking out (as of poison from a wound). [A, 385.]

EXSUDAT (Ger.), n. E^{2}x-su-da^{3}t'. See EXUDATE.

EXSUDATIO (Lat.), n. f. E^{2}x-su^{2}d(sud)-a(a^3)'shi^2(ti^2)-o. Gen., *exsudation'is.* 1. Sweating. 2. See EXUDATION. [A, 322.]

EXSUDATORIUS (Lat.), adj. E^{2}x-su^{2}d(sud)-a^{2}t(a^{3}t)-o'ri^2-u^{3}s-(u^{4}s). See EXUDATIVE.

EXSUFFLATIO (Lat.), n. f. E^{2}x-su^{3}f(su^{4}f)-fla(fla^3)'shi^2(ti^2)-o. Gen., *exsufflation'is.* Forcible expiration. [A, 322.]

EXTA (Lat.), n. n. pl. E^{2}x'ta^3. The viscera. [A, 322.]

EXTASE (Fr.), n. E^{2}x-ta^{3}z. See ECSTASY.

EXTEMPORANEOUS, adj. E^{2}x-te^{2}m-po-ran'e-u^{3}s. From *ex*, without, and *tempus*, time. Fr., *extemporané.* Ger., *unvorbereitet.* Of a prescription, devised for the occasion, and not according to a standing formula. [L, 41, 43.]

EXTENDED, adj. E^{2}x-te^{2}nd-e^{2}d. Lat., *extensus.* Fr., *étendu.* Ger., *augestreckt.* Held at full length (said of the limbs).

EXTENSEUR (Fr.), n. E^{2}x-ta^{3}n^2-su^{5}r. See EXTENSOR.—**Court e. de l'avant bras.** See HUMERO-OLECRANIUS *externus.*—**Court e. des orteils.** See EXTENSOR *digitorum pedis brevis.*—**Court e. du pouce.** See EXTENSOR *pollicis brevis.*—**E. antérieur du métacarpe.** See EXTENSOR *metacarpi magnus.*—**E. antérieur des phalanges.** See EPICONDYLO-PRÆPHALANGEUS.—**E. commun des doigts.** See EXTENSOR *digitorum manus communis.*—**E. commun des orteils.** See EXTENSOR *digitorum pedis longus.*—**E. court des orteils.** See EXTENSOR *digitorum pedis brevis.* [*a*, 29.]—**E. court du pouce.** See EXTENSOR *pollicis brevis.*—**E. de la jambe.** See EXTENSOR *quadriceps femoris.*—**E. de l'avant bras.** See *Triceps* EXTENSOR *cubiti.*—**E. du coccyx.** See EXTENSOR *coccygis.*—**E. du pied.** See EXTENSOR *pedis.*—**E. du pouce court.** See EXTENSOR *pollicis brevis.*—**E. du pouce long.** See EXTENSOR *pollicis longus.*—**E. latéral des phalanges.** See CUBITO-PRÆPHALANGEUS.—**E. long des orteils.** See EXTENSOR *digitorum pedis longus.*—**E. oblique du métacarpe.** See EXTENSOR *metacarpi obliquus.*—**E. propre de l'index.** See EXTENSOR *indicis.*—**E. propre du doigt index.** See EXTENSOR *indicis.*—**E. propre du gros orteil.** See EXTENSOR *hallucis longus.*—**E. propre du petit doigt.** See EXTENSOR *minimi digiti.*—**Gros e. de l'avant bras.** See SCAPULO-OLECRANIUS *major.*—**Long e. du pouce.** See EXTENSOR *pollicis longus.*—**Moyen e. de l'avant bras.** See HUMERO-OLECRANIUS *internus.*—**Petit e. de l'avant bras.** See HUMERO-OLEOCRANIUS *minor.*—**Petit e. des orteils.** See EXTENSOR *digitorum pedis brevis.*

EXTENSIBILITY, n. E^{2}x-te^{2}ns'i^2-bi^{2}l'i^{2}t-i^2. Fr., *extensibilité.* Ger., *Ausdehnbarkeit.* Capability of being extended. [B, 121 (*a*, 24).]

EXTENSIBLE, EXTENSILE, adj's. E^{2}x-te^{2}ns'i^2-b'l, -i^{2}l. Capable of extension.

EXTENSIO (Lat.), n. f. E^{2}x-te^{2}ns(tans)'i^2-o. Gen., *extension'is.* See TETANUS and EXTENSION.

EXTENSION, n. E^{2}x-te^{2}n'shu^{3}n. Gr., ἔκτασις. Lat., *extensio* (from *extendere*, to stretch out). Fr., *e.* Ger., *Ausdehnung.* It., *estensione.* Sp., *extensión.* A straightening (as of the limbs). 2. A stretching (as of a limb for reducing a fracture or dislocation). See *E.* APPARATUS. 3. In the *Arthropoda*, a bending dorsad. [C, 3 ; L, 322.]—**Counter-e.** See the major list.—**Elastic e.** E. (2d def.) by means of a weight and pulley or by the interposition of a piece of elastic material in some other form of e. apparatus.—**E. of the fœtal head.** A backward inclination of the head, by which the chin is thrown away from the sternum.—**Kontrae'** (Ger.). See COUNTER-EXTENSION.

EXTENSOR (Lat.), n. m. E^{2}x-te^{2}n(tan)'sor. Gen., *extenso'ris.* Fr., *extenseur.* Ger., *Strecker.* A muscle that acts to extend a part. [C.]—**Anterior e. of the phalanges.** See FEMORO-PRÆPHALANGEUS and EPICONDYLO-PRÆPHALANGEUS.—**Anterior e. of the radius.** See *E. metacarpi magnus.*—**Common e. of the fingers.** See *E. digitorum manus communis.*—**Digitorum e. primus.** See *E. communis digitorum.*—**E. annularis.** An anomalous e. of the ring finger. [L.]—**E. antibrachii.** See *Triceps e. cubiti.*—**E. brevi-radialis** [E. Coues]. See *E. carpi radialis brevior.*—**E. brevis digiti quinti.** See PERONEUS.—**E. brevis digitorum manus.** See *E. digitorum manus brevis.*—**E. brevis digitorum pedis.** See *E. digitorum pedis brevis.*—**E. carpi intermedius.** An anomalous bundle of fibres extending between the e. carpi radialis brevis and the e. carpi radialis longus. [L, 332.]—**E. carpi radialis accessorius.** An anomalous muscle which arises in common with the e. digitorum communis, or is given off from it, and is inserted into the metacarpal bone of the thumb or into the trapezium. [L, 332.]—**E. carpi radialis brevior** (seu **brevis**). Ger., *kurzer äusserer Speichenmuskel.* A muscle which arises from the external condyle of the humerus, the antibrachial fascia, the septa between it and the adjacent muscles, and the external lateral ligament of the elbow joint. In the middle of the forearm its muscular fibres terminate in a flat tendon which is closely connected with that of the e. carpi radialis longus, in company with which it passes through the annular ligament, and is inserted into the base of the metacarpal bone of the middle finger. It is an e. of the wrist and of the forearm upon the arm. [L, 31, 142, 172, 332.]—**E. carpi radialis intermedius.** See *E. carpi intermedius.*—**E. carpi radialis longior** (seu **longus**). Ger., *langer äusserer Speichenmuskel.* A flat, long muscle which arises from the lower portion of the external condyloid ridge of the humerus, the external condyle, and the external intermuscular septum. It becomes tendinous about the middle of the forearm, its tendon passing down in company with that of the e. carpi radialis brevis along the outer side of the radius to the annular ligament, through which it passes and is inserted into the radial side of the base of the metacarpal bone of the index finger. Its action is the same as that of the e. carpi radialis brevis. [L, 31, 142, 172, 332.]—**E. carpi ulnaris.** Ger., *äusserer Ellenbogenmuskel, Ellenbogenstrecker der Hand.* A muscle which arises from the external condyle of the humerus, the intermuscular septa, the capsular ligament of the elbow joint, the middle third of the posterior border of the ulna, and the antibrachial fascia. It is the most internal of the muscles on the ulnar side of the back of the forearm, it becomes tendinous shortly above the annular ligament, through which it passes in a separate compartment, and is inserted into the tuberosity upon the base of the metacarpal bone of the little finger. It has the same action as the E. carpi ulnaris brevis. [L, 31, 142, 172, 332.]—**E. coccygis.** See LEVATOR *coccygis.*—**E. communis digitorum.** See *E. digitorum communis.*—**E. communis digitorum brevis.** See *E. digitorum pedis brevis.*—**E. communis digitorum manus.** See *E. digitorum communis.*—**E. communis digitorum pedis.** See *E. digitorum pedis longus.*—**E. communis indicis et medii.** An anomalous e. inserted into the first and middle fingers ; or the e. digitorum manus communis when the tendons to the ring and little fingers are lacking. [L, 332.]—**E. communis indicis medii et annularis.** The e. digitorum manus communis when the tendon to the little finger is lacking. [L, 332.]—**E. communis longus digitorum pedis.** See *E. digitorum pedis longus.*—**E. communis pollicis et indicis.** See *E. pollicis indicisque.*—**E. cruris.** See *E. quadriceps femoris.*—**E. cruris externus.** See VASTUS *externus.*—**E. cruris medialis superficialis** [Meckel]. See RECTUS *femoris.*—**E. cruris quadriceps.** Ger., *vierköpfiger Unterschenkelstrecker.* A collective term for the rectus femoris, vastus medius (Cravæus), vastus internus, vastus externus, and subcruræus muscles regarded as one muscle. [L.]—**E. cruris vastus.** See VASTUS *externus.*—**E. cubiti.** The triceps e. cubiti. [L.]—**E. cubiti longus.** See ANCONÆUS *longus.*—**E. digiti medii manus proprius.** A rare e. muscle of the middle finger observed by Müller and Hartmann. [L.]—**E. digiti minimi proprius.** Fr., *extenseur propre du petit doigt.* Ger., *eigener Strecker des kleinen Fingers.* A long, spindle-shaped muscle which arises from the external condyle of the humerus by a tendon common to it and the e. digitorum communis, between which and the e. carpi ulnaris it is placed. Its tendon passes through a separate compartment in the annular ligament, behind the inferior radio-ulnar articulation, and upon the back of the hand divides into two portions, the outermost of which is blended with the fourth tendon of the e. digitorum communis. The two portions expand into a broad aponeurosis, upon the dorsum of the little finger, which is inserted into the second and third phalanges in the same manner as the tendons of the e. digitorum communis. It is an e. of the little finger, and of the wrist upon the forearm. The number of tendons which are given off is uncertain. [L, 31, 142, 172, 332.]—**E. digiti quinti brevis.** See PERONEUS.—**E. digitorum** [E. Coues]. See *E. digitorum pedis longus.*—**E. digitorum brevis.** See *E. digitorum pedis brevis.*—**E. digitorum communis.** See *E. digitorum manus communis.* [L, 135.]—**E. digitorum communis brevis.** See *E. digitorum pedis brevis.*—**E. digitorum communis longus.** See *E. digitorum pedis longus.*—**E. digitorum manus communis.** Fr., *extenseur commun des doigts.* Ger., *gemeinschaftlicher Fingerstrecker.* A long, flattish, round muscle which arises in a point from the external condyle of the humerus, the deep fascia and the adjacent intermuscular septa, and in the middle of the dorsum of the forearm divides into four bellies which become tendinous in the lower third of the forearm. The tendons pass through a compartment of the annular ligament on the back of the radius, and upon the carpus diverge to reach the index, middle, ring, and little fingers. Opposite each metacarpophalangeal articulation a thin slip is given off from each side. These form the posterior ligament of the joint, and are re-enforced by fasciculi from the lumbricales and interossei muscles, which make a fibrous expansion upon the dorsal surfaces of the first phalanges. The tendon divides into three slips, the middle one being inserted into the base of the second phalanx, the two lateral ones being continued along the sides of the second phalanx to unite into one tendon which is inserted upon the dorsum of the distal phalanx. The tendons of the index and little fingers are joined by those of their special e's before their division. Upon the dorsum of the hand the tendons are united to each other by cross-slips, that between the index and middle fingers being loose, while those on each side of the ring finger are more closely united, so that any great degree of independent motion of the middle or ring finger is prohibited. [L, 31, 142, 172, 332.]—**E. digitorum pedis.** Ger., *Streckmuskel der Zehen.* See *E. digitorum longus pedis.*—**E. digitorum pedis brevis.** Fr., *extenseur court des orteils.* A muscle which arises from the outer side of the os calcis, the anterior annular, and the calcaneo-astragaloid ligaments and terminates in four tendons, the innermost of which is inserted into the first phalanx of the great toe, and the others into the outer sides of the tendons of the e. digitorum longus, going to the second, third, and fourth toes. [L, 31, 142, 332.] Cf. *E. hallucis brevis.*—**E. digitorum pedis longus.** Fr., *long extenseur des orteils.* Ger., *gemeinschaftlicher langer Zehenstrecker.* A long, flat muscle which arises from the external tuberosity of the tibia, the head and upper three fourths of the anterior surface of the fibula, the septa between itself and the adjacent muscles, the upper portion of the interosseous membrane, and the deep fascia. It divides into a varying number of tendons (three, four, or five) either just above the annular ligament or upon the dorsum of the foot, which, after subdividing into four tendons when the original number is less than four, are inserted into the second and third phalanges of the four outer toes. The fifth tendon, when it exists, is inserted upon the dorsal surface of the fifth metatarsal bone. The tendons become expanded over the first phalanges, being joined by tendinous processes from the lumbricales and interossei muscles, and divide into three portions, the central ones being inserted into the bases of the second phalanges, and the lateral ones, after uniting into one, into the bases

of the third phalanges. The three inner tendons are each joined on the outer side by a tendon from the e. digitorum brevis. It extends the phalanges, and, after extension is executed, flexes the torsus upon the leg. [L, 31, 142, 172, 332.]—**E. digitorum primus.** See *E. digitorum manus communis.*—**E. dorsi communis.** See ERECTOR *spinæ.*—**E. hallucis** [E. Coues]. See *E. hallucis longus.*—**E. hallucis brevis.** Fr., *court extenseur du gros orteil* [Testut.] Ger., *kurzer Strecker der grossen Zehe.* The tendon of the e. digitorum pedis brevis which is inserted into the first phalanx of the great toe. [L, 31.]—**E. hallucis longus.** Fr., *long extenseur du gros orteil.* Ger., *langer Strecker der grossen Zehe.* A thin, flat muscle which arises from the middle two fourths of the anterior surface of the fibula and the corresponding portion of the interosseous membrane. Its tendon passes through a separate compartment in the annular ligament and along the dorsum of the foot, to be inserted into the base of the last phalanx of the great toe. Opposite the metatarso-phalangeal articulation it gives off a broad process on each side, which covers the surface of the joint. [L, 31, 142, 172, 332.]—**E. hallucis longus accessorius.** See *E. primi internodii hallucis longus.*—**E. hallucis minor.** See *E. primi internodii hallucis longus.*—**E. hallucis proprius.** See *E. hallucis longus.*—**E. indicis** (**proprius**). Fr., *extenseur propre de l'index.* Ger., *eigener Strecker des Zeigefingers.* Syn.: *indicator, abductor indicis.* A long, thin, and flat muscle which arises from the posterior surface of the ulna, just below the origin of the e. secundi internodii follicis, and from the lower part of the interosseous muscle. Its tendon passes through the annular ligament in common with those of the e. digitorum communis, and unites with the tendon of that muscle destined for the index finger at a point about opposite the lower end of the corresponding metacarpal bone. [L, 31, 142, 172, 332.]—**E. longi-radialis** [E. Coues]. See *E. carpi radialis longior.*—**E. longus digitorum pedis.** See *E. digitorum pedis longus.*—**E. longus hallucis.** See *E. hallucis longus.*—**E. longus hallucis tricaudatus.** See *E. ossis metacarpi pollicis.*—**E. longus pollicis.** See *E. pollicis longus.*—**E. longus pollicis pedis.** See *E. hallucis longus.*—**E. magnus.** See GASTROCNEMIUS.—**E. major pollicis manus.** *E. pollicis longus.*—**E. manus radialis brevis.** See *E. carpi radialis brevis.*—**E. manus radialis longus.** See *E. carpi radialis longus.*—**E. manus ulnaris.** See *E. carpi ulnaris.*—**E. medii digiti.** An anomalous muscle which arises from the lower posterior portion of the ulna, or from the annular ligament, and is united with the tendon of the e. digitorum communis of the middle finger, or with an anomalous tendon given off from the e. indicis. [L, 142.]—**E. metacarpi magnus.** Fr., *extenseur antérieur du métacarpe, épicondylo-prémétacarpien.* Ger., *Armschienbeinmuskel, langer* (oder *gerader*) *Schienbeinstrecker, Strecker des Schienbeins.* A muscle of the solipeds which represents the e. carpi radialis brevior and the e. carpi radialis longior of man. [L, 13.]—**E. metacarpi obliquus** (**seu parvus**). Fr., *cubito-* (ou *radio-*) *prémétacarpien, extenseur oblique du métacarpe.* Ger., *Vorarmschienbeinmuskel, Strecker des Vorderfussmuskels* (oder *des Knies*), *kurzer* (oder *gewundener*) *Schienbeinstrecker, schiefer Abzieher* (oder *Strecker*) *des Vorderknies.* The analogue of the e. ossis metacarpi pollicis and the e. pollicis brevis of man, found in lower mammals. [L.]—**E. meta-pollicis** [E. Coues]. See *E. ossis metacarpi pollicis.*—**E. minimi digiti.** See *E. digiti minimi.*—**E. minor pollicis manus** [Albinus]. See *E. pollicis brevis.*—**E. ossis metacarpi pollicis.** Fr., *cubito-sus-métacarpien du pouce.* Ger., *grosser* (oder *langer*) *Daumenstrecker.* Syn.: *abductor longus pollicis.* A long, flat muscle which arises from the posterior surface of the shaft of the ulna, between the insertion of the anconæus muscle and the e. secundi internodii pollicis, the middle third of the posterior surface of the radius and the interosseous membrane, and after becoming tendinous, passes, together with the tendon of the e. primi internodii pollicis, through a groove on the outer side of the lower extremity of the radius to be inserted into the base of the metacarpal bone of the thumb. [L, 31, 142, 332.]—**E. ossis metatarsi hallucis.** An anomalous muscle given off from the tibialis anticus, the e. digitorum communis, the e. hallucis proprius, or arising close to the latter, and inserted into the metatarsal bone of the great toe. [L, 142.]—**E. parvus antibrachii.** See ANCONÆUS (3d def.).—**E. pedis.** Fr., *extenseur du pied.* The gastrocnemius and solæus muscles regarded as one. [a, 29.]—**E. pedis digitorum brevis.** See *E. digitorum pedis brevis.*—**E. pedis minor** [Douglas]. See PLANTARIS.—**E. pollicis brevis.** Fr., *court extenseur du pouce.* Ger., *kurzer Daumenstrecker.* 1. A small, flat muscle which arises from the interosseous ligament and a portion of the posterior surface of the lower part of the radius and becomes tendinous close to the upper border of the annular ligament. Its tendon accompanies that of the e. ossis metacarpi pollicis through the annular ligament, and is inserted into the posterior surface of the proximal phalanx of the thumb. [L, 31, 142, 332.] 2. See *E. digitorum pedis brevis.*—**E. pollicis indicisque.** The e. pollicis longus when, as is often the case, it sends a tendon to the index finger. [L, 332.]—**E. pollicis longus** (**seu major**). Fr., *long extenseur* (ou *cubito-sus-phalangettien*) *du pouce.* Ger., *langer Daumenstrecker.* A muscle which arises from the posterior aspect of about the middle third of the ulna and the interosseous membrane. Its tendon passes through a separate compartment in the annular ligament, lying in a groove upon the posterior surface of the lower end of the radius, and is inserted into the base of the distal phalanx of the thumb. It extends and abducts the thumb. [L, 31, 142, 332.]—**E. pollicis minor.** See *E. pollicis brevis.*—**E. pollicis primus.** See *E. primus pollicis.*—**E. pollicis secundus** [Winslow]. See *E. pollicis longus.*—**E. primi internodii.** See *E. pollicis brevis* (1st def.) and *E. ossis metacarpi pollicis.*—**E. primi internodii hallucis** (**longus**). An anomalous bundle of fibres given off from the e. hallucis longus, and inserted into the metacarpal bone of the great toe, or into its proximal phalanx, or into the tendon of the e. hallucis brevis. [L, 31, 142.]—**E. primi internodii pollicis.** See *E. primi internodii.*—**E. primi pollicis.** See *E. ossis metacarpi pollicis.*—**E. primus pollicis** [Winslow]. See *E. carpi ulnaris.*—**Lateral e. of the phalanges.** See CUBITO-PRÆPHALANGEUS.—**Long e. of the forearm.** See SCAPULO-OLECRANIUS.—**Magnus e. digitorum.** See *E. digitorum manus communis.*—**Oblique e. of the metacarpus.** See *E. metacarpi obliquus.*—**Quadriceps e. cruris.** See *E. cruris quadriceps.*—**Short e. of the forearm.** See HUMERO-OLECRANIUS *externus.*—**Short e. of the toes.** See *E. digitorum pedis brevis.*—**Small e. of the forearm.** See HUMERO-OLECRANIUS *minor.*—**Triceps e. cubiti.** Ger., *Dreiköpfiger Armmuskel, Vorderarmstrecker.* A muscle arising by three heads or portions, which occupies nearly the whole of the posterior portion of the arm. Its long or middle head (the anconæus longus) arises as a flat tendon from the infra-glenoid tubercle and contiguous portions of the axillary border of the scapula, its external head (the anconæus brevis) is fleshy and tendinous and arises from the upper and outer part of the posterior surface of the humerus between the insertion of the teres minor and the groove for the musculo-spiral nerve, and from the external intermuscular septum, where it forms an arch over the upper portion of the groove, and its internal or deep head (the anconæus internus) arises from the posterior surface of the humerus, between the groove for the musculo-spiral nerve and a point about an inch above the trochlear surface and the internal and external intermuscular septa. It is inserted into the back part of the upper surface of the olecranon by the common tendon which commences at about the middle of the arm as two aponeurotic layers, the one subcutaneous and the other situated in the substance of the muscle. The muscular fibres of the different heads are inserted into these layers, which unite just above the olecranon to form a single tendon. It extends the forearm upon the arm and renders the fascia of the forearm tense. [L, 31, 142, 172, 332.]

EXTENUATIO (Lat.), n. f. E^{2}x-te^{2}n-u^2(u)-a(a^3)'shi^2(ti^2)-o. Gen., *extenuation'is.* From *extenuare*, to make thin. Fr., *exténuation.* Ger., *Verdünnung, Abmagerung.* See EMACIATION.

EXTERGENT, adj. E^{2}x-tu^{5}rj'e^{2}nt. Lat., *extergens.* See DETERGENT.

EXTERIOR, adj. E^{2}x-te'ri^2-o^{2}r. Lat., *e.* Fr., *extérieur.* Ger., *äusserlich.* See EXTERNAL.

EXTERIORATION, n. E^{2}x-te-ri^2-o^{2}r-a'shu^{3}n. Fr., *extérioration.* 1. The mental faculty by which the image of an object seen is referred to the actual situation of the object. [A, 301.] 2. (Fr., *extérioration des amputés.*) The physiological process by which a painful impression on a nerve coming from a stump is referred to the amputated part. [A, 385.]

EXTERIORITY, n. E^{2}x-te-ri^2-o^{2}r'i^2-ti^2. Fr., *extériorité.* The mental perception resulting from exterioration (1st def.). [A, 385.]

EXTERN, adj. E^{2}x'tu^{2}rn. Treated as an out-patient. [Simpson, "Edinb. Med. Jour.," May, 1882.]

EXTERNA (Lat.), n., f. of adj. *externus* (*tunica* understood). E^{2}x-tu^{5}rn(te^{2}rn)'a^3. An external tunic. [L.]—**E. oculi.** See SCLERA.

EXTERNAL, adj. E^{2}x-tu^{5}rn'a^{2}l. Lat., *externus.* Fr., *externe.* Ger., *äusserlich.* Situated on the outside or on the outer side. [a, 24.]

EXTERNALITY, n. E^{2}x-tu^{5}rn-a^{2}l'i^{2}t-i^2. The state of being external. [B, 100.]

EXTERNAT (Fr.), n. E^{2}x-te^{2}r-na^3. In the French hospitals, the office of an *externe.* [A, 385.]

EXTERNE (Fr.), adj. E^{2}x-te^{2}rn. See EXTERNAL; as a n. m., in the French hospitals, a medical student who, after an examination, is appointed to serve under an *interne.* [A, 385.]

EXTERNO-MARGINAL, adj. E^{2}x-tu^{5}rn"o-ma^{3}rj'i^{2}n-a^{2}l. A more correct term for *ectomarginal* (*q. v.*). ["Proc. of the Zool. Soc.," 1878, p. 965 (L).]

EXTERNO-MEDIAL, adj. E^{2}x-tu^{5}rn"o-med'i^2-a^{2}l. Lat., *externo-medialis.* Fr., *externo-médial.* Situated between the median and external veins (said of a vein in an insect's wing). [L, 196.]

EXTERNO-MEDIALIS (Lat.), adj. E^{2}x-tu^{5}rn(te^{2}rn)"o(o^2)-med(me^{2}d)-i^2-a(a^2)'li^{2}s. See EXTERNO-MEDIAL; as a n., of Kirby, the third principal nerve of the wing of insects. [L, 180.].

EXTERNUS (Lat.), adj. E^{2}x-tu^{5}rn(te^{2}rn)'u^{2}s(u^{4}s). Fr., *externe.* Ger., *äusserlich.* See EXTERNAL; as a n., a muscle situated externally to another muscle.—**E. auris, E. mallei.** See LAXATOR *tympani.*

EXTESTICULATUS (Lat.), adj. E^{2}x-te^{2}st-i^{2}k-u^2(u^4)-lat(la^{3}t)'u^{2}s(u^{4}s). From *ex*, priv., and *testis*, the testicle. Castrated. [E.]

EXTINCTILIFORMIS (Lat.), adj. E^{2}x-ti^{2}n^{2}k-ti^{2}l(tel)-i^2-fo^{2}rm'-i^{2}s. From *extinguere*, to extinguish, and *forma*, form. Ger., *lichtlöscherförmig*. Having the form of an extinguisher. [B, 123 (a, 24).]

EXTINCTION, n. E^{2}x-ti^{2}n^{2}k'shu^{3}n. Lat., *extinctio* (from *extinguere*, to extinguish). 1. The eradication or destruction of anything. [A, 326 (a, 21).] 2. The act or process of extinguishing mercury by reducing it by trituration with a powder or a fatty substance to such a fine state of subdivision that the globules are no longer visible to the naked eye and have no tendency to run together. [B.] 3. Of lime, the process of slaking. [A, 385.] 4. The state or condition of being extinguished.

EXTINE, n. E^{2}x'ten. Fr., *exine*, *exhyménine*. The outer coat of a pollen grain. [B, 77, 291 (a, 24).]

EXTIRPATION, n. E^{2}x-tu^{5}r-pa'shu^{3}n. Lat., *exstirpatio* (from *exstirpare*, to root out). Ger., *Exstirpation*. It., *estirpazione*, *esportazione*. Sp., *arrancamiento*, *extirpación*. The complete removal of a part. [E.] See also ABSCISSION and EXCISION.

EXTOZOA (Lat.), **EXTOZOARIA** (Lat.), n's n. pl. E^{2}x-to-(to^3)-zo'a^3-zo-a(a^3)'ri^2-a^3. From ἐξ, without, and ζῷον, an animal. Fr., *extozoaires*. See ECTOZOA.

EXTRA-AMNIOTIC, adj. E^{2}x-tra^3-a^{2}m-ni^2-o^{2}t'i^{2}k. Outside the amnion; between the amnion and the chorion. [J.]

EXTRA-AXILLARY, adj. E^{2}x''tra^3-a^{2}x'i^{2}l-a-ri^2. Lat., *extra-axillaris* (from *extra*, without, and *axilla* [*q. v.*]). Fr., *extra-axillaire*. Ger., *ausserwinkelständig*. Springing beyond or above the *axils* (said of flowers, buds, etc.).

EXTRABRANCHIAL, adj. E^{2}x''tra^3-bra^{2}n^{2}k'i^2-a^{2}l. From *extra*, without, and βράγχια, the gills. Situated external to the branchiæ. [L, 294.]

EXTRACALICULAR, adj. E^{2}x''tra^3-ka^{2}l-i^{2}k'u^2-la^{3}r. Situated external to the calix. ["Proc. of the Zool. Soc.," 1883, p. 407 (L).]

EXTRACAPSULAR, adj. E^{2}x''tra^3-ka^{2}p'su^{2}l-a^{3}r. Fr., *extra-capsulaire*. Situated outside a capsule, especially an articular capsule. [A, 385.]

EXTRACARDIAL, adj. E^{2}x-tra^3-ka^{2}rd'i^2-a^{2}l. External to the heart. [a, 29.]

EXTRACELLULAR, adj. E^{2}x''tra^3-se^{2}l'u^2-lar. Fr., *eccellulaire*. 1. Pertaining to a physiological process going on, or a part existing outside the cells of the organism in contradistinction to what goes on within cells or what is composed of cells (*e. g.*, e.-c. digestion, in distinction from intra-cellular digestion). [J.] 2. Situated outside of the cells of an insect's wing. ["Proc. of the Zool. Soc.," 1877, p. 141 (L).]

EXTRACOSTALES [E. Coues] (Lat.), n. pl. E^{2}x-tra^2-ko^{2}st-a-(a^3)'lez(las). From *extra*, without, and *costa*, a rib. The external intercostal muscles. [L; "N. Y. Med. Soc.," July 30, 1887.]

EXTRA-COURANT (Fr.), n. E^{2}x-tra^3-ku-ra^{3}n^2. See *Extra* CURRENT.

EXTRACRANIAL, adj. E^{2}x-tra^3-kran'i^2-a^{2}l. Situated outside the cranial cavity. [J.]

EXTRACRESCENT (Fr.), adj. E^{2}x-tra^3-kre^{2}s-sa^{3}n^2. Lat., *extracrescens* (from *extra*, without, and *crescere*, to grow). Growing from without. [B, 1 (a, 24).]

EXTRA-CRURÆUS [E. Coues] (Lat.), n. m. E^{2}x'tra^2-kru^2-(kru)-re'(ra^3'e^2)-u^{3}s(u^{4}s). See VASTUS *externus*.

EXTRACT, n. E^{2}x'tra^{2}kt. Lat., *extractum* (from *ex*, out, and *trahere*, to draw). Fr., *extrait*. Ger., *E.*, *Extrakt*, *Absud*. It., *estratto*. Sp., *extracto*. A preparation, soft, hard, or dry, obtained by the evaporation of either the natural juice pressed out of fresh herbs or other parts of plants, or of a solution obtained by treating vegetable or animal substances with a liquid, such as water, alcohol, or ether, which can be evaporated. E's are made by maceration, digestion, or infusion with hot or boiling water, and sometimes by boiling in water with repeated stirring, pressing the liquid out between strong tin plates, and then evaporating it, generally over a water-bath, to one third or one fourth the original volume, according to the consistence prescribed. Sometimes the evaporation is conducted *in vacuo*. [B, 95 (a, 14).]—**Abführendes E.** (Ger.). See *Extractum* COLOCYNTHIDIS *compositum*.—**Acetic e.** Lat., *extractum aceticum*. Fr., *extrait acétique*. Sp., *extracto acético*. An e. prepared by exhausting the drug with an acetic solution. [L, 41 (a, 21).]—**Aetherisches E.** (Ger.). See OLEO-RESIN.—**Alcoholic e.** Lat., *extractum alcoholicum* (seu *spirituosum*). Fr., *extrait alcoolique*. Ger., *alkoholisches* (oder *geistiges*) *E.*, *Abstractiv*. An extract obtained by exhausting the powdered drug with strong or diluted alcohol. [B, 81 (a, 21).]—**Anodyne e.** See EXTRACTUM *anodynum*.—**Aperient e.** See EXTRACTUM *solutivum*.—**Aqueous alcoholic e.** Ger., *spirituöswässeriges E.* An e. made by exhaustion with a mixture of water and alcohol. [B, 95, 108 (a, 14).—**Aqueous e.** Lat., *extractum aquosum*. Fr., *extrait aqueux*. Ger., *wässeriges Extract*. An e. formerly made by boiling the drug with water and expressing, but more recently, according to nearly all the pharmacopœias, by infusing or percolating with water. [B, 81 (a, 21).]—**Aromatic fluid e.** See EXTRACTUM *aromaticum fluidum*.—**Bezoardic e.** See EXTRACTUM *bezoardicum Camerarii*.—**Bitteres E.** (Ger.). See EXTRACTUM *amarum*.—**Cathartic e.** See *Extractum* COLOCYNTHIDIS *compositum*.—**Compound e.** Lat., *extractum compositum*. Fr., *extrait composé*. EXTRACTED, adj. E^{2}x-tra^{2}kt'e^{2}d. Lat., *extractus*. Fr., *extrait*. 1. Drawn out. 2. Prepared by extraction. 3. Subjected to extraction.

EXTRACTEUR (Fr.), n. E^{2}x-tra^{3}k-tu^{5}r. See EXTRACTOR.

EXTRACTIF (Fr.), n. E^{2}x-tra^{3}k-tef. See EXTRACTIVE.

EXTRACTIFORM, adj. E^{2}x-tra^{2}kt'i^2-fo^{2}rm. From *extractum*, an extract, and *forma*, form. Fr., *extractiforme*. Resembling or of the nature of an extract. [A, 385.]

EXTRACTIO (Lat.), n. f. E^{2}x-tra^{2}k(tra^{3}k)'shi^2(ti^2)-o. Gen., *extraction'is*. See EXTRACTION and EXTRACT.

EXTRACTION, n. E^{2}x-tra^{2}k'shu^{3}n. Gr., ἐξελκυσμός, ἐξαγωγή. Lat., *extractio* (from *ex*, out, and *trahere*, to draw). Fr., *e.* Ger., *E.*, *Ausziehen*. It., *estrazione*. Sp., *extracción*. A drawing out, as of a tooth, a hair, the crystalline lens, a foreign body, etc.; in obstetrics, the manual or instrumental removal of the fœtus, especially by the pelvis pole; in pharmacy, the process of making an extract.—**Cataract e.** The operation of extracting a cataract. *Aasner's method* is the same as Schmidt's (*vide infra*). *Barth's method* is a so-called modification of the original Daviel's operation in which the flap in the cornea is made by a single incision with a knife, without the aid of scissors. *Beer's method* is the typical corneal flap operation, made with Beer's triangular knife (the edge of the blade being the hypotenuse), and the incision being made downward, followed by free capsulotomy and the extrusion of the lens without iridectomy. *Beer's flap-e. without capsulotomy* is an operation in which the corneal section is made downward in the usual manner with a Beer's knife, the lens is then spitted on the needle, and then (by lateral movements of the needle from above downward and from right to left, accompanied by a rotatory motion) the lens in its capsule is detached from the zomula and extracted. *Berenger's method* is a modification of Daviel's operation in which the corneal section is made with a single instrument (a knife), no scissors being employed to enlarge the wound. *Boroman's modified linear e.* is an operation in which a broad lance-knife is employed, the section being made in the sclero-corneal margin, and lengthened during the withdrawal of the lance-knife. The iridectomy is made upward, the capsule lacerated, and the lens removed by a spoon resembling Critchett's rather than Waldau's. *Bribosia's operation* is one in which two modifications of the peripherical linear operation are

proposed. The capsule is first lacerated through the cornea by a stop-needle. The narrow knife is then introduced, and, as it is passed across the anterior chamber, rotated slightly so as to cause a prolapse, upon the knife, of the iris, which is thus excised. *Carter's operation* is one in which the knife recommended is 30 mm. long, 2 mm. broad, and very thin. The points of entrance and exit are just behind the margin of the cornea, on a line 2 mm. below the horizontal tangent. The incision is completed by a series of gently drawing cuts, and the rotation of the edge forward should be sufficient to make the centre of the incision correspond exactly with the sclero-corneal junction, so that its whole track will lie in a plane less oblique than and anterior to the plane of Von Graefe's section. There may or may not be made a conjunctival flap. The iridectomy is then made in the usual way. Then the anterior capsule is incised with a double fleam-shaped cystitome, and a quadrangular piece of capsule removed. The cataract is then caused to extrude by gentle pressure and counterpressure. *Christeau's operation* consists in removing the lens in its capsule by pressure upon the upper lid after the incision in the cornea has been made in the usual manner in the limbus. *Critchett's operation* is a modification of Von Graefe's peripherical operation, in which the puncture and counterpuncture are made in the sclerotic at a distance of 1 mm. from the edge of the cornea, and 3 mm. below its upper tangent, and the knife is brought out through the sclerotic immediately above the cornea. *Critchett's modified linear e.* is an operation in which the section is made in the cornea upward within the limbus with a broad lance-knife, and then the wound is enlarged in both directions with a pair of blunt-pointed scissors. An iridectomy upward is then made, and the capsule lacerated. The spoon employed is shallower and with a blunter edge than the spoon of Waldau. The corneal section is more like a fissure than a flap-wound. *Daviel's flap-e.* is an operation in which an incision in the cornea is made with a pointed lance-knife, and the wound enlarged with a myrtle-shaped lance-knife, and later with two pairs of scissors, one curved on the flat, and the other on the edge. The anterior capsule is then freely opened in various directions, and the lens then extruded by slight pressure on the eye with a spoon. *Desmarres's operation* is for shrunken capsular cataracts, devised in 1847. It resembles Sichel's operation through the sclerotic, except for the use of a strong pair of forceps, with arms 4 to 5 mm. long. *Earle's cataract e. through the sclerotic* is an operation in which a small lancet, moving backward and forward between the blades of a pair of forceps, is employed. This instrument being introduced into the sclera, the lancet is withdrawn by means of a spring within the handle, the blades of the forceps are opened, and the cataract seized and extracted. The incision should form a line perpendicular to the edge of the cornea. *Gibson's simple linear cataract e.* is an operation, advised in 1811, consisting in extracting a capsular cataract through a simple corneal incision by means of a hook. *Gibson's operation for soft cataract* is one in which the anterior capsule was first freely lacerated with a needle, and then in the course of a few weeks the cornea was opened through a small incision near its temporal edge, a curette introduced as far as the pupil, and the lens thus evacuated by means of gentle pressure. *Gioppi's peripheral modified linear cataract e.* is an operation in which a peripherical linear section is made upward, as in Von Graefe's operation, and the lens in its capsule is removed with a spoon-shaped instrument resembling Waldau's spoon. There is no iridectomy, and no laceration of the capsule. *Jacobson's modified flap-e.* is an operation in which the corneal section is made in the sclero-corneal margin, the lens and capsule are extracted in the usual manner, and finally the segment of iris which has been pressed upon by the lens in its extrusion, excised. *Jaeger's flap-e.* is an operation in which the corneal incision is made upward, as recommended by Wenzel in 1786. In other respects it is the same as Beer's operation. *Jaeger's peripherical modified linear cataract e.* is an operation in which the incision is made with a knife, shaped like a Beer's knife, one surface of which is concave, and the other convex, the latter being turned toward the eyeball. The section is made upward, the points of entrance and exit being 3·5 mm. below the apex of the corneal base, and lying in the sclera about 2·5 mm. from the corneal margin. The knife is pressed steadily forward in making the section, just as the ordinary Beer's knife is employed. The capsule is then opened freely, and the lens extruded. No iridectomy is done. *Jaeger's simple linear cataract e.* is an operation resembling Gibson's, in which an ordinary iris-hook is used. *Küchler's cataract e. by horizontal incision* is an operation in which a transverse section is made across the middle of the cornea, in its horizontal diameter, and after extracting the lens through this opening, immobilizing the eyelids by enveloping the whole head and face in a sort of helmet of plaster-of-Paris bandage, which was not removed for several days. *Lafayé's flap-e.* consisted in making the corneal wound a curve, and using only one instrument, which was a knife shaped something like a scalpel. *Landrau's modified flap-e.* is the same as Schmidt's. *Lebrun's corneal-flap-e.* resembles Liebreich's, except that the two ends of the incision lie in the cornea within the limbus, and about one mm. below the horizontal meridian. The section is made upward, and its apex lies at the point of limitation between the upper and middle thirds of the vertical corneal meridian. The blade of the knife is gradually rotated during the section, making at first an angle of 30° with the base of the cornea and ending at almost a right angle. The capsule is then lacerated, and the lens extracted by gentle pressure, without an iridectomy. *Liebreich's corneal-flap-e.* is one in which the section lies in the lower half of the cornea so that the apex of the slightly curved incision is placed about two mm. above the lower corneal margin. It is made with a very narrow Graefe knife. The plane of the blade should form an angle of 45° with the horizontal meridian of the cornea. The points of entrance and exit lie in the scleral margin, one mm. from the corneal margin and about two mm. below the horizontal meridian. No iridectomy is made, but the capsule is immediately opened and the lens extracted by gentle pressure. *Macnamara's operation* is an e. of the lens in the capsule without an iridectomy, by means of a large, straight, triangular keratome. With this a large incision is made just within the margin of the cornea, on the outer side. A scoop is then inserted through the wound as far as the outer edge of the pupil, having reached which its handle is raised so as to bring the lower end into contact with the capsule of the lens. The scoop is then slightly withdrawn, but so as to draw open the pupil far enough for pressure to be made on the edge of the lens with the rounded end of the scoop. This causes the lens to tilt over in front of the scoop, and both are then withdrawn. *Mooren's modified flap-e.* is an operation which consists in making a preliminary iridectomy several weeks before the operation, so as to avoid the dangers incident to hæmorrhage or the possibilities of a suppurative iritis. The operation is then done in the usual manner, and the lens in its capsule extracted either by pressure or with the spoon. *Pagenstecher's modified flap-e.* is an operation for the removal of the lens in its capsule. Pagenstecher employed complete anæsthesia, and made his corneal flap downward with the incision back in the sclero-corneal limbus. He then excised a piece of iris, and then by pressure on the eyeball through the closed upper lid endeavored to cause extrusion of the lens in its capsule by rupture of the zonula. If this proved unsuccessful, he opened the canal of Petit below and introduced a small spoon below and behind the lens, and lifted it out. More recently, he has advised making the Graefe peripherical linear incision with iridectomy. *Pagenstecher's peripheral modified linear e.* consists in removing the lens and its capsule at the same time. The section is a peripheral one, resembling somewhat the incision of Von Graefe, though having somewhat more of a flap-wound, and the iridectomy is made upward. The section is best made with a straight, narrow knife. *Palucci's simple linear e.* is an operation devised in 1750 which consists in extracting lens and capsule through the usual corneal incision by means of a fine forceps. *Richter's flap-e.* is a modification of Daviel's operation, consisting merely in the use of a single instrument (a knife), in completing the corneal incision. *Rosa's flap-e.* is an operation in which the corneal incision is made upward, but in all other respects the same as Beer's. *Santerelli's simple linear e.* was an operation (employed from 1795 to 1810 for all forms of cataract) in which the corneal incision was made with a broad lance-knife with curved surface, near its upper margin, and the capsule opened at the same time with the point of the knife. The lens was then extruded by pressure. *Schmidt's flap-e.* consists in a simple puncture of the vitreous humor through the posterior capsule or hyaloid membrane (after the lens has been extracted in the ordinary way), in order to overcome the collapse of the cornea which frequently occurs in this operation. All the other steps are precisely as in the ordinary Beer's operation. *Sharp's flap-e.* is almost exactly similar to Lafayé's. *Sichel's cataract e. through the sclerotic* was devised in 1840 for the e. of shrunken cataracts. The incision is made through the sclerotic with a lance-knife, and the cataract extracted with a fine forceps. *Steffan's modified flap-e.* is an operation in which the points of entrance and exit of the knife, in making the corneal section, lie about one mm. within the corneal margin, so as to make the incision long enough for the extraction of large, hard cataracts. An iridectomy is then made, the capsule opened freely, and the lens extruded by pressure on the upper lid. *Taylor's cataract e.* is an operation in which it is proposed to combine the benefits of iridectomy with the preservation of the integrity of the pupil. An incision is made in the corneal margin, the iris is separated for a corresponding distance from its ciliary attachment, and the lens is then pressed out through the peripheral opening thus made. After this operation, the detached portion of iris falls slightly, but this forms but a slight blemish. *Teale's operation by suction* was devised in 1864. Teale invented an instrument which consisted of a fine, somewhat curved tube of metal, a piece of rubber-tubing, and a glass mouth-piece. The cornea was first opened by a broad needle, and the capsule freely lacerated. A curette was then passed into the lens-mass, and connected with the suction apparatus, and the lens matter removed by aspiration. *Travers's simple linear e.* is an operation in which the usual corneal incision is made, and the anterior capsule opened with the point of the knife, when by gentle pressure and counter-pressure the lens is caused to present at the corneal wound and is removed with a curette or spoon. He at first advised preliminary dislocation of the cataract into the anterior chamber. *Von Graefe's peripheral modified linear e.* is an operation in which the knife employed is 2 mm. wide, 3·5 cm. long, and very thin. This should puncture the sclera 1·5 mm. from the corneal margin, enter and cross the anterior chamber, and the counter-puncture should be in the sclera, on the opposite side, at an equal distance from the corneal margin. The direction of the blade should be such that its back is turned toward the centre of curvature of the anterior surface of the cornea. The edge then appears as a curved line which corresponds to the greatest circle of the corneal surface. By a to-and-fro, sawing motion, the section is then completed upward. Externally the distance between the point of entrance and point of exit should measure 11 mm. in a straight line. A broad iridectomy is then made, which may or may not be as broad as the section is long. The capsule is then to be opened freely, either by a straight incision, or a crucial incision, or a quadrilateral incision, with a cystitome or hook. In the original operation they introduced Daviel's spoon inside the capsule and removed the lens entire. *Waldau's modified linear e.* is one in which an incision is made in the cornea, with a lance-headed keratome, half a line from its junction with the sclerotic and embracing one fourth of its circumference; a portion of iris is excised; the capsule of the lens is lacerated freely with a cystitome; a silver spoon is inserted into the corneal incision, and glided along the posterior surface of the lens, between it and its capsule; the lens is then within the bowl of the spoon, and the latter with the lens is slowly and carefully withdrawn from the eye. The spoon employed is something like a shovel in shape, and four sizes are used. *Weber's peripherical modified linear e.* is an operation done with a broad concave lance- or heart-shaped knife, bent

at an angle of 120° with the shaft, the concavity being on the posterior surface. The section is made preferably downward in the base of the cornea. When an iridectomy is deemed necessary, the excision should be confined to the pupillary margin of the iris, and it is better to use an iris-hook than a forceps. The capsule is then to be extensively lacerated, especially in a transverse direction. The wound is then made to gape by a gentle steady pressure and counter-pressure, and the lens is extracted. *Wenzel's flap-e.* at first consisted in making the corneal flap upward, but subsequently he recommended a lateral incision in the cornea, so that the flap was directed outward toward the external canthus. The supposed advantages of this modification are purely imaginary. *Williams's operation* consists in making a typical classical flap-e. without an iridectomy, going through each step in the ordinary way. Then when the lens has been extruded, a single point of very fine suture is inserted at the apex of the corneal flap by means of a straight needle, less than one fourth of an inch long, with a flat cutting point. A single strand of the finest silk is employed for the suture, the edges of the wound being held with very fine, toothed forceps. The suture is left in for a week, and should then be removed under ether. [F, 2, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69; Liebreich, "Med. Times and Gaz.," 1871 (F); Sharp, "Phil. See *Flap.-e.*—**E. of cataract.** See *Cataract e.*—**E. per vias naturales.** Fr., *accouchement artificiel par les voies naturelles.* E. of the fœtus through the parturient canal, as distinguished from delivery by the Cæsarean operation (generally used in speaking of artificial delivery after the death of the mother).—**Flap-e.** Fr., *e. à lambeau.* E. of a cataract by making a flap in the cornea.

EXTRACTIVE, n. E²x-tra²kt'i²v. Fr., *extractif.* Ger., *Extractivstoff.* It., *estrattivo.* 1. A name given in a chemical analysis of an organic substance to matters present in small quantity and of indeterminate composition which can be extracted or removed by solvents. 2. A substance (also called *extract* and *e. matter*) present in most vegetable extracts, and either occurring already formed in the vegetable tissues, or else produced at the time of preparation of the extract by the interaction of the other ingredients. It is at first soluble in water and alcohol, but by evaporation, and by heating in the presence of air, it becomes insoluble, and then constitutes *oxidized e.* [B, 5.]—**Oxidized e.** A name erroneously given to the insoluble modifications of an e. produced by heating or evaporation, under the idea that the change was due to a combination with oxygen. [B, 5.]

EXTRACTOR (Lat.), n. m. E²x-tra²k(tra³k)'to²r. Gen., *extractor'is.* Fr., *extracteur.* Ger., *Auszieher.* An instrument for extracting; of W. Gifford, who died in 1731, an obstetrical forceps devised by himself; of Dease, the vectis. [A, 24, 43.]—**Nerve-e.** A piece of fine wire with one edge toothed like a saw for introducing into a tooth and drawing out the nerve. [E.]—**Obstetrical e.** Of Evans, an instrument devised by him for extracting the fœtus, to be used instead of the forceps; consisting of a band to be placed around the head above its largest circumference, and secured there, with two straps passing down from it, by which to make traction. [A, 43.]

EXTRACTO-RESINOUS, adj. E²x-tra²k"to-re²z'i²n-u³s. Fr., *extracto-résineux.* Consisting of an extract and resembling resin. [A, 385.]

EXTRACTORIUM (Lat.), n. n. E²x-tra²k(tra³k)-to'ri²-u³m-(u⁴m). An extractor; of Kiwisch, an instrument for extracting the head of the fœtus after its separation from the trunk.

EXTRACTUM (Lat.), n. n. E²x-tra²k(tra³k)'tu³m(tu⁴m). See EXTRACT.—**E. aceticum.** See *Acetic* EXTRACT.—**E. æthereum, E. æthericum.** See OLEO-RESIN.—**E. alcoholicum.** See *Alcoholic* EXTRACT.—**E. amarum** [Russ. Ph.]. An extract made by mixing equal parts of e. absinthii, e. gentianæ, and e. trifolii fibrini. [B, 95 (*a*, 21).]—**E. anodynum** [Würt. Ph., 1798]. Fr., *extrait anodin.* An extract made by mixing together 3 drachms of aqueous extract of opium, 5 drachms of extract of *Carduus benedictus*, 1 oz. each of the extracts of sweet flag and *Archangelica officinalis*, and 10 drops of oil of cloves. [B, 97 (*a*, 21.)]—**E. antidysentericum aquosum.** An extract obtained from the peeled fruit of *Garcinia mangostana.* ["Proc. of the Am. Pharm. Assoc.," xxv (*a*, 21).]—**E. aquosum.** See *Aqueous* EXTRACT.—**E. aromaticum fluidum** [U. S. Ph.]. Fr., *extrait liquide des aromates.* Ger., *flüssiges Gewürzextrakt.* An extract made by exhausting 25 oz. (av.) of aromatic powder with alcohol sufficient to yield 24 fl. oz. of extract. [B, 81 (*a*, 21).]—**E. bezoardicum Camerarii** [Würt. Ph., 1798]. An extract made by dissolving in mint-water 96 parts of extract of species for elixir vitæ, 24 each of aloe wood and *Archangelica officinalis*, 12 each of balm, sage, tormentil, and opium, 6 each of red poppies and castor, and 4 each of the five precious stones, prepared amber, and adding 2 each of horn of sea-unicorn, East Indian and West Indian bezoar, and 6 each of alkermes confection and confection of hyacinth; an ancient and celebrated alexipharmac; also given as a sudorific and anodyne. [B, 97 (*a*, 21).]—**E. catharticum.** See *E.* COLOCYNTHIDIS *compositum.*—**E. catholicum.** 1. See *E.* COLOCYNTHIDIS *compositum.* 2. See *E.* RHEI *compositum.*—**E. drasticum** [Greek Ph.]. An extract made by digesting in pure alcohol for one day, 4 parts of the root of *Ipomœa turpethum*, 6 of the root of *Exogonium purga*, and 1 of resin of scammony, filtering, distilling off the alcohol, and drying the residue at a moderate heat. Fr., *extrait macrocostin, pilules macrocostines.* Macrocostine extract, made by dissolving 192 parts of Socotrine aloes in a mixture of 48 parts each of the depurated juice of *Absinthium vulgare, Apium graveolens, Anethum fœniculum, Fumaria officinalis*, and *Pimpinella saxifraga*, and 320 each of roses and lemon, setting aside, pouring off the clear liquor, evaporating at a gentle heat to the consistence of honey, adding 12 parts of extract of *Crocus sativus*, 8 of extract of myrrh, and 24 of gum ammoniac dissolved in 64 of vinegar of squills, reducing to the consistence of an extract of 8 parts of powder of marum and 12 of Arabian costus, mixing and preserving. [B, 97 (*a*, 21).]—**E. Martis.** Fr., *extrait de Mars.* A product obtained by evaporating to dryness potassium tartrate and liquid iron. [L, 49, 105 (*a*, 21).]—**Extractum molle** [Belg. Ph.]. See *Extractum tenue.*—**Extracta narcotica sicca.** See *Dry narcotic* EXTRACTS.—**Extractum ordinarium** [Dan. Ph.]. See *Extractum spissum.*—**E. panchymagogum.** Ger., *schleimausführendes Extract.* See *Extractum* RHEI *compositum.*—**E. panchymagogum Crollii.** See *E.* COLOCYNTHIDIS *compositum.*—**E. (panchymagogum) Quercetani.** See *Extractum* COLOCYNTHIDIS *compositum.*—**E. siccum.** A dry extract; an extract which can be reduced to a powder. [B.]—**E. solutivum** [Brunsw. Ph., 1777]. Aperient extract, made by digesting in 192 parts of water for twenty-four hours 48 parts each of senna-leaves and rhubarb, 2 each of cinnamon and anise, and 3 of potassium tartrate, straining with slight expression, and evaporating to the consistence of an extract. [B, 97 (*a*, 21).]—**Extractum spirituosum.** See *Alcoholic* EXTRACT.—**Extractum spissum** [Austr. Ph., Ger. Ph., Hung. Ph., Netherl. Ph., Norweg. Ph., Russ. Ph.]. An extract so thick that it will not run [Ger. Ph.], will not drop from the spatula [Hung. Ph., Netherl. Ph.], but may be drawn out into threads by it [Dan. Ph., Norweg. Ph., Swed. Ph., Swiss Ph.], that run together again into a mass [Russ. Ph.], or are like pap [Swiss Ph. gradus II, Hung. Ph.], like hard honey [Swiss Ph. gradus II], or of pippular consistence [Austr. Ph., Belg. Ph., Roum. Ph., Swiss Ph.]. [B, 95 (*a*, 21).]—**Extractum subspissum** [Hung. Ph.]. An extract having a consistence intermediate between that of a thick and that of a thin extract. [B, 95 (*a*, 21).]—**E. tenue.** An extract of the consistence of honey. [B.]—**E. thebaicum.** See *E.* OPII.—**E. thebaicum ammonicale.** See ELIXIR *ammoniato-opiatum.*—**E. Thridacium.** See *E.* LACTUCÆ.—**E. tonicum Bacher.** Sp., *extracto tónico de Bacher* [Sp. Ph.]. A preparation made by digesting 4 parts of the root of *Helleborus niger* in 16 of 50-per-cent. alcohol containing 1 part of potassium carbonate, straining, macerating the residue with 16 parts of white wine, and straining after heating to the boiling point, and finally filtering both liquids, distilling off the alcohol, and evaporating to proper consistence. [B, 95 (*a*, 14).]

EXTRA CURRENT, n. E²x'tra³ ku³r-e²nt. See under CURRENT.

EXTRADILATE, adj. E²x-tra³-di'lat. Lat., *extra-dilatatus.* Fr., *extra-dilaté.* In botany, having unusually large scales. [B, 1 (*a*, 24).]

EXTRA-EMBRYONIC, adj. E²x-tra³-e²m-bri²-o²n'i²k. Fr., *extra-embryonnaire.* Of certain structures of the ovum, lying without, or not forming a part of, the embryo.

EXTRA-EPITHELIAL, adj. E²x-tra³-e²p-i²-thel'i²-a²l. Occurring or situated outside an epithelium. [J.]

EXTRAFOLIACEOUS, adj. E²x-tra³-fo-li²-a'shu³s. Lat., *extrafoliaceus.* Fr., *extra-foliacé.* Ger., *ausserblattständig.* Having an unusual number of leaves. [B, 1, 123 (*a*, 24).]

EXTRAFOLIATE, adj. E²x-tra³-fo'li²-at. Lat., *extra-foliatus.* Fr., *extra-folié.* Of a scape, arising from the root of a plant which has no other leaves. [Mirbel (B, 1 [*a*, 24]).]

EXTRAGENITAL, adj. E²x-tra³-je²n'i²t-a²l. Situated elsewhere than on the genitals (said of chancres).

EXTRAIRE (Fr.), adj. E²x-tra²r. Lat., *extrarius.* Ger., *ausserhalb befindlich.* Of a plant-embryo, lying outside the endosperm or albumen; external. [Richard (B, 1 [*a*, 24]).]

EXTRAIT (Fr.), adj. E²x-tre². Extracted; as a n., see EXTRACT.—**E. anodin.** See EXTRACTUM *anodynum.*—**E. catholique.** 1. See *Extractum* COLOCYNTHIDIS *compositum.* 2. See *Extractum* RHEI *compositum.*—**E. de Goulard.** See *Liquor* PLUMBI *subacetatis.*—**E. de Poesner.** An extract made by boiling aloes with water, decanting, and evaporating. [L, 85.]—**E. formé.** See *Thick* EXTRACT.—**E. liquide.** See *Fluid* EXTRACT.—**E. mou.** See *Soft* EXTRACT.—**E. panchymagogue.** See *Extractum* COLOCYNTHIDIS *compositum.*—**E. sec.** See EXTRACTUM *siccum.*—**E. solutif.** See EXTRACTUM *solutivum.*—**E's sulfo-carboniques.** See *Ethereal narcotic* EXTRACTS.—**E. thébaïque** [Fr. Cod.]. See *Extractum* OPII.—**E. vineux.** See *Vinous* EXTRACT.

EXTRAKT (Ger.), n. E²x-tra³kt'. See EXTRACT.

EXTRALOBULAR, adj. E²x-tra³-lo²b'u²l-a³r. Situated outside a lobe, in contradistinction to that which is within it. [J.]

EXTRANEURAL, adj. E²x-tra³-nu²r'a²l. Situated outside a nerve or the nervous system. [J.]

EXTRANUCLEAR, adj. E²x-tra³-nu²'kle-a³r. Situated outside a nucleus. [J.]

EXTRA-OCULAR, adj. E²x-tra³-o²k'u²-la³r. Lat., *extra-ocularis.* Fr., *extra-oculaire.* External to the eye. [L.]

EXTRA-ORBITAL, adj. E²x-tra³-o²rb'i²t-a²l. External to the orbit or eye. ["Proc. of the Zool. Soc.," 1856, p. 134 (L).]

EXTRA-ORGANISMAL, adj. E²x-tra³-o²r-ga²n-i²s'ma²l. Occurring outside the organism. [B, 290.]

EXTRAPELVIC, adj. E^{2}x-tra^3-pe^{2}l'vi^{2}k. Situated outside the pelvic cavity. ["Proc. of the Zool. Soc.," 1878, p. 674 (L).]

EXTRAPERITONEAL, adj. E^{2}x-tra^3-pe^{2}r-i^2-to-ne'a^{2}l. Outside the peritonæum. [A, 301.]

EXTRAPOLAR, adj. E^{2}x-tra^3-pol'a^{3}r. Situated, in general, outside instead of between poles; in particular, the poles or electrodes of a battery. See *Extra-polar* ELECTROTONUS. [J.]

EXTRA-RECTUS [E. Coues] (Lat.), n. m. E^{2}x-tra^3-re^{2}k'tu^{3}s-(tu^{4}s). 1. See PYRAMIDALIS *abdominis*. 2. The external rectus muscle of the eye. [L.]

EXTRARIUS (Lat.), n. E^{2}x-tra(tra^3)'ri^2-u^{3}s(u^{4}s). See EXTRAIRE.

EXTRARADICAL, adj. E^{2}x-tra^3-ra^{2}d'i^{2}k-a^{2}l. From *extra*, without, and *radix*, a root. In chemistry, replaceable by a base, *i. e.*, not replaceable by a negative or alcoholic radicle (said of hydrogen atoms). [a, 27.]

EXTRARENAL, adj. E^{2}x-tra^3-ren'a^{2}l. From *extra*, without, and *renes*, the kidneys. Situated externally to the kidney. [L, 351.]

EXTRASCAPULAR, adj. E^{2}x-tra^3-ska^{2}p'u^2-la^{3}r. Lat., *extrascapularis*. From *extra*, without, and *scapula*, the shoulder-blade. Unconnected with, but close to, the scapula. [L, 14.]

EXTRASTAPEDIAL, adj. E^{2}x-tra^3-sta-ped'i^2-a^{2}l. From *extra*, without, and *stapes*, a stirrup. External to the stapes. [L, 121.]

EXTRASTOMACHAL, adj. E^{2}x-tra^3-stu^{3}m'a^{2}k-a^{2}l. From *extra*, without, and στόμαχος, the gullet. Taking place externally to the stomach (said of digestion). [L, 210.]

EXTRASTROM (Ger.), n. E^{2}x'tra^3-stro^{3}m. See *Extra* CURRENT.

EXTRATHORACIC, adj. E^{2}x-tra^3-tho-ra^{2}s'i^{2}k. Situated outside the thorax. [L.]

EXTRA-TRICEPS (Lat.), n. m. E^{2}x-tra^3-tri(tre)'se^{2}ps(ke^{2}ps). The outer head of the triceps muscle of the arm. [E. Coues, "Med. Soc.," July 30, 1887 (L).]

EXTRATROPICAL, adj. E^{2}x-tra^3-tro^{2}p'i^{2}k-a^{2}l. Lat., *extratropicus*. Fr., *extratropique*. Ger., *e*. Of plants, indigenous to the temperate zone. [B, 121 (a, 24).]

EXTRA-UTERINE, adj. E^{2}x-tra-u^2'te^{2}r-i^{2}n. Fr., *extra-utérin*. Situated outside the cavity of the uterus.

EXTRAVASAT (Ger.), n. E^{2}x-tra^3-va^3-sa^{3}t'. See EXTRAVASATION.

EXTRAVASATED, adj. E^{2}x-tra^{2}v'a-sat-e^{2}d. Lat., *extravasatus*. Fr., *extravasé*. Having escaped from its proper receptacle (said of liquids, etc., poured out from the blood-vessels, etc.). [L, 94 (a, 21).]

EXTRAVASATION, n. E^{2}x-tra^{2}v-a^3-sa'shu^{3}n. Lat., *extravasatia* (from *extra*, without, and *vas*, a vessel), *suffusia* (from *sub*, under, and *fundere*, to pour). Fr., *e*. Ger., *E.*, *Extravasat* (2d def.). It., *stravaso*. 1. The escape of blood or a juice or excretion from the proper receptacle. 2. The material that has so escaped.

EXTRAVASATUM (Lat.), n. n. E^{2}x-tra^3-va^{3}s(wa^{3}s)-at(a^{3}t)'-u^{3}m(u^{4}m). See EXTRAVASATION (2d def.).

EXTRAVASCULAR, adj. E^{2}x-tra^3-va^{2}s'ku^{2}l-a^{3}r. Situated outside the vascular system, in contradistinction to what is within the vessels. [J, 55.]

EXTRAVENTRICULAR, adj. E^{2}x-tra^3-ve^{2}n-tri^{2}k'u^2-la^{3}r. Situated outside a ventricle (especially of the heart). [J.]

EXTRAVILLOUS, adj. E^{2}x-tra^3-vi^{2}l'u^{3}s. Situated outside a villus.

EXTRAVISCERAL, adj. E^{2}x-tra^3-vi^{2}s'u^{3}r-a^{2}l. Situated externally to the visceral arches. ["Proc. of the Zool. Soc.," 1876, p. 700 (L).]

EXTREMITAS (Lat.), n. f. E^{2}x-tre^{2}m(tram)'i^2-ta^{2}s(ta^{3}s). Gen., *extremitat'is*. Fr., *extrémité*. Ger., *Extremität*. See EXTREMITY.—**Extremitates abdominales.** The lower limbs. [L, 332.]—**E. occipitalis.** Of Pansch, see *Occipital* POLE.—**Extremitates pectorates** (seu **superiores**, seu **thoracicæ**). The upper limbs. [L, 332.]—**E. septi.** Of Massa, the fornix cerebri, supposed to be continuous with the septum lucidum. [I, 3 (K).]

EXTRÉMITÉ (Fr.), n. E^{2}x-tra-me-ta. See EXTREMITY.—**E. ampullaire.** See CRUS *ampullare*.—**E. non-ampullaire, E. simple.** See CRUS *canalis semicircularis simplex*.

EXTREMITY, n. E^{2}x-tre^{2}m'i^{2}t-i^2. Lat., *extremitas*. Fr., *extrémité*. Ger., *Extremität*. 1. The terminal portion of anything. 2. Of the animal organism, a limb.

EXTRINSIC, adj. E^{2}x-tri^{2}n'si^{2}k. Lat., *extrinsecus*. Fr., *extrinsèque*. Ger., *äusserlich*. Situated or coming from without; of muscles, attached partly to the trunk and partly to a limb. [C.]

EXTROBLIQUUS [E. Coues] (Lat.), n. E^{2}x-tro-bli(ble)'kwu^{3}s-(kwu^{4}s). See *External oblique* MUSCLE *of the abdomen*.

EXTRODUCTION, n. E^{2}x-tro-du^{3}k'shu^{3}n. From *extra*, outward, and *ducere*, to lead. Gentle extraction. [L, 60.]

EXTROPHY, n. E^{2}x'tro-fi^2. See EXSTROPHY.

EXTRORSAL, EXTRORSE, adj's. E^{2}x-tro^{2}rs'a^{2}l, -tro^{2}rs'. Lat., *extrorsus*. Fr., *e*. Ger., *auswärts angeheftet* (oder *gekehrt*, oder *aufspringend*). Of anthers, facing outward, looking away from the pistil. [B, 1, 123, 291 (a, 24).]

EXTROVERSION, n. E^{2}x-tro-vu^{3}r'zhu^{3}n. See EXSTROPHY.

EXTRUSION, n. E^{2}x-tru^2'zhu^{3}n. Lat., *extrusio* (from *extrudere*, to squeeze out). Fr., *e*. Ger., *E*. A forcing out, expulsion. [J.]

EXTUBERANCE, n. E^{2}x-tu^{2}b'e^{2}r-a^{2}ns. Lat., *extuberantia*. See PROTUBERANCE.

EXTUBERANT, adj. E^{2}x-tu^{2}b'u^{3}r-a^{2}nt. Protruding.

EXTUBERATION, n. E^{2}x-tu^{2}b-e^{2}r-a'shu^{3}n. See PROTUBERANCE and PROTRUSION.

EXTUMEFACTION, EXTUMESCENCE, n's. E^{2}x-tu^{2}m-e-fa^{2}k'shu^{3}n, -tu^{2}m-e^{2}s'e^{2}ns. Lat., *extumefactio* (from *ex*, out, *tumere*, to swell, and *facere*, to make). Fr., *extumescence*. Tumidity. [A, 385.]

EXUBER (Lat.), adj. E^{2}x-u^{2}b(ub)'u^{3}r(e^{2}r). From *ex*, away from, and *uber*, the breast. Fr., *exubère*. See ABLACTATUS.

EXUBERANT, adj. E^{2}x-u^{2}b'e^{2}r-a^{2}nt. Lat., *exuberans*. Growing luxuriantly. [A, 326 (a, 21).]

EXUDATE, n. E^{2}x'u^2-dat. Fr., *exudation*. Ger., *Exsudat*. See EXUDATION (2d def.).

EXUDATION, n. E^{2}x-u^{2}d-a'shu^{3}n. Lat., *exsudatio* (from *exsudare*, to sweat out). Fr., *exsudation*. Ger., *Exsudation*, *Exsudat* (2d def.). It., *essudazione*. 1. An oozing out; in pathology, one of the phenomena of inflammation, in which serum, liquor sanguinis, or corpuscular elements permeate the walls of the blood-vessels of the part, without rupture, into the surrounding tissue or upon the free surface of the inflamed structure. 2. Material that has so exuded.

EXUDATIVE, adj. E^{2}x-u^2-dat'i^{2}v. 1. Having the property of exuding. [D.] 2. Accompanied with or giving rise to exudation (said of inflammation).

EXUDENIA (Lat.), n. f. E^{2}x-u^{2}d(ud)-e^{2}n-i(e)'a^3. See UDENIA and EXOTICUDENIA.

EXULCERATION, n. E^{2}x-u^{3}l-su^{3}r-a'shu^{3}n. Lat., *exulceratio*. Fr., *exulcération*. Superficial ulceration.

EXUMBILICATIO (Lat.), n. f. E^{2}x-u^{3}m(u^{4}m)-bi^{2}l-i^2-ka(ka^3)'-shi^2(ti^2)-o. Gen., *exumbilication'is*. From *ex*, out from, and *umbilicus*, the navel. Protrusion of the navel. [A, 322.]

EXUMBREL, adj. E^{2}x-u^{3}m'bre^{2}l. Pertaining to the exumbrella. [L, 358.]

EXUMBRELLA (Lat.), n. f. E^{2}x-u^{3}m(u^{4}m)-bre^{2}l'a^3. The outer convex portion or surface of the umbrella of a medusa. [L, 358.]

EXUNGUICULATUS (Lat.), adj. E^{2}x-u^{3}n^2(u^{4}n^2)-gwi^{2}k-u^2(u)-lat(la^{3}t)'u^{3}s(u^{4}s). From *ex*, without, and *unguis*, a nail. Fr., *exonguiculé*. Of Illiger, unprovided with nails. [L, 180.]

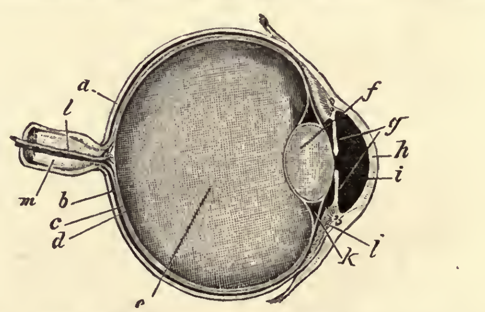
EXUSTIO (Lat.), n. f. E^{2}x-u^{3}st(u^{4}st)'i^2-o. Gen., *exustion'is*. From *exurere*, to burn. Fr., *exustion*. See CAUTERIZATION.

EXUTORIUM (Lat.), n. n. E^{2}x-u^2(u)-to'ri^2-u^{3}m(u^{4}m). From *exuere*, to draw out. Fr., *exutoire*. See ISSUE.

EXUVIABILITY, n. E^{2}x-u^2-vi^2-a-bi^{2}l'i^{2}t-i^2. Lat., *exuviabilitas*. Fr., *exuviabilité*. Ger., *Hautwechsel*. The power possessed by some animals of periodically shedding the skin. [K.]

EXUVIABLE, adj. E^{2}x-u^2'vi-a-b'l. Fr., *e*. Having the property of being exuviated. [L, 14.]

EXUVIÆ (Lat.), n. f. pl. E^{2}x-u^2(u)'vi^2(wi^2)-e(a^3-e^2). The cast-off epidermis, etc., of animals. [K.]



EXUVIATION, n. E^{2}x-u^2-vi^2-a'shu^{3}n. The process of casting off the skin or shell. [L, 121, 168.]

EXUVIUM (Lat.), n. n. E^{2}x-u^2(u)'vi^2(wi^2)-u^{3}m(u^{4}m). See EXUVIÆ.

EXVOLUTÉ (Fr.), adj. E^{2}x-vo-lu^6-ta. Having a centrifugal or peripheral development (said of the fruit of Fungi). [B, 121 (a, 24).]

EXYTHANA (Lat.), n. f. E^{2}x-i^2(u^6)-tha(tha^3)'na^3. A genus of the *Leguminosæ*.—**E. ovalifolia.** The *dralakaka* of the Fijians, among whom an infusion of the leaves is used by puerperal women to prevent future conception. [A. J. F. Skottowe, "Glasgow Med. Jour.," Jan., 1889, p. 1.]

EYE, n. I. Gr., ὄμμα ὤψ. Lat., *oculus*. Fr., *œil*. Ger., *Auge*. It., *occhio*. Sp., *ojo*. 1. The organ of vision, situated in the orbit. It consists of the eyeball, bulb or globe of the eye, the prolongation of the optic nerves, and the six extrinsic muscles, four straight

SCHEMATIC DIAGRAM OF THE EYE, SHOWING A LONGITUDINAL SECTION THROUGH THE EYEBALL. (DRAWN BY DR. H. MACDONALD.)

a, the sclerotic; *b*, the choroid; *c*, the retina; *d*, the hyaloid membrane; *e*, the cavity of the eyeball; *f*, the lens; *g*, the iris; *h*, the cornea; *i*, the anterior chamber; *j*, the ciliary muscle and ligament; *k*, the canal of Petit; *l*, the central retinal vessels; *m*, the optic nerve.

and two oblique. It is a spherical body, and consists of three tunics. 1st. Cornea and sclera. 2d. Iris, ciliary processes, and choroid. 3d. Retina. Within these tunics are contained three refracting media,

the aqueous humor, lens and capsule, and vitreous humor. The cornea and sclera are fibrous in structure and form the outer coat; the middle coat, formed of iris, ciliary processes, and choroid. is mainly a muscular, vascular, and pigmented coat, while the retina

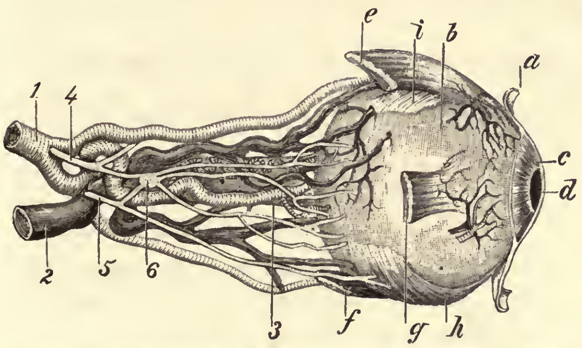


DIAGRAM SHOWING THE EYE WITH ITS NERVES AND BLOOD-VESSELS. (DRAWN BY DR. H. MACDONALD, AFTER B. J. BÉRAUD.)

a, section of the conjunctiva; *b*, the sclerotic; c, the cornea; *d*, the pupil; *e*, section of the superior rectus muscle; *f*, the inferior rectus muscle; *g*, the external rectus muscle; *i*, the superior oblique muscle; 1, the ophthalmic artery; 2, the ophthalmic vein; 3, the optic nerve; 4, the ophthalmic nerve; 5, the motor nerve of the eye; 6, the ophthalmic or lenticular ganglion.

is mainly a nervous structure, being an expansion of the optic nerve fibres. [F.] 2. The genus *Dianthus*. 3. The bud of a tuber. 4. A perforation (*e. g.*, the e. of a needle). [A, 505 (*a*, 21); B, 19, 275 (*a*, 24).]—**Amaurotic cat's-e.** See AMAUROSIS.—**Artificial e.** Fr., *œil artificiel*. Ger., *künstliches Auge*. An e. usually made of glass or porcelain, but sometimes of hard rubber or celluloid. It is inserted in the orbit from which the eyeball has been removed, or, in cases where the stump still remains, for purely cosmetic purposes. [F.]—**Cat's e.** Fr., *œil de chat*. Ger., *Katzenauge*. 1. Obliquity of the palpebral apertures. See ÆLUROPSIS. 2. An obsolete term under which several morbid conditions of the eye were confounded; all agreeing, however, in presenting an opalescent appearance of the pupil or of the fundus of the eye, which was more or less intense according to the direction in which the eye is turned. This appearance was compared by Beer to the reflection from the tapetum of the eye of the cat. [F.]—**Com-**

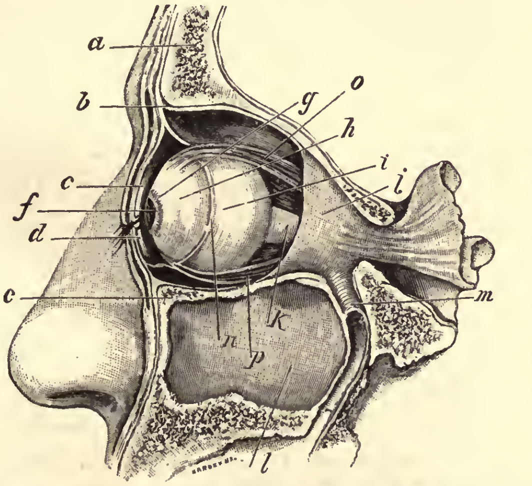

DIAGRAM SHOWING THE EYE IN SITU. (DRAWN BY DR. H. MACDONALD, AFTER B. J. BÉRAUD.)

a, section of the frontal bone; *b*, section of the periosteum of the orbit; *c*, section of the cartilage of the upper eyelid; *d*, section of the cartilage of the lower eyelid; *e*, section of the superior maxillary bone; *f*, the pupil; *g*, the iris; *h*, the sclerotic coat; *i*, the globe of the eye; *j*, the periosteum of the orbit; *k*, the optic nerve; *l*, the maxillary sinus; *m*, the prolongation of the dura in the posterior palatine canal; *n*, section of the orbito-ocular aponeurosis; *o*, the superior rectus muscle; *p*, the inferior rectus muscle.

pound e's. The e's of insects, etc., which consist of a large number of simple e's coalesced into one mass. [L, 121, 196.]—**Crab's e.** See ASTACOLITH.—**Devil's-e's.** The *Stellaria holostea*. [A, 505, (*a*, 21).]—**Diagrammatic e.** Fr., *œil diagrammatique*. Ger., *diagrammatisches Auge*. An ideal e. constructed by Listing for the more exact calculation of the passage of rays of light. It has six cardinal points, corresponding to those of optical lenses and situated on the optic axis.—**E.-point.** See *E.*-POINT.—**E.-preservers, E.-protectors.** Fr., *conserveurs des yeux*. Ger., *Schutzbrillen*. Very weak convex glasses which exercise no effect upon the refraction, or neutral glasses of a tint designed to modify the quality and quantity of the light. [F.]—**E.-speck.** See OCELLUS.—**Schematic E.** Fr., *œil schématique*. Ger., *Schematisches Auge*. The reduced e. of Donders. It is supposed to contain only one refracting medium, whose index of refraction is to that of air as 4 to 3, and to have only one refracting surface, the cornea. The radius of curvature of the cornea is 5 mm., and its center of curvature coincides with the optical center of the eye. The length of the eye from cornea to posterior pole is 20 mm. Listing's schematic e. is a diagrammatic e. constructed by Listing for the more exact calculation of the rays of light through the eye. It has six cardinal points, corresponding to those of optical lenses and situated on the optic axis, viz., two foci, two principal points, and two nodal points. According to Listing, the first or anterior focus lies 12·8326 mm. in front of the cornea, and the second or posterior focus lies 14·6470 mm. behind the posterior surface of the lens; the first principal point lies 2·1746 mm. and the second principal point 2·5724 mm. behind the anterior surface of the cornea; the first nodal point lies 0·7580 mm. and the second nodal point 0·3602 mm. in front of the posterior surface of the lens. [F.]—**Simple e.** A single e.—[L, 196.]—**Reduced e.** Fr., *l'œil réduit*. Ger., *reducirtes Auge*. An imaginary e. in which the compound dioptric system of the human eye is reduced to a single refracting surface, bounded anteriorly by air and posteriorly by aqueous or vitreous humor. Where very great accuracy is not required, this reduced eye may be made the basis of a number of considerations and calculations. [F.]—**Watery e.** See EPIPHORA.

EYEBALL, n. I'ba^{4}l. Fr., *globe de l'œil*. Ger., *Augapfel*. It., *bulbo dell'occhio*. The ball of the eye. [L, 56.]

EYE-BREEK, n. I'brek. An old name for the eyelid. [F.]

EYE-BREEN, n. I'bren. An obsolete term for eyebrow.

EYEBRIGHT, n. I'brit. 1. The *Euphrasia officinalis*. 2. The *Veronica chamædrys*. 3. The *Bartsia odontites*. [A, 505 (*a*, 21); B, 275 (*a*, 24).]—**Blue e.-b.** An old name for the *Myosotis repens*. [B, 275 (*a*, 24).]—**Distilled water of e.-b.** [Fr. Cod., 1818, Palat. Disp., 1764, Sard. Ph., 1773]. A preparation made by distilling off one half (two thirds [Sard. Ph., 1773]) from a mixture of 1 part of the herb of *Euphrasia officinalis* and 2 parts of water [Palat. Disp., 1764], or by mixing 10 parts of the herb and 25 of water, and distilling off 20 parts. [B, 97 (*a*, 21).]—**Red e.-b.** The *Bartsia odontites*. [B, 275 (*a*, 24).]—**West Indian e.-b.** The *Euphorbia maculata*. [B, 275 (*a*, 24).]

EYEBRIGHT COW-WHEAT, n. I''brit-ku^5'u^4-hwet. The genus *Bartsia*, and the *Bartsia odontites*. [A, 505 (*a*, 21): B, 275 (*a*, 24).]—**Red e.-c.-w.** The *Bartsia odontites*. [B, 275 (*a*, 24).]

EYED, adj. Id. Having an eye (4th def.).

EYE-GLASS, n. I'gla^{3}s. The variety of optical lenses for improving the vision, also a small porcelain or glass cup for the application of collyria to the eye.

EYE-GROUND, n. I'gru^5-u^{4}nd. See FUNDUS *oculi*.

EYELET, n. I'le^{2}t. Fr., *œillet*. A small flanged tube for insertion into an opening for the purpose of preventing it from closing.—**Politzer's vulcanite e's.** Fr., *œillets de vulcanite*. Ger., *Politzer'sche Kautschukösen*. Small tubes of vulcanite, 2 to 3 mm. long and 1 mm. wide, which have one or two grooves on their external surface, into which the margin of the perforation in the membrana tympani enter. They are introduced into the perforation on the point of a parcenteses needle, for the purpose of keeping the perforation open. [F, 3.]

EYE-PIECE, n I'pes. See OCULAR.

EYESEEDS, n. I'sedz. Probably the *Salvia verbenaca*. [A, 505 (*a*, 21); B, 275 (*a*, 24).]

EYE-STONE, n. I'ston. The shelly operculum of small Turbinidæ, used to remove foreign particles from the eye. It is put into the inner corner of the eye, beneath the eyelids, and allowed to work its way out at the outer canthus. [F; L, 354.]

EYE-TOOTH, n. I'tuth. See *Eye*-TOOTH.

EYE-WINKER, n. I'wi^{2}n^{2}k-u^{3}r. See EYELASH.

EYSENHARDTIA (Lat.), n. f. I-ze^{2}n-ha^{3}rt'i^2-a^3. A genus of papilionaceous legumes of the group *Galigeæ*, subtribe *Psoraleæ*. [B, 121 (*a*, 24).]

EYTHYOPISTHOCRANIUS (Lat.), adj. I-thi^2(thu^6)-o^{2}p-i^{2}s-tho(tho^3)-kran(kra^{3}n)'i^2-u^{3}s(u^{4}s). See CRYTOPISTHOCRANIUS and HOMATOPISTHOCRANIUS. [L.]

EZEL, n. In the Sahara, the *Callegonum convosum*. [B, 121 (*a*, 24).]

EZEZICH, n. Of the alchemists, salt. [L, 94 (*a*, 21).]

EZION, n. The *Salix vitellina*. [B, 121 (*a*, 24).]

EZOB, n. E'zo^{2}b. The *Hyssopus officinalis*. [A, 505 (*a*, 21).]

EZQUAHUITL [Mex. Ph.], n. The *Croton sanguifluum*. [A, 447 (*a*, 21).]

EZULA (Lat.), n. f. E^{2}z'u^2(u^4)-la^3. See ESULA.

O, no; **O^2**, not; **O^3**, whole; **Th**, thin; **Th^2**, the; **U**, like oo in too; **U^2**, blue; **U^3**, lull; **U^4**, full; **U^5**, urn; **U^6**, like ü (German).

F

FA, n. In Japan, the *Corylus avellana*. [B, 121 (a, 24).]

FAAESKE (Swed.), n. The *Boletus igniarius*. [B, 92 (a, 14).]

FAALIM, n. An African plant said to be used against the bites of poisonous serpents. [B, 121 (a, 24).]

FAAM (Fr.), n. m. The *Angræcum fragrans*. [B, 121, 173 (a, 24).]

FABA (Lat.), n. f. Fa(fa^3)'ba^3. 1. A bean; of Tournefort, the *Vicia f.* 2. Of Mönch, a genus of plants, referred by most authors to *Vicia*. [B, 34, 121 (a, 24).]—**Extractum fabæ calabarensis** [Fr. Cod., Ger. Ph., 1st ed., Swiss Ph.]. See *Extractum* PHYSOSTIGMATIS.—**F. ægyptiaca.** The achænia of *Nelumbium speciosum* and the seed of *Lupinus albus*. [B, 121, 180 (a, 24).]—**Fabæ albæ** [Gr. Ph.]. White beans; the seeds of *Phaseolus vulgaris*. [B, 95.]—**F. anacardii.** See ANACARDII *occidentalis fructus*.—**Fabæ arabicæ.** Coffee-beans. [B, 180 (a, 24).]—**F. bengalensis.** A gall produced by the sting of an insect on the leaves of *Terminalia chebula*. [B, 48 (a, 14).]—**Fabæ brasilienses.** See *Pichurim* BEAN.—**Fabæ cacao.** Cacao beans (the seed of *Theobroma cacao*). [B, 180 (a, 24).]—**F. calabarica** [Ger. Ph.]. The calabar bean. [B, 5 (a, 24).] See PHYSOSTIGMA.—**F. carica.** The common fig (*Ficus carica*). [B, 121 (a, 24).]—**F. cathartica.** The seed of *Jatropha curcas*. [B, 38 (a, 14).]—**Fabæ coffeæ.** Coffee beans (the seed of *Coffea arabica*). [B, 180 (a, 24).]—**F. crassa.** The *Sedum telephium*. [B, 121 (a, 24).]—**Fabæ de Malacca.** See ANACARDII *occidentalis fructus*.—**Fabæ de Tonca.** The seeds of *Dipteryx odorata*. [B, 180 (a, 24).]—**Fabæ dividivi.** The *Cæsalpinia coriaria*. [B, 180 (a, 24).]—**F. dulcis.** The *Cassia alata*. [B. 121 (a, 24).]—**F. equina.** See *Horse*-BEAN.—**F. febrifuga.** The *Strychnos Ignatii*. [B, 121 (a, 24).]—**F. ficulnea.** The *Lupinus albus*. [B. 121 (a, 24).]—**F. græca.** The *Diospyros lotus*. [B, 121 (a, 24).]—**Fabæ hortenses.** The seed of *Phaseolus vulgaris*. [B, 180 (a, 24).]—**Fabæ Ignatii.** St.-Ignatius's bean. [B, 5 (a, 24).]—**F. indica.** See *F. febrifuga*.—**F. inversa.** See *F. crassa*.—**F. julianna.** Fr., *fève julienne*. A variety of the *Vicia f.* [B, 173 (a, 24).]—**Fabæ libidibi.** The seed of *Cæsalpinia coriaria*. [B, 180 (a, 24).]—**F. longisiliqua.** Fr., *fève à longues gousses*. A variety of *Vicia f.* [B, 173 (a, 24).]—**Fabæ macis.** See *Pichurim* BEAN.—**F. major.** The *Vicia f.* [B, 173 (a, 24).]—**F. marina.** The *Entada scandens* and the *Turbo rugosus*. [B, 121, 180 (a, 24).]—**F. mexicana.** The seed of *Theobroma cacao*. [B, 121 (a, 24).]—**F. minor.** Fr., *fève des champs*. The *F. major*, var. *minor*. [B, 173 (a, 24).]—**Fabæ pechurim (seu pechuris, seu pecurim, seu pecuris).** See *Pichurim* BEAN.—**Fabæ pichurim majores.** Pichurim beans obtained from *Nectandra puchury major*. [B, 180 (a, 24).]—**Fabæ pichurim minores.** The small pichurim beans (from *Nectandra puchury minor*). [B, 180 (a, 24).]—**F. porcina.** The *Hyoscyamus niger*. [L, 107.]—**F. purgatrix.** The *Entada scandens*. [B, 121 (a, 24).]—**F. rotunda.** Fr., *fève de windsor*. A variety of *Vicia f.* [B, 173 (a, 24).]—**F. Sancti Ignatii** [Belg. Ph.]. St.-*Ignatius's bean*. [B, 95.] See IGNATIA.—**F. sativa.** The *Vicia f.* [B, 173 (a, 24).]—**Fabæ spuriæ.** The small or false pichurim beans (from *Nectandra puchury minor*). [B, 180 (a, 24).]—**Fabæ sassafras.** Pichurim beans (from *Nectandra puchury major*). [B, 180 (a, 24).]—**F. suilla.** The *Hyoscyamus niger*. [B, 180 (a, 24).]—**Fabæ Tonco, F. tunka.** See *Tonka* BEAN.—**F. viridis.** Fr., *fève verte*. A variety of *Vicia f.* [B, 173 (a, 24).]—**F. vulgaris.** The *Vicia f.* [B, 34 (a, 24).]—**Flores fabæ (seu fabarum).** The bloom of *Vicia f.* [B, 180 (a, 24).]—**Semen fabæ (seu fabarum).** The seed of *Vicia f.* [B, 180 (a, 24).]—**Stipites fabarum.** The stems or stalks of *Vicia f.* [B, 180 (a, 24).]

FABACEOUS, adj. Fa-ba'shu^{3}s. Lat., *fabaceus*. Fr., *fabacé*. Resembling a bean or the genus *Faba*; belonging to the *Fabaceæ* (Fr., *fabacées*), which are: 1. Of Reichenbach, a division of papilionaceous plants comprising the *Vicieæ*, *Phaseoleæ*, and *Glycineæ*. 2. Of Lindley, an order of the *Rosales*, comprising the *Papilionaceæ*, *Cæsalpinieæ*, and *Mimoseæ*. [B, 121, 170 (a, 24).]

FABACIA, n. f. Fa(fa^3)-ba(ba^3)'si^2(ki^2)-a^3. A flour made from beans which was used by the Romans to make a sort of bread. [B, 121 (a, 24).]

FABACIUM (Lat.), n. n. Fa(fa^3)-ba(ba^3)'si^2(ki^2)-u^{3}m(u^{3}m). A cake made of bean-meal, used as an article of food. [L, 94 (a, 21).]

FABAGELLE (Fr.), n. Fa^3-ba^3-zhe^{2}l. The genus *Zygophyllum*. [B, 121 (a, 24).]—**F. à feuilles de pourpier.** The *Zygophyllum portulacoides*. [B, 173 (a, 24).]—**F. commune.** See ZYGOPHYLLUM *fabago*.—**F. écarlate.** The *Zygophyllum coccineum*. [B, 173 (a, 24).]—**F. en arbre.** The *Zygophyllum arboreum*. [B, 173 (a, 24).]—**F. officinale.** The *Zygophyllum fabago*. [B, 173 (a, 24).]

FABAGINEA (Lat.), **FABAGO** (Lat.), n's f. Fa(fa^3)-ba(ba^3)-ji^{2}n(gi^{2}n)'e^2-a^3, -ba(ba^3)'go. Gen., *fabagin'eæ*, *-ag'inis*. A section of the genus *Zygophyllum*. [B, 121 (a, 24).]—**F. alata.** The *Zygophyllum f.* [B, 173 (a, 24).]

FABARIA (Lat.), n. f. Fa(fa^3)-ba(ba^3)'ri^2-a^3. The *Sedum telephium*. [B, 180 (a, 24).]—**F. crassula, F. telephium.** See *F.*

FABE, n. The *Parkinsonia vulgaris*. [B, 121 (a, 24).]

FABELLA (Lat.), n. f. Fa(fa^3)-be^{2}l'la^3. A sesamoid bone. [L, 14, 200.]

FABES, n. Fabz. The fruit of *Ribes grossularia*. [A, 505 (a, 21).]

FABES-BLETSCHEN (Ger.), n. Fa^{3}b'e^{2}s-ble^{2}t-she^{2}n. In Switzerland, the *Rumex alpinus*. [B, 180 (a, 24).]

FABIANA (Lat.), n. f. Fa(fa^3)-bi^2-an(a^{3}n)'a^3. Fr., *fabiane*, *fabienne*. A genus of South American solanaceous plants, of the *Cestrineæ* (*Fabianeæ*). [B, 42, 121 (a, 24).]—**F. imbricata.** A species indigenous to Chili, where it is called *pichi*. The aromatic, very resinous branches and leafy branchlets contain fabianine, a volatile oil, and a bitter resin and are used in calculous, dropsical, urinary, and vesical affections, and as a stomachic and tonic. [A. Rodriguez, "Diario Med.-farm."; "Med. Times and Gaz."; "N. Y. Med. Jour.," Dec. 26, 1885, p. 732; A. B. Lyons, "Am. Jour. of Pharm.," Feb., 1886, p. 65.]

FABIANINE, n. Fa^3-bi-a^{3}n'en. A supposed alkaloid contained in the stalks of *Fabiana imbricata*; more probably a fluorescent glucoside resembling æsculin. ["Proc. of the Am. Pharm. Assoc.," xxxvi (a, 14).]

FABIENNE (Fr.), n. Fa^3-be-e^{2}n. See FABIANA.

FABINE, n. Fa'ben. Fr., *f.* An alkaloid obtained in the distillation of beans. [L, 49.]

FABRECOULIER (Fr.), **FABREGUIER** (Fr.), n. Fa^{3}br'ku-le-a, -ge-a. The *Celtis australis*. [B, 121, 173 (a, 24).]

FACALDINA (It.), n. Fa^3-ka^{3}l-de'na^3. Fr., *facaldine*. Of Zecchinelli, an epidemic disease of a syphilitic nature and tabetic character which was prevalent about the beginning of the present century in Facalde, province of Trent, Austria, and was characterized by ulcers and osteocopic pains. [L, 87 (a, 14).]

FACE, n. Fas. Gr., πρόσωπον. Lat., *facies*, *vultus*. Fr., *f.*, *visage*. Ger., *Gesicht*, *Ansehen*. It., *faccia*. Sp., *cara*. A particular surface of a solid body; of an animal, the anterior and lower part of the head; of a stump, of the cervix uteri, etc., the free extremity.—**Carbuncled f.** An old term for rosacea. [G.]—**Corvisart's f.** See FACIES *cardiaque*.—**Dorsal f.** Of a leaf, the lower surface if the leaf is horizontal; the outer surface presented by the unfolding of the leaf-bud. [a, 24.]—**F.-ache.** See PROSOPALGIA.—**F.-ague.** See *Brow*-AGUE.—**F.-and-hood.** The *Viola tricolor*. [A, 505 (a, 21).]—**F. de loup** (Fr.). The *Lycopsis arvensis*. [B, 173 (a, 24).]—**F. grippée** (Fr.). A peculiar expression of the features seen in peritonitis. [L, 107.]—**F.-in-hood.** The *Aconitum napellus*. [A, 505 (a, 21).]—**Hippocrates's f.** See FACIES *hippocratica*.—**Myopathic f.** Fr., *f. myopathique*. Of Landouzy, a peculiar state of the countenance associated with progressive muscular atrophy. The f. lacks animation, and the subject can not whistle, blow, make grimaces, or kiss, owing to atrophy of the orbicularis oris. ["Lancet," Nov. 6, 1886, p. 887.]—**Ovarian f.** See FACIES *ovariana*.—**Pneumonic f.** See FACIES *pneumonique*.—**Spencer Wells's f.** See FACIES *ovariana*.

FÄCES (Ger.), n. Fatz'e^{2}s. See FÆCES and EXCREMENT.

FACET, n. Fa^{2}s-e^{2}t'. Lat., *faciecula*. Fr., *facette*. Ger., *Facette*. A small flattened surface. [L, 343.]—**Articular f.** Fr., *facette articulaire*. 1. A small articular surface. 2. A particular portion of an articular surface, differing in direction or contour from the rest of the surface.—**Auricular f.** Fr., *facette auriculaire*. The superficies auricularis of the sacrum or of the innominate bone.—**Capitular f's.** The f's on the vertebræ by which they articulate with the ribs. [L, 200.]—**Corneal f's.** Fr., *facettes de la cornée*. Ger., *Hornhautfacetten*. Circumscribed, flattened areas on the surface of the cornea where small phlyctenulæ or ulcers have existed. They represent a peculiar reparative process, and may be slightly cloudy or entirely transparent. [F.] See cut under *Crystalline* CONES.—**Costo-central f's.** The surfaces upon the ribs which articulate with the bodies of two adjoining vertebræ. [L, 142.]—**Jugular f.** A small irregular surface on the petrous portion of the temporal bone, internal to the stylo-mastoid foramen. [C.]—**Pleural f.** A flattened surface upon the anterior half of the pleuron of certain *Crustacea*, which is overlapped by the preceding pleuron, except in complete extension. [L, 11.]—**Tergal f.** A smooth, lenticular surface forming the anterior third of a tergum of certain *Crustacea*, which is overlapped by the preceding tergum, except in complete flexion. [L, 11.]

FACETED, FACETTED, adj's. Fa^{2}s-e^{2}t'e^{2}d. Ger., *facettert*. Provided with facets. [B, 100.]

FACH (Ger.), n. Fa^{3}ch^2. 1. See LOCULUS. 2. A branch or division of a subject. [A, 523.]—**F'artig.** Multilocular, cellular. [A, 521.]—**Fächerhaut.** See ENDOCARP.—**F'ig.** See *F'artig*.—**F'kolben.** See the major list.—**F'ordnung.** Classification. [A, 521.]—**F'spaltig.** See LOCULICIDUS and DEHISCENT.—**F'werk.** A framework. [a, 14.]

FACH (Turk.), n. A celebrated Turkish antidote. [L, 94, 105 (a, 14).]

FÄCHEL (Ger.), n. Fach^2'e^{2}l. Lit., a fan. See CORONA *radiata*.—**F'gerste.** The *Hordeum zeocriton*. [B, 180 (a, 24).]—**F'stäbe.** See CORONA *radiata*.

FÄCHER (Ger.), n. Fak^2'e^{2}r. 1. Pl. of *Fach* (*q. v.*). 2. A fan.—**F'binde.** A fan-shaped abdominal bandage. [A, 521.]—**F'blättrig.** Fan-leaved. [L, 43.]—**F'förmig.** Fan-shaped. [L, 31.]—**F'fruchttang.** See the major list.—**F'palme.** See the major list.—**F'tang.** The genus *Cystoseira*. [B, 180 (a, 24).]

FÄCHERFRUCHTTANG (Ger.), n. Fach^2'e^{2}r-fruch^{2}t-ta^{3}n^2. The genus *Sargassum*. [B, 180 (a, 24).]—**Beerentragender F.**

The *Sargassum bacciferum*. [B. 180 (a, 24).]—**Gemeiner f.** The *Sargassum vulgare*. [B, 180 (a, 24).]

FÄCHERPALME (Ger.), n. Fach²'e²r-pa³l-me². The genus *Borassus*. [a, 24.]—**Gemeine F.** The *Borassus flabelliformis*. [B, 180 (a, 24).]

FACHING (Ger.), **FACHINGEN** (Ger.), n's. Fa³ch²'i²n², -e²n. A place near Seltz, in the province of Nassau, Germany, where there are cold, gaseous, highly alkaline and saline and weakly chalybeate springs. [L, 49, 87, 105 (a, 14).]

FACHKOLBEN (Ger.), n. Fa³ch²'koib-e²n. The genus *Symplocarpus*. [B, 180 (a, 24).]—**Stinkender F.** The *Symplocarpus fœtidus*. [B, 180 (a, 24).]

FÄCHLEIN (Ger.), n. Fach²'lin. A cell. [A, 450.]—**F. des Warzenfortsatzes.** The mastoid cells. [L, 80.]

FACIAL, adj. Fa'si²-a²l. Lat., *facialis*. Fr., Ger., *f*. It., *faciale*. Sp., *f*. Pertaining to the face. [C.]—**Corticale F'-bahn** (Ger.). A tract of nerve-fibres figured by Monakow in a cross-section of the brain carried through the centre of the internal capsule. They are situated on the inner side of the reticular substance. [" Arch. f. Psych. u. Nervenkr.," xii, 1882, p. 535 (J).]—**F'-centrum** (Ger.), **F'kern** (Ger.). The centre of origin of the facial nerve. [I, 17 (K).]—**F'gebiet** (Ger.). The area of distribution of the facial nerve. [Berger (A, 319).]—**F'knie** (Ger.). See Genu *nervi facialis*.—**F'krampf** (Ger.). See *Convulsive* tic.—**F'lähmung.** See *Facial* paralysis.—**F'parese** (Ger.). Paresis of the facial nerve. [D, 18.]—**F'phänomen** (Ger.). The manifestation of excessive excitability of the facial nerve on the application of a stimulus; observed in tetany. [Berger (A, 319).]—**F'stamm** (Ger.). The trunk of the facial nerve. [I.]—**F'wurzeln** (Ger.). The roots of the facial nerve. [I, 6 (K).]

FACIECULA (Lat.), n. f. Fa(fa³)-si²(ki²)-e²k'u²(u⁴)-la³. Fr., *faciécule*. Ger., *kleines Gesicht*. See Facet.

FACIES (Lat.), n. f. Fa(fa³)'si²(ki²)-ez(e²s). Gen., *facie'i*. Fr., *f*. Ger., *Aussenfläche* (1st def.), *Angesicht* (2d def.). 1. The general exterior appearance of anything. [A, 385.] 2. The face, particularly with reference to its general appearance as indicative of health or of some special form of disease.—**Corvisart's f.** See *F. cardiaque*.—**F. agonique** (Fr.). See *F. hippocratica*.—**F. articularis.** An articular surface.—**F. asystolique** (Fr.). See *F. cardiaque*.—**F. auricularis.** See *Auricular* facet.—**F. cadaverica.** See *F. hippocratica*.—**F. cancerosa.** The facial appearance characteristic of cancerous disease. [a, 29.]—**F. cardiaque** (Fr.). Of Corvisart, an apathetic or anxious expression, which may or may not be accompanied with cyanosis or œdema, sometimes seen in the early stages of chronic disease of the heart. [L.]—**F. cholerica, F. choleritica.** Fr., *f. cholérique*. Ger., *Choleragesicht*. The peculiar f. of malignant cholera. The eyes are sunken, red, and congested, the cornea is flattened, the spaces beneath the orbits are livid, the features are pinched and rigid, the lips and tongue are purple, and the complexion is thick and muddy. [A, 326 (a, 21); D, 1.]—**F. gastrica.** The f. of patients suffering from chronic diseases of the stomach; characterized by deeply marked labial and nasal lines, pallor, and emaciation. [A, 326 (a, 21).]—**F. hippocratica.** Fr., *f. hippocratique*. Ger., *Hippocratisches Gesicht*. A peculiar f. first described by Hippocrates as an indication of approaching death, but which may result from long-continued diarrhœa. It consists in a sharp nose, hollow eyes, collapsed temples, cold, contracted ears, the lobes being turned outward, the skin of the forehead rough, distended, and parched, and the color of the face green, black, livid, or lead-colored. [D, 25.]—**F. hysterica.** The f. characteristic of hysteria. It consists mainly in a restless and unsettled expression, the facial muscles being in active contraction. [D, 35.]—**F. leontina, F. leprosa.** See Leontiasis.—**F. ovariana, F. ovarica.** Of Spencer Wells, the f. of women suffering from ovarian cysts; characterized, according to Winckel, by very prominent cheek bones, a sharp nose, sharply defined nostrils, compressed lips, depressed corners of the mouth, deep wrinkles in the vicinity of the mouth, and a furrowed forehead. [C. K. Briddon, " N. Y. Med. Jour.," Feb. 8, 1890, p. 141; A, 326 (a, 21).]—**F. pneumonique** (Fr.). The f. of pneumonia; characterized by general suffusion and animation, and by marked dilatation of the nostrils with each inspiratory effort. [L, 88 (a, 18).]—**F. progenæa.** Ger., *progenäe Schädelbildung*. A deformity of the skull associated with idiocy and due to arrested development of the base of the skull in childhood. It is characterized by a very prominent inferior maxilla, a narrow face, depressed below the chin and forehead, a much developed crown, and a slightly developed posterior part of the head. [A, 326 (a, 21).]—**F. rubra.** See Rosacea.—**F. tetanica.** The facial and bodily appearance characteristic of tetanus. [a, 29.]—**F. tubercularis.** The appearance characteristic of tubercular disease. [a, 29.]—**F. tortualis.** See *F. hippocratica*.—**F. uterina.** Fr., *f. utérin*. 1. The uterine surface of the placenta. 2. A peculiar change in the appearance of the face, described by Aran as seen in cases of suppuration within the pelvis; the face becomes pale, but of a shade intermediate between the dead white of anæmia and the yellowish dead-leaf tint of cancer. [A, 62.]—**F. vara.** A more or less pronounced depression of the outline of the inferior maxilla resulting chiefly from contracture of the external pterygoid muscle. [A, 326 (a, 21).]—**Wells's f.** See *F. ovarica*.

FACKELDISTEL (Ger.), n. Fa³k'a²l-di²st-e²l. See Cactus (1st def.) and Cereus (3d def.).—**Breite F.** The *Cactus tuna*. [L, 80.]—**Gemeine F.** The *Cactus opuntia*. [L, 80.]—**Grossblumige F.** The *Cactus grandiflorus*. [L, 80.]—**Peitschenförmige F.** The *Cactus flagelliformis*. [L, 80.]

FACKELKRAUT (Ger.), n. Fa³k'e²l-kra³-u⁴t. The *Verbascum thapsus*. [B, 180 (a, 24).]

FACO DE LOUP, n. In Provence, the *Lycopsis arvensis*. [B, 121 (a, 24).]

FACTITIOUS, adj. Fa²k-ti²sh'u³s. Lat., *factitius* (from *facere*, to make). Fr., *factice*. Ger., *künstlich*. Artificial; made in imitation of what is natural.

FACTITIUM (Lat.), n. n. Fa²k(fa³k)-ti²sh(ti²t)'i²-u³m(u⁴m). An artificial product. [L, 135 (a, 14).]

FÄCULENT (Ger.), n. Fa-ku-le²nt'. See Fæculent.

FACULTAS (Lat.), n. f. Fa²k(fa³k)-u³l(u⁴l)'ta²s(ta³s). Gen., *facultat'is*. See Faculty.—**F. attractrix.** Ger., *anziehende Facultät*. The psychical power of attraction. [a, 29.]—**F. auctrix, F. formatrix, F. nutrix, F. vegetativa.** The ability to originate, form, nourish, or animate. [a, 29.]—**Facultates naturales.** Natural capacity for certain classes of mental or psychical activity. [a, 29.]

FACULTATIVE, adj. Fa²k'u²l-ta-ti²v. Fr., *facultatif*. Ger., *facultativ*. See Ectogenous.

FACULTATIV-SAPROPHYTISCH (Ger.), adj. Fa²k-ul-ta³t-ef'sa³p-ro-fu⁶t'i²sh. Ectogenous and saprophytic. [B, 206.]

FACULTY, n. Fa²k'u³l-ti². Gr., δύναμις (1st def.). Lat., *facultas* (from *facere*, to do). Fr., *faculté*. Ger., *Vermögen* (1st def.), *Fähigkeit* (1st def.), *Facultät*. 1. The inherent quality or power of performing a certain physiological act; in the pl., *faculties*, the senses together with the mental attributes. 2. A collective term for the teachers in a university or in any department of a university; in popular language, the members of a profession.—**Affective faculties.** Capacity for emotional activities. [a, 29.]—**Germinative f.** Fr., *faculté germinative*. The intrinsic power of a germ to develop into a plant. [B, 121 (a, 24).]

FÁDAJE MÁDANI (Ar.), n. Magnesium and iron silicate. [A, 479 (a, 21).]

FÄDCHEN (Ger.), n. Fad-ch²e²n. A filament. [L, 304.]

FADEN (Ger.), n. Fa³d'e²n. 1. A fibril or filament, especially one of the finer filaments of the nuclear reticulum. [Frommann, " Jena Ztg.," 1884, p. 1 (J).] 2. A greatly elongated cell. [A, 396 (a, 21).]—**Achromatische f.** See *Achromatic* fibrils.—**Bartf'.** The barbels or cirri around the mouth of some fishes, amphibia, etc. [" Arch. f. Anat. u. Phys.," 1861, p. 603 (J).]—**Blasse F.** See *Achromatic* fibrils.—**Ependymf'.** See under Ependym.—**F'ähnlich, F'artig, F'förmig.** See Filiform.—**F'gewebe.** A tissue composed of fine threads; fibrous connective tissue. [J.]—**F'knäuel.** See Convolution.—**F'loch.** The opening made by the introduction of a suture.—**F'pilze.** See Hyphomycetes.—**F'probe.** Garrod's thread test for detecting uric acid. [a, 29.]—**F'spindel.** See *Nuclear* spindle.—**F'tragend.** See Comophorous.—**F'zellgewebe.** Fibrous connective tissue. [J.]—**Fangf'.** Stinging threads. [J.]—**Gefässf'.** A small blood-vessel. [J.]—**Hyphasmaf'.** Supposed mycelial threads of a fungus, causing matting of the hair, as in plica polonica. [" Arch. f. Anat. u. Phys.," 1846, p. 158 (J).]—**Intranucleäre Fäden.** See *Achromatic* fibrils.—**Kernfäden.** See *Achromatic* fibrils.—**Kiemenf'.** A branchial filament. [" Arch. f. Anat. u. Phys.," 1845, p. 198, 199 (J.)].—**Knorpelf'.** A slender mass or thread of cartilage. [" Arch. f. Anat. u. Phys.," 1845, p. 199 (J.)]—**Muskelf'.** See *Muscular* fibre.—**Nervenfäden.** See *Nerve*-fibres.—**Nesselfäden.** The stinging threads of the *Cœlenterata*. [J, 11.]—**Primitivfäden.** The primitive fibres of a muscle or nerve. [J.]—**Purkinje'sche F.** See Fibres *of Purkinje*.—**Samenfäden.** See Zoosperm.—**Subdurale Fäden.** Of Schwalbe, a series of delicate connective-tissue fibres extending between the spinal dura and the arachnoid. [I, 17 (K).]—**Verbindungsfäden.** See *Achromatic* fibrils.—**Wimperfäden.** See Cilia.—**Zellfäden.** See *Achromatic* fibrils.

FADENFIGUR (Ger.), n. Fa³d'e²n-fe-gur". A filamentous structure.—**Achromatische F.** See *Nuclear* spindle.

FADENTANG (Ger.), n. Fa³d'e²n-ta³n². The genus *Scytosiphon*. [B, 180 (a, 24).]—**Gemeiner F.** The *Scytosiphon filum*. [B, 180 (a, 24).]

FADENWURM (Ger.), n. Fa³d'e²n-vurm. See Filaria.—**F. von Medina, Guinee'scher F., Medinensischer F.** See Filaria *medinensis*.

FADUJ (Ar.), n. See Bezoar.

FÆ-BERRY, n. Fa'be²r-i². See Fay-berry.

FÆCAL, adj. Fe'ka²l. Lat., *fæcalis*. Fr., *fécal*. Ger., *fäcal*, *kothig*. It., *fecale*. Sp., *fecal*. Of or pertaining to fæces.

FÆCATION, n. Fe-ka'shu³n. Of the old chemists, the rejection of the useless or excrementitious matter of a substance submitted to chemical analysis. [Hoefer (a, 27).]

FÆCES (Lat.), n. f., pl. of *fæx*. Fe'(fa³'e²)-sez(kas). Fr., *féces*. Ger., *Fäces*, *Bodensatz* (1st def.), *Koth* (2d def.). It., *fecce*. 1. A sediment. 2. Intestinal excrement.—**F. vini.** The sediment deposited in urine. [L, 135 (a, 27).]

FÆCULA (Lat.), n. f. Fe²k'(fa³'e²k)-u²(u⁴)-la³. Dim. of *fæx*. Fr., *fécule*. Ger., *Bodenmehl* (1st def.), *Stärkemehl* (2d def.). 1. Solid matter suspended in or precipitated from an expressed juice. 2. Starch. [A, 301.]

FÆCULENTIA (Lat.), n. f. Fe²k(fa³-e²k)-u²(u⁴)-le²n'shi²(ti²)-a³. See Feculence.

FÆCULENTUS (Lat.), adj. Fe²k(fa³-e²k)-u²(u⁴)-le²n'tu²s(tu⁴s). See Feculent.

FÆNUGRÆCUM (Lat.), n. n. Fe²n(fa³-e²n)-u²(u)-gre'(gra³'e²)-ku²m(ku⁴m). See Fenugreek.—**Semen fænugræci** [Ger. Ph.]. See Fenugreek.

FÆX (Lat.), n. f. Fe²x(fa³'e²x). Gen., *fæcis*. See Fæcula; in the pl., see Fæces.—**F. sacchari, Sacchari f.** Treacle. [B, 81 (a, 21).]

FAGARA (Lat.), n. f. Fa(fa^3)-ga(ga^3)'ra^3. Fr., *fagarie, fagarier*. The genus *Xanthoxylon*. [B, 121 (*a*, 24).]—**F. Avicennæ.** The *Xanthoxylon avicennæ*. [*a*, 24.]—**F. budrunga.** The *Xanthoxylon budrunga*. [B, 172, 180 (*a*, 24).]—**F. capenesis.** See Xanthoxylon *capense*.—**F. elaphrium glabrum.** A variety of *Elaphrium tomentosum*. [B, 173, 180 (*a*, 24).]—**F. emarginata.** The *Xanthoxylon emarginatum*. [B, 180 (*a*, 24).]—**F. evodia.** The *Evodia hortensis*. [B, 180 (*a*, 24).]—**F. guianensis.** The *Xanthoxylon hermaphroditum*. [B, 173 (*a*, 24).]—**F. heterophylla.** The *Xanthoxylon heterophyllum*.—**Flentiscifolia.** The *Xanthoxylon pterota*. [B, 180 (*a*, 24).]—**F. major, F. nitida.** The *Xanthoxylon nitidum*. [B, 180 (*a*, 24).]—**F. octandra.** The *Elaphrium tomentosum*. [B, 173, 180 (*a*, 24).]—**F. pentandra.** The *Xanthoxylon hermaphroditum*. [B, 173, 180 (*a*, 24).]—**F. piperita.** Fr., *f.* (ou *fagarier*) *poivre*. The *Xanthoxylon nitidum*. [B, 180 (*a*, 24).]—**F. rhetsa.** The *Xanthoxylon rhetsa*. [B, 180 (*a*, 24).]—**F. ternata.** The *Xanthoxylon ternatum*. [B, 180 (*a*, 24).]—**F. triphylla.** The *Xanthoxylon triphyllum*.—**F. xanthoxyloides.** The *Xanthoxylon senegalense*. [B, 180 (*a*, 24).]

FAGARIER (Fr.), n. Fa^3-ga^3-re-a. See Fagara.—**F. à huit étamines.** The *Elaphrium tomentosum*. [B, 173 (*a*, 24).]—**F. du Cap.** The *Fagara capensis*. [B, 173 (*a*, 24).]—**F. glabre.** See Fagara *elaphrium glabrum*.—**F. poivre.** See Fagara *piperita*.

FAGHUREH (Pers.), n. The *Xanthoxylon rhetsa*. [A, 505 (*a*, 21).]

FAGI (Jap.), n. The *Lylhrum salicaria*. [B, 88 (*a*, 14).]

FAGICOLUS (Fr.), adj. Fa^{2}j(fa^{3}g)-i^{2}k'o^{2}l-u^{3}s(u^{4}s). From *fagus*, the beech, and *colere*, to inhabit. Fr., *fagicole*. Ger., *buchenbewohnend*. Growing upon the beech-tree. [L, 41, 180.]

FAGINE, n. Fa'jen. Lat., *fagina*. Fr., *f.* Ger., *Fagin, Bucheckernstoff*. An alkaloid of unknown composition, discovered by Buchner in the fruit of the beech-tree ; by some considered identical with pyremetine. [L, 41, 87 (*a*, 14).]

FAGIOLINA (It.), n. Fa^3-ji^2-o-le'na^3. The *Dolichos catjang*. [B, 121 (*a*, 24).]

FAGIOLO (It.), n. Fa^3-ji^2-o'lo. The genus *Phaseolus*. [B, 121 (*a*, 24).]

FAGITRITICUM (Lat.), n. n. Fa^{2}j(fa^{3}g)-i^2-tri^{2}t(tret)'i^{2}k-u^{3}m-(u^{4}m). See Fagopyrum.

FAGONIA (Lat.), n. f. Fa^{2}g(fa^{3}g)-o'ni^2-a^3. Fr., *fagonie*. A genus of the *Fagonieæ* (Fr., *fagoniées*), which are a tribe of the *Zygophylleæ*. [B, 42, 170 (*a*, 24).]—**F. mysorlensis.** A species found in India. Its leaves are succulent, bitter, astringent, and somewhat aromatic. In decoction or infusion it is used as a tonic, astringent, and diuretic. [A, 479 (*a*, 21).]

FAGOPYRUM (Lat.), n. Fa^{2}g(fa^{3}g)-o(o^3)-pir(pu^{6}r)'u^{3}m(u^{4}m). From *fagus*, the beech, and πυρός, wheat. 1. Of Bentham and Hooker, a genus of polygonaceous herbs, of the *Eupolygoneæ*. 2. Of Klotzsch and others, the genus *Polygonum*. [B. 42, 121 (*a*, 24).]—**F. carinatum.** The *Polygonum convolvulaceum*. [B, 173 (*a*, 24).]—**F. dentatum.** The *Polygonum tataricum*. [B, 173 (*a*, 24).]—**F. dumetorum.** The *Polygonum dumetorum*. [B, 173 (*a*, 24).]—**F. esculentum.** Fr., *sarrasin, blé noir* (ou *rouge*) *bucail, carabin, dragées de cheval*. Ger., *gemeiner Buckweizen, Heidekorn, Haidel, Haden, blinde Gricken*. Buckwheat ; a widely distributed species, indigenous to Europe and middle Asia. The seeds, *semen fagopyri* (seu *fagotritici*, seu *tritici fagini*), furnish a meal (*farina fagopyri*) used in cataplasms and as a food. [B, 173, 180 (*a*, 24).]—**F. membranaceum.** The *Polygonum dumetorum*. [B, 173 (*a*, 24).]—**F. tataricum.** Fr., *sarrasin de Tartarie, blé de Tartarie*. A species cultivated in Europe as a cereal. The leaves are sometimes eaten. The fruit was formerly official. [B, 173, 180 (*a*, 24).]—**F. volubilis.** The *Anredera scandens*. [*a*, 24.]—**F. vulgare.** The common buckwheat. [*a*, 24.]—**Farina fagopyri.** Buckwheat meal. [B, 180 (*a*, 24).]—**Semen fagopyri.** The seed of *F. esculentum* ; a triangular, smooth, blackish-brown seed of about the size of a hemp-seed, having a ferruginous taste. [B, 97 (*a*, 21).]

FAGOPYRUS (Lat.), n. m. Fa^{2}g(fa^{3}g)-o(o^3)-pir(pu^{6}r)'u^{3}s(u^{4}s). A more correct form of *fagopyrum* (*q. v.*).

FAGOTRITICUM (Lat.), n. n. Fa^{2}g(fa^{3}g)-o(o^3)-tre^{2}t(tret)'i^{2}k-u^{3}m(u^{4}m). See Fagopyrum.—**Semen fagotritici.** The seed of *Fagopyrum esculentum*. [B, 180 (*a*, 24).]

FAGOUE (Fr.), n. Fa^3-gu. Sweetbread ; the pancreas of the pig and the thymus of the calf. [A, 301.]

FAGRÆA (Lat.), n. f. Fa^{2}g(fa^{3}g)-re'gra^3(e^2)-a^3. Fr., *fagré, fagrée*. Of Thunberg, a genus of loganiaceous trees or shrubs. The *Fagrœaceœ* of Meissner and De Candolle are a tribe of the *Loganieœ*. The *Fagrœeœ* of Miquel are a tribe of the *Loganiaceœ*. [B, 42, 170 (*a*, 24).]—**F. auriculata.** A species employed medicinally in Asia. [B, 121 (*a*, 24).]—**F. malabarica, F. peregrina.** Species used medicinally in Asia. [B, 121 (*a*, 24).]

FAGUS (Lat.), n. f. Fa(fa^3)'gu^{3}s(gu^{4}s). Fr., *hêtre*. Ger., *Buche*. Sp., *haya*. The beech ; of Linnæus, a genus of cupuliferous trees of the *Quercineœ*.—**Bitumen fagi.** Ger., *Buchentheer*. Beech-tar. [Bernatzik (A, 319).]—**F. betuloides.** Evergreen beech ; a variety of the common beech, with small leaves like those of birch, but firmer. It is indigenous to Tierra del Fuego. [B, 185 (*a*, 24).]—**F. castanea.** A species found in China and Cochin-China, where it is used like *Castanea vulgaris*. [B, 180 (*a*, 24).]—**F. castanea pumila.** See Castanea *pumila*.—**F. comptonifolia, F. crista galli.** Fr., *hêtre à feuilles de comptonia, hêtre crête de coq*. Varieties of *F. silvatica*. [B, 173 (*a*, 24).]—**F. ferruginea.** Fr., *hêtre ferrugineux* (ou *rouge*). A North American species having properties similar to those of *F. silvatica*. In Michigan the leaves are used in cataplasms for burns and scalds. [B, 173, 180 (*a*, 24) ; "Proc. of the Am. Pharm. Assoc.," vii (*a*, 14).]—**F. heterophylla.** Fr., *hêtre hétérophylle*. A variety of *F. silvatica*. [B, 173 (*a*, 24).]—**F. nana, F. pumila.** See Castanea *pumila*.—**F. purpurea.** See *F. silvatica*.—**F. rubra.** Fr., *hêtre rouge*. A variety of *F. silvatica*. [B, 173 (*a*, 24).]—**F. silvatica, F. silvestris.** Fr., *hêtre des bois, fan, faon, fau, favinier, fayard, fayau, fouteau, foyard, hêtre blanc*. Ger., *gemeine Buche, Rothbuche*. A species found in Europe and North America. The nuts (*nuces fagi*) yield a mild, pleasant oil, beech-nut oil (*oleum fagi*), used as a food and for other domestic purposes. The bark, leaves, and capsules are used in tanning. [B, 173, 180, 185 (*a*, 24).]—**Nuces fagi.** Fr., *fame*. Ger., *Bucheicheln*. Beech-nuts (obtained from *F. silvatica*). [B, 180 (*a*, 24).]—**Oleum fagi.** Fr., *huile de fame*. Ger., *Bucheichelöl*. Beech-nut oil (obtained from the fruit of *F. silvatica*). [B, 180 (*a*, 24).]—**Sapo piceus e bitumine fagi.** Ger., *Buchentheerseife*. A soap made by heating together 4 parts each of tallow, beech-tar, and solution of caustic soda, and adding 1 part of oil of cedar. [Bernatzik (A, 319).]

FAHAM [Fr. Cod.], **FAHAME** (Fr.), n's. Fa^3-a^{3}n^2. See Angræcum *fragrans*.

FAHAMIN, FAHANIN, n's. In the East, the *Santolina fragrantissima*. [B, 121, 180 (*a*, 24).]

FÄHIGKEIT (Ger.), n. Fa'i^{2}g-kit. See Aptitude and Faculty.

FAHL (Ger.), adj. Fa^{3}l. Pale. [A, 523.]—**F'sucht.** See Chlorosis.

FAHNE (Ger.), n. Fa^{3}n'e^2. See Vexillum.—**F'nförmig.** See Vexillary.—**F'ngeräusch.** See Brint *de diable*.—**F'nhafer.** See Avena *orientalis*.

FAHON, n's. See Faham.

FAHRBAHRE (Ger.), n. Fa^{3}r'ba^{3}r-e^2. In field-hospitals, a sort of litter which, after removing the wounded from the field, can be promptly fixed on a pair of wheels for removal to the hospital by a single person. [*a*, 14.]

FAIAR, n. In Provence, the beech (*Fagus*). [B, 121 (*a*, 24).]

FAIFAI, n. In Tahiti, the *Acacia myriadenia*. [B, 121 (*a*, 24).]

FAIM (Fr.), n. Fa^{2}n^2. Hunger.—**F. canine, F.-valle.** See Bulimia.

FAÎNE (Fr.), n. Fa^3-en. The fruit of *Fagus silvatica*. [B. 121, 173 (*a*, 24).]—**Huile de f.** See *Oleum* fagi.—**Tourteau de f.** The residue of beech-nuts after expression of the oil. [A, 301.]

FAINT, adj. Fant. Fr., *languissant*. Ger., *ohnmäehtig, kraftlos*. It., *disanimato*. Sp., *lánguido*. Wanting in physical strength, weak, having a tendency to syncope. [D.]

FAINT, FAINTING, n's. Fant. fant'i^{2}n^2. Fr., *evanouissement*. Ger., *Ohnmacht*. It., *svenimento*. Sp., *desmayo*. See Syncope.

FAINTNESS, n. Fant'ne^{2}s. Lat., *defectio virium*. The state of being faint.

FAINTS, n. Fants. The latter portions of the distillate obtained on rectifying crude spirit of wine. [B, 3 (*a*, 27).]

FAIR-DAYS, FAIR-GRASS, n's. Fa^{2}r'daz, -gra^{3}s. The *Potentilla anserina*. [A, 505 (*a*, 21).]

FAIRIES'-BATH, n. Fa^2'ri^{2}z-ba^{3}th. The *Peziza coccinea*. [A, 505 (*a*, 21).]

FAIRIES'-BUTTER, n. Fa^2'ri^{2}z-bu^{3}t-u^{6}r. The *Tremella albida* and *Tremella arborea*. [B, 275 (*a*, 24).]

FAIRIES'-HAIR, n. Fa^2'ri^{2}z-ha^{2}r. The *Cuscuta epithymum*. [A, 505 (*a*, 21).]

FAIRIES'-HORSE, n. Fa^2'ri^{2}z-ho^{3}rs. The *Senecio jacobœa*. [A, 505 (*a*, 21).]

FAIRIES'-PETTICOATS, n. Fa^2'ri^{2}z-pe^{2}t-i^2-ko^{3}tz. The *Digitalis purpurea*. [A, 505 (*a*, 21).]

FAIRIES'-TABLE, n. Fa^2'ri^{2}z-tab'l. 1. The *Agaricus campestris*. 2. The *Hydrocotyle vulgaris*. [A, 505 (*a*, 21).]

FAIR-IN-SIGHT, n. Fa^{2}r'i^{2}n-sit. The *Campanula patula*. [A, 505 (*a*, 21).]

FAIR-MAID-OF-FRANCE, n. Fa^{2}r-mad-o^{2}v-fra^{3}ns'. See Fair-maids-of-France.

FAIR-MAIDS, n. Fa^{2}r'madz. The *Galanthus nivalis*. [A, 505 (*a*, 21).]

FAIR-MAIDS-OF-FEBRUARY, n. Fa^{2}r-madz-o^{2}v-fe^{2}b'ru^2-a-ri^2. The *Galanthus nivalis*. [B, 275 (*a*, 24).]

FAIR-MAIDS-OF-FRANCE, n. Fa^{2}r-madz-o^{2}v-fra^{3}ns'. 1. The *Saxifraga granulata*. 2. The *Achillea ptarmica*. 3. The *Ranunculus aconitifolius*. 4. The *Lychnis flos cuculi*. [A, 505 (*a*, 21).]

FAIR-MAIDS-OF-KENT, n. Fa^{2}r-madz-o^{2}v-ke^{2}nt'. The double-flowered variety of *Ranunculus aconitifolius*. [A, 505 (*a*, 21) ; B. 275 (*a*, 24).]

FAIROON, n. In Languedoc, the genus *Phaseolus*. [B, 121 (*a*, 24).]

FAIRVIEW SPRINGS, n. Fa^{2}r'vu^2. A place in Limestone County, Texas, where there are springs containing sodium chloride, sodium, magnesium, and calcium sulphates, etc. [A, 363 (*a*, 21).]

FAIRY-BELL, n. Fa^2'ri^2-be^{2}l. The *Digitalis purpurea*. [A, 505 (*a*, 21).]

FAIRY-BUTTER, n. Fa^2'ri^2-bu^{3}t-u^{6}r. The *Tremella albida*. [A, 505 (*a*, 21).]

FAIRY-CAP, n. Fa^2'ri^2-ka^{2}p. The *Digitalis purpurea*. [A, 505 (*a*, 21).]

FAIRY-CHEESES, n. Fa^2'ri^2-chez-e^{2}z. The *Malva rotundifolia*. [A, 505 (*a*, 21).]

FAIRY-CUPS, n. Fa^{2}'ri^{2}-ku^{2}pz. The *Primula veris.* [A, 505 (*a*, 21).]

FAIRY-FINGERS, n. Fa^{2}'ri^{2}-fi^{2}n^{2}-gu^{5}rz. The *Digitalis purpurea.* [B, 275 (*a*, 24).]

FAIRY-FLAX, n. Fa^{2}'ri^{2}-fla^{2}x. The *Linum catharticum.* [B, 275 (*a*, 24).]

FAIRY-GLOVE, n. Fa^{2}'ri^{2}-glu^{3}v. The *Digitalis purpurea.* [A, 505 (*a*, 21).]

FAIRY-LINT, n. Fa^{2}'ri^{2}-li^{2}nt. The *Linum catharticum.* [A, 505 (*a*, 21).]

FAIRY-PURSES, n. Fa^{2}'ri^{2}-pu^{5}rs-e^{2}z. Probably the *Nidularia campanulata.* [A, 505 (*a*, 21).]

FAIRY-RINGS, n. Fa^{2}'ri^{2}-ri^{2}n^{2}z. Circles formed in the autumn on grassy lawns by certain species of *Fungi*, such as the *Marasmius oreades*, formerly supposed to be produced by supernatural agency. [B, 185 (*a*, 24).]

FAIRY-THIMBLES, FAIRY-WEED, n's. Fa^{2}'ri^{2}-thi^{2}m-b'lz, -wed. The *Digitalis purpurea.* [A, 505 (*a*, 21).]

FAISANDÉ (Fr.), adj. Fa^{2}-za^{2}n^{2}-da. From *faisan*, the pheasant. "High," gamy, having an odor verging on that of putrefaction. [A, 385.]

FAISCEAU (Fr.), n. Fa^{2}s-so. See BUNDLE and FASCICULUS.—**—F'x acoustiques.** See STRIÆ *acusticæ.*—**F. ansiforme.** Of Hélie, one of the bundles of the outermost of the three layers into which he divides the intrinsic muscular fibres of the uterus. It is made up of longitudinal fibres which, arising on the posterior surface of the organ, at the isthmus, pass upward over the fundus and, spreading out laterally, are continued, the middle ones down on the anterior surface, and the outer ones to the oviducts and the broad ligaments, where they are confounded with the extrinsic fibres. [A, 15.]—**F. antérieur du bulbe.** See *Anterior* PYRAMID.—**F. arciforme.** See F. *ansiforme* and FASCICULUS *arciformis.*—**F. arciforme de l'olive, F. arqué.** See *Arciform* FIBRES.—**F'x cérébelleux latéraux directs.** The direct lateral cerebellar tract. [*a*, 29.]—**F'x cérébelleux moyens.** The middle peduncles of the cerebellum. [*a*, 29.]—**F'x cérébelleux inférieurs.** The inferior peduncles of the cerebellum. [*a*, 29.]—**F'x cérébelleux supérieurs.** The superior peduncles of the cerebellum. [*a*, 29.]—**F'x convergents.** Converging bundles of nerve-fibres in the brain. [I, 49 (K).]—**F. cortico-bulbaire.** See FASCICULUS *cortico-bulbaris.*—**F. cunéiforme, F. de Burdach.** See *Cuneate* FUNICULUS.—**F. de la calotte.** See *Tegmental* LAYER.—**F. de la couronne radiée.** See CORONA *radiata.*—**F. de la pyramide.** See PYRAMID.—**F. de Reil.** See ISLAND *of Reil.*—**F. de renforcement.** Of Cruveilhier, the deepest bundle of nerve-fibres in that portion of the medulla oblongata which corresponds to the lateral columns. [I, 42 (K).]—**F. disséminé.** Of Gratiolet, certain bundles of interlacing nerve-fibres in the central gray matter of the spinal cord, especially in the cervical region. [I, 35 (K).]—**F'x divergents du bulbe.** The diverging anterior columns of the medulla oblongata. [I, 36 (*a*, 29).]—**F. dorso-tricipital.** A supernumerary muscular fasciculus, quadrangular in shape, situated in the axillary space, arising from the lower border of the anterior surface of the tendon of the latissimus dorsi, running directly downward a distance of 0·039 ctm., and being inserted into the long head of the triceps; found by L. Testut in a Bushman, and thought by him to be the analogue of a muscle possessed by the apes. ["Union méd.," July 22, 1884, p. 129.]—**F'x du centre ovale.** The bundles of nerve-fibres in the *centrum ovale.* [K.]—**F. du corps genouillé externe.** See *External geniculate* BODY.—**F. du pédoncule cérébral.** See *Cerebral* PEDUNCLE.—**F. du pulvinar.** See *Optical* RADIATIONS.—**F. encéphalique croisé.** The posterior lateral column. [*a*, 29.]—**F. encéphalique direct.** The anterior lateral column. [*a*, 29.]—**F. en crochet.** Ger., *Hakenbündel.* A bundle of nerve-fibres described by Huguenin as beginning on the lower surface of the frontal lobe, passing through the base of the island of Reil, then curving downward to enter the temporal lobe near the nucleus amygdalæ. [I, 28.]—**F. externe de la silique.** The external portion of the capsule of the olive. [I, 35 (K).]—**F'x fibro-vasculaires.** See *Fibro-vascular* BUNDLES.—**F'x foliaires.** See *Fibro-vascular* BUNDLES *of the leaf.*—**F. frontal inférieur.** See *Inferior frontal* CONVOLUTION.—**F. frontal moyen.** See *Middle frontal* CONVOLUTION.—**F. frontal supérieur.** See *Superior frontal* CONVOLUTION.—**F. géniculé.** A bundle of fibres in the pes pedunculi cerebri which lies next to the f. cortico-bulbaire. [*a*, 29.]—**F. grand fibreux des hémisphères.** Of Gall, the crura cerebri. [I, 3 (K).]—**F. innominé.** See SUBSTANTIA *innominata.*—**F. intermédiaire, F. intermédiaire du bulbe.** See *Olivary* FASCICULUS.—**F. interne de la silique.** The internal portion of the capsule of the olive. [I, 35 (K).]—**F. latéral.** A lateral column of the spinal cord. [I, 36 (K).]—**F. latéral du bulbe.** See *Lateral* TRACT.—**F'x libériens.** See *Cribrose* TISSUE.—**F'x libéro-ligneux.** See BAST.—**F. longitudinal arqué.** See FASCICULUS *arcuatus.*—**F. longitudinal de la calotte.** The longitudinal nerve-fibres of the tegmentum. [I, 28 (K).]—**F. longitudinal inférieur.** See *Inferior longitudinal* FASCICULUS.—**F. longitudinal supérieur.** See FASCICULUS *longitudinalis superior.*—**F. médullaires.** See STRIÆ *medullares.*—**F'x moyens.** Of Rolando, see *Olivary* FASCICULUS.—**F. musculaire primitif** (ou **strié**). See *Muscular* FIBRE.—**F. nerveux.** See FUNICULUS.—**F'x nerveux arciformes.** Arched bundles of nerve-fibres. [*a*, 29.]—**F. olivaire.** See *Olivary* BODY.—**F'x optiques.** See *Optic* TRACT.—**F. originaire du cervelet.** The inferior peduncle of the cerebellum. [I, 3 (K).]—**F. pariétal inférieur.** See *Inferior parietal* CONVOLUTION.—**F. pariétal moyen.** See *Middle parietal* CONVOLUTION.—**F. pariétal supérieur.** See *Superior parietal* CONVOLUTION.—**F. pédonculaire du corps strié.** A bundle of fibres in the internal capsule which enters the corpus striatum, of which it has been called the peduncle. [I, 28 (K).]—**F'x pédonculaires du noyau lenticulaire.** Fibres which enter the lenticular nucleus from the internal capsule. [I, 28 (K).]—**F. postérieur du bulbe détaché.** See *Posterior* PYRAMID.—**F. postérieur intermédiaire.** See *Posterior median* COLUMN. [I, 42.]—**F. primitif.** See *Muscular* FIBRE.—**F. primitif du cervelet.** See *F. originaire du cervelet.*—**F. pyramidal croisé.** The anterior columns of the medulla oblongata. [L, 114, 191 (*a*, 29).]—**F. pyramidal direct.** See *Antero-lateral* COLUMN.—**F'x pyramidaux.** See *Anterior* PYRAMIDS.—**F. rayonnant.** See CORONA *radiata.*—**F. respiratoire.** Of Bell, see *Olivary* FASCICULUS. [*a*, 29.]—**F. restiforme.** See *Restiform* BODY.—**F. sensitif.** A bundle of sensory nerve-fibres. [K.]—**F. solitaire de Stilling.** See *Solitary* FASCICULUS. [I, 28.]—**F. sous-olivaire.** See *Olivary* FASCICULUS.—**F. triangulaire.** A band of white substance extending obliquely from its point of origin in the lower part of the pons Varolii to the point where the lateral bulbar fasciculus merges into the cerebral peduncle. [L, 114 (*a*, 29).]—**F. unciforme.** See *Uncinate* CONVOLUTION.

FAIU, n. In Provence, the *Verbascum thapsus.* [B, 121 (*a*, 24).]

FAIX (Fr.). n. Fe^{2}. An old term for the contents of the gravid uterus. [A, 518.]

FAJOTTINO (It.), n. Fa^{3}-yot-te'no. The wild anemone. [B, 121 (*a*, 24).]

FAKA (Jap.), n. The MENTHA *piperita.* [B, 88 (*a*, 14).]

FAKONA (Jap.), n. The ASPLENIUM *trichomanes.* [B, 88 (*a*, 14).]

FAKULIYUN (Ar.), n. The leaves of *Lawsonia alba.* ["Proc. of the Am. Pharm. Assoc.," xxvii (*a*, 14).]

FAKUS (Ar.), n. Of Forskål, the cucumber. [B. 121 (*a*, 24).]

FALABREGUIL, n. In Provence, the nettle-tree (*Celtis*). [B, 121 (*a*, 24).]

FALABREQUIER, FALABRIGÜIER, n's. In southern France, the *Celtis australis.* [B, 173 (*a*, 24).]

FALCADINA (It.), n. Fa^{2}lk-a^{3}-den'a^{2}. Fr., *falcadine.* A supposed variety of syphilis (by some regarded as leprosy) which, in 1786, was introduced into the village of Falcado (or Falcaldo), province of Belluno, in northern Italy. It was marked by scabby eruptions, ulcers in the throat and nasal fossæ, destruction of the nose, and serpiginous ulcerations in various parts of the body. [G.]

FALCANOS (Ar.), n. Of the alchemists, arsenic. [L, 94 (*a*, 21).]

FALCARIA (Lat.), n. f. Fa^{2}l(fa^{3}l)-ka(ka^{3})'ri^{2}-a^{3}. A genus of the *Ammineæ*, closely allied to *Carum.* [B, 42 (*a*, 24).]—**F. Rivini.** Ger., *Sichelkraut*, *Feldbacillen*, *Ackerbacillen.* A species growing throughout Europe and the East. The herb has a somewhat bitterish, salty, slightly aromatic taste and was once in use as a diuretic and stimulant. In some parts of Europe the juice of the fresh herb is used for wounds of domestic animals. [B, 180 (*a*, 24).]

FALCATE, FALCATED, adj's. Fa^{2}l'kat, -e^{2}d. Lat., *falcatus* (from *falx*, a sickle). Fr., *falqué.* Ger., *sichelig.* Scythe-shaped or sickle-shaped. [B, 119, 121 (*a*, 24).]

FALCIAL, adj. Fa^{2}l'si^{2}-a^{2}l. Connected with or in the vicinity of the falx cerebri. [L, 14.]

FALCIFERUS (Lat.), adj. Fa^{2}l(fa^{3}l)-si^{2}f(ki^{2}f)'e^{2}r-u^{3}s(u^{4}s). From *falx*, a sickle, and *ferre*, to bear. Fr., *falcifère.* Having sickle-shaped folds upon the sides (said of certain species of the *Ammoneæ*). As a n., in the f. pl., *Falciferæ* (Fr., *falciférées*), a tribe of the *Ammoneæ*). [L, 180.]

FALCIFOLIUS (Lat.), adj. Fa^{2}l(fa^{3}l)-si^{2}(ki^{2})-fol(fo^{2}l)'i^{2}-u^{3}s-(u^{4}s). From *falx*, a scythe, and *folium*, a leaf. Fr., *falcifolié.* Having scythe-shaped leaves. [L, 41.]

FALCIFORM, adj. Fa^{2}l'si^{2}-fo^{2}rm. Lat., *falciformis* (from *falx*, a scythe, and *forma*, form). Fr., *falciforme.* Ger., *sichelförmig.* Sickel-shaped. [L, 43.]

FALCINELLUS (Lat.), n. Fa^{2}l(fa^{3}l)-si^{2}(ki^{2})-ne^{2}l'lu^{3}s(lu^{4}s). Of Johnson, a species of heron, the fat of which was formerly employed as a resolvent, as a nervine, and as a remedy for corneal opacities. [L, 94.]

FALCIROSTRIS (Lat.). adj. Fa^{2}l(fa^{3}l)-si^{2}(ki^{2})-ros'tri^{2}s. From *falx*, a scythe, and *rostrum*, a beak. Fr., *falcirostre.* Having a sickle-shaped beak or jaws. [L, 180.]

FALCO (Lat.), n. m. Fa^{2}l(fa^{3}l)'ko. Gen., *falcon'is.* Fr., *faucon.* Ger., *Falke.* A genus of the *Falconidæ*, various species of which were formerly in medicinal use. The fat was employed in optical disorders, and as a resolvent, nervine, and sudorific. The flesh was eaten for cerebral affections. The *Falcones*, or *Falconidæ* (Fr., *falconidées*), are a family or section of the diurnal *Raptores* (*Accipitres*). The *Falconina* are a tribe and the *Falconinæ* a subfamily of the *Falconidæ.* [L, 94, 147, 180, 221.]—**F. chrysætos.** Ger., *Steinadler*, *Goldadler.* Of Galen and Pliny, a species the tongue of which was worn as an amulet. The gall was used for cataracts, and the fat as an emollient, anodyne, and resolvent. The skin, while still covered with feathers, was recommended for abdominal pains, and the wing placed under the foot of a woman in labor was supposed to facilitate delivery; the vapor exhaled from the excrements, when thrown into a fire, was recommended for nervous affections, etc. [L, 105.]—**F. communis.** Ger., *gemeiner Falk*, *Taubenfalk.* A species the flesh, fat, and excrement of which were formerly considered medicinal. [B, 88, 180 (*a*, 14).]—**F. milvus.** Ger., *gemeiner Gabelweih*, *rother Milan.* A species the flesh, liver, fat, and dung of which were formerly used medicinally. [B, 88, 180 (*a*, 14).]—**F. nisus.** Ger., *Sperber*, *Finkenhabicht.* A species the eyes of which were formerly worn as amulets, and the flesh, fat, and dung used in various diseases. [B, 180 (*a*, 14); L, 105.]—**F. subbuteo.** Ger., *Baumfalk*, *Lerchenfalk.* A species the testicles of which have been said to be aphrodisiac. [B, 180 (*a*, 14); L, 105.]

FALCONINE, adj. Fa^{4}l'kon-i^{2}n. Hawk-like; belonging to the *Falconidæ.* [L, 343.]

FALCULAR, adj. Fa^{2}lk'u^2-la^{3}r. Lat., *falcularis* (from *falx*, a scythe). Fr., *falculaire*. Ger., *krallenförmig*. Sickle-like; elongated, attenuated, and implanted on the superior aspect of the ungual phalanges (said of nails or claws). [L, 180.]

FALCULATE, adj. Fa^{2}l'ku^2-lat. Lat., *falculatus* (from *falx*, a scythe). Fr., *falculé*. Of a finger, furnished with a falcular nail. The *Falculata* (Fr., *falculés*) are an order of the *Mammifera* so characterized. [L, 180.]

FALDELLA (Lat.), n. f. Fa^{2}l(fɛ^{3}l)-de^{2}l'la^3. Of Martius, twisted lint, used for compresses, etc. [L, 94.]

FALÈRE (Fr.), n. Fa^3-le^{2}r. A disease of sheep pastured near the sea in Catalonia and in the eastern Pyrenees; characterized by violent convulsions, labored breathing, and great tympanites, and usually proving fatal within an hour or two. [A, 301.]

FALIGOULE, n. In Provence, the *Thymus vulgaris*. [B, 121, 173 (a, 24).]

FALIGOULETO, n. In Provence, the *Thymus serpyllum*. [B, 121 (a, 24).]

FALIGOULO, n. See FALIGOULE.

FALKA (Jap.), n. See FAKA.

FALKE (Ger.), n. Fa^{3}lk'e^2. See FALCO.—**F'nbinde.** See ACCIPITER.—**Gemeiner F.** See FALCO *communis*.

FALKENBERG (Ger.), n. Fa^{3}lk'e^{2}n-be^{2}rg. A place in the Upper Palatinate district, Bavaria, where there is a spring containing free carbonic acid, calcium, magnesium, and sodium carbonates, and sodium chloride and sulphate. [L, 30, 37, 105 (a, 14).]

FALL (Ger.), n. Fa^{3}l. 1. A fall. 2. See CASE (1st def.).—**F'beule.** A bruise caused by a fall. [a, 29.]—**F'hut.** See BOURRELET.—**F'kraut.** The genus *Arnica*, especially the *Arnica montana*. [B, 121, 180 (a, 24).]—**F'sucht.** Epilepsy. [A, 521.]

FALLACIA (Lat.), n. f. Fa^{2}l(fa^{3}l)-la(la^3)'si^2(ki^2)-a^3. Ger., *Täuschung*. An illusion. [A, 322.]—**F. optica.** Ger., *optische Täuschung*. An optical illusion. [A, 322.]

FALLAX (Lat.), adj. Fa^{2}l(fa^{3}l)'la^{2}x(la^{3}x). Spurious, false. [a, 24.]

FALLEN-STARS, n. Fa^{4}l-e^{2}n-sta^{3}rz'. The *Nostor commune*. [B, 275 (a, 24).]

FALLETTE (Fr.), n. Fa^{3}l-e^{3}t. See ATRIPLEX *hortensis*.

FALLING, n. Fa^{4}l'i^{2}n^2. Lat., *lapsus*. Fr., *chute*. Ger., *F.* See PROLAPSE.—**F. of the belly.** A popular term for the partial subsidence of the enlargement of the abdomen that takes place as a premonitory symptom of labor.—**F. of the body, F. of the bowel.** See PROLAPSUS *recti*.

FALLOPIAN, FALLOPPIAN, adj's. Fa^{2}l-o'pi^2-a^{2}n. Described by Gabriello Falloppio.

FALL-POISON, n. Fa^{4}l'poi-z'n. The *Amianthium muscætoxicum*. [B, 275 (a, 24).]

FALLTRANK (Ger.), n. Fa^{3}l'tra^{3}n^{2}k. Fr., *thé* (ou *vulnéraire*) *suisse* (2d def.). 1. A vulnerary plant, especially a species of *Arnica*. [B, 121 (a, 24).] 2. Swiss tea; a variable mixture of herbs (of various species of *Arnica*, *Achillea*, *Valeriana*, etc.), used in infusion as a restorative in cases of injury, also by women at the time of the menopause. [A, 301.]

FALLU, n. In Chili, the *Flotovia diacanthoides*; a decoction of the bark is used for convulsions. [B, 121 (a, 24); "Proc. of the Am. Pharm. Assoc.," xvi (a, 14).]

FÄLLUNG (Ger.), n. Fal'lun^2. See PRECIPITATION.—**F'smittel.** A precipitant. [L, 80.]

FALON, n. See BALEEN.

FALQUÉ (Fr.), n. Fa^{3}l-ka. See FALCATE.

FALSA (Hind., Beng.), n. The *Grewia asiatica*. [B, 172 (a, 24).]

FALSCH (Ger.), adj. Fa^{3}lsh. See FALSE.—**F'paarig.** See DISPAR.

FÄLSCHUNG (Ger.), n. Falsh'un^2. See ADULTERATION.

FALSE, adj. Fa^{4}ls. Lat., *falsus* (from *fallere*, to deceive). Fr., *faux*. Ger., *falsch*. It., Sp., *falso*. 1. Not genuine. 2. Unnatural (see *F.* JOINT, *F.* PASSAGE, etc.).

FALSE-NERVED, adj. Fa^{4}ls-nu^{5}rvd'. Lat., *falsinervis* (from *falsus*, false, and *nervus*, a nerve). Fr., *falsinervé*. Having nervules with no vascular tissue, but formed of simple, elongated cellular tissue, as in mosses. [B, 19 (a, 24).]

FALSET (Sp.), n. Fa^{3}l-se^{2}t'. A place in the province of Tarragona, Spain, where there is an alkaline spring. [L, 49; Bescherelle (a, 14).]

FALSETTO, n. Fa^{4}l-se^{2}t'o. Fr., *fausset*. Ger., *Kopfstimme*. It., *f.* Sp., *falsete*. The head register of a man's voice, resembling the voice of a woman; produced by relaxation of the vocal bands. [A, 306.]

FALSIFICATION, n. Fa^{4}ls-i^2-fi^2-ka'shu^{3}n. From *falsus*, false, and *facere*, to do. Fr., *f.* Ger., *verfälschung*. See ADULTERATION.

FALSINERVIS (Lat.), adj. Fa^{2}l(fa^{3}l)-si^2-nu^{5}r(ne^{2}r)'vi^{2}s(wi^{2}s). Fr., *falsinerve*. See FALSE-NERVED.

FALSODICTAMNUM (Lat.), n. n. Fa^{2}l(fa^{3}l)'so(so^3)-di^{2}k-ta^{2}m(ta^{3}m)'nu^{3}m(nu^{4}m). See PSEUDODICTAMNUS.

FÄLTCHEN (Ger.), n. Falt-ch^{2}e^{2}n. A small fold. [L.]—**Mondförmiges F. der Conjunctiva.** See MEMBRANULA *semilunaris conjunctivæ*.

FALTE (Ger.), n. Fa^{3}lt'e^2. A fold; of Reil, the hippocampus minor. [I, 3 (K).]—**Adergeflechtsf'.** A fold of the chorioid plexus in the descending cornu of the lateral ventricle.—**Afterf'.** The cleft between the nates. [L, 59.]—**Amnionsf'.** See the major list.—**Eileiterf'n.** Folds or rugæ in the oviduct. [J.]—**F. der Hinterstränge.** The groove between the posterior columns of the spinal cord. [a, 29.]—**F'nkranz.** See CORONA *radiata*.—**F'nmagen.** See OMASUM.—**F'npilz.** See the major list.—**F'nschnecken.** The *Volutidæ*. [L, 353.]—**F'nschwamm.** See the major list.—**Grosse F.** [Mayer]. See VALVE *of Vieussens*.

FALTENMORCHEL (Ger.), n. Fa^{3}lt'e^{2}n-mo^{2}rch^2-e^{2}l. The genus *Helvella*. [B, 180 (a, 24).]

FALTENOHR (Ger.), n. Fa^{3}lt'e^{2}n-or. The genus *Ptycholis*. [B, 180 (a, 24).]—**Indisches F.** 1. The *Ptychotis ajowan*. [B, 180 (a, 24).] 2. See CARUM *ajowan*.—**Koptisches F.** The *Ptychotis copitica*. [B, 180 (a, 24).]—**Roxburgh's F.** The *Ptychotis roxburghiana*. [B, 180 (a, 24).]

FALTENPILZ (Ger.), n. Fa^{3}lt'e^{2}n-pi^{2}ltz. See CANTHARELLUS.—**Gemeiner F.** The *Cantharellus cibarius*. [B, 180 (a, 24).]—**Orangefarbener F.** The *Cantharellus aurantiacus*. [B, 180 (a, 24).]

FALTENSCHWAMM (Ger.), n. Fa^{3}lt'e^{2}n-shwa^{3}m. The genus *Merulius*.—**Tropfender F.** The *Merulius lacrimans*. [B, 180 (a, 24).]

FALTER (Hind.), n. The *Borassus fabelliformis*. [B, 172 (a, 24).]

FALTRANC, FALTRANK, n's. Fa^{3}l'tra^{3}n^{2}k. See FALLTRANK.

FALTUNG (Ger.), n. Fa^{3}lt'un^2. A folding, a convolution.

FALX (Lat.), n. f. Fa^{2}lx(fa^{3}lx). Gen., *falc'is*. Fr., *f.* Ger., *Sichel*. Lit., a sickle or scythe; any structure of that shape.—**F. cerebelli.** Fr., *f. du cervelet*. Ger., *Kleinhirnsichel*. A vertical partition formed by the duplication of the inner layer of the dura which passes down between the hemispheres of the cerebellum. It is continuous with the middle of the posterior border of the tentorium, and is attached to the internal occipital crest of the occipital bone, as far as the foramen magnum, where it divides into two folds. [L, 142.]—**F. cerebri.** Fr., *f. du cerveau*. Ger., *Grosshirnsichel*. The falciform process of the dura which separates the hemispheres of the cerebrum. It is attached anteriorly to the crista galli, posteriorly to the surface of the tentorium. At its upper margin it divides so as to form part of the wall of the superior longitudinal sinus, and at its free border it divides to inclose the inferior longitudinal sinus. [I, 6 (K).]—**F. du cerveau** (Fr.). See *F. cerebri*.—**F. du cervelet** (Fr.). See TENTORIUM *cerebelli* and *F. cerebelli*.—**F. magna (cerebri), F. major.** See *F. cerebri*.—**F. messoria.** See *F. cerebri*.—**F. minor.** See *F. cerebelli*.—**F. parva.** See *F. cerebelli*.—**F. peritonæi maxima.** Fr., *grande faux du péritoine* (ou *de la veine ombilicale*). The broad, falciform, or suspensory ligaments of the liver. [a, 29.]—**F. transversalis.** See TENTORIUM *cerebelli*.—**Great longitudinal f., Large f.** See *F. cerebri*.—**Lesser f. of the peritonæum.** Fr., *petites faux du péritoine*. The lateral ligaments of the liver and the peritoneal folds covering the umbilical arteries. [A, 301.]—**Lesser longitudinal f.** See *F. cerebelli*.

FALZ (Ger.), n. Fa^{3}ltz. A fold or groove. [J.]—**Nagelf'.** The groove of skin in which the nails are inserted. [J.]

FAME-FLOWER, n. Fam'flu^5-u^4-u^{5}r. The *Talnum teretifolium*. [B, 275 (a, 24).]

FAMELICUS (Lat.), adj. Fa^{2}m(fa^{3}m)-e^{2}l(al)'i^{2}k-u^{3}s(u^{4}s). From *fames*, hunger. Gr., βουλιμῶν. Ger., *hungerleidend*. Famished, affected with bulimia; as a n., in the f., *famelica* (*febris* understood), an old name for a form of fever characterized by excessive hunger. [A, 322.]

FAMES (Lat.), n. f. Fam(fa^{3}m)'ez(as). Gen., *fam'is*. See HUNGER.—**F. bovina, F. canina, F. lupina.** See BULIMIA.

FAMILIA (Lat.), n. f. Fa^{2}m(fa^{3}m)-i^{2}l'i^2-a^3. See FAMILY.

FAMILIAL (Fr.), adj. Fa^3-me-le-a^{3}l. Peculiar to or characteristic of a family (said of certain traits of character or physique). [Longuet, "Union méd.," May 18, 1884 (D).]

FAMILLE (Fr.), n. Fa^3-mel-y'. Ger., *Familie*. See FAMILY.—**F. pleureuse.** The *Agaricus hariolorum*. [B, 121 (a, 24).]

FAMILY, n. Fa^{2}m'i^2-li^2. Gr., οἰκία. Lat., *familia*. Fr., *famille*. Ger., *Familie*. It., Sp., *familia*. 1. A collective term for the persons of an individual household or for the descendants of given ancestors. 2. A group of genera more or less allied. [a, 24.] 3. As an adj. (Lat., *familiaris*; Fr., *familial*), pertaining or peculiar to a certain f., hereditary.

FAN, n. Fa^{2}n. Lat., *vannus*. Fr., *éventail* (1st def.). Ger., *Fächer* (1st def.). 1. An implement for cooling the person by creating currents of air by its motion. 2. The *Fagus silvatica*. [B, 121, 173 (a, 24).]—**Astigmatic f.** Fr., *éventail astigmatique*. Ger., *astigmatischer Fächer*. A semicircular plane figure with lines radiating from the centre of the base line like the ribs of a fan; used in testing for astigmatism. [F.]—**F.-flower of Tasmania.** The *Scævola cuneiformis*. [B, 275 (a, 24).]—**F.-nerved.** Of leaves or insects' wings, having the nervures arranged in the form of an open f. [L, 56.]—**F.-palm.** See the major list.—**F.-shaped.** Of a leaf, plaited like a f. [B, 19 (a, 24).]—**Red-Sea f.** The *Coralleria reticulata plana purpurescens*. [B, 307 (a, 24).]

FANABREGOU, n. In Languedoc. The *Celtis australis*. [B, 121 (a, 24).]

FANCIULLACCIA (It.), n. Fa^{3}n-chi^2-ul-la^{3}t'chi^2-a^3. The *Nigella damascena*. [B, 121 (a, 24).]

FANCY, n. Fa^{2}n'si^2. The *Viola tricolor*. [B, 275 (a, 24).]

FANDRAMANA, n. In Madagascar, the *Catha fasciculata*. [B, 121 (a, 24).]

FANDUKA (Hind.), n. The nuts of *Aleurites triloba*. [A, 479 (a, 21).]

FANE, n. Fan. The white flower-de-luce. [A, 505 (a, 21).]

FANFARIZOULIÉ, n. The *Celtis australis*. [B, 121 (a, 24).]

FANG, n. Fa²n². Ger., *F.* 1. A sharp-pointed tooth. [L.]—2. The root of a tooth. [C.]—**Poison-f's.** Fr., *dents* (ou *crochets*) *à venin.* In venomous serpents, two teeth in the upper jaw, one on each side, usually of considerable length, curved backward, and having their bases over or adjacent to the poison-glands. They contain the excretory ducts of these glands, either in canals or longitudinal fissures, which terminate near the f's' points. [L, 14; a, 17.]—**Reserve f's.** The rudimentary or developed f's found in the mucous sheath of the poison-f's of serpents, which take the place of the latter when they are shed. [L, 14.]—**Venom-f's.** See *Poison-f's.* [L, 14, i, p. 398; "Proc. of the Zool. Soc.," 1864, p. 156.]

FANGABIUM (Ar.), n. The *Tussilago farfara.* [B, 92 (a, 14).]

FANGHAME, n. In Madagascar, the *Euphorbia pirifolia.* [L, 49.]

FANGSCHWANZ (Ger.), n. Fa³n²'shwa³ntz. A prehensile tail. [L.]

FANKE-SO (Jap.), n. The *Pinellia tuberifera.* ["Proc. of the Am. Pharm. Assoc.," xxviii (a, 14).]

FANNA IKADE, n. In Japan, the *Helwingia japonica.* [B, 121 (a, 24).]

FANNON, n. In the Mauritius, the *Stachychrysum pterospermum.* [B, 121 (a, 24).]

FANON (Fr.), n. Fa³-no²n². Lat., *pannus, ferula.* Ger., *Fahne.* 1. A coaptation-splint for the thigh or leg. 2. A fold of linen interposed between the splint and a fractured limb. 3. A baleen-plate. 4. Any fan-like structure or appendage (*e. g.*, the tuft of hair growing behind the fetlock of a horse or the fold of loose skin on the inferior surface of a cow's neck). [E; L, 43, 87 (a, 14), 216, 321.]—**Faux f.** See *F.* (2d def.).

FANONIER (Fr.), adj. Fa³-no-ne-a. Pertaining to the fanon in horses; as a n., in the pl., of Lafosse, the inferior lumbrici muscles of the horse. [A, 385.]

FAN-PALM, n. Fa²n'pa³m. Any palm with fan-shaped leaves (*e. g.*, *Sabal* and *Thrinax*). [B, 275, 282 (a, 24).]—**Dwarf f.-p.** The *Chamærops humilis.* [B, 275 (a, 24).]—**Great f.-p.** The *Borassus flabelliformis* and *Corypha umbraculifera.* [B, 275 (a, 24).]—**Jamaica f.-p.** The *Sabal blackburniana* and *Sabal umbraculifera.* [B, 275 (a, 24).]—**Nepal f.-p.** The *Chamærops excelsa.* [B, 275 (a, 24).]—**New-South-Wales f.-p.** The *Livistonia australis.* [B, 275 (a, 24).]

FAN-PO-LO-MIE (Chin.), n. The pine-apple (*Ananas sativus*). [B, 88 (a, 14).]

FANTASIA, n. In Turkey (in the *lingua franca* employed in commerce), the voluptuous stupor produced by hasheesh. [L, 77 (a, 14).]

FANTÔME (Fr.), n. Fa³n²-tom. See Phantom and Manikin.

FAN-YACIN (Chin.), n. The *Carica papaya.* [B, 88 (a, 14).]

FAOU (Fr.), n. Fa³-u. The *Fagus silvatica.* [B, 121, 173 (a, 24).]

FAOUTERNO, n. In Provence, the genus *Aristolochia.* [B, 121 (a, 24).]

FAPES, n. Faps. The fruit of *Ribes grossularia.* [A, 505 (a, 21).]

FAR (Lat.), n. n. Fa³r. Gen., *far'ris.* An old name for barley, also for grain or coarse meal. [A, 318; B, 121 (a, 24).]

FARABREGUIÉ (Fr.), n. Fa³-ra³-bre²-ge-a. The *Celtis australis.* [B, 121 (a, 24).]

FARACH, n. The *Bauhinia acuminata* and *Acacia heterocarpa.* [B, 121 (a, 24).]

FARAD, n. Fa²r'a²d. From the name *Faraday.* The unit of electrical capacity. Symbol Φ. [L, 87 (a, 27); "Nature," June 25, 1885, p. 187 (B).]

FARADAIC, adj. Fa²r-a³-da'i²k. Fr., *faradique.* Discovered by or relating to Faraday; pertaining to the induced electrical current. [E.]

FARADAISM, n. Fa²r'a³-da-i²zm. See Faradism.

FARADAYIN, n. Fa²r'a³-da-i²n. An oily liquid; according to Gregory, a camphene, boiling at 33° C., of the sp. gr. 0·654, found in caoutchouc. [Himly (B, 2).]

FARADIC, adj. Fa²r'a³-di²k. See Faradaic.

FARADISM, n. Fa²r'a²d-i²z'm. Fr., *faradisme.* Ger., *Faradismus.* 1. The induced electrical current. 2. See Faradization.

FARADIZATION, n's. Fa²r-a²d-i²z-a'shu³n. Fr., *faradisation.* Ger., *Faradisation.* It., *faradizzazione.* Sp., *faradización.* The employment of the induced electrical current.—**General f.** Fr., *faradisation généralisée.* The methodical f. of the general surface of the body, beginning with the back and ending with the neck and head, one electrode being usually applied to the feet. [L, 87, (a, 27).]

FARARIA (Lat.), n. f. Fa(fa³)-ra(ra³)'ri²-a³. The genus *Scrophularia.* [B, 180 (a, 24).]—**Radix fararlæ.** The root of *Scrophularia nodosa.* [B, 180 (a, 24).]

FARBENSINN (Ger.), n. Fa³rb'e²n-zi²n. See Color-*sense.*—**F'centrum.** See *Color*-centre.

FARA-UFARFARA, n. A species of *Acacia* cultivated in Egypt. The wood is employed for fumigation in certain diseases. [Forskål (B, 88 [a, 14]).]

FARBE (Ger.), n. Fa³rb'e². See Color.—**Einfache F'n.** See *Simple* colors.—**Eisenf'.** Iron-color, iron-gray. [a, 14.]—**F'beere.** The fruit of *Rhamnus cathartica.* [B, 180 (a, 24).]—**F'beerstrauch.** The *Rhamnus cathartica.* [B, 180 (a, 24).]—**F'distel.** The *Serratula tinctoria.* [L, 80.]—**F'bild.** The spectrum. [L, 80.]—**F'nblindheit.** See *Color*-blindness.—**F'nbogen.** The iris. [a, 29.]—**F'nempfindung.** Color sensation. [J, 40, 176.]—**F'nhören.** See *Color*-hearing.—**F'ninduction.** See Color-*induction.*—**F'nlehre.** See Chromatography. [L, 80.]—**F'nmachend.** See Colorific.—**F'nmessung.** See Chromatometry.—**F'nringe.** See *Newton's* rings.—**F'nscheu.** See Chromatophobia.—**F'nsehen.** See Chromatopsia.—**F'nsinn.** See the major list.—**F'nspiel.** A play of colors. [L, 80.]—**F'nunterscheidungsvermögen.** The ability to distinguish colors. [L, 135.]—**F'nzerstreuung.** The dispersion of colored rays. [B.]—**F'stoff.** See Farbstoff.—**Komplementäre F'n.** See *Complementary* colors.—**Zusammengesetzte F'n.** See *Compound* colors.

FÄRBEKRAUT (Ger.), n. Farb'e²-kra³-u⁴t. The *Genista tinctoria.* [B, 180 (a, 24).]—**Rothes ägyptisches F.** The *Lawsonia alba.* [B, 180 (a, 24).]

FÄRBELACK (Ger.), n. Farb'e²-la³k. Lac-dye. [B.]

FÄRBER (Ger.), n. Farb'e²r. A dyer. [a, 14.]—**F'eiche.** The *Quercus infectoria.* [B, 180 (a, 24).]—**F'eichengallwespe.** The *Cynips gallæ tinctoriæ.* [B, 180 (a, 24).]—**F'flechte.** The *Roccella tinctoria.* [B, 92 (a, 14).]—**F'ginster.** The *Genista tinctoria.* [B, 180 (a, 24).]—**F'kamille.** See Anthemis *tinctoria.*—**F'knöterig.** The *Polygonum tinctorum.* [L, 80.]—**F'kraut.** The *Anchusa tinctoria.* [L. 43.]—**F'resede.** The *Reseda luteola.* [L, 80.]—**F'röthe.** The *Rubia tinctorum.* [B, 180 (a, 24).]—**F'safflor.** The *Carthamus tinctorius.* [B, 180 (a, 24).]—**F'scharte.** The *Serratula tinctoria* and *Genista tinctoria.* [B, 19, 180 (a, 24).]—**F'waid.** The *Isatis tinctoria.* [B, 180 (a, 24).]—**F'wan.** The *Reseda luteola.* [B, 180 (a, 27).]—**F'wurzel.** The *Rubia tinctorum.* [B, 180 (a, 24).]—**Rothe F'wurzel.** The root of *Rubia tinctorum.* [B, 180 (a, 24).]

FARBSTOFF (Ger.), n. Fa³rb'sto³f. A coloring matter, pigment, or dye. [L.]—**F'gährung.** The fermentation of pigments. [A, 396 (a, 21).]—**F'kugeln** [Leeuwenhoeck]. The red blood-corpuscles. [K, 13.]

FÄRBUNG (Ger.), n. Farb'un². Coloration, staining.

FARCIMEN (Lat.), n. n. Fa³r-si(ke)'me²n. Gen., *farcim'inis.* A sausage. [A, 318.]

FARCIMINALIS (Lat.), adj. Fa³r-si²m(kem)-i²n-a(a³)'li²s. From *farcire*, to stuff. See Allantoid.

FARCIMINOSUS (Lat.), adj. Fa³r-si²m(kem)-i²n-o'su³s(su⁴s). Pertaining to or affected with farcy. [A, 318.]

FARCIMINUM (Lat.), n. n. Fa³r-si²m(kem)'i²n-u³m(u⁴m). See Farcy.

FARCIN (Fr.), n. Fa³r-sa²n². See Farcy.

FARCINEUX (Fr.), adj. Fa³r-se-nu⁵. See Farcinous.

FARCINIÈRE (Fr.), n. Fa³r-se-ne-e²r. The *Potentilla verna.* [B, 121 (a, 24).]

FARCINOMA (Lat.), n. n. Fa³r-si²n(ki²n)-o'ma³. Gen., *farcinom'atos* (*-is*). Properly, a farcy-bud; as commonly used, a general term for farcy and glanders.

FARCINOUS, adj. Fa³r'si²n-u³s. Lat., *farciminosus.* Fr., *farcineux.* Pertaining to or affected with farcy. [A, 301.]

FARCTATE, adj. Fa³rk'tat. Lat., *farctus, fartus.* Stuffed, impacted; in botany, without vacuities. [L, 56.]

FARCTURA (Lat.), n. f. Fa³rk-tu²(tu)'ra². A stuffing, impaction, packing; in pharmacy, the stuffing of an exenterated animal or the empty rind of a fruit with medicinal substances. [L, 84.]

FARCTUS (Lat.), adj. Fa³rk'tu³s(tu⁴s). See Farctate.

FARCY, n. Fa³r'si². Gr., μᾶλις. Lat., *farciminum, malleus.* Fr., *farcin, morve farcineuse.* Ger., *Wurm.* It., *farcino, scabbia.* Sp., *lamparones.* A chronic form of glanders in which the lymphatic system and the skin are chiefly affected. [A, 301; D, 1.]—**F.-buds.** The tumors which occur in different parts of the body in f., which contain the poison of the disease. [D, 1.]—**F.-buttons.** F.-buds consisting of enlarged subcutaneous glands without involvement of the surrounding connective tissue. [D, 1.]—**F.-cord, F.-pipe.** An enlargement of a lymph-vessel due to f. [D, 1.]

FARD (Fr.), n. Fa³r. A pigment for the face. [a, 18.]—**F. blanc.** A white pigment, usually a mixture of bismuth subnitrate or zinc oxide and French chalk. [A, 385, 518.]—**F. de la Chine.** A cosmetic made from *Carthamus tinctorius* and talc. [B, 173 (a, 24).]—**F. noir.** A cosmetic in the form of a paste, powder, or pencil, having for its base lamp-black; used to blacken the eyelashes and eyebrows. [L, 49 (a, 21).]—**F. rouge.** See Rouge and *F. vermillon.*—**F. végétal.** See Rouge.—**F. vermillon.** Porphyrized cinnabar. [A, 385.]

FARDEAU (Fr.), n. Fa³r-do. An old name for the placenta. [A, 301.]

FARDEL-BOUND, n. Fa³r'de²l-bu⁵-u⁴nd. Syn.: *maw-bound, stomach-staggers, lakeburn.* Of the veterinarians, distension of the omasum of ruminants with undigested food, accompanied by inflammation of the abomasum. [L, 297.]

FARDING-BAG, n. Fa³rd'i²n²-ba²g. See Rumen.

FARE, n. In Madagascar, the sugar-cane. [B, 121 (a, 24).]

FAREI, n. In Abyssina, the *Bauhinia acuminata.* [B, 46, 88 (a, 14).]

FARENTIT, n. The *Dracunculus loa.* [Niebuhr (L, 17).]

FARE-NUT, n. Fa²r'nu³t. The *Bunium flexuosum.* [B, 275 (a, 24).]

FAREWELL-SUMMER, n. Fa²r-we²l'su³m'u⁵r. The *Saponaria officinalis* and some species of *Aster.* [B, 275 (a, 24).]

FARFARA (Lat.), n. f. Fa^{3}r'fa^{3}r-a^3. The *Tussilago f.* [B, 121 (α, 24).]—**Conserva farfaræ** [Pal. Disp., 1764, Wirt. Ph., 1798]. Fr., *conserve de pas-d'âne.* A preparation made by beating together 1 part of flowers of *Tussilago f.* and 2 parts of white sugar; used in catarrhal cough. [B, 97 (α, 21).]

FARFARACCIA (It.), n. The *Petasites vulgaris.* [B, 121 (α, 24).]

FARFARUS (Lat.), n. m. Fa^{3}r'fa^{3}r-u^{3}s(u^{4}s). 1. The *Tussilago farfara.* [A, 318.] 2. The *Populus alba.* [L, 94 (α, 21).]

FARFERA (Lat.), n. f. Fa^{3}r'fe^{2}r-a^3. See FARFARA.

FARFIZUN, n. In Bombay, euphorbium. ["Proc. of the Am. Pharm. Assoc.," xxviii (α, 14).]

FARFUGIUM (Lat.), n. n. Fa^{3}r-fu^{2}j(fu^{4}g)'i^2-u^{3}m. 1. The genus *Senecio.* 2. See FARFARA. [B, 121 (α, 24).]

FARIDBUTI (Hind. and Beng.), n. The *Cocculus villosus.* [B, 172 (α, 24).]

FARIGOULE (Fr.), n. Fa^3-re-gul. The *Thymus tenuifolius.* [B, 173 (α, 24).]

FARINA (Lat.), n. f. Fa^{2}r(fa^{3}r)-i(e)'na^3. Gr., ἄλφιτον. Fr., *farine.* Ger., *Mehlstaub.* 1. Meal, flour, or any like powder. 2. Of Marsitius, the spores of *Fungi.* [B, 121 (α, 24).]—**Animal f.** Fr., *farine animale.* An article of food consisting of fish reduced to powder and mixed with pine-bark. [L, 41 (α, 21).]—**Calcined f.** See DEXTRIN.—**Cataplasma farinarum resolventium.** Sp., *cataplasma de harinas resolutivas* [Sp. Ph.]. A preparation made by mixing 4 parts of farinæ resolventes with a sufficiency of hot water to make a soft mass, and adding while warm 1 part of unguentum colophonii pallidum. [B, 95 (α, 14).]—**F. avenacea.** See AVENÆ *f.*—**Farinæ emollientes** [Belg. Ph.]. A powder of 4 parts each of flaxseed and althæa-root and 1 part each of malva-leaves and tops of *Melilotus officinalis.* [B, 95 (α, 21).]—**F. fœcundus.** Pollen. [B, 1 (α, 24).]—**F. fossilis.** See *Mineral* AGARIC.—**F. lactea.** See FARINE *lactée.*—**F. leguminosarum.** See *F.* FABÆ. **Farinæ resolventes.** Fr., *farines émollientes* (ou *résolutives*). Sp., *harinas resolutivas* [Sp. Ph.]. A mixture of equal parts of the flour of beans, *Ervi ervilia*, barley, and rye. [B, 95.]—**F. secalina.** Rye-meal. [B, 180 (α, 24).]—**Farinæ solventes.** See *Farinæ resolventes.*—**Fossil f.** See *Mineral* AGARIC.

FARINACCIO (It.), n. Fa^{3}r-en-a^{3}t'chi^2-o. The *Chenopodium album* and the *Amanita ovoidea.* [B, 121 (α, 24).]

FARINACEOUS, adj. Fa^{2}r-i^{2}n-a'shu^{3}s. Gr., ἀλφιτώδης. Lat., *farinaceus* (from *farina*, flour). Fr., *farinacé.* Ger., *mehlartig, mehlstaubartig.* It., *farinaceo.* Sp., *farináceo.* 1. Containing or consisting of farina, mealy. [B, 7, 123, 291 (α, 24); α, 30.] 2. Of desquamation, having a mealy appearance. [G.]

FARINALIS (Lat.), adj. Fa^{2}r(fa^{3}r)-i^{2}n-a(a^3)'li^{2}s. Fr., *farinal.* Of insects, nourished on farina. [L, 116.]

FARINE (Fr.), n. Fa^3-ren. See FARINA.—**F. de montagne.** See *Mineral* AGARIC.—**F. d'Hercule.** An old name for the *Erysimum officinale.*—**F's émollientes.** See FARINÆ *resolventes.*—**F. fossile.** See *Mineral* AGARIC.—**F. jaune.** Indian-corn meal. [L, 41 (α, 21).]—**F. lactée.** A powder made of condensed and desiccated milk, bread dried by heat, and sugar. [A, 385.]—**F. minérale.** A mineral reduced to very fine powder. [L, 41 (α, 21).]—**F's résolutives.** See FARINÆ *resolventes.*—**Fleur de f.** A very pure, fine quality of wheaten flour. [L, 41 (α, 21).]

FARINEUX (Fr.), adj. Fa^3-re-nu^6. See FARINOSE.

FARINIERS (Fr.), n. Fa^3-re-ne-e^{2}r. The *Amanita ovoidea.* [B, 121 (α, 24).]—**F. à collet.** Of Paulet, a term for certain agarics. [B, 121 (α, 24).]

FARINOSE, n. Fa^{2}r'i^{2}n-os. Starch cellulose, the material composing the wall of the starch granule. [B, 3.]

FARINOSE, FARINOUS, adj's. Fa^{2}r'i^{2}n-os, -u^{3}s. Lat., *farinosus* (from *farina*, flour). Fr., *farineux.* Ger., *mehlig, mehlstaubig.* Mealy, farinaceous. [B, 1, 123, 291 (α, 24).]

FARKLE-BERRY, n. Fa^{3}r'k'l-be^{2}r-i^2. The *Vaccinium arboreum.* [B, 275 (α, 24).]

FARMERS'-PLAGUE, n. Fa^{3}rm-u^{5}rz-plag'. The *Ægopodium podagraria.* [A, 505 (α, 21).]

FARN, n. Fa^{3}rn. The *Pteris aquilina.* [A, 505 (α, 21).]

FARN (Ger.), n. Fa^{3}rn. See FERN.—**F'extract.** See *Oleoresina* ASPIDII and *Extractum filicis.*—**F'kraut.** See the major list. —**F'wurzel.** See *Rhizoma* FILICIS.—**Haarf', Krullf'.** See ADIANTUM *capillus Veneris.*—**Milzf'.** See ASPLENIUM.—**Saumf'.** See ADIANTUM.—**Streiferf', Strichf'.** See ASPLENIUM.

FARNBÜHL (Ger.), n. Fa^{3}rn'bu^{6}l. A place in the canton of Lucerne, Switzerland, where there are warm and cold springs containing sulphur, iron, etc. [A, 319 (α, 21); L, 49.]

FARNKRAUT (Ger.), n. Fa^{3}rn'kra^3-u^{4}t. See ASPIDIUM: In the pl., *Farnkräuter*, the *Filices.* [B, 180 (α, 24).]—**F'lichen.** See ASPLENIUM *filix fœmina.*—**F'männchen.** See ASPIDIUM *filix mas.* —**F'weibchen.** See ASPLENIUM *filix fœmina.*—**F. wurzel.** See *Rhizoma* FILICIS.—**Weibliches F.** See ASPLENIUM *filix fœmina.* —**Männliches F.** See ASPIDIUM *filix mas.*

FARO (Fr.), n. Fa^3-ro. A kind of beer made in Belgium.

FAROBA, n. The pulp of the fruit of the *Hymenæa courbaril.* [B, 121 (α, 24).]

FAROLES (Sp.), n. Fa^3-ro'las. In Chili, the *Campanula medium.* [B, 121 (α, 24).]

FAROLILLOS (Sp.), n. Fa^3-ro-lel'yos. The *Cardiospermum halicacabum.* [B, 121 (α, 24).]

FAROUCH (Fr.), n. Fa^3-rush. The *Trifolium incarnatum.* [B, 173 (α, 24).]

FARRÃO (Port.), n. Fa^{3}r-ro^{2}n^2'. The *Arum esculentum.* [B, 121 (α, 24).]

FARRENKRAUT (Ger.), n. Fa^{3}r're^{2}n-kra^3-u^{4}t. See FARNKRAUT.

FARREUS (Lat.), adj. Fa^{3}r're^2-u^{3}s(u^{4}s). From *far*, meal. Fr., *teigneux.* Scurfy (said of the urine when it deposits a branny sediment). [L, 116.]

FARRIER, n. Fa^{2}r'i^2-u^{5}r. A veterinary surgeon.

FARRIERY, n. Fa^{2}r'i^2-e^{2}r-i^2. The veterinary art.

FARSETIA (Lat.), n. f. Fa^{3}r-se(sa)'shi^2(ti^2)-a^3. A genus of the *Cruciferæ*, closely allied to *Lunaria.* [B, 121 (α, 24).] Cf. ALYSSON (3d def.).—**F. clypeata.** An Eastern species now naturalized in southern Europe and considered as the ἄλυσσον of Dioscorides, which was used in the treatment of hydrophobia and in skin diseases. [B, 121, 128, 180 (α, 24).]

FAR-SIGHTED, adj. Fa^{3}r-sit'e^{2}d. See HYPERMETROPIC.

FAR-SIGHTEDNESS, n. Fa^{3}r-sit'e^{2}d-ne^{2}s. See HYPERMETROPIA.

FARU-JURI (Jap.), n. The *Fritillaria Thunbergii* and the *Uvularia cirrhosa.* ["Proc. of the Am. Pharm. Assoc.," xxviii (α, 14).]

FARTHING-ROT, n. Fa^{3}rth^2'i^{2}n^2-ro^{2}t. The *Hydrocotyle vulgaris.* [A, 505 (α, 21).]

FARWAR (Hind.), n. The *Cassia auriculata.* [P. T. Mootoo-swamy, "Indian Med. Gaz.," Jan., 1887, p. 3.]

FASAY, n. In Morocco, African ammoniacum. [B, 18 (α, 24).]
